GOVERNMENT FINANCES

County Government Finances: 1991-92

U.S. Department of Commerce
Economics and Statistics Administration
BUREAU OF THE CENSUS

Acknowledgments

This report was prepared in the Governments Division by the Census of Governments Branch, headed by **Henry Wulf**. Publication development, data review, and final table examination were done by various staff members of Governments Division. The data assembly and processing were directed by **Russell Price**, Chief, Finance and Employment Branch (West) and **George Beaven**, Chief, Finance and Employment Branch (East).

Timothy Antisdell and **James Maier** directed data processing operations and **Robert Junghans** programmed the tables under the supervision of **Kathy Chamberlain**, Chief, Information Systems Branch.

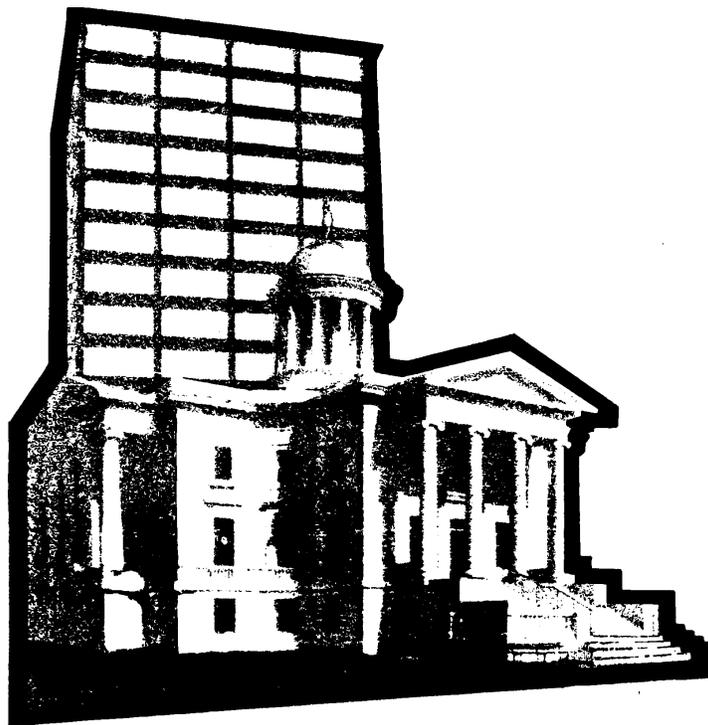

The staff of Administrative and Customer Services Division, **Walter C. Odom**, Chief, performed publication planning, design, editorial review, composition, and printing planning and procurement. **Frances B. Scott** performed publication coordination and editing.

Carma Hogue of the Economic Statistical Methods and Programming Division supplied advice and assistance in sample selection and statistical methodologies.

Grateful acknowledgement is made to the numerous State and local government officials for their cooperation in kindly providing the information needed for this report.

For information regarding data in this report, contact **Henry Wulf**, Governments Division, Bureau of the Census, Washington, DC, 20233 (1-800-242-2184).

Introduction

The United States Bureau of the Census conducts an Annual Survey of Government Finances as authorized by law under title 13, United States Code, Section 182. The 1992 survey, similar to other annual surveys and census of governments conducted for many years, covers the entire range of government finance activities—revenue, expenditure, debt, and assets.

The 1992 Government Finance Series (Series GF92) contains 7 parts: No. 1, *State Government Tax Collections: 1992*; No. 2, *Finances of Employee-Retirement Systems of State and Local Governments: 1991-92*; No. 3, *State Government Finances: 1992*; No. 4, *City Government Finances: 1991-92*; No. 5, *Government Finances: 1991-92*; No. 8, *County Government Finances: 1991-92*; and No. 10, *Finances of Public School Systems: 1991-92*. The 1992 reports will not include an edition for No. 6, *Local Government Finances in Major County Areas: (year)*; refer to tables in the 1992 Census of Government publication Volume 4, No. 5, *Compendium of Government Finances* for the latest available county area data.

