# Introduction to the Economic Census

---

## PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public. Title 13 of the United States Code (Sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product estimates, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions. Specific uses of economic census data include the following:

- Policymaking agencies of the Federal Government use the data to monitor economic activity and assess the effectiveness of policies.
- State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.
- Trade associations study trends in their own and competing industries, which allows them to keep their members informed of market changes.
- Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

## INDUSTRY CLASSIFICATIONS

This report presents data classified according to both the 1987 Standard Industrial Classification (SIC) system, and 1997 North American Industry Classification System (NAICS). Most reports from the 1997 Economic Census present data based only on the NAICS.

## RELATIONSHIP TO NAICS

While many of the individual SIC industries correspond directly to industries as defined under the NAICS system, most of the higher level groupings do not. Particular care should be taken in comparing data for retail trade, wholesale trade, and manufacturing, which are sector titles used in both NAICS and SIC, but cover somewhat different

groups of industries. The industry definitions discuss the relationships between NAICS and SIC industries. Where changes are significant, it will not be possible to construct time series that include data for points both before and after 1997.

## BASIS OF REPORTING

The economic census is conducted on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, shop, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company.

## DOLLAR VALUES

All dollar values presented are expressed in current dollars; i.e., 1997 data are expressed in 1997 dollars, and 1992 data, in 1992 dollars. Consequently, when making comparisons with prior years, users of the data should consider the changes in prices that have occurred.

All dollar values are shown in thousands of dollars.

## AVAILABILITY OF ADDITIONAL DATA

### Reports in Print and Electronic Media

All results of the 1997 Economic Census are available on the Census Bureau Internet site ([www.census.gov](http://www.census.gov)) and on compact discs (CD-ROM) for sale by the Census Bureau. Unlike previous censuses, only selected highlights are published in printed reports. For more information, including a description of electronic and printed reports being issued, see the Internet site, or write to U.S. Census Bureau, Washington, DC 20233-8300, or call Customer Services at 301-457-4100.

### Special Tabulations

Special tabulations of data collected in the 1997 Economic Census may be obtained, depending on availability of time and personnel, in electronic or tabular form. The data will be summaries subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) that govern the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief of the division named below, U.S. Census Bureau, Washington, DC 20233-8300. To discuss a special tabulation before submitting specifications, call the appropriate division:

## HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1954, 1958, and 1963. Prior to that time, individual components of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for the 1840 Decennial Census and subsequent censuses to include mining and some commercial activities. The 1905 Manufactures Census was the first time a census was taken apart from the regular decennial population census. Censuses covering retail and wholesale trade and construction industries were added in 1930, as were some covering service trades in 1933. Censuses of construction, manufacturing, and the other business service censuses were suspended during World War II.

The 1954 Economic Census was the first census to be fully integrated: providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires.

The range of industries covered in the economic censuses expanded between 1967 and 1992. The census of construction industries began on a regular basis in 1967, and the scope of service industries, introduced in 1933, was broadened in 1967, 1977, and 1987. While a few transportation industries were covered as early as 1963, it was not until 1992 that the census broadened to include all of transportation, communications, and utilities. Also new for 1992 was coverage of financial, insurance, and real estate industries. With these additions, the economic census and the separate census of governments and census of agriculture collectively covered roughly 98 percent of all economic activity.

Printed statistical reports from the 1992 and earlier censuses provide historical figures for the study of

long-term time series and are available in some large libraries. All of the census reports printed since 1967 are still available for sale on microfiche from the Census Bureau. CD-ROMs issued from the 1987 and 1992 Economic Censuses contain databases including nearly all data published in print, plus additional statistics, such as ZIP Code statistics, published only on CD-ROM.

## SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1997 Economic Census and Related Statistics* at [www.census.gov/epcd/www/guide.html](http://www.census.gov/epcd/www/guide.html). # Core Business Statistics Series

---

## GENERAL

This report, from the 1997 Economic Census, is one of a series of four Core Business Statistics Series of reports, each of which cover all sectors in the economy. Other economic census reports are published sector by sector.

The first report, the Advance report, released in March 1999, presents advance data at the two- and three-digit North American Industry Classification System (NAICS) levels and at the trade area and two-digit Standard Industrial Classification System (SIC) levels for 1997. Those data are now superseded by later reports in this and other series.

The Comparative Statistics report, presents data at the division, two-, and three-, and four-digit SIC levels and selected six-digit SIC levels for the U.S. for 1997 and 1992, and at the division, two-, and selected three- and four-digit SIC levels for states for 1997 and 1992. This report presents statistics on the number of establishments; employment; payroll; and value of sales, receipts, revenue, or shipments for establishments with paid employees.

This report, the Bridge Between NAICS and SIC report, presents data for each six-digit NAICS industry and its six-digit SIC-Bridge components, and data for each four-digit SIC industry and its eight-digit NAICS-Bridge components. This report also includes statistics on the number of establishments; employment; payroll; and value of sales, receipts, revenue, or shipment for establishments with paid employees.

The Nonemployer Statistics report presents data at selected two- through six-digit NAICS levels for 1997. This report includes statistics on the number of establishments and the value of sales, receipts, or revenue for firms with no paid employees—entities excluded from the reports listed above and from other economic census publications.

