NEW RESIDENTIAL CONSTRUCTION IN SEPTEMBER 2016

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for September 2016:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in September were at a seasonally adjusted annual rate of 1,225,000. This is 6.3 percent ($\pm 1.9\%$) above the revised August rate of 1,152,000 and is 8.5 percent ($\pm 2.4\%$) above the September 2015 estimate of 1,129,000.

Single-family authorizations in September were at a rate of 739,000; this is 0.4 percent $(\pm 1.6\%)^*$ above the revised August figure of 736,000. Authorizations of units in buildings with five units or more were at a rate of 449,000 in September.

HOUSING STARTS

Privately-owned housing starts in September were at a seasonally adjusted annual rate of 1,047,000. This is 9.0 percent ($\pm 9.2\%$)* below the revised August estimate of 1,150,000 and is 11.9 percent ($\pm 11.9\%$) below the September 2015 rate of 1,189,000.

Single-family housing starts in September were at a rate of 783,000; this is 8.1 percent (\pm 7.4%) above the revised August figure of 724,000. The September rate for units in buildings with five units or more was 250,000.

HOUSING COMPLETIONS

Privately-owned housing completions in September were at a seasonally adjusted annual rate of 951,000. This is 8.4 percent ($\pm 10.3\%$)* below the revised August estimate of 1,038,000 and is 5.8 percent ($\pm 13.4\%$)* below the September 2015 rate of 1,010,000.

Single-family housing completions in September were at a rate of 687,000; this is 8.8 percent $(\pm 9.8\%)$ * below the revised August rate of 753,000. The September rate for units in buildings with five units or more was 250,000.

New Residential Construction data for October 2016 will be released on Thursday, November 17, 2016, at 8:30 A.M. EST.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 6 months for total starts, and 6 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent (±3.2%) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

^{* 90%} confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.

⁽p) Preliminary. (r) Revised. RSE Relative standard error. S Does not meet publication standards because tests for identifiable and stable seasonality do not meet reliability standards.

Note: These data represent the number of housing units authorized in all months up to and including the last day of the reporting period and not started as of that date without regard to the months of original permit issuance. Cancelled, abandoned, expired, and revoked permits are excluded.

Z Relative standard error is less than 0.5 percent.

¹Average RSE for the latest 6-month period.

² Computed using unrounded data.

³ See the Explanatory Notes in the accompanying text for an explanation of 90% confidence intervals.
