
Characteristics of New Housing

Index of Housing Characteristic Tables

Table Page

Characteristics of New One-Family Houses Completed

Presence of Air Conditioning 4
Number of Bathrooms 20
Number of Bedrooms 36
Number of Bedrooms by Number of Bathrooms 52
Type of Construction Method 92
Principal Type of Exterior Wall Material 100
Secondary Type of Exterior Wall Material 128
Secondary Wall Material by Brick Primary Wall Material 136
Secondary Wall Material by Wood Primary Wall Material 144
Secondary Wall Material by Stucco Primary Wall Material 152
Secondary Wall Material by Vinyl Siding Primary Wall Material 160
Secondary Wall Material by Aluminum Primary Wall Material 168
Secondary Wall Material by 'Other' Primary Wall Material 176
Number of Fireplaces 184
Type of Foundation 200
Type of Heating Fuel 216
Heating Fuel by Type of Heating System 232
Type of Heating System 248
Median and Average Square Feet by Location 264
Median and Average Square Feet by Type of Financing 268
Presence of Outdoor Features 272
Type of Parking Facility 284
Square Feet of Floor Area 300
Number of Stories 316

Characteristics of Units in New Multi-Family Buildings Completed

Number of Floors 332
Units per Building . . . . . Not yet available
Presence of Air Conditioning 336
Type of Heating Fuel 340
Presence of Heat Pump 344
Number of Bathrooms 348
Number of Bedrooms 353
Square Foot Ranges 358
Design Type 362
Presence of Fireplace 365

Characteristics of New Multi-Family Buildings Completed

Number of Floors 368
Units per Building 372
Presence of Air Conditioning 376
Type of Heating Fuel 380
Presence of Heat Pump 384
Presence of Fireplace 388
Construction Method 391

Characteristics of New One-Family Houses Sold

Presence of Air Conditioning 394
Number of Bathrooms 403
Number of Bedrooms 412
Number of Bedrooms by Number of Bathrooms 421
Closing Costs Included . . . . . Not yet available
Principal Type of Exterior Wall Material 430
Secondary Type of Exterior Wall Material 442
Secondary Wall Material by Brick Primary Wall Material 454
Secondary Wall Material by Wood Primary Wall Material 457
Secondary Wall Material by Stucco Primary Wall Material 460
Secondary Wall Material by Vinyl Siding Primary Wall Material 463
Secondary Wall Material by Aluminum Primary Wall Material 466
Secondary Wall Material by 'Other' Primary Wall Material 469
Number of Fireplaces 472
Type of Financing . . . . . Not yet available
Type of Foundation 481
Type of Heating Fuel 490
Heating Fuel by Type of Heating System 499
Type of Heating System 511
Lot Size 520
Design Type 533
Type of Parking Facility 534
Price per Square Foot 543
Median and Average Price Per Square Foot 553
Median and Average Sales Price . . . . . Not yet available
Square Feet Range 556
Median and Average Square Feet 566
Number of Stories 569

Characteristics of New Contractor Built Houses Started

Contract Price Range 578
Median and Average Contract Price 581
Contract Price per Square Foot Range 582
Median and Average Contract Price per Square Foot 583

Presence of Air-Conditioning in New One-Family Houses Completed

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

RSE	2	9	18	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

[2]Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

[2]Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Number of Bathrooms in New One-Family Houses Completed: Owner-Built[1]

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

[2]Includes 2 1/2 bathrooms or more for years 1986 and earlier.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

RSE	2	18	6	5	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.
[2]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.
[2]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.
[2]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.
[2]Includes panelized and precut units.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

RSE	2	43	24	9	27	38	23	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Principal Type of Exterior Wall Material of New One-Family Houses Completed: Built for Sale[1]

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.
[2]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.
[2]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

RSE	10	53	28	17	40	69	30	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.
[2]Includes cinder block, stone, fiber cement, and other types. Data prior to 1992 include vinyl siding.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.
[2]Includes cinder block, stone, fiber cement, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Secondary Type of Exterior Wall Material of New One-Family Houses Completed: Owner-Built[1]