## GEOGRAPHIC AREAS COVERED

Statistics are shown for the United States only.

## COMPARABILITY OF THE 1997 AND 1992 CENSUSES

The adoption of the NAICS has had a major impact on the comparability of data between the 1997 and 1992 censuses. This report outlines, in a detailed fashion, this comparability between the SIC and NAICS classification systems. A broad-based summary of each NAICS sector and its SIC components, as well as other NAICS sector-specific information are presented below:

**Accommodation and Foodservices.** The Accommodation and Foodservices sector (new) is comprised of hotels and other lodging places that were classified in SIC Division I, Services, and eating and drinking places and mobile foodservices that were classified in SIC Division G, Retail Trade.

**Administrative and Support and Waste Management and Remediation Services.** The Administrative and Support and Waste Management and Remediation Services sector (new) primarily includes administrative and business support establishments that were classified in SIC Division I, Services, and waste management establishments that were classified in SIC Division E, Transportation, Communications, and Utilities. Most establishments included in the Administrative and Support subsector were classified in SIC major group 73. Travel agencies and other arrangers of passenger transportation, part of SIC Division E, Transportation, Communications, and Utilities, are also included in this subsector. Most establishments included in the Waste Management and Remediation Services subsector were classified in SIC major groups 42 and 47. Note that landscaping services, although part of this sector, are not in scope of the 1997 Economic Census.

**Arts, Entertainment, and Recreation.** The Arts, Entertainment, and Recreation sector (new) primarily includes establishments that were classified in SIC Division I, Services. Most establishments included in this sector were included in SIC major groups 79 and 84. Authors, composers, and writers, part of SIC major group 89, are included in this sector. Marinas, part of SIC Division E, Transportation, Communications, and Utilities, and dinner theaters, part of SIC Division G, Retail Trade, are also included in this sector. Sports instruction and recreational equipment rental, both part of SIC major group 79, are included in the Educational Services sector and the Real Estate and Rental and Leasing sector respectively.

**Auxiliaries.** In the SIC system, auxiliary establishments (i.e., those establishments primarily serving other establishments of the same enterprise) were classified in the industry of the establishments served. In NAICS, auxiliary establishments are classified according to the services performed rather than the industry served.

Corporate, subsidiary and regional managing offices are included in NAICS Sector 55, Management of Companies and Enterprises (new). In NAICS-based tables from the 1997 Economic Census, all other auxiliary establishments

---

are included in the separate category titled "Auxiliaries, except management of companies and enterprises," and further classified into several broad NAICS industry categories based on the type of service performed. Future economic censuses will probably not differentiate these auxiliary establishments from other establishments in the same NAICS industry.

For the SIC-based tables from the 1997 Economic Census, all auxiliaries are included in the category titled "Auxiliaries." Note that in published reports from previous censuses for manufacturing and mining, auxiliary establishments were included in, or along with, data for the industries served; for other SIC divisions, auxiliary establishments were excluded from the detailed tables. The data for manufacturing and mining in Table 2 of this report do not include auxiliary establishments, and thus differ from 1992 census data published previously.

**Construction.** While some changes affecting construction were within the sector, this sector now includes industries that were previously classified in other sectors. Prominent among these industries are construction management and land subdividers and developers.

In addition, although the construction sector is enumerated on an establishment basis, statistical information was obtained in the census by a survey which included all large employers and a sample of the smaller ones.

**Educational Services.** The Educational Services sector (new) primarily includes establishments that were classified in SIC Division I, Services. Most establishments included in the sector were included in SIC major group 82 although this sector also includes establishments that were classified in SIC major groups 72 (beauty and barber schools), 79 (sports and recreational instruction), and 87 (educational testing and consulting). Libraries, part of SIC 82, are included in the Information sector. Note that elementary and secondary schools and colleges and universities, although part of this sector, are not in scope of the 1997 Economic Census.

**Finance and Insurance.** The Finance and Insurance sector (new) was created from selected industries in SIC Division H, Finance, Insurance, and Real Estate. While most of the changes affecting finance and insurance were minor at the sector level, some industries left the finance part of this sector and other industries came into this sector. Prominent among those leaving are holding companies and patent owners and lessors. Prominent among the industries coming into the sector are pawnshops. Also, there are conceptual differences in what defines an establishment in this sector, since distinct activities have a less physical/geographical basis than industries in most other sectors. Note that funds, trusts, and other financial vehicles (except for REITs), although part of this sector, are not in scope of the 1997 Economic Census.

**Health Care and Social Assistance.** The Health Care and Social Assistance sector (new) primarily includes establishments that were classified in SIC Division I, Services. Most establishments included in this sector were classified in SIC major groups 80 and 83. Ambulance services, part of SIC Division E, Transportation, Communications, and Utilities, are also included in this sector. Dental laboratories, part of SIC 80, are included in the Manufacturing sector and grantmaking/giving and social advocacy services, part of SIC 83, are included in the Other Services sector. Note that government owned and operated hospitals are in scope of the 1997 Economic Census.

