# Introduction

## HISTORY OF THE ECONOMIC CENSUS

Economic censuses were conducted in Puerto Rico beginning with a census of manufactures for 1909 and continuing at 10-year intervals through 1949, excepting 1929. Wholesale and retail trades and service industries were included as part of the economic censuses for 1939. Starting with 1949 through 1992, the censuses of wholesale and retail trades and service industries have been conducted concurrently with the census of manufactures. The census of construction industries has been included since 1967. Congress has authorized the economic censuses to be taken at 5-year intervals covering years ending in 2 and 7.

## USES OF THE CENSUS

The economic census provides essential information for government, business, industry, and the general public and is the primary source of facts about the structure and function of the economy. The census furnishes an important part of the framework for such composite measures as the net income and gross product of Puerto Rico. In forecasting and planning, censuses are especially useful in analyzing the gross product in terms of the transactions that determine its size and composition. The economic census also provides weights and a benchmark for indices of industrial production, productivity, and price, all of which are essential for understanding current economic developments.

Commonwealth and municipal governments use census data to assess business activities within their jurisdictions. The private sector uses the data to forecast general economic conditions; analyze sales performance; lay out sales territories; allocate funds for advertising; decide on locations for new plants, warehouses, or stores; and measure potential markets in terms of size, geographic areas, kinds of businesses, and kinds of products made or sold.

Following every census, thousands of businesses and other users purchase reports. Likewise, census facts are widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Census reports are available for sale by the Superintendent of Documents,

# Introducción

## HISTORIA DEL CENSO ECONOMICO

El censo de manufactura de 1909 marcó el comienzo del censo económico en Puerto Rico, que hasta 1949 se realizó a intervalos de 10 años exceptuando el año 1929. Las actividades del comercio al por mayor y al por menor, al igual que las de las industrias de servicios fueron incluidas como parte del censo económico de 1939. Por primera vez en 1949 hasta 1992, los censos de comercio al por mayor, comercio al por menor e industrias de servicios fueron tomados al mismo tiempo que el censo de manufactura. El censo de las industrias de construcción ha estado incluido desde 1967. El Congreso ha dado su autorización para que los censos económicos se realicen cada 5 años, cubriendo los años que terminan en 2 y 7.

## USOS DEL CENSO

El censo económico provee información esencial para el gobierno, el comercio, la industria y el público en general y es la fuente principal de datos acerca de la estructura y función de la economía. El censo proporciona una parte importante del sistema mediante el cual se preparan estimados compuestos, tales como el ingreso neto y el producto bruto de Puerto Rico. Los censos son particularmente útiles en las etapas de proyección y planificación, durante las cuales se analiza el producto bruto en términos de las transacciones que determinan su volumen y composición. El censo económico provee además las ponderaciones y las cifras de referencia que se utilizan en la elaboración de índices de precios, productividad y producción industrial, los cuales son esenciales para comprender el desarrollo económico actual.

Tanto el gobierno del Estado Libre Asociado como los gobiernos municipales utilizan los datos censales para evaluar las actividades comerciales que tienen lugar dentro de sus respectivas jurisdicciones. El sector privado emplea dichos datos para pronosticar la situación económica en general; analizar el volumen de ventas; determinar las regiones donde llevarán a cabo sus actividades comerciales; asignar fondos con fines publicitarios; determinar la localización de nuevas tiendas, plantas o almacenes; y medir mercados potenciales en lo que respecta a tamaño, áreas geográficas, clases de actividades comerciales y clases de productos vendidos o manufacturados.

Después de cada censo, miles de negocios y otros usuarios compran los resultados publicados por el censo. Asimismo, los resultados del censo son ampliamente difundidos por asociaciones mercantiles, diarios comerciales y periódicos. Dichos resultados se publican en una colección de tomos que pueden hallarse en la mayoría de las bibliotecas públicas y universitarias. Las publicaciones del censo están disponibles para la venta por medio del "Superintendent of Documents, U.S.

U.S. Government Printing Office, Washington, DC 20402.'' All 1992 data are available in electronic form from the Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300. Finally, the State data centers also are suppliers of economic census statistics.

## AUTHORITY

The 1992 Economic Census is authorized by an act of the U.S. Congress, Title 13, U.S. Code, Sections 131, 191, and 224, and by an act of the Legislature of the Commonwealth of Puerto Rico, Law No. 11, approved March 27, 1950. The census of 1992 covered manufacturing, construction industries, wholesale trade, retail trade, and service industries. The next economic census of Puerto Rico is scheduled to be taken in 1998 covering the year 1997.

## CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure, so this information may be released even though other information is withheld.

## COMPARABILITY OF DATA

The 1987 and 1992 Economic Censuses data were collected under similar conditions and procedures except:

**Nonemployer sampling.** In 1987, personal interviews were conducted to obtain data for a sample of nonemployer establishments engaged in retail trade and certain service industries. For 1992, data collection of nonemployer establishments was discontinued because of two factors: the increasing cost of data collection and the decreasing proportion of the economy which it represented. In 1987, nonemployer data represented approximately 5 percent of sales for retail and service establishments. Over three censuses, the proportion of sales made-up by nonemployers had declined at a rate of 2 percent every 5 years.

## SCOPE AND CLASSIFICATION

This report includes data from all employer establishments (establishments with payroll) primarily engaged in wholesale trade, retail trade, and service industries as defined in the *Standard Industrial Classification Manual: 1987*[1] (SIC). This is the system of industrial classification developed over a period of

[1] *Standard Industrial Classification Manual: 1987.* For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Stock No. 041-001-00314-2.

Government Printing Office, Washington, DC 20402.'' Todas las estadísticas correspondientes al año 1992 pueden obtenerse electrónicamente por medio de la División de Servicios a Usuarios, "Data User Services Division, Customer Services, Bureau of the Census, Washington, DC 20233-8300." Las estadísticas del censo económico también pueden obtenerse por medio de centros de datos censales.

## AUTORIZACION

El Censo Económico de 1992 es requerido por una ley del Congreso de los EE.UU.-secciones 131, 191 y 224, título 13 del Código de los EE.UU.-y por la Ley No.11 de la Legislatura del Estado Libre Asociado de Puerto Rico, que fuera aprobada el 27 de marzo de 1950. El Censo Económico de 1992 abarcó las industrias de construcción, manufactura, comercio al por mayor, comercio al por menor y servicios. El próximo censo económico de Puerto Rico se llevará a cabo en 1998 a fin de cubrir el año 1997.

