

3 Steps to Accessing Data on American FactFinder

1

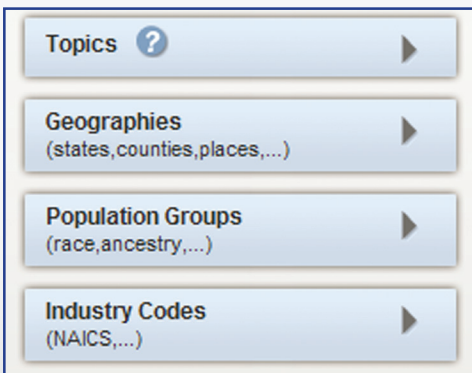

Make Your Selections

QUICK START

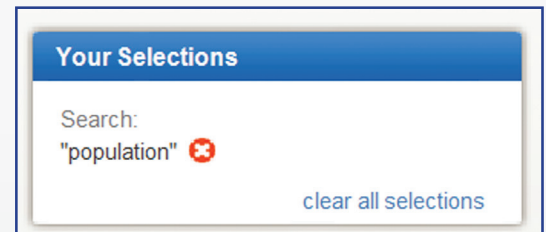

Search for data by entering keywords or phrases in the topic or table name search box. Enter an optional geography in the geography text box to search for data in a specific area.

SEARCH OPTIONS

OR

PREDEFINED SEARCH

“Your Selections” tracks the search criteria you have applied to your search results. Your search results will be updated each time you add or remove an item to “Your Selections.”

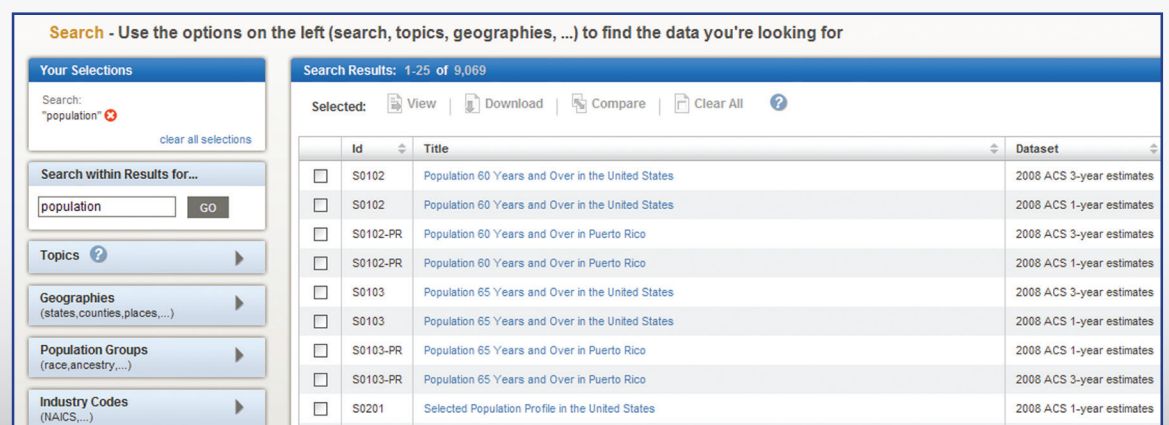

You can also search for data by selecting Topics, Geographies, Population Groups, or Industry Codes.

2

View/Refine Your Search Results

SEARCH RESULTS

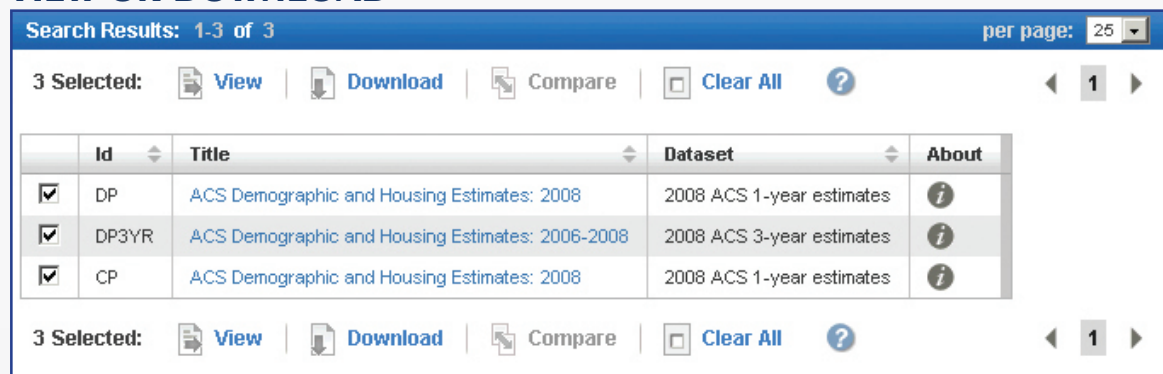

Once you have made “Your Selections,” you can view or refine them from the Search Results page. To refine your results, simply continue making selections from the predefined Topics, Geographies, Population Groups, or Industry Codes. You can also use the “Search within Results for...” text search box to enter keywords or phrases to refine your search results.

3

Access Your Data Products

VIEW OR DOWNLOAD

To view one or more products, simply click on the corresponding check box for that data product(s) and click the “View” button. American FactFinder displays the table. From the table view, you can modify, bookmark, download the table, or create a thematic map.

To download a product, simply click on the corresponding check box for that data product(s) and click the “Download” button.