**Information.** The Information sector (new) includes publishing establishments that were classified in SIC Division D, Manufacturing; telecommunications and broadcasting establishments that were classified in SIC Division E, Transportation, Communications, and Utilities; and various types of information-related establishments that were classified in SIC Division I, Services (e.g. software publishing, motion picture production, data processing, on-line information services, and libraries).

**Management of Companies and Enterprises.** The Management of Companies and Enterprises sector (new) includes holding companies that were classified in SIC Division H, Finance, Insurance, and Real Estate, and corporate, subsidiary, and regional managing offices of companies and enterprises. Managing offices of companies or enterprises were considered to be "auxiliary" establishments in the SIC system. See section on "Auxiliaries" for additional explanation of the treatment of auxiliary establishments in the 1992 and 1997 Economic Censuses.

**Manufacturing.** While most of the change affecting the manufacturing sector was change within the sector, this sector now excludes industries which were previously within the scope of manufacturing and includes others that were not in manufacturing. Prominent among the industries that are excluded from manufacturing are logging and portions of publishing. Prominent among the industries that are now included in manufacturing are bakeries, candy stores where candy is made on the premises, custom tailors, makers of custom draperies, and tire retreading.

Another change resulting from the conversion to NAICS is that data for manufacturing auxiliary establishments are not included with the manufacturing data; these establishments are now classified in a particular NAICS industry based on the function of the auxiliary establishment. See section on "Auxiliaries" for additional explanation of the treatment of auxiliary establishments in the 1992 and 1997 Economic Censuses.

**Mining.** While changes affecting mining were minor at the sector level, within the sector the number of subsectors changed from four to three. In addition, this sector now

excludes portions of industries that are now included in the services sector. Prominent among these industries are geophysical surveying and mapping services for metal mining, oil and gas extraction, and nonmetallic minerals mining.

Another change resulting from the conversion to NAICS is that data for mining auxiliary establishments are not included with the mining data; these establishments are now classified in a particular NAICS industry based on the function of the auxiliary establishment. See section on "Auxiliaries" for additional explanation of the treatment of auxiliary establishments in the 1992 and 1997 Economic Censuses.

**Other Services (Except Public Administration).** The Other Services (Except Public Administration) sector (new) includes three distinct subsectors:

1. The Repair and Maintenance subsector primarily includes establishments that were classified in SIC Division I, Services. Most establishments were included in SIC major groups 75 and 76 although selected types of establishments in SIC major groups 72 (garment alteration, shoe repair) and 73 (computer repair) are also included. Boat repair, part of SIC Division D, Manufacturing, is included in this sector.
2. The Personal and Laundry Services subsector primarily includes establishments that were classified in SIC Division I, Services. Most establishments were included in SIC major group 72. This subsector also includes parking lots, part of SIC major group 75, and photofinishing laboratories, part of SIC major group 73. Cemeteries, which were included in SIC Division H, Finance, Insurance, and Real Estate, are included in this sector. Tax return preparation services, part of SIC major group 72, are included in the Professional, Scientific, and Technical Services sector. Note that pet care services, although part of this sector, are not covered in the economic census.
3. The Religious, Grantmaking, Civic, Professional, and Similar Organizations subsector primarily includes establishments that were classified in SIC Division I, Services. Most establishments were included in SIC major group 86. Grantmaking/giving services and social advocacy organizations that were included in SIC major group 83 are included in this sector. Grantmaking foundations and condominium associations, part of SIC Division H, Finance, Insurance, and Real Estate, are also included in this sector. Note that grantmaking foundations are included in the 1997 Economic Census but were not covered in the 1992 Economic Census; and that religious organizations, labor unions, political organizations, and private households, although part of this sector, are not covered in the economic census.

**Professional, Scientific, and Technical Services.** The Professional, Scientific, and Technical Services sector (new) primarily includes professional and other highly specialized technical service establishments that were classified in SIC Division I, Services. Most establishments in this sector were classified in SIC major groups 73, 81, and 87. Title abstract offices, part of SIC Division H, Finance, Insurance, and Real Estate, and advertising specialty distributors, part of SIC Division F, Wholesale Trade, are also included in this sector. Note that veterinary services, although part of this sector, are not in scope of the 1997 Economic Census.

**Real Estate and Rental and Leasing.** The Real Estate and Rental and Leasing sector (new) was created from selected industries in SIC Division H, Finance, Insurance, and Real Estate; SIC Division I, Services; and SIC Division E, Transportation, Communications, and Utilities. While most of the changes affecting real estate were minor at the sector level, some industries left the real estate part of this sector and other industries came into this sector. Prominent among those leaving are title abstract offices and land subdividers and developers. Prominent among the industries coming into the sector are patent owners and lessors, miniwarehouses, and most of the rental industries previously classified in the Services Division of the SIC, including video tape, motor vehicle, computer, and equipment rental and leasing. Rental of equipment with operators is classified elsewhere, depending on the services provided.

**Retail Trade.** This sector includes most of what was classified in Retail Trade under the SIC system. Excluded from this sector, however, are eating and drinking places and mobile foodservices (which are now in the Accommodation and Foodservices sector); pawn shops (which are now in the Finance and Insurance sector); and bakeries (which are now in the Manufacturing sector).