This report (No. 8) provides a comprehensive summary of the annual survey findings for counties. The tables present the details of revenue by type; expenditure by object and function, indebtedness by term and function; and assets by purpose.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope of the Census Bureau's county government finance data collection activities. It also explains the intricacies of the types of data, and notes the limitations of the data as well as their relationship to data in other reports.

The tabular section comes next and contains 8 tables, divided roughly into 3 parts: tables 1, 2, 3, and 4 concentrate on summaries for counties, tables 5, 6, and 7 on individual governments; and table 8 shows utilities.

Table 1 displays national totals of county government finances for 1992 and prior years. Tables 2, 3, and 4 show detailed national summaries of counties divided into population-size groups. Tables 5 and 6 display data for individual county governments with population greater than 100,000 in 1990. There are 426 county governments shown. Table 7 displays those counties with population greater than 500,000.

SCOPE

Definition of County Government

Organized county governments are found throughout the Nation except for Connecticut, Rhode Island, the District of Columbia, and limited portions of other states where certain county areas lack a distinct county government. (See appendix C for a listing of county-type areas without county government.) In Louisiana, the county governments are officially designated as "parish" governments, and in Alaska the "Borough" governments resemble county governments in other states. Both are classified as county governments for Census statistics on governments.

Not all geographic areas known as counties have county governments. Where municipal and county governments have been consolidated, or substantially merged, the composite units are classed as municipalities for the Bureau of the Census reporting of governmental statistics. Moreover, the cities of Baltimore and St. Louis are outside the areas of the adjacent counties of Baltimore and St. Louis, and a similar situation exists among 41 independent cities in Virginia. Since these exceptional areas also include New York City, Philadelphia, and several other of the most populous cities (or composite city-counties) in the Nation, almost 10 percent of the total United States population is not served by a county government.

The number of county governments per state ranges widely. Texas has the highest total at 254 and several states have fewer than 20.

GENERAL CONCEPTS

This report uses a number of terms that, in other contexts, might have different meanings. Further, some of the tabular presentations contain concepts that are not commonly used or easily understood. If the following, which is a limited attempt to explain some of these terms and ideas, does not provide sufficient information, please write to the Chief, Governments Division, U.S. Bureau of the Census.

Current Dollars

The statistics in this report, as in the others issued by the Bureau of the Census on Federal, state, and local government finances, are in terms of current dollar amounts. They have not been adjusted for price and wage changes occurring through the years.

Fiscal Years

Data in this report pertain to county government fiscal years that ended between July 1, 1991 and June 30, 1992. Tables 5 and 6 indicate the fiscal period being reported for each county.

Slightly more than one-half of all county governments in the Nation had a fiscal year corresponding directly with calendar year 1991, i.e., they ended their fiscal year on December 31, 1991. September and November were other common months in which county governments ended their fiscal years.

Composition of Financial Amounts

Revenues and expenditures comprise actual receipts and payments of a county government and its agencies (net of such correcting transactions and recoveries or refunds), including government operated enterprises, utilities, and public trust funds. Transactions excluded are debt issuance and retirement, loans and investments, agency, and private trust transactions, and internal transfers between funds of a county government. Aggregates for county governments exclude intergovernmental transactions between those county governments.

Government Financial Sectors

County Government financial data are presented within broad activity sectors, including general government, utilities, liquor stores, and insurance trust activities. General government includes all government revenue and expenditure except activities defined as utility, liquor stores, and insurance trust transactions. Other commercial-type operations of county governments, such as port facilities, airports, toll highways, and housing projects are part of the general government sector. Utilities are water supply systems, electric power systems, gas supply systems, and transit facilities owned and operated by governments. Liquor stores consist of dispensaries operated by certain county governments only in Maryland and North Carolina. Insurance trust activities consist of contributory retirement systems for public employees.

REVENUE CONCEPTS

As noted above, revenue is reported net of recoveries and correcting transactions and excludes amounts from debt issuance, internal transfers, and private trust transactions. The following examples illustrate some applications of this summary definition:

1. Tax revenue is reported in terms of gross collections minus tax refunds during the same period.

2. Receipts from issuance of debt, recoupment of previous loans, and sale of securities are not counted as revenue.
3. Property tax amounts, widely collected by county governments acting as an agent of other governments, are counted only as revenue of the final receipt units.
4. County governments act as agents of the Federal Government in withholding Federal income and social security taxes from their employees' pay; such amounts are excluded from county revenue and expenditure but are reported as Federal revenue.
5. Figures in this report include the gross transactions of business-type county government corporations and agencies such as airports and utilities.

