

CURRENT BUSINESS REPORTS

Advance Monthly Retail Sales

For release June 10, 1976 3:00 P.M.

CB-76-125

MAY 1976

The Bureau of the Census, U. S. Department of Commerce announced today that total sales of retail stores in May, after adjusting for seasonal variations and trading day differences, but not for price changes, were estimated at \$52.6 billion. This adjusted figure was about 1 percent below April 1976 but 9 percent greater than sales for May of last year. The adjusted May estimate, excluding the automotive group, was 1 percent lower than April but 6 percent above May of last year.

Adjusted sales of durable goods stores decreased 3 percent from April, while sales of nondurable goods stores were virtually unchanged. Compared with sales for May 1975, durable goods stores increased 18 percent, while nondurable goods stores increased 5 percent.

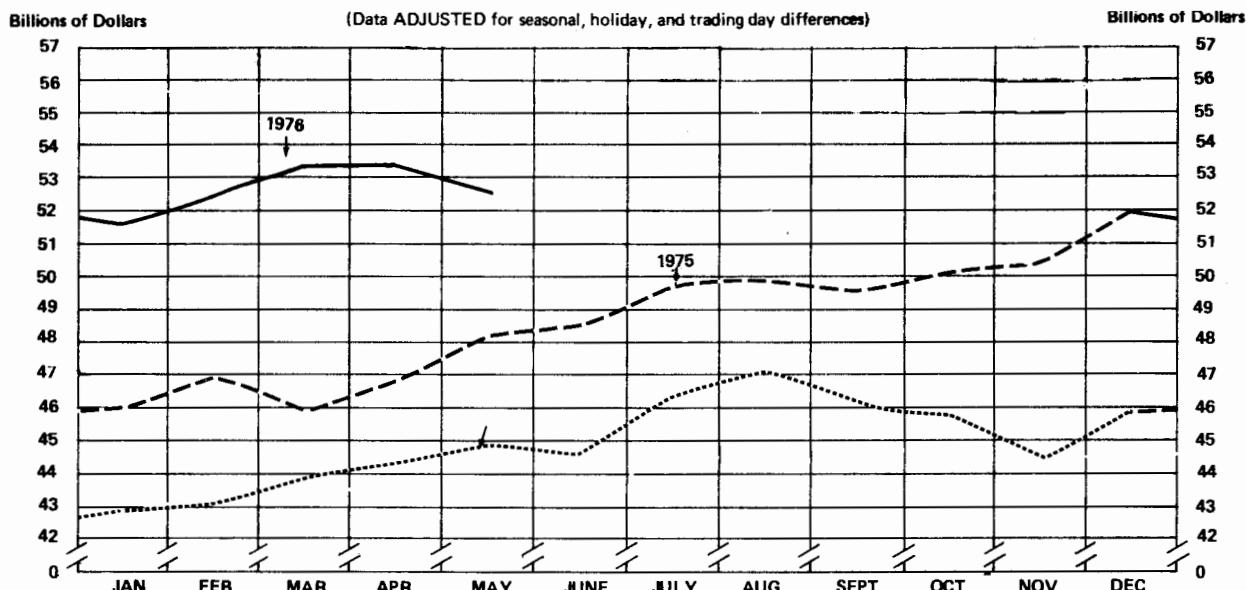

The revised estimate of retail sales for April, based on preliminary results from the full sample of retail stores, were virtually unchanged from the advance estimate of \$53.3 billion published earlier. Seasonally adjusted sales for April as revised, were virtually unchanged from March but 4 percent above April 1975. Excluding the automotive group, these estimates were about 1 percent below March but 10 percent over April of last year. For nondurable goods stores, adjusted April sales decreased about 1 percent from the previous month but increased 9 percent from the same month a year ago. For durable goods stores, adjusted sales for April were 3 percent above March and 26 percent over April of last year.

The advance sales estimates are based on early reporting of sales for the weeks and part-weeks of the month by a small subsample of the Bureau's retail survey panel. Because retailers' weekly records often differ from their monthly records (in reflecting such items as carrying charges, sales, taxes, merchandise returns), the advance estimate can differ from the subsequent estimates which are based on monthly reports obtained from the full sample of retail stores. In addition, sampling variability between the sub-sample used for the advance estimates and the full sample can cause a difference. For most months, such differences have been reduced by modifying the advance estimates, prior to publication, on the basis of the relationship between the advance and full-sample data for previous months.

The differences between advance and full-sample estimates of month-to-month percentage change in seasonally adjusted total retail store sales have ranged from 0 to 2 during the last 12 months and a median value of 1. For individual kind of business groups, these differences tend to be higher.

Preliminary estimates for April 1976 and final estimates for March 1976 based on the full sample will also be published later this month in the Monthly Retail Trade report for April (BR-76-4). The complete report will provide sales estimates in greater detail and will present a description of the sample design and the techniques used in developing the estimates. In addition, the complete report will include approximate measures of sampling variability.

MONTHLY SALES OF ALL RETAIL STORES IN THE UNITED STATES

Inquiries concerning this report should be addressed to Mr. Irving True, Business Division, Bureau of the Census, Washington, D.C. 20233. Telephone (301) 763-7660.

The Weekly Retail Sales Report, Advance Monthly Retail Sales Report, Monthly Retail Trade Report, and Annual Retail Trade Report are available on a single subscription from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 at \$30.10 per year. Add \$7.55 for each subscription to a foreign address. Postage stamps not acceptable; currency submitted at sender's risk. Remittances from foreign countries must be by international money order or by draft on a U.S. bank. Single copies of the Advance Monthly Retail Sales Report are available from Subscriber Services Section (Publications), Bureau of the Census, Washington, D.C. 20233 at 25 cents each.