In addition, this sector now includes industries previously classified in Wholesale Trade that sold merchandise using facilities open to the general public. Prominent examples of these are automotive supplies dealers, computer and peripheral equipment merchants, office supplies dealers, farm supplies dealers, and building materials dealers.

**Transportation and Warehousing.** The Transportation and Warehousing sector (new) was created from selected industries in SIC Division E, Transportation, Communications, and Utilities. While most of the changes affecting transportation and warehousing were minor at the sector level, some industries left transportation and warehousing and others came into this sector. Prominent among those leaving transportation and warehousing are travel agencies, tour operators, miniwarehouses, marinas, waste collection, and ambulances. Prominent among the industries coming into the Transportation and Warehousing sector

---

are automotive vehicle towing services. Note that large certificated passenger air transportation, rail transportation, and the postal service, although part of this sector, are not in scope of the 1997 Economic Census.

**Utilities.** The Utilities sector (new) was created from selected industries in SIC Division E, Transportation, Communications, and Utilities. While most of the changes affecting utilities were minor at the sector level, prominent among the industries excluded from the Utilities sector are waste management services and pipeline transportation of natural gas and other petroleum products.

**Wholesale Trade.** This sector includes most of what was classified in Wholesale Trade under the SIC system. Excluded from this sector, however, are establishments with retail selling characteristics; these establishments are now classified in the Retail Trade sector. Prominent examples of these are auto parts, farm supplies, and building products dealers and lumber yards.

In addition, this sector now includes prerecorded video tape wholesalers; this industry was previously classified in Services Industries under the SIC system.

The wholesale sector includes: merchant wholesalers who buy and take title to the goods they sell, manufacturers' sales branches and offices who sell products manufactured domestically by their own company, and agents and brokers who collect a commission or fee for arranging the sale of merchandise owned by others.

## RELIABILITY OF DATA

Most data compiled in this report originated from either census questionnaires or administrative records of other Federal agencies and, therefore, are not subject to sampling errors. However, all of the data are subject to non-sampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, and estimation for missing or misreported data. Data for the Construction sector are subject to sampling errors, as these data originate from a survey which included all large employers and a sample of the smaller ones. For a detailed discussion of these sampling errors, see Appendix C in the Construction sector

reports from the 1997 Economic Census. Slight differences may also exist between the data estimates in the Construction sector reports and this report because of rounding methodologies.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained except for estimation for missing or misreported data; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

Moreover, the Census Bureau obtains on computer tape limited information extracted from administrative records of other Federal agencies. This information is used in conjunction with other information available to the Census Bureau to develop estimates for nonemployers, small employers, and other establishments for which responses were not received in time for publication.

## DISCLOSURE

In accordance with Federal law governing census reports (Title 13 of the United States Code), no data are published that would disclose the operations of an individual establishment or company. However, the number of establishments classified in a specific industry or geography is not considered a disclosure and may be released even when other information is withheld.

To ensure the assignment of consistent suppression patterns as part of the 1997 Economic Census publication program, it was necessary to coordinate the suppression of data cells assigned in this report with the suppression of data cells assigned in other reports. These other reports include reports in the core Business Statistics Series as well as reports previously published as part of the Industry Series and Geographic Area Series for the various economic sectors covered.

A major objective of the 1997 Economic Census was the publication of NAICS-based data from the Industry Series and Geographic Area Series of reports. As a result, in the course of implementing disclosure analysis for the 1997 Economic Census publication program, when choosing whether to publish or suppress NAICS-based versus the SIC-based data cells, preference was given to publishing the NAICS-based data and suppressing the SIC-based data. This, in turn, resulted in the suppression of a moderate number of SIC-based cells in this report which might not have been otherwise suppressed.

### NUMBER OF ESTABLISHMENTS

#### General Definition

An establishment is a single physical location at which business is conducted and/or services are provided. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Economic census figures represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Each economic census establishment was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1997.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, separate establishment reports for each of the different activities were obtained in the census.

#### Sector-Specific Information

**Accommodation and Foodservices.** Leased departments are treated as separate establishments and are classified according to the kind of business they conduct. For example, a leased department selling gifts/souvenirs within a hotel would be considered a separate establishment under the "gift, novelty, and souvenir stores" classification in the Retail Trade sector.

**Administrative and Support and Waste Management and Remediation Services; Arts, Entertainment, and Recreation; Educational Services; Health Care and Social Assistance; Information; Professional, Scientific, and Technical Services; and Other Services (Except Public Administration).** An establishment is included in the census if it is an employer, the establishment has \$1,000 in payroll, and was in operation at any time during 1997. Leased service departments (separately

owned businesses operated as departments or concessions of other service establishments or of retail businesses, such as a separately owned shoeshine parlor in a barber shop, or a beauty shop in a department store) are treated as separate service establishments for census purposes. Leased retail departments located in service establishments (e.g., a gift shop located in a hotel) are considered separate retail establishments.

