Other inedible products 4/.....	81,236	r/ 81,310

r/Revised by 5 percent or more from previously published data.

1/Includes hydrogenated fats (vegetable and animal) and other fats and oils in process.

2/Includes confectioner's fats.

3/Includes only once-refined soybean oil consumed in methyl esters. Consumption of crude soybean oil and any other fat or oil in methyl esters is reported in the "Other inedible products" or "Inedible products" lines of this report.

4/Revised totals for consumption in methyl esters for August and July are 165,146 thousand lbs and 121,185 thousand lbs, respectively. Downward revisions are due to companies incorrectly reporting consumption of crude soybean oil in methyl esters as consumption of once-refined soybean oil in methyl esters. As a result, there are upward revisions in the "Other inedible products" line. Revised totals for consumption in other inedible products for August and July are 84,334 thousand lbs and 78,037 thousand lbs, respectively.

1/Includes hydrogenated fats (vegetable and animal) and other fats and oils in process (e.g., refined cottonseed includes stocks of stearin).

2/Production of refined oils covers only once-refined oils. Degummed soybean oil is reported as crude oil.

3/Consumption in feed is reported by renderers and fat reprocessors as shipments for consumption of inedible tallow and grease for use in livestock and poultry feed. Data are not collected regarding other oils provided for or consumed in animal feed.

4/Includes raw and boiled linseed oil.

5/Includes linseed oil other than raw and boiled.

6/Includes only once-refined soybean oil consumed in methyl esters. Consumption of crude soybean oil and any other fat or oil in methyl esters is reported in the "Other inedible products" or "Inedible products" lines of this report.

7/Revised totals for consumption in methyl esters for August and July are 165,146 thousand lbs and 121,185 thousand lbs, respectively. Downward revisions are due to companies incorrectly reporting consumption of crude soybean oil in methyl esters as consumption of once-refined soybean oil in methyl esters. As a result, there are upward revisions in the "Other inedible products" line. Revised totals for consumption in other inedible products for August and July are 78,004 thousand lbs and 66,305 thousand lbs, respectively.

8/The use of whole or crude tall oil in the distillation or fractionization process is reported as consumed in fatty acids. The production represents refined tall oil and distilled tall oil containing less than 90 percent free fatty acids not including resin acids.