## REGLAS SOBRE DIVULGACION

De acuerdo con la ley federal que rige los informes censales, los datos que se publican no divulgan las operaciones de un establecimiento o negocio en particular. Sin embargo, el número de establecimientos clasificados bajo un tipo de negocio no constituye una divulgación, por lo tanto esta información puede ser publicada aunque otra información sea suprimida.

## COMPARABILIDAD ENTRE LOS DATOS

Los datos de los censos económicos de 1987 y 1992 se recopilaron bajo condiciones y procedimientos similares, excepto:

**Muestra de establecimientos sin empleados.** En 1987 se llevaron a cabo entrevistas personales para obtener información sobre los establecimientos sin empleados y que se dedicaban al comercio al por menor y a ciertas industrias de servicio. Para 1992 se dejó de recopilar información para estos establecimientos por dos razones: el alto costo de recopilar información y la pequeña proporción del sector de la economía que representaba dicha muestra. En 1987 los establecimientos que no tenían empleados representaban aproximadamente 5 por ciento de las ventas de los establecimientos que se dedicaban al comercio al por menor y a las industrias de servicios. Durante los tres últimos censos la proporción de las ventas de los establecimientos que no tenían empleados ha disminuido a razón de un 2 por ciento cada 5 años.

## ALCANCE Y CLASIFICACION

Este informe incluye los datos obtenidos de los establecimientos que tenían empleados (establecimientos con nómina) que se dedican principalmente al comercio al por mayor, comercio al por menor y las industrias de servicios, según están definidas en la edición de *Manual de Clasificación Industrial Uniforme: 1987*[1] (CIU). Este sistema de clasificación industrial ha sido desarrollado durante un período

years by experts on classification in government and private industry under the guidance of the Office of Management and Budget and is in general use among government agencies and organizations outside the government.

Establishments were classified on the basis of their self- designation, answers to questions on sales by commodity and merchandise lines, and other inquiries.

**Wholesale trade (SIC's 50 and 51).** Includes establishments primarily engaged in selling merchandise to retailers; industrial, commercial, institutional, farm, professional business users, or to other wholesalers; or in acting as agents or brokers in buying merchandise for or selling merchandise to such persons or companies. As in the past, wholesale firms without employees are excluded from the scope of the census.

**Retail trade (SIC's 52 to 59).** Includes establishments primarily engaged in selling merchandise for personal or household consumption, and rendering services incidental to the sale of the goods. Data for post exchanges, ship stores, and similar establishments operated on military posts by agencies of the Federal Government are not included.

**Service industries (SIC's 472; 70 to 79, except 702 and 704; 8072, 8111, 84, 871, 8731, 8732, and 8734; and 874).** Includes establishments primarily engaged in providing a wide variety of services to individuals, businesses, government establishments, and other organizations. In this report, hotel casinos, lottery agents, and horserace betting agencies, all controlled by the Commonwealth government, are included in the service statistics. However, data for all other establishments operated by the government are not included. Establishments engaged in the arrangement of passenger transportation (SIC 472) are included in service industries, although the SIC Manual classifies these establishments in SIC 47, Transportation Services.

Establishments identified by multi-establishment firms as ''central administrative offices'' or ''auxiliaries,'' whose primary functions were to manage, administer, service, or support the activities of other establishments of the company, were not within the scope of the 1992 Economic Census of Puerto Rico. Consequently, no data are published for them.

de años por expertos en clasificación en el gobierno y en la empresa privada, bajo la dirección de la Oficina de Administración y Presupuesto. El mismo es usado generalmente por agencias gubernamentales al igual que no gubernamentales.

Los establecimientos fueron clasificados a base de su autodesignación, respuestas a preguntas sobre ventas según las líneas de producto y mercancía y otras preguntas.

**El comercio al por mayor (CIU 50 y 51).** Incluye los establecimientos que se dedican principalmente a venderles mercancía a detallistas, a usuarios del sector industrial, comercial, institucional, agrícola o profesional o a otros mayoristas; o los que se dedican a servir como agentes comerciales en la compra o venta de mercancía a tales personas o compañías. Como en años anteriores, los establecimientos de comercio al por mayor que no tienen empleados son excluidos del alcance del censo.

**El comercio al por menor (CIU 52 a 59).** Incluye los establecimientos que se dedican principalmente a la venta de mercancía para el consumo personal o familiar y al suministro de servicios relacionados con la venta de la mercancía. No están incluidos los datos que conciernen a los puestos comerciales, las tiendas del servicio naval y establecimientos similares a éstos que están localizados en bases militares y de cuyo funcionamiento se encargan las agencias del gobierno federal.

**Las industrias de servicios (CIU 472; 70 a 79, con la excepción de la 702 y la 704; 8072, 8111, 84, 871, 8731, 8732 y 8734; y 874).** Incluyen los establecimientos que se dedican principalmente a proporcionar una extensa variedad de servicios a individuos, negocios, establecimientos del gobierno y otras organizaciones. En este informe, los casinos hoteleros, los agentes de la lotería y las agencias hípicas que no están localizadas en el mismo hipódromo, los cuales son todos controlados por el gobierno del Estado Libre Asociado, están incluidos en las estadísticas correspondientes a servicios. Sin embargo, las estadísticas no incluyen los datos que conciernen a todos los otros establecimientos operados por el gobierno. Los establecimientos que se dedican a la tramitación del transporte de pasajeros (CIU 472) están incluidos en las industrias de servicios aunque el Manual de CIU clasifica a estos establecimientos bajo la CIU 47, Servicios de Transporte.

Los establecimientos que fueron identificados por firmas con establecimientos múltiples como ''oficinas centrales administrativas'' o "auxiliares," cuyas funciones principales eran las de dirigir, administrar, servir o apoyar las actividades de los otros establecimientos de la misma compañía, no formaron parte de la cobertura del Censo Económico de Puerto Rico de 1992. Por consiguiente, los datos sobre estos establecimientos no son publicados.

## ESTABLISHMENT BASIS OF REPORTING

The economic census is conducted on an establishment basis. A company operating establishments at more than one location is required to submit a report for each location. Companies engaged in distinctly different lines of activity at one location are required to submit separate reports if records permit such a separation and if the activities are substantial in size. Each census report was tabulated according to the physical location at which the activity was conducted. All establishments employing one person or more at any time during the census year are included.