S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

[2]Includes cinder block, stone, fiber cement, and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

Secondary Type of Exterior Wall Material of New One-Family Houses Completed With Primary Exterior Wall Material of Vinyl Siding: Contractor-Built[1]

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

[1]Includes cinder block, stone, fiber cement, and other types.
[2]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.
[3]Includes cinder block, stone, fiber cement, and other types that are different from the primary type of "other" material.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

RSE	2	6	4	10	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

1"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

1"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

1"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

RSE	2	28	9	17	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]Includes wood, coal, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

[2]Includes wood, coal, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

[2]Includes wood, coal, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

[2]Includes wood, coal, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]Includes wood, coal, solar and other types.
[2]Includes both air source and geothermal (ground source) versions.
[3]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

[2]Includes wood, coal, solar and other types.

[3]Includes both air source and geothermal (ground source) versions.

[4]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

Type of Heating Fuel Used in New One-Family Houses Completed
By Type of Heating System: Contractor-Built[1]

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

[2]Includes wood, coal, solar and other types.

[3]Includes both air source and geothermal (ground source) versions.

[4]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]Includes both air source and geothermal (ground source) versions.
[2]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

[2]Includes both air source and geothermal (ground source) versions.

[3]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

[2]Includes both air source and geothermal (ground source) versions.

[3]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

[2]Includes both air source and geothermal (ground source) versions.

[3]Includes electric baseboard, panel, radiant heat, space heater, floor or wall furnace, solar and other types.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[1]Data prior to 1992 include garages for 3 cars or more.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[2]Data prior to 1992 include garages for 3 cars or more.

Type of Parking Facility of New One-Family Houses Completed: Contractor-Built[1]

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[2]Data prior to 1992 include garages for 3 cars or more.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[2]Data prior to 1992 include garages for 3 cars or more.

Square Feet of Floor Area in New One-Family Houses Completed

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

RSE	2	14	9	5	5	7	6	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[1] Data prior to 1987 include 2,000 to 2,399 square feet.
[2] Data prior to 1977 include 3,000 or more square feet.

Square Feet of Floor Area in New One-Family Houses Completed: Built For Sale[1]

RSE	2	15	9	7	6	7	8	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1] "Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[2] Data prior to 1987 include 2,000 to 2,399 square feet.

[3] Data prior to 1977 include 3,000 or more square feet.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1] "Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[2] Data prior to 1987 include 2,000 to 2,399 square feet.
[3] Data prior to 1977 include 3,000 or more square feet.

Square Feet of Floor Area in New One-Family Houses Completed: Owner-Built[1]

(Components may not add to totals because of rounding. Percents computed from unrounded figures.)

Year	Number of houses (in thousands) by square feet							Percent distribution

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1] "Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

[2] Data prior to 1987 include 2,000 to 2,399 square feet.
[3] Data prior to 1977 include 3,000 or more square feet.

RSE	2	5	5	58	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1] Includes houses 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

RSE	2	5	6	61	(NA)	(NA)	(NA)	(NA)

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Built for Sale" are houses built with the intention of being sold with the sale of the land included in the transaction.
[2] Includes houses 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1]"Contractor-Built" houses are built for owner occupancy on the owner's land under the supervision of a general contractor.
[2] Includes houses 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Less than 500 units or less than 0.5 percent.

[1] "Owner-Built" houses are built for owner occupancy on the owner's land with the owner acting as the general contractor.
[2] Includes houses 1 1/2, 2 1/2, and 3 stories.

Note: Single-family estimates prior to 1999 include an upward adjustment of 3.3 percent made to account for structures built in permit-issuing areas without permit authorization.

- Represents zero. A Represents an RSE that is greater than or equal to 100 or could not be computed.
NA Not available. RSE Relative Standard Error.
S Withheld because estimate did not meet publication standards on the basis of response rate, associated standard error, or a consistency review.
Z Fewer than 500 units or less than 0.5 percent.

[1] Includes both air source and geothermal (ground source) versions.
