U.S. Census Bureau News Joint Release U.S. Department of Housing and Urban Development

U.S. Department of Commerce • Washington, D.C. 20233

FOR IMMEDIATE RELEASE WEDNESDAY, FEBRUARY 17, 2016 AT 8:30 A.M. EST

CB16-25

Raemeka Mayo or Stephen Cooper Economic Indicators Division (301) 763-5160

NEW RESIDENTIAL CONSTRUCTION IN JANUARY 2016

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for January 2016:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in January were at a seasonally adjusted annual rate of 1,202,000. This is 0.2 percent ($\pm 0.5\%$)* below the revised December rate of 1,204,000, but is 13.5 percent ($\pm 1.5\%$) above the January 2015 estimate of 1,059,000.

Single-family authorizations in January were at a rate of 720,000; this is 1.6 percent (\pm 1.0%) below the revised December figure of 732,000. Authorizations of units in buildings with five units or more were at a rate of 442,000 in January.

HOUSING STARTS

Privately-owned housing starts in January were at a seasonally adjusted annual rate of 1,099,000. This is 3.8 percent $(\pm 12.0\%)^*$ below the revised December estimate of 1,143,000, but is 1.8 percent $(\pm 13.5\%)^*$ above the January 2015 rate of 1,080,000.

Single-family housing starts in January were at a rate of 731,000; this is 3.9 percent $(\pm 10.5\%)^*$ below the revised December figure of 761,000. The January rate for units in buildings with five units or more was 354,000.

HOUSING COMPLETIONS

Privately-owned housing completions in January were at a seasonally adjusted annual rate of 1,057,000. This is 2.0 percent $(\pm 9.3\%)^*$ above the revised December estimate of 1,036,000 and is 8.4 percent $(\pm 13.2\%)^*$ above the January 2015 rate of 975,000.

Single-family housing completions in January were at a rate of 693,000; this is 1.4 percent $(\pm 10.2\%)^*$ below the revised December rate of 703,000. The January rate for units in buildings with five units or more was 351,000.

New Residential Construction data for February 2016 will be released on Wednesday, March 16, 2016, at 8:30 A.M. EDT. Our Internet site is: <u>http://www.census.gov/starts</u>

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 6 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised three percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