## EL ESTABLECIMIENTO COMO BASE INFORMATIVA

El censo económico se realiza a base de establecimientos. A toda compañía que administre establecimientos en más de una localidad se le pide que someta un informe por cada una de las localidades. A las compañías que se dedican a varias actividades completamente distintas en una misma localidad, se les pide que rindan informes por separado, si los récords del establecimiento permiten tal separación y si las actividades en sí son cuantiosas. Cada informe del censo fue tabulado de acuerdo a la localización física en que se condujo la actividad. Todos los establecimientos que emplearon a una o más personas en algún momento durante el año censal están incluidos en el censo.

## REPORT FORM

The censuses of wholesale trade, retail trade, and service industries were conducted as part of the economic census which included construction and manufacture industries. One form was used to enumerate all in scope economic activity. The report form was divided into sections and each section contained questions appropriate to the trade or industry. Response was required by law. A facsimile of the report form, which was available in English as well as Spanish, is presented in appendix B.

## CUESTIONARIO CENSAL

Los censos de comercio al por mayor, comercio al por menor y las industrias de servicio fueron realizados como parte del censo económico que incluyó las industrias de construcción y manufactura. Se utilizó un cuestionario para enumerar todas las actividades económicas que estaban dentro del alcance del censo. El cuestionario se dividió en partes, cada parte contenía preguntas específicas a un tipo de industria o actividad comercial. El responder al cuestionario fue requerido por ley. El apéndice B, presenta un facsímil del cuestionario que estaba disponible en inglés y español.

## GEOGRAPHIC AREAS COVERED

Data from the 1992 Economic Censuses of wholesale trade, retail trade, and service industries have been tabulated for nine commercial regions, and the legally constituted units (municipios) into which Puerto Rico is divided. A commercial region is an entity delineated by the Puerto Rico Department of Commerce. Each commercial region is named after the principal municipio in the area. A municipio is entirely included in a commercial region; it does not cross boundaries to form part of any broader geographic area.

## AREAS GEOGRAFICAS CUBIERTAS

Los datos de los Censos de comercio al por mayor, comercio al por menor y las industrias de servicio de 1992 han sido tabulados según las nueve regiones comerciales y las unidades políticas legalmente constituidas (municipios) en las que Puerto Rico está dividido. Una región comercial es una entidad delineada por el Departamento de Comercio de Puerto Rico. Cada región comercial lleva el nombre del municipio principal en el área. El municipio entero queda dentro de la región comercial; el mismo no traspasa los límites de la región comercial para formar parte de ninguna área geográfica más extensa.

## DATA PROCESSING

Forms were mailed to all wholesale trade, retail trade, and service industries firms subject to payment of Federal Insurance Contributions Act (FICA) taxes (i.e., employers of one person or more) and classified as being within the scope of the census. The forms and instructions for completing them were mailed from the Census Bureau's Data Preparation Division in Jeffersonville, IN.

The completed questionnaires were returned by mail to Jeffersonville. Contact with respondents about overdue report forms, was undertaken by the Census Bureau's area office, a temporary facility located in Hato Rey, Puerto Rico.

## ELABORACION DE LOS DATOS

Se le enviaron cuestionarios por correo a todas las compañías de comercio al por mayor, comercio al por menor y servicios que están sujetas al pago de contribuciones bajo la Ley de Seguro Social Federal (FICA), (por ejemplo, compañías que emplean a una o más personas) y las cuales se clasificaron dentro del alcance del censo. El cuestionario y las instrucciones para completarlo fueron enviados por correo desde la División de Elaboración de Datos de la Oficina del Censo en Jeffersonville, IN.

Una vez completados, los cuestionarios se enviaban por correo a Jeffersonville. La comunicación con los establecimientos cuyos cuestionarios estaban retrasados, estuvo a cargo de la oficina de área del Negociado del Censo, localizada temporeramente en Hato Rey, Puerto Rico.

The returned reports underwent extensive review and computer processing. All reports were geographically coded, data-keyed, and edited. The editing process identified records with significant problems and referred them for correction resolution. Corrections were performed interactively using standard procedures.

The data were then tabulated by SIC, subjected to further data analysis, and the resulting corrections applied to individual computer records. Corrected tabulations were then produced for the final published reports.

## RELIABILITY OF DATA

Census questionnaires were sent to all known wholesale trade, retail trade, and service industry employers and, therefore, are not subject to sampling variability. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; inability or unwillingness on the part of respondents to provide correct information; definition and classification difficulties, response errors and bias; errors in collection or processing; misinterpretation of questions; and other errors of recording; keying; and estimation for missing or misreported data.

The accuracy of these tabulated data is influenced by the joint effects of the various nonsampling errors. Explicit measures of the effects of these nonsampling errors are not available. However, it is believed that most of the important operational and response errors were detected and corrected through systematic clerical edits, automated data edits, and an analyst review.

For total nonresponse cases (report forms not returned), the establishments' administrative records information was used in conjunction with industry averages to estimate the basic data. For item nonresponse, missing items were estimated based on response to other items and/or administrative records and in direct relationships to sales or receipts. It is assumed that characteristics of establishments not responding to a particular inquiry are the same as establishments with equal sales or receipts in the same category (publication table line) that did respond to the inquiry.

If estimation of the data on the basis of total sales or receipts was not appropriate, another basic data item was used. In a few tables, data are available only from establishments that completed the appropriate inquiries on the report form. Any biases introduced by the estimation and correction procedures are believed to be small.

Los cuestionarios devueltos fueron sometidos a una revisión y elaboración extensa. Todos los cuestionarios fueron codificados geográficamente y sometidos a la digitación y crítica de sus datos. El proceso de crítica sirvió para identificar los récords que tenían problemas significativos y fueron referidos para corrección y revisión. Las correcciones se llevaron a cabo utilizando procedimientos uniformes.

Los datos fueron tabulados por CIU y sometidos a una revisión analítica, a partir de la cual se hicieron las correcciones necesarias a cada récord en la computadora. Por último, se produjeron las tabulaciones ya corregidas para la publicación de los informes finales.

