Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

2002 NAICS code	Geographic area and kind of business	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
		Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

See footnotes at end of table.

Table 10. Statistics for All U.S. Firms by Kind of Business for Metropolitan and Micropolitan Statistical Areas: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area and industry in which they operate. This table is based on the 2002 North American Industry Classification System (NAICS). For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For definition of metropolitan and micropolitan statistical areas, see Appendix E]

2002 NAICS code	Geographic area and kind of business	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
		Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

[1]All firms data include both firms with paid employees and firms with no paid employees.
[2]For explanation of relative standard errors, see Reliability of Estimates in the introductory text.
[3]Data do not include crop and animal production (NAICS 111, 112).
[4]Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.
[5]Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).
[6]Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Appendix C.

Table 11. **Statistics for All U.S. Firms by County: 2002**

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 11. **Statistics for All U.S. Firms by County: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

[1]All firms data include both firms with paid employees and firms with no paid employees.
[2]For explanation of relative standard errors, see Reliability of Estimates in the introductory text.

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Appendix C.

Table 12. **Statistics for All U.S. Firms by Place: 2002**

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

See footnotes at end of table.

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

Table 12. **Statistics for All U.S. Firms by Place: 2002**—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each geographic area in which they operate, but only once in the state totals. For information on geographic area coding, confidentiality protection, and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A. For information on geographic areas, see Appendix D]

Geographic area	All firms[1]		Firms with paid employees				Relative standard error of estimate (percent)[2] for column—					
	Firms (number)	Sales and receipts ($1,000)	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)

[1]All firms data include both firms with paid employees and firms with no paid employees.
[2]For explanation of relative standard errors, see Reliability of Estimates in the introductory text.

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Appendix C.

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 13. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, and Gender: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

[1]All firms data include both firms with paid employees and firms with no paid employees.
[2]For explanation of relative standard errors, see Reliability of Estimates in the introductory text.
[3]Data do not include crop and animal production (NAICS 111, 112).
[4]Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.
[5]Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).
[6]Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Appendix C.

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 14. Statistics for All U.S. Firms by Kind of Business, Receipts Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with paid employees and firms with no paid employees. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

[1]All firms data include both firms with paid employees and firms with no paid employees.
[2]For explanation of relative standard errors, see Reliability of Estimates in the introductory text.
[3]Data do not include crop and animal production (NAICS 111, 112).
[4]Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.
[5]Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).
[6]Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Appendix C.

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, and gender	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, and gender	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

See footnotes at end of table.

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, and gender	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, and gender	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

See footnotes at end of table.

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

Table 15. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, and Gender: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

[1]For explanation of relative standard errors, see Reliability of Estimates in the introductory text.
[2]Data do not include crop and animal production (NAICS 111, 112).
[3]Data do not include large certificated passenger carriers that report to the Office of Airline Information, U.S. Department of Transportation. Railroad transportation and U.S. Postal Service are out of scope for the 2002 Economic Census.
[4]Data do not include funds, trusts, and other financial vehicles (NAICS 525), except real estate investment trusts (NAICS 525930).
[5]Data do not include religious, grantmaking, civic, professional, and similar organizations (NAICS 813) and private households (NAICS 814).

Note: To maintain confidentiality, the Census Bureau suppresses data to protect the identity of any business or individual. The census results in this table contain nonsampling errors. Data users who create their own estimates using data from this table should cite the Census Bureau as the source of the original data only. For the full technical documentation, see Appendix C.

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

See footnotes at end of table.

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

See footnotes at end of table.

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

See footnotes at end of table.

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

See footnotes at end of table.

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—

Table 16. Statistics for All U.S. Firms With Paid Employees by Kind of Business, Employment Size of Firm, Hispanic or Latino Origin, and Race: 2002—Con.

[Includes firms with payroll at any time during 2002. Employment reflects the number of paid employees during the March 12 pay period. The U.S. totals are based on the 2002 Economic Census, whereas the gender, Hispanic or Latino origin, and race estimates are based on the 2002 Survey of Business Owners (see Appendix C for information on survey methodology and sampling error). Detail may not add to total because a Hispanic or Latino firm may be of any race. Moreover, each owner had the option of selecting more than one race and therefore is included in each race selected. Firms with more than one domestic establishment are counted in each industry in which they operate, but only once in the U.S. total. This table is based on the 2002 North American Industry Classification System (NAICS). For information on confidentiality protection and the meaning of abbreviations and symbols, see introductory text. For explanation of terms, see Appendix A]

2002 NAICS code	Kind of business, employment size, Hispanic or Latino origin, and race	Firms (number)	Sales and receipts ($1,000)	Employees (number)	Annual payroll ($1,000)	Relative standard error of estimate (percent)[1] for column—