Taxes consist of compulsory contributions exacted by governments for public purposes. Normally this is the single largest revenue source for county governments.

Charges and miscellaneous general revenue comprise all nontax revenue of governments from their own sources (excluding amounts received from other governments). Most of this revenue is from charges for current services and sale of products in connection with general government activities. Such amounts are designated as current charges, and are reported on a gross basis, without offset for the cost of producing or buying the commodities or services sold. Utility service charges are excluded here and reported under utility revenue.

Utility revenue and liquor stores revenue comprise amounts from sales of goods and services by such undertakings. These are the most common type of enterprise activities in county governments.

Insurance trust revenue encompasses only (1) retirement contributions received from insured individuals and their employers and (2) earnings on investment assets of retirement system trust funds.

Employer contributions and other transfers made by administering governments to their insurance trust funds are treated as intragovernmental transactions rather than governmental revenue or expenditure. However, to the extent that particular governments make payments as employers to insurance trust systems administered by other governments — for example, employer contributions by state and local governments to the Federal Social Security System (OASDHI) or municipal government payments to county-administered retirement systems — are included, without special treatment, in the "revenue from contributions" of the various systems affected.

EXPENDITURE CONCEPTS

The expenditure reporting categories comprise all amounts of money paid by a government and its agencies, with the exception of amounts for debt retirement, and for loan,

investment, agency and private trust transactions. Included in this category are expenditures of business-type government corporations and agencies. Transactions not considered as expenditures include payments to the Federal Government of monies withheld for income tax or Social Security purposes.

The commonly used character and object (or use) categories this finance series employs are intergovernmental expenditure, current operation, capital outlay, assistance and subsidies, interest on debt, insurance benefits and repayments, and salaries and wages.

The major portion of county intergovernmental expenditures goes for activities such as education, hospitals, highways, welfare, and transit subsidies. The education segment reflects mainly the distribution of county-imposed property taxes to school systems for local school purposes.

Governmental expenditure for capital outlay is financed commonly by borrowing, especially for local governments; but governmental revenue does not include receipts from borrowing. This, among other things, means that the relationship between totals of revenue and expenditure, as shown in this report, should not be considered a direct measure of budgetary "balance."

In addition to payments for goods, services, and capital items, total governmental expenditure includes payments for which no services or products are directly received in return. A major portion of such payments comprise items reported here as assistance and subsidies. These amounts include only cash grants and not gifts of supplies, materials, or other grants in kind. The cost of items to be distributed in kind is included in current operation expenditure as purchases of goods and services.

Insurance benefit and repayment amounts are limited to actual payments to insured persons and beneficiaries. These amounts, therefore, exclude as internal transfers contributions by governments to insurance trust funds they administer and costs of administering insurance trust programs (which are classified as general expenditure).

Payments for salaries and wages consist of gross amounts paid to government employees before deductions for income tax, retirement contributions, charges for quarters or subsistence, or other purposes. They comprise only cash payments, and exclude the value of subsistence, quarters, or other payments in kind. Note that the salary and wage amounts were mainly for current operations but also included payments for construction work performed on a force account rather than on a contract basis.

In presenting expenditures by function, this report attempts to show a more comprehensive picture by grouping related activities into broader classifications. For example, social services and income maintenance includes public welfare, hospitals, health, social insurance administration, and veterans' services not elsewhere classified. Transportation includes

highways, airports, parking facilities, and water transport and terminals. The report does not provide totals for these larger categories because they are meant only as presentational guidelines.

Note that the functions cannot be equated specifically with a single Federal or state government program. Instead they represent broader activities of government that have remained virtually unchanged over many years so that as specific programs expand and contract they will remain useful for analytical purposes. Medicaid, for example, is a well-known program that is included in the larger public welfare function, specifically as a medical vendor payment, along with all other social welfare activities.