## CONFIABILIDAD DE LOS DATOS

Los cuestionarios se enviaron a todos los patronos de establecimientos que se dedicaban al comercio al por mayor, comercio al por menor y las industrias de servicio y por lo tanto, no están sujetos a la variabilidad del muestreo. No obstante, los datos están sujetos a errores ajenos al muestreo. Los errores ajenos al muestreo pueden ocurrir por muchas razones: inabilidad para identificar todos los casos en el universo, inabilidad o renuencia de parte de los respondedores a proporcionar la información correcta, dificultades con las definiciones y clasificaciones, errores y sesgos en las respuestas, errores en la recopilación o procesamiento de los datos, mala interpretación de las preguntas y otros errores en el registro y digitación de los datos, y estimados que se utilizan para los récords sin respuestas o repuestas incorrectas.

La exactitud de los datos tabulados está influenciada por el conjunto de efectos que tienen los diversos errores ajenos al muestreo. No existen medidas explícitas de los efectos que tienen dichos errores. Sin embargo, se estima que la mayoría de los errores importantes de ejecución y respuesta fueron hallados y corregidos mediante los procedimientos sistemáticos de la crítica manual, crítica electrónica y revisión de los datos por parte de analistas.

En el caso de los récords sin respuestas (cuestionarios no devueltos), se usó la información administrativa del establecimiento conjuntamente con los promedios industriales para estimar los datos básicos. Las preguntas individuales sin respuestas (preguntas dejadas en blanco) se estimaron en base a las respuestas a otras preguntas y/o en base a los récords administrativos del establecimiento y en relación a las ventas o ingresos. Se asume que las características de los establecimientos que no responden a una pregunta en particular, son iguales a los establecimientos que tienen las mismas ventas o ingresos en la misma categoría (línea en la tabla de publicación) que respondió a dicha pregunta.

Si la estimación de los datos a base del total de ventas o ingresos no resultó apropiado, otros datos básicos fueron utilizados. En algunas tablas los datos están disponibles para los establecimientos que contestaron las preguntas apropiadas en el cuestionario. Se cree que los sesgos que se puedan deber a la estimación o a los procedimientos de corrección son mínimos.

# Appendix A.
# **Explanation of Terms**

**Number of establishments.** Includes all establishments in operation at any time during the year. It covers all full- and part-year operations. An establishment is not necessarily identical with a company or enterprise, which may consist of one or more establishments. Census figures represent a summary of reports for individual establishments rather than companies.

**Annual payroll.** Payroll includes all forms of compensation, such as salaries, wages, commissions, bonuses, vacation allowances, sick-leave pay, and value of payments-in-kind (e.g., free meals and lodging) paid during the year to all employees. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compe nsation of proprietors and partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, and other withholdings. This definition of payroll is the same as that used by the Internal Revenue Service (IRS) for form 941PR.

**First quarter payroll.** This item consists of payroll, as defined above, paid to persons employed at any time during the quarter from January to March 1992.

**Paid employees.** Paid employees consists of the number of employees (both full- and part-time), including salaried officers and executives of corporations, who were on the payroll in the pay period which included March 12, 1992. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. This definition of paid employees is the same as that used on IRS form 941PR.

**Proprietors and partners, working.** Includes proprietors and partners of unincorporated busine sses who worked 15 hours or more during the week which included March 12, 1992.

**Unpaid family workers.** Includes all unpaid family members who worked 15 hours or more during the week which included March 12, 1992.

# Apéndice A.
# **Explicación de los Términos**

**Número de establecimientos.** Comprende todos los establecimientos que estuvieron activos durante cualquier período del año. Cubre todas las operaciones que duraron el año entero al igual que aquellas que duraron parte del año. Un establecimiento no es necesariamente idéntico a una compañía o empresa, la cual podría tener uno o más establecimientos. Las estadísticas del censo representan un resumen de los informes individuales de cada establecimiento y no de las compañías.

**Nómina.** La nómina incluye todo tipo de compensación, como por ejemplo, salarios, sueldos, comisiones, bonificaciones, pagos por vacaciones, enfermedad y el equivalente en efectivo de pagos en especie (tales como comidas gratuitas y alojamiento), pagadas durante el año a todos los empleados. Para las corporaciones, la nómina incluye las cantidades pagadas a los oficiales y ejecutivos. Si el establecimiento no es una corporación, la nómina excluye los beneficios y compensaciones pagadas a los propietarios y socios. La cantidad de la nómina de sueldos se declara sin restar los pagos por seguro social, contribuciones sobre ingresos, primas de seguro, cuotas de sindicatos y otros ajustes. La definición de nómina que se presenta es la misma que empleó el Servicio de Rentas Internas (IRS) en el formulario 941PR.

**Nómina del primer trimestre.** Esta cifra consta de la nómina, según se define anteriormente, pagada a personas empleadas en cualquier momento durante el trimestre de enero a marzo de 1992.

**Empleados.** Comprende el número de empleados (de jornada completa o parcial), incluyendo oficiales asalariados y ejecutivos de corporaciones quienes estuvieron en la nómina durante el período de pago que incluyó el 12 de marzo de 1992. Están incluidos aquellos empleados a quienes se les pagaron días feriados, o los días libres tomados como vacaciones o días de enfermedad; no se incluyen los propietarios y socios de negocios no incorporados. La definición de empleados que se presenta es la misma que empleó el Servicio de Rentas Internas (IRS) en el formulario 941PR.

**Propietarios y socios que trabajan.** Comprende propietarios y socios de negocios que no están incorporados quienes trabajaron 15 horas o más durante la semana que incluyó el 12 de marzo de 1992.

**Familiares no remunerados.** Comprende todos los familiares que trabajaron sin sueldo 15 horas o más durante la semana que incluyó el 12 de marzo de 1992.

**Sales and receipts.** Sales and receipts include sales of merchandise, receipts for repairs and other services to customers, and delivery charges whether or not payment was received in 1992. Sales and receipts are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Sales and receipts include income from business activities classified in a major category other than the one assigned to the establishment; e.g., wholesalers may have receipts from sales at retail, and, similarly, retailers may have receipts from sales at wholesale.

Sales and receipts do not include carrying or other credit charges; commissions from vending machine operations; or nonoperating income from such sources as investments, rental or sale of real estate; nor wholesale and retail sales or service receipts made by construction or manufacturing establishments.

The receipts of horserace betting agencies and lottery agencies consist of the sum of the net receipts of all agencies that operated in Puerto Rico during 1992. Net receipts are that part of the total receipts retained by the horserace or betting agency as a commission for doing business for the racetrack or for selling lottery tickets. Reporting of receipts on this basis was first instituted in 1972.