**Construction.** Construction establishments that were inactive or idle for the entire year were not included.

**Mining.** For the crude petroleum and support activities for mining industries, the basis for reporting is different from the establishment basis used for other types of mining. Firms operating oil and gas wells, drilling wells, or exploring for oil and gas for their own account were required to submit a separate report for each state or offshore area adjacent to a state in which it conducted such activities. Firms that performed contract services for oil and gas field operations or for mining establishments were required to submit one report covering all such activities in the United States and to include information on receipts for services and production-worker wages and hours by state. These consolidated reports were then allocated to state establishments based on the data reported at the state level.

**Real Estate and Rental and Leasing.** Data for individual properties leased or managed by property lessors or property managers are not normally considered separate establishments, but rather the permanent offices from which the properties are leased or managed are considered establishments. Data for separate automotive rental offices or concessions (e.g., airport locations) in the same metropolitan area, for which a common fleet of cars is maintained, are merged together and not considered as separate establishments.

**Retail Trade.** Leased departments are treated as separate establishments and are classified according to the kind of business they conduct. For example, a leased department selling shoes within a department store would be considered a separate retail establishment under the "shoe stores" classification.

### SALES, SHIPMENTS, RECEIPTS, REVENUE, OR BUSINESS DONE

#### General Definition

Includes the total sales, shipments, receipts, revenue, or business done by domestic establishments (excludes

---

foreign subsidiaries) within the scope of the economic census. The definition of each of these items is included in the information provided below.

### **Sector-Specific Information**

Included are all products physically shipped by the establishments, whether sold, transferred to other plants of the same company, or shipped on consignment. For products transferred to other establishments of the same company, or prepared on a custom or toll basis, companies were requested to report the estimated value, not merely the cost of producing the product.

In the case of multiunit companies, the mineral operation was requested to report the value of products transferred to other establishments of the same company at full economic or commercial value, including not only the direct cost of production but also a reasonable proportion of "all other costs" (including company overhead) and profit.

In addition to the value for (North American Industry Classification System) NAICS-defined products, aggregates of the following categories of miscellaneous receipts are reported as part of a total establishment's value of shipments and receipts:

1. Receipts for services. Receipts for work or services that an establishment performed for others.
2. Value of resales. Sales of products brought and sold without further processing.
3. Other miscellaneous receipts. Such as repair work, installation, sales of scrap, etc.

An establishment's value of shipments and receipts include those products assigned to an industry (primary products), those considered primary to other industries (secondary products), receipts for services and miscellaneous activities, and the value of resales.

**Real Estate and Rental and Leasing.** Includes revenue from all business activities whether or not payment was received in the census year, including commissions and fees from all sources, rents, net investment income, interest, dividends, and royalties. Revenue from leasing property marketed under operating leases is included. Revenue also includes the total value of service contracts, amounts received for work subcontracted to others, and rents from real property sublet to others.

Revenue does not include sales and other taxes collected from customers and remitted directly by the firm to a local, state, or Federal tax agency.

**Retail Trade.** Includes merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; the total value of service contracts; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed on to the retailer.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from sales. Sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; gross sales and receipts of departments or concessions operated by other companies; and commissions or receipts from the sale of government lottery tickets.

Sales do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is other than retail trade. They do include receipts other than from the sale of merchandise at retail, e.g., service receipts, sales to industrial users, and sales to other retailers by establishments primarily engaged in retail trade.

### **Transportation and Warehousing and Utilities.**

Includes revenue from all business activities whether or not payment was received in the census year. Revenue does not include sales and other taxes collected from customers and remitted directly by the firm to a local, state, or Federal tax agency.

**Wholesale Trade.** Sales include merchandise sold for cash or credit by establishments primarily engaged in wholesale trade; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer and passed on to the wholesaler.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; and nonoperating income from such sources as investments, rental or sale of real estate, etc.

Sales in this report do not include wholesale sales made by manufacturers, retailers, service establishments, or other businesses whose primary activity is other than wholesale trade. They do include receipts other than from the sale of merchandise at wholesale, e.g., service receipts, retail sales, etc., by establishments primarily engaged in wholesale trade.

Sales figures include sales of all establishments in business at any time during the year. Sales shown for agents and brokers represented the value of the goods involved in the transactions rather than the commissions received or earnings.

## **ANNUAL PAYROLL**

### **General Definition**

Payroll includes all forms of compensation, such as salaries, wages, commissions, dismissal pay, bonuses, vacation allowances, sick-leave pay, and employee contributions to qualified pension plans paid during the year to all employees. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service (IRS) on Form 941.

### Sector-Specific Information

**Accommodation and Foodservices and Retail Trade.** Excludes employees of departments or concessions operated by other companies at the establishment.

**Administrative and Support and Waste Management and Remediation Services; Arts, Entertainment, and Recreation; Educational Services; Health Care and Social Assistance; Information; Professional, Scientific, and Technical Services; and Other Services (Except Public Administration).** Included are members of professional service organizations or associations which operates under state professional corporation statutes and file corporate Federal income tax returns. ### NUMBER OF ESTABLISHMENTS

#### General Definition

An establishment is a single physical location at which business is conducted and/or services are provided. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Economic census figures represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Each economic census establishment was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1997.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, separate establishment reports for each of the different activities were obtained in the census.