These functions, in addition, have utility beyond the limits of this specific report or other Volume 4 publications on government finances. All other phases of the Census of Governments, including the organization and employment, use these same functions, making cross-analyses feasible.

Each functional expenditure includes amounts for all types of activities relating to that purpose. For example, police protection includes not only police officers but also any ancillary services, such as finance, personnel, or secretarial, that directly support that activity. However, centralized county government accounting, budgeting, purchasing, personnel, and other general staff services are included in functional categories under the heading governmental administration.

Understanding the specific functional categories requires close attention to the definitions in appendix A. The following discussion supplements, but does not supplant, that basic information.

Education

The provision of this service at the elementary-secondary level is intermittent among county governments. In four states, Maryland, North Carolina, Tennessee and Virginia, the county governments are primary providers of this service. In most parts of the country, however, the county governments' elementary-secondary education role is usually limited to financial support or to providing a specific portion of the service such as vocational and special education. Some county governments also operate colleges, junior colleges and other schools beyond the high school level that are included in the education expenditures.

The education expenditures include all outlays other than for interest (reported under interest on general debt) and retirement benefits paid to former education employees (reported under employee-retirement expenditure of the appropriate government). At the elementary-secondary education level, this encompasses gross school system expenditure for the school lunch program and other cafeteria operations as well as school health, recreation, and library services administered by county school systems.

Similarly in higher education, the expenditures include gross amounts for auxiliary activities such as dormitories, dining halls, and bookstores operated by county-run institutions of higher education.

Public Welfare

This activity includes institutional and noninstitutional assistance to the needy, as well as the administration of such assistance. The cash assistance payment portion consists of old age assistance, aid to families with dependent children, aid to the blind, and aid to the disabled.

County government outlays include any applicable cash benefits in excess of, or supplementary to, those financed with Federal or state participation. General relief, which is wholly financed from state and local sources, makes up most other cash assistance. Other public welfare spending includes vendor payments under various public welfare programs, including the federally supported medical care program commonly known as Medicaid; institutional care for the needy; and administration of welfare activities.

In some states county governments administer major public assistance and relief programs, while in others the county governments only bear some portion of the financial burden. Because the administration of this activity is often a major portion of a county government's operation, comparative analyses need to take these differences into account.

Hospitals

Expenditures for hospital facilities operated directly by county governments and payments to private medical facilities belong here. The classification of medical vendor payments varies somewhat between public welfare and hospitals according to the situation. Private purveyor payments made under welfare programs are classed as public welfare; but any services provided directly by a government through its hospital agency is included under the hospitals heading.

Highways

Highways include provision and maintenance of highway facilities, including toll turnpikes, bridges, tunnels, and ferries, as well as regular roads, highways, and streets. These figures exclude interest on debt issued for highway purposes (included in general expenditure for interest) and highway policing costs (classified under police protection).

Natural Resources

For county governments, natural resources covers activities pertaining to soil conservation, flood control, irrigation and drainage. However, local water supply and electric utilities are reported under utilities.

Utilities and Liquor Stores

Utility expenditure and liquor stores expenditure comprise all spending involved in provision and conduct of such undertakings. Specifically that is the acquisition of facilities, current operation (including the purchase of goods and services for resale), and interest on utility debt.

Insurance Trusts

Only insurance benefits and repayments of contributions from insurance funds comprise insurance trust expenditure. Costs of administering insurance trust activities are classified as general expenditure. Among county governments the only existing activity of this type is for public employee retirement systems. See the report *Employee Retirement Systems of State and Local Governments (Vol. 4, No. 6, 1992 Census of Governments)*, for additional detailed information.

INDEBTEDNESS CONCEPTS

County government long-term debt includes general obligation bonds, guaranteed by the taxing power of the governments, as well as nonguaranteed indebtedness that pledges only some nontax source related to the bond purpose — rents, charges, or tolls for example — as credit. Public debt for private purposes, such as pollution control and industrial revenue issues, sometimes comprise a considerable portion of the nonguaranteed debt amounts.