The following terms apply only to wholesale trade:

**Operating expenses.** Operating expenses include payroll as well as other overhead expenses of the establishment and the prorated share of any general office expense. They do not include the cost of merchandise for sale, income and excise taxes, or withdrawals by owners or part owners of unincorporated businesses.

**Inventories, end of year.** Inventories consist of stock of merchandise for sale at the end of the year. Inventories are reported on an ownership basis; all merchandise owned by reporting establishments are included, even though some may be held by others for sale on consignment.

**Class-of-customer.** Class-of-customer sales of all wholesale establishments are reported by the following types of customers to whom the sales were made:

- **Farmers.** Includes sales to farmers for use in agricultural production rather than personal consumption.
- **Builders and contractors.** Includes sales to contractors, builders, and applicators for use in construction rather than for resale.

**Ventas e Ingresos.** Las ventas e ingresos incluyen las ventas de mercancía, los ingresos por concepto de reparaciones y otros servicios prestados a clientes, y los cargos por entrega de la mercancía, hubiérase recibido o no el pago durante 1992. Las ventas e ingresos son netos después de restarse los reembolsos y hacerse los ajustes necesarios por la devolución de mercancía. Mercancía entregada como pago parcial en la compra de mercancía nueva no se resta del total de ventas. Las ventas e ingresos incluyen los ingresos obtenidos de las actividades comerciales que están clasificadas bajo una categoría principal diferente a la que se le asigna al establecimiento; por ejemplo, los mayoristas pueden recibir ingresos de ventas al por menor y, en forma similar, los detallistas pueden recibir ingresos de ventas al por mayor.

Las ventas e ingresos no incluyen los intereses o cargos por concesión de crédito; comisiones obtenidas de las operaciones relacionadas con las máquinas que venden cigarrillos, dulces, etc.; ni ingreso no operativo obtenido de fuentes tales como inversiones, alquiler o venta de bienes raíces; tampoco incluyen los ingresos de los servicios prestados ni los ingresos de las ventas realizadas al por mayor o al por menor por los establecimientos de construcción o manufactura.

Los ingresos de las agencias hípicas y agencias de la lotería son la suma de los ingresos netos de todas las agencias que estuvieron activas en Puerto Rico durante 1992. Los ingresos netos representan aquella porción del total de los ingresos que la agencia de lotería o de apuestas retuvo como comisión por servir al hipódromo o por vender billetes de la lotería. La declaración de estos ingresos de esta forma se instituyó por primera vez en 1972.

Los siguientes términos son pertinentes únicamente cuando se trata del comercio al por mayor:

**Gastos de operación.** Los gastos de operación incluyen las nóminas de sueldos, al igual que otros gastos generales de los establecimientos y la proporción a prorrata de cualquier gasto general de oficina. Esto no incluye el costo de la mercancía para la venta, los impuestos sobre ingresos y mercancía o el dinero retirado por los propietarios o socios de negocios no incorporados.

**Inventarios a fin de año.** Los inventarios constan del surtido de mercancía que esté disponible para la venta al finalizar el año. Los inventarios se declaran en base a la propiedad; se incluye toda mercancía que sea propiedad de los establecimientos informantes, aunque parte de la mercancía esté en manos de otros para ser vendida a consignación.

**Clase de cliente.** Las ventas según la clase de cliente para todos los establecimientos de comercio al por mayor, son declaradas por los siguientes tipos de clientes:

- **Agricultores.** Esta clasificación incluye las ventas a agricultores que utilizan los productos para la producción agrícola y no para consumo personal.
- **Trabajadores de construcción y contratistas.** Esta clasificación incluye las ventas a contratistas, trabajadores de construcción y aplicadores que utilizan los productos para la construcción y no para la reventa.

- **Export sales.** Includes sales made to buyers outside Puerto Rico.

- **Retailers and repair shops.** Includes sales to retailers of all types (retail chain organizations, independent stores, department stores, etc.) who normally buy for resale to home consumers. Includes also sales to all types of repair shops.

- **Other wholesale organizations.** Includes sales to organizations that normally purchase for resale at wholesale, including sales to purchasers who buy for resale to industrial, institutional, and similar users. Sales made through agents and brokers selling on the account of others are also included in this category.

- **Household and individual users.** Includes sales to individuals for personal consumption.

- **Institutional, commercial, and professional users.** Includes sales to commercial, professional, and institutional users. Also included are sales to laboratories, service businesses, public utilities, restaurants, food processors, and other business concerns that normally buy for business use rather than for resale.

- **Industrial users.** Includes sales to industrial users for use in manufacturing, mining, and other industrial activities.

- **Governmental bodies.** Includes sales to the Federal Government (including the military, post exchanges, General Services Administration, Government Printing Office, and similar federal agencies) and to the Commonwealth and local governments.

**Employment by activity.** Employees of all wholesale establishments are classified in the following categories according to their principal activity for the pay period including March 12.

- **Selling employees.** Includes employees primarily engaged in selling merchandise and services both from the business location and from outside the business location (such as traveling salesmen).

- **Sales support employees.** Includes employees engaged in office and clerical work servicing the business location such as billing clerks, secretaries, payroll clerks, and so forth. Includes also employees engaged in warehousing activities for the business location.

- **Ventas de exportación.** Esta clasificación incluye las ventas hechas a compradores que no residen en Puerto Rico.

- **Minoristas y talleres de reparaciones.** Esta clasificación incluye las ventas a minoristas de todas clases (cadenas de minoristas, tiendas independientes, tiendas por departamento, etc.) quienes por lo regular compran mercancía para revenderla a consumidores domésticos. También se incluyen las ventas a todo tipo de taller de reparación.

- **Otras organizaciones mayoristas.** Esta categoría incluye las ventas a organizaciones que por lo regular compran mercancía para revenderla al por mayor, inclusive las ventas a compradores que revenden la mercancía a usuarios industriales, usuarios de colectividades y otros similares. Las ventas realizadas por mediación de agentes y corredores que venden a cuenta de otros también se incluyen en esta categoría.

- **Usuarios domésticos e individuales.** Esta categoría incluye las ventas a individuos que utilizan la mercancía para consumo personal.