### Trade Area-Specific Information

**Auxiliaries.** In the Standard Industrial Classification (SIC) system, auxiliary establishments (i.e., those establishments primarily serving other establishments of the same enterprise) were classified in the industry of the establishments served. In the North American Industry Classification System (NAICS), auxiliary establishments are classified according to the services performed rather than the industry served.

**Construction.** Establishments are defined as a relatively permanent office or other place of business where the usual business activities related to construction are conducted. Establishments do not represent each project or construction site. Includes all establishments that were in business at any time during the year. It covers all full-year and part-year operations. Construction establishments

which were inactive or idle for the entire year were not included. Establishments are based on a survey which included all large employers and a sample of the smaller ones.

**Finance, Insurance, and Real Estate.** Data for individual properties leased or managed by property lessors or property managers are not normally considered separate establishments, but rather the permanent offices from which the properties are leased or managed are considered establishments. Data for separate automotive rental offices or concessions (e.g., airport locations) in the same metropolitan area for which a common fleet of cars is maintained are merged together and not considered as separate establishments.

**Manufacturing.** Includes all manufacturing establishments (plants) with one employee or more and establishments in operation at any time during the year.

**Mining.** Includes all mineral establishments with one employee or more and establishments in operation at any time during the year. Establishments in the crude petroleum and natural gas and support activities for mining represent statewide operations rather than those at a single physical location.

**Retail Trade.** Leased departments are treated as separate establishments and are classified according to the kind of business they conduct. For example, a leased department selling shoes within a department store would be considered a separate retail establishment under the "shoe stores" classification.

**Services.** An establishment is included in the census if it is an employer and was in operation at any time during 1997. Leased service departments (separately owned businesses operated as departments or concessions of other service establishments or of retail businesses, such as a separately owned shoeshine parlor in a barber shop, or a beauty shop in a department store) are treated as separate service establishments for census purposes. Leased retail departments located in service establishments (e.g., a gift shop located in a hotel) are considered separate retail establishments.

### SALES, SHIPMENTS, RECEIPTS, REVENUE, OR BUSINESS DONE

#### General Definition

Includes the total sales, shipments, receipts, revenue, or business done by establishments within the scope of

---

the economic census. The definition of each of these items is included in the information provided below.

### Trade Area-Specific Information

**Construction.** Includes the value of construction work and other business receipts for work done by establishments during the year. Included is new construction, additions and alterations or reconstruction, and maintenance and repair construction work. Also included is the value of any construction work done by the reporting establishments for themselves.

Speculative builders were instructed to include the value of buildings and other structures built or being built for sale in the current year, but not sold. They were to include the costs of such construction plus normal profit. Also included is the cost of construction work done on buildings for rent or lease.

Establishments engaged in the sale and installation of such construction components as plumbing, heating, and central air-conditioning supplies and equipment; lumber and building materials; paint, glass, and wallpaper; electrical and wiring supplies; and elevators or escalators were instructed to include both the value for the installation and the receipts covering the price of the items installed.

Excluded was the cost of industrial and other specialized machinery and equipment, which are not an integral part of a structure.

**Finance, Insurance, and Real Estate.** Includes revenue from all business activities whether or not payment was received in the census year, including commissions and fees from all sources, rents, net investment income, interest, dividends, royalties, and net insurance premiums earned. Revenue from leasing property marketed under operating leases is included, as well as interest earned from property marketed in the census year under capital, finance, or full payout leases. Revenue also includes the total value of service contracts, amounts received for work subcontracted to others, and rents from real property sublet to others.

Revenue does not include sales and other taxes collected from customers and remitted directly by the firm to a local, state, or Federal tax agency.

**Manufacturing.** Covers the received or receivable net selling values, f.o.b. plant (exclusive of freight and taxes), of all products shipped, both primary and secondary, as well as all miscellaneous receipts, such as receipts for contract work performed for others, installation and repair, sales of scrap, and sales of products bought and resold without further processing. Included are all items made by or for the establishments from materials owned by it, whether sold, transferred to other plants of the same company, or shipped on consignment. The net selling value of products made in one plant on a contract basis from materials owned by another was reported by the plant providing the materials.

In the case of multiunit companies, the manufacturer was requested to report the value of products transferred to other establishments of the same company at full economic or commercial value, including not only the direct cost of production but also a reasonable proportion of "all other costs" (including company overhead) and profit.

**Mining.** Includes the net selling values, f.o.b. mine or plant after discounts and allowances, excluding freight charges and excise taxes. Shipments includes all products physically shipped from the establishment during the year, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in the current year. For products transferred to other establishments of the same company or prepared on a custom basis, companies were requested to report the estimated value, not merely the cost of producing the items. Multiestablishment companies were asked to report value information for each establishment as if it were a separate economic unit. They were instructed to report the value of all products transferred to other plants of the company at their full economic value; to include, in addition to direct cost of production, a reasonable proportion of company overhead and profits.

