

Geographically Updated Population Certification Program (GUPCP) Counts Released to Government Units

The data below include U.S. Census Bureau certified counts for governmental units that have requested and paid for a geographically updated population certification. These are official Census 2000 GUPCP population and housing unit counts that reflect boundary updates reported to the U.S. Census Bureau after January 1, 2000, the official date of boundaries used to tabulate the April 1, 2000, Census 2000 counts. The GUPCP counts also reflect any changes previously made to Census 2000 counts under the Census Bureau's Count Question Resolution Program.

Last Updated 11/10/2005

¹ Geographically updated population and housing unit counts are generally requested by a government because there has been a change in the geographic boundary since January 1, 2000. Type of geographic change indicates the sort of change that precipitated the GUPCP request.

² Date Mailed indicates the date the official certification was sent to the requesting government.

³ The population of Florence, AZ was corrected via CQR to 14,466 people and 3,216 housing units.

⁴ Verdigris, OK was incorporated in 1980, but that incorporation was reported to the Census Bureau after Census 2000.

Note: The Census 2000 counts used for Congressional apportionment and provided for legislative redistricting and in Census 2000 data products will remain unchanged. The official counts are based on boundaries that the Census Bureau uses for data collection and tabulation purposes only; their depiction and designation for statistical purposes do not constitute a determination of jurisdictional authority or rights of ownership or entitlement.