- **Usuarios de colectividades, comerciales y profesionales.** Esta categoría incluye las ventas a usuarios de colectividades y usuarios comerciales y profesionales. También incluye las ventas a laboratorios, empresas de servicios públicos, restaurantes, empresas para la elaboración de alimentos y otras empresas que por lo regular compran los productos para uso propio y no para la reventa.

- **Usuarios industriales.** Esta categoría incluye las ventas a usuarios industriales para manufactura, minería y otras actividades industriales.

- **Dependencias gubernamentales.** Esta categoría incluye las ventas al gobierno federal (incluyendo al ejército, comisarías militares, la Administración de Servicios Generales, la Oficina de Imprenta y otras agencias federales similares), así como también incluye las ventas a gobiernos estatales y locales.

**Empleo según la actividad.** Los empleados de todos los establecimientos de comercio al por mayor han sido clasificados en las siguientes categorías de acuerdo a las actividades que desempeñaron durante el período de pago que incluyó el 12 de marzo.

- **Vendedores.** Esta categoría incluye a los empleados que se dedican principalmente a vender mercancía y servicios tanto desde el lugar donde está ubicado el establecimiento como desde fuera del establecimiento (tales como los vendedores viajantes).

- **Empleados de apoyo.** Esta categoría incluye a los empleados que trabajan para el establecimiento principalmente como oficinistas, facturadores, secretarias, cajeros pagadores de nómina y así sucesivamente. También incluye a los empleados que se dedican principalmente al trabajo de almacén del establecimiento.

- **Auxiliary employees.** Includes employees primarily engaged in various management, accounting, clerical, warehousing, and other services for other company establishments. It also includes corporate officers unless primarily engaged in sales activities.

- **Manufacturing employees.** Includes employees primarily engaged in the manufacture of products.

- **Other types of employees.** Includes all other types of employees such as janitors, mechanics, and truck drivers not included in the categories above.

The following terms apply to SIC 701 in service industries:

**Guest rooms (hotels).** Guest rooms consist of the number of rooms that can be rented as separate units. In tables that present data for both hotels and motels, this term, when associated with motels, motor hotels, tourist villas, and paradores refers to ''rental units.'' (See explanation below.) Suites of rooms that cannot be subdivided are counted as a single unit. The number of guest rooms as of December 31, 1992, was tabulated only for establishments in business at the end of the year.

**Rental units (motels, tourist villas, and paradores).** Rental units consist of rooms, apartments, cabin units, and other types of lodging accommodations normally rented as a single unit. The number of rental units was tabulated only for establishments in business at the end of the year.

## KIND-OF-BUSINESS CLASSIFICATIONS—WHOLESALE TRADE

Wholesale trade, major groups 50 and 51 in the 1987 SIC Manual, includes establishments primarily engaged in selling merchandise to retailers; to industrial, commercial, institutional, farm, or professional business users; or to other wholesalers; or acting as agents or brokers in buying merchandise for or selling merchandise to such persons or companies. Establishments primarily engaged in the wholesale distribution of used products are classified on the basis of the products sold.

Establishments primarily engaged in selling merchandise to contractors are included in wholesale trade, with the exception of lumber yards and paint, glass, and wallpaper stores. These exceptions are classified in retail trade if they sell to the general public and are known as ''retail'' in the trade, even if a higher proportion of their sales is made to contractors.

- **Empleados auxiliares.** Esta categoría incluye a los empleados que se dedican principalmente a prestar varios servicios, tales como servicios de gerencia, contabilidad, secretaría, almacenamiento y así sucesivamente, a otros establecimientos de la compañía. También incluye los ejecutivos de la empresa, a menos que estos se dediquen principalmente a las ventas.

- **Empleados de manufactura.** Esta categoría incluye a empleados que se dedican principalmente a la elaboración de productos.

- **Otros tipos de empleados.** Esta categoría incluye a todos los otros tipos de empleados, tales como conserjes, mecánicos, choferes de camiones y así sucesivamente, que no han sido incluidos en las categorías anteriores.

Los siguientes términos se aplican solamente al CIU 701 para industrias de servicios:

**Habitaciones para huéspedes (hoteles).** Las habitaciones para huéspedes consisten en el número de habitaciones que pueden ser alquiladas como unidades individuales. Este término se refiere a ''unidades de arriendo'' cuando aparece relacionado con moteles, villas turísticas y paradores en las tablas que proporcionan datos sobre hoteles y moteles. (Véase la explicación a continuación.) Las ''suites'' de habitaciones que no pueden ser subdivididas son contadas como una sola unidad. El número de habitaciones que habían el 31 de diciembre de 1992, fue tabulado únicamente para los establecimientos que estaban activos a fin de año.

**Unidades de arriendo (moteles, villas turísticas y paradores).** Las unidades de arriendo consisten de habitaciones, apartamentos, cabañas y otros tipos de alojamiento que por lo general se alquilan como una sola unidad. El número de unidades de arriendo fue tabulado únicamente para los establecimientos que estaban activos a fin de año.

## CLASIFICACIONES DE TIPO DE NEGOCIO—COMERCIO AL POR MAYOR

El comercio al por mayor, según los grupos principales 50 y 51 del Manual de CIU de 1987, incluye establecimientos que se dedican principalmente a la venta de mercancía a comerciantes detallistas; usuarios del sector industrial, comercial, institucional, agrícola o profesional; o a otros mayoristas; a la vez que incluye establecimientos que hacen las veces de agentes o corredores en la compra o venta de mercancía de tales personas o compañías. Los establecimientos que se dedican principalmente a la distribución al por mayor de productos usados son clasificados en base a los productos vendidos.

Los establecimientos que se dedican principalmente a vender mercancía a contratistas son considerados como establecimientos de comercio al por mayor, exceptuando las madererías y las tiendas de pintura, cristal y papel para empapelar paredes. Estas excepciones son clasificadas como establecimientos de comercio al por menor si venden sus productos al público en general y si se conocen como detallistas dentro de la profesión, aún cuando las ventas a contratistas representen la mayor parte del total de sus ventas.

Establishments covered by the census were assigned to a kind-of-business classification in accordance with the industry classifications defined in the 1987 SIC Manual. However, because of the low number of establishments in some industry groups, the kinds of business shown in this report are often limited to the three-digit SIC codes.

A los establecimientos abarcados por el censo se les clasificó según el tipo de negocio, conforme a las clasificaciones industriales definidas en el Manual de CIU de 1987. Sin embargo, debido a que algunos grupos industriales tienen muy pocos establecimientos, los tipos de negocios que aparecen en este informe suelen estar limitados a códigos de CIU de sólo tres dígitos.