For all establishments classified in an industry, value of shipments and receipts includes (1) the value of all primary products of the industry; (2) the value of secondary products which are primary to other industries; (3) the receipts for contract work done for others, except custom milling; and (4) the value of products purchased and resold without further processing. Receipts for custom milling are not included to avoid duplication with the value of custom milled ores included in an industry's primary and secondary products. Some duplication exists in industry and industry group totals because of the inclusion of materials transferred from one establishment to another for mineral preparation or resale.

**Retail Trade.** Includes merchandise sold for cash or credit at retail and wholesale by establishments primarily engaged in retail trade; amounts received from customers for layaway purchases; receipts from rental of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; the total value of service contracts; and gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed on to the retailer.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from sales. Sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; gross sales and receipts of departments or concessions operated by other companies; and commissions or receipts from the sale of government lottery tickets.

---

Sales do not include retail sales made by manufacturers, wholesalers, service establishments, or other businesses whose primary activity is other than retail trade. They do include receipts other than from the sale of merchandise at retail, e.g., service receipts, sales to industrial users, and sales to other retailers by establishments primarily engaged in retail trade.

**Services.** Receipts (basic dollar volume measure for TAXABLE establishments): Includes receipts from customers or clients for services rendered, from the use of facilities, and from merchandise sold during the year whether or not payment was received in that year, except for health practitioners and legal, architectural, engineering, and surveying services, which reported on a cash basis (payments received in the year regardless of when services were rendered). Excise taxes on gasoline, liquor, tobacco, etc., which are paid by the manufacturer or wholesaler and passed on in the cost of goods purchased by the service establishment, are also included. Receipts from leasing of vehicles, equipment, etc., marketed under operating leases are included in receipts figures as well as the fair sales value of merchandise marketed in the year under capital, finance, or "full payout" leases. Receipts also include the total value of service contracts, amounts received for work subcontracted to others, and dues and assessments from members and affiliates.

Receipts are net after deductions for refunds and allowances for merchandise returned by customers. Receipts do not include sales, occupancy, admissions, or other taxes collected from customers and remitted directly by the firm to a local, state, or Federal tax agency, nor do they include income from such sources as contributions, gifts, and grants; dividends, interest, and investments; or sale or rental of real estate. Also excluded are rents from and receipts (gross as well as the establishment's share) of departments and concessions which are operated by others; sales of used equipment rented or leased to customers; commissions from vending machine operators; and other nonoperating income such as royalties, franchise fees, etc.

Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, or other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sale of merchandise to individuals or other businesses) by establishments primarily engaged in performing services and classified in the service industries.

Revenue (basic dollar volume measure for TAX-EXEMPT firms): Includes revenue from customers or clients for services rendered and merchandise sold during 1992, whether or not payment was received in the year. Also included are income from interest, dividends, gross contributions, gifts, grants (whether or not restricted for use in operations), rents, royalties, dues and assessments from members and affiliates, and receipts from fundraising

activities. Receipts from taxable business activities of firms exempt from Federal income tax (Unrelated Business Income) are also included in revenue.

Revenue does not include sales, admissions, or other taxes collected by the organization from customers or clients and paid directly to a local, state, or Federal tax agency; income from the sale of real estate, investments, or other assets (except inventory held for resale); gross receipts of departments, concessions, etc., that are operated by others; and amounts transferred to operating funds from capital or reserve funds.

**Transportation, Communications, and Utilities.** Includes revenue from all business activities whether or not payment was received in the census year.

Revenue does not include sales and other taxes collected from customers and remitted directly by the firm to a local, state, or Federal tax agency.

**Wholesale Trade.** Sales include merchandise sold for cash or credit by establishments primarily engaged in wholesale trade; receipts from rental or leasing of vehicles, equipment, instruments, tools, etc.; receipts for delivery, installation, maintenance, repair, alteration, storage, and other services; and gasoline, liquor, tobacco, and other excise taxes that are paid by the manufacturer and passed on to the wholesaler.

Sales are net after deductions for refunds and allowances for merchandise returned by customers. Trade-in allowances are not deducted from total sales. Total sales do not include carrying or other credit charges; sales (or other) taxes collected from customers and forwarded to taxing authorities; and nonoperating income from such sources as investments, rental or sale of real estate, etc.

Sales in this report do not include wholesale sales made by manufacturers, retailers, service establishments, or other businesses whose primary activity is other than wholesale trade. They do include receipts other than from the sale of merchandise at wholesale, e.g., service receipts, retail sales, etc., by establishments primarily engaged in wholesale trade.

Sales figures include sales of all establishments in business at any time during the year. Sales shown for agents and brokers represented the value of the goods involved in the transactions rather than the commissions received or earnings.

### **811 Repair and Maintenance**

Industries in the Repair and Maintenance subsector restore machinery, equipment, and other products to working order. These establishments also typically provide general or routine maintenance (i.e., servicing) on such products to ensure they work efficiently and to prevent breakdown and unnecessary repairs.

The NAICS structure for this subsector brings together most types of repair and maintenance establishments and categorizes them based on production processes (i.e., on the type of repair and maintenance activity performed, and the necessary skills, expertise, and processes that are found in different repair and maintenance establishments). This NAICS classification does not delineate between repair services provided to businesses versus those that serve households. Although some industries primarily serve either businesses or households, separation by class of customer is limited by the fact that many establishments serve both. Establishments repairing computers and consumer electronics products are two examples of such overlap.