Kind-of-business classifications are not interchangeable with commodity classifications because most businesses sell several kinds of commodities. The kind-of-business code assigned generally reflects either the individual commodity or the commodity group that is the primary source of the establishment's receipts, or some mixture of commodities which characterizes the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular commodity or the sales of that commodity. For example, the ''groceries and related products'' classification excludes establishments selling food if the sale of food is not the primary source of receipts; moreover, even though establishments are classified as ''groceries and related products,'' some of their receipts may be derived from the sale of nonfood products. Some indication of the extent to which commodities are handled by different kinds of business is given in the 1992 Economic Census of Puerto Rico, Subject Statistics report for Wholesale Trade and Retail Trade (OA92-E-2).

Las clasificaciones de tipo de negocio no pueden intercambiarse con las clasificaciones de la mercancía, porque la mayoría de los negocios venden varios tipos de mercancía. El código de tipo de negocio que se asigna generalmente refleja el producto individual o el grupo de productos que constituye la fuente principal de los ingresos del establecimiento, o alguna combinación de los productos que caracteriza el tipo de negocio al que se dedica el establecimiento. De este modo, la clasificación de los establecimientos, según el tipo de negocio, generalmente no permite determinar ni el número de establecimientos que venden un producto en particular ni la cantidad de ventas que tiene el producto. Por ejemplo, la clasificación de ''comestibles y productos relacionados'' excluye los establecimientos que venden alimentos si la venta de los mismos no es la fuente principal de sus ingresos; además aún cuando los establecimientos sean clasificados como "comestibles y productos relacionados," algunos de sus ingresos pueden derivarse de la venta de productos que no sean comestibles. El informe temático del Censo Económico de Puerto Rico de 1992 que trata sobre las industrias de comercio al por mayor y comercio al por menor (OA92-E-2) indica hasta cierto punto cuales son los productos que venden los diferentes tipos de negocios.

## TYPE-OF-OPERATION CLASSIFICATIONS

In addition to being classified by kind of business, each wholesale establishment was classified for the census by type of operation according to the ownership of the business, ownership of the goods sold, or character of the principal transactions. Establishments in wholesale trade are grouped into three major type-of-operation classifications:

**Merchant wholesalers.** Establishments primarily engaged in buying and selling merchandise on their own account. Included are such types of establishments as wholesale merchants or jobbers, industrial distributors, voluntary group wholesalers, exporters, importers, cash-and-carry wholesalers, retail cooperative warehouses, terminal and country grain elevators, farm products assemblers, wholesale cooperative associations, and petroleum bulk plants and terminals operated by non-refining companies.

**Manufactures' sales branches and offices.** Establishments maintained by manufacturing, refining, mining companies apart from their plants or mines for marketing their products at wholesale. Branch stores selling to household consumers and individual users are classified in retail trade. Sales branches and offices located at plants and administrative offices are included when separate records are available.

## CLASIFICACIONES DE TIPO DE OPERACION

Además de haberse clasificado por clase de negocio, cada establecimiento de comercio al por mayor también fue clasificado para el censo según el tipo de operación y de acuerdo al tipo de propiedad que fuera el negocio, el tipo de propiedad que fueran los artículos vendidos, o la naturaleza de las transacciones principales. Los establecimientos de comercio al por mayor se agrupan en tres clasificaciones principales de tipo de operación:

**Comerciantes mayoristas.** Establecimientos que se dedican principalmente a la compra y venta de mercancía por cuenta propia. Se incluyen tipos de establecimientos tales como comerciantes mayoristas o destajeros, distribuidores industriales, grupos voluntarios de mayoristas, exportadores, importadores, mayoristas que venden "cash and carry," almacenes cooperativos que venden al por menor, elevadores de grano utilizados en las terminales y en el campo, acaparadores de productos agrícolas, asociaciones cooperativas de comercio al por mayor, y terminales y depósitos de petróleo operados por compañías que no son refinerías de petróleo.

**Sucursales y oficinas de ventas de establecimientos manufactureros.** Establecimientos que las empresas manufactureras, refinerías o compañías mineras mantienen separados de las fábricas o minas, con el propósito de vender sus productos al por mayor. Las sucursales que le venden a consumidores domésticos y a usuarios individuales se clasifican como de comercio al por menor. Las sucursales y oficinas de ventas ubicadas en las fábricas y oficinas administrativas se incluyen cuando éstas mantienen sus propios registros aparte.

**Agents, brokers, and commission merchants.** Establishments whose operators are in business for themselves and are primarily engaged in selling or buying goods for others. Included are such types of operations as auction companies, import agents, export agents, sell agents, merchandise brokers, and commission merchants. The ''sales'' of agents, brokers, and commission merchants are the gross sales (or purchase) value of the goods in the transactions negotiated.

In this report data are shown separately for merchant wholesalers. Data for manufactures' sales branches and sales offices and for merchandise agents and brokers are combined and shown under ''Other operating types.''

**Agentes, corredores y vendedores a comisión.** Establecimientos cuyos comerciantes realizan negocios por cuenta propia y se dedican principalmente a la venta o compra de mercancía para terceros. Se incluyen operaciones tales como las de empresas subastadoras, agentes importadores, agentes exportadores, agentes vendedores, corredores y comerciantes a comisión. Las ''ventas'' de los agentes, corredores y comerciantes a comisión constituyen el valor bruto de venta (o de compra) de los artículos que implican las transacciones negociadas.

En este informe se presentan datos sobre los comerciantes mayoristas por separado. Los datos sobre las oficinas y sucursales de venta de establecimientos manufactureros, y sobre los corredores y agentes de mercancía, se combinan bajo la categoría "Otros tipos de mayoristas."

## KIND-OF-BUSINESS CLASSIFICATIONS—RETAIL TRADE

Retail trade, major groups 52 through 59 in the 1987 SIC Manual, includes establishments engaged in selling merchandise for personal or household consumption and in rendering services incidental to the sale of the goods. Exceptions are necessitated by trade practices. For example, lumber yards and paint, glass, and wallpaper stores are included in retail trade if they sell to the general public, even if a higher proportion of their sales is made to contractors. Establishments engaged in selling products to the general public from displayed merchandise, such as typewriters, stationery, or gasoline, are classified in retail trade even though such products may not be used for personal or household consumption. However, establishments that sell exclusively to business establishments, institutional and industrial users, or contractors are classified in wholesale trade.

Other important characteristics of retail trade establishments are that they are usually fixed places of business; they are engaged in activities to attract the general public to buy; they buy or receive as well as sell merchandise; they may process their products, although processing is incidental or subordinate to selling; and they are considered as "retail" in the trade. Not all of these characteristics need to be present and some are modified by trade practice.

Establishments covered by the census were assigned kind-of-business classifications in accordance with the industry classifications defined in the 1987 SIC Manual. However, because of the low number of establishments in some industry groups, the kinds of business shown in this report are often limited to the three-digit SIC codes. Retail establishments were generally classified according to the principal lines of merchandise sold (groceries, hardware, etc.), or the usual trade designation (drug store, cigar store, etc.).

## CLASIFICACIONES DE TIPO DE NEGOCIO—COMERCIO AL POR MENOR

El comercio al por menor, los grupos principales del 52 al 59 del Manual de CIU de 1987, incluye los establecimientos que se dedican a vender mercancía para consumo personal o familiar y a prestar los servicios relacionados con la venta de los artículos. Las excepciones a esta regla general se hacen necesarias debido a las prácticas en la industria. Por ejemplo, se incluyen en el comercio al por menor las tiendas que venden madera, pintura, cristal y papel para empapelar paredes, si las ventas están dirigidas al público en general, aún cuando las ventas a contratistas representen la mayor parte del total de ventas. Los establecimientos que se dedican a vender al público en general los productos de mercancía en exhibición, tales como maquinillas de escribir, papel y sobres para correspondencia o gasolina, se clasifican como de comercio al por menor aún cuando tales productos no se usen para consumo personal o familiar. Sin embargo, los establecimientos que venden mercancía exclusivamente a establecimientos comerciales, a usuarios institucionales e industriales, o a contratistas, se clasifican como de comercio al por mayor.

Otras características importantes de los establecimientos de comercio al por menor son las siguientes: tienen por lo general un lugar de negocio fijo; se dedican a actividades que incitan al público en general a comprar; compran o reciben y también venden mercancía; pueden elaborar sus productos; sin embargo, la elaboración es incidental y menos importante que la venta de los mismos y son considerados en la industria como establecimientos de comercio al por menor. No todas esta características tienen que estar presentes necesariamente y algunas son modificadas por las prácticas en la industria.

Se le asignaron clasificaciones de tipo de negocio a los establecimientos incluidos en el censo de acuerdo a las clasificaciones industriales definidas en el Manual de CIU de 1987. Sin embargo, debido al escaso número de establecimientos que tenían algunos tipos de negocios industriales, los tipos de negocios que se indican en este informe a menudo están limitados al código de CIU de sólo tres dígitos. Los establecimientos que se dedican al comercio al por menor generalmente fueron clasificados de acuerdo a las principales líneas de productos vendidos (comestibles, ferretería, etc.) o a la designación comercial usual (farmacia, tabaquería, etc.).

Kind-of-business classifications are not interchangeable with merchandise lines classifications; most businesses sell several kinds of merchandise. The kind-of-business code generally reflects either the individual merchandise or the merchandise line which is the primary source of the establishment's receipts, or some mixture of merchandise which characterizes the establishment's business. Thus, the classification of establishments by kind of business generally does not make it possible to determine either the number of establishments handling a particular merchandise or the sales of that merchandise. For example, the ''food stores'' classification excludes stores selling food if the sale of food is not the primary source of receipts; moreover, even though stores are classified as "food stores,'' some of their receipts may be derived from the sale of nonfood products. Some indication of the extent to which various broad groups of commodities, or ''merchandise lines,'' are characteristic of different kinds of business is given in the 1992 Economic Census of Puerto Rico Subject Statistics report for Wholesale Trade and Retail Trade (OA92-E-2).

Las clasificaciones de tipo de negocio no son intercambia bles con las clasificaciones de las líneas de mercancías; la mayoría de los negocios venden varias líneas de mercancías. El código de tipo de negocio generalmente refleja, ya sea la mercancía individual o el conjunto de mercancías que constituyen la fuente principal de los ingresos del establecimiento, o alguna combinación de mercancías que caracterizan la actividad comercial del establecimiento. Por lo tanto, la clasificación de establecimientos según el tipo de negocio generalmente no permite determinar ni el número de establecimientos que venden un producto en particular, ni el volumen de ventas de dicho producto. Por ejemplo, la clasificación ''tiendas de comestibles'' excluye las tiendas que venden alimentos, si la venta de éstos no constituye la fuente principal de los ingresos; por otra parte, aunque algunas tiendas se clasifican como ''tiendas de comestibles,'' parte de sus ingresos pueden derivarse de la venta de productos que no son alimentos. El informe temático del Censo Económico de Puerto Rico de 1992 que trata sobre las industrias de comercio al por mayor y comercio al por menor (OA92-E-2) indica hasta cierto punto los productos principales o líneas de mercancía que son vendidas por los diferentes tipos de negocio.

## KIND-OF-BUSINESS CLASSIFICATIONS—SERVICE INDUSTRIES

Service Industries, as defined in the 1987 SIC Manual, include establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned kind-of-business classifications in accordance with the industry classifications defined in the 1987 SIC Manual. When a more detailed classification was needed than that defined in the SIC Manual, more kinds of business were identified within an SIC code. However, because of the limited number of establishments in some industry groups within small geographic areas, the kinds of business shown in this report are often limited to the three-digit SIC codes.

## CLASIFICACIONES DE TIPO DE NEGOCIO—INDUSTRIAS DE SERVICIOS

La clasificación correspondiente a las industrias de servicios según la define el Manual de la CIU de 1987, incluye establecimientos que se dedican principalmente a prestar una amplia variedad de servicios a individuos y a establecimientos comerciales.

A cada establecimiento abarcado por el censo se le asignó una clasificación de tipo de negocio, de acuerdo a las clasificaciones industriales descritas en el Manual de CIU de 1987. Cuando fue necesario tener una clasificación más detallada que la del Manual de CIU, se identificaron más tipos de negocio dentro de la CIU correspondiente. Sin embargo, ya que algunos grupos industriales tienen un número limitado de establecimientos, los códigos de CIU de los tipos de negocio que se presentan en este informe suelen estar limitados a tres dígitos solamente.