The Repair and Maintenance subsector does not include all establishments that do repair and maintenance. For example, a substantial amount of repair is done by establishments that also manufacture machinery, equipment, and other goods. These establishments are included in the Manufacturing sector in NAICS. In addition, repair of transportation equipment is often provided by or based at transportation facilities, such as airports, seaports, and these activities are included in the Transportation and Warehousing sector. A particularly unique situation exists with repair of buildings. Plumbing, electrical installation and repair, painting and decorating, and other construction-related establishments are often involved in performing installation or other work on new construction as well as providing repair services on existing structures. While some specialize in repair, it is difficult to distinguish between the two types and all have been included in the Construction sector.

Excluded from this subsector are establishments primarily engaged in rebuilding or remanufacturing machinery and equipment. These are classified in Sector 31-33, Manufacturing. Also excluded are retail establishments that provide after-sale services and repair. These are classified in Sector 44-45, Retail Trade.

## **AUXILIARIES**

Auxiliaries are establishments whose employees are primarily engaged in providing various management or support services to one or more establishments of the same enterprise. Characteristically, these auxiliaries service only locations of the same enterprise, and generally do not produce any products nor provide services for the

general public, other business firms, or government. Services may be provided, as a secondary activity, to the general public or other business firms.

The term Auxiliaries includes establishments often referred to as central administrative offices or corporate, subsidiary, and regional managing offices. These establishments provide general management and/or administrative support services to other establishments of the same company or its subsidiaries. These establishments operate independently from other establishments of the company and provide a range of services, such as long term strategic and organizational planning, financial management, payroll and personnel management, etc. Examples of these establishments are corporate offices, centralized administrative offices, head offices, and district and regional offices. Other types of auxiliaries are data processing centers, warehousing facilities, accounting and billing offices, etc.

For the 1997 Economic Census, separate establishments classified in Major Group 46 and Industry Groups 481, 491, 492, 493, 602, 603, 606, 631, 632, 633, 635, and 636 engaged in performing support services for other establishments of the same enterprise, where the support service is an integral part of the enterprise's business (e.g., loan processing department of a bank, underwriting department of a power company), are all classified in their respective Standard Industrial Classification (SIC) Divisions as operating establishments.

An enterprise is a business, service, or other organization consisting of one or more establishments under common, direct, or indirect ownership or control. An enterprise is the highest level of establishment aggregation. An enterprise may vary in composition ranging from a single establishment company (e.g., corporation, partnership, etc.) to a complex family of parent and subsidiary companies (or firms) under common ownership or control.

An enterprise must have at least one operating establishment in order to have another establishment classified as an auxiliary. An operating establishment is one which produces or distributes goods or which performs services for the general public or for other business firms. The particular legal form of organization of an enterprise has no bearing on the classification of an establishment as an auxiliary. Hence, an enterprise may consist of one or more "legal entities" and thus have one or more Employer Identification (EI) number. Some enterprises, in fact, have separate EI numbers setup exclusively for these administrative and support services provided by auxiliaries.

For the purpose of classification, an auxiliary should be considered a separate establishment if it provides management or support services to at least one other establishment of the same enterprise at a different location. An auxiliary at the same physical location as one of the enterprise's operating establishments is considered a separate establishment if: (1) it also services at least one other establishment of the enterprise, (2) the data for both the

---

operating establishment and the auxiliary at the same location are significant, and (3) separate establishment type data can be reported. If an auxiliary and operating establishment at the same location cannot meet all three conditions, the entire location is treated as one establishment and is classified on the basis of its primary activity measured by employment or payroll.

Auxiliary establishments are classified industrially based on the primary activity, SIC, of the operating establishment(s) they serve. This "industry-serviced" code is the most appropriate industry representing the primary activity of the establishments served. The first four digits of the SIC will identify the industry served.

In addition, Auxiliaries are further subclassified according to the principal support function performed. For 1997, there are several type-of-activity codes available such as:

- Corporate, subsidiary, and regional managing office
- Data processing
- Research and development
- Security or guard
- Janitorial, pest control, and landscaping services to buildings and dwellings
- Repair and maintenance
- Warehousing facilities
- Trucking

Separate agriculture, mining, construction, and manufacturing establishments primarily producing goods or providing services for establishments of the same enterprise are not classified as auxiliaries, but are classified on the basis of their primary activity. Also, separate establishments primarily engaged in long distance trucking, stevedoring, water transportation, railroad transportation, or pipeline transportation for other establishments of the same enterprise are classified in the corresponding transportation industry. However, establishments primarily providing local trucking; warehousing; communications or electric, gas, and sanitary services for other establishments of the same enterprise are classified as auxiliaries.

In Public Administration, establishments engaged in performing central administrative and managerial activities are classified as operating establishments in the Public Administration Division. Establishments primarily engaged in performing other auxiliary activities for establishments in public administration, such as warehouses, automotive maintenance shops, and recreation facilities, are classified as auxiliary establishments.