CASH AND SECURITY HOLDINGS CONCEPTS

This category is dominated generally by public-employee retirement system assets. It includes only the cash or investment resources of county governments, excluding any other type of assets such as real property or fixed assets. A portion of a county government's investment portfolio, and something that can create sudden shifts in the offsets to debt, are mortgages held in conjunction with the issuance of mortgage revenue debt.

INTRAGOVERNMENTAL AND INTERGOVERNMENTAL TRANSACTIONS

Intragovernmental Flows

To achieve comparability, these statistics ignore governmental fund structure. Since the data for each individual government represent a consolidation of amounts for its various funds, payments between funds have been eliminated. Thus, for example, a government's contribution as employer to a retirement fund it administers is not counted as an expenditure nor is the receipt of this contribution by

the retirement fund considered as a revenue. For this survey's purposes, only the payment out of the fund for retirement benefits is classified as an expenditure — insurance trust expenditure in this example.

County governments sometimes pay some interest on debt that is held as investment securities by retirement funds they administer. However, because of the difficulty in identifying such transactions, this interest is counted as revenue in contravention of the rule about payments between funds.

Intergovernmental Flows

Funds flowing between governments (subject to limited exceptions, mentioned below) are treated distinctively as intergovernmental revenue and intergovernmental expenditure. Mainly these represent grants-in-aid and the sharing of tax proceeds, but also include payments in lieu of taxes and amounts for services performed by one government for another on a reimbursable or cost-sharing basis.

Total revenue and total expenditure for an individual county government, of course, include any intergovernmental amounts. When measuring groups of governments, however, monies going from one government to another must be netted out to arrive at nonduplicative totals. These aggregations treat each government as if it were a "fund" under the intragovernmental flow described above.

The value of intergovernmental aid "in kind," such as commodities distributed by the Federal Government for school lunch purposes, is not treated as intergovernmental revenue or expenditure. Furthermore, the following transactions between governments have not been isolated for special treatment here as intergovernmental in nature:

1. In situations where a government-administered employee retirement system covers the employees of a second government, contributions by the latter are included, without distinction, as part of the *current operation* expenditure of the donor government, and as *insurance trust revenue* of the donee government.
2. No attempt at special treatment has been applied to interest on outstanding debt that is paid to other governments holding the securities involved.
3. No special handling has been attempted for transactions where governments deal as ordinary suppliers and customers — e.g., in purchasing property, utility services, or supplies from one another. Under this method, then, when one government buys water or electric from a second, the entire transaction is classified as *utility* revenue or expenditure with no intergovernmental component.

UTILITIES AND LIQUOR

In Census Bureau reporting on governmental finances, the term *utilities* pertains only to four types of enterprises operated by governments — water supply, electric power,

gas supply, and transit systems. Other studies broaden this concept to include additional enterprise activities (e.g., sewerage) that the Census Bureau definition excludes. By referencing tables other than table 8, this report may yield data on these broader concepts of utilities.

Table 8 shows revenue and expenditure amounts for county operated utility systems. Of the four types of utilities shown in that table, only water supply involves any significant activity by county governments, and even this utility service is provided by relatively few counties.

Publicly operated liquor stores also retain a distinctive classification in the Census Bureau's data on governmental finances. Certain county governments in Maryland and North Carolina are the only counties that operate liquor stores. In comparison municipalities in several states and 17 state governments also manage liquor store operations.

In reviewing table 8 data, the following technical and analytical points apply:

1. Utility revenue is defined as charges only. Taxes, intergovernmental and miscellaneous general revenue are all classified under general revenue and, therefore, are excluded here.
2. Imbalances between total revenue and expenditure are common and might result from numerous factors such as the influence of general revenue described above, sporadic capital outlays from debt sources, or expenditures that are a draw down of assets.
3. Minor amounts may represent differences in the interpretation of financial classifications.

PUBLIC EMPLOYEE RETIREMENT SYSTEMS IN COUNTY GOVERNMENTS

Though most county government employees are eligible for retirement coverage, the administration of that benefit varies considerably from state to state. In some instances state administered retirement systems cover local government employees and this can take the form of general coverage for all employees or specialized coverage for a specific group of local employees such as police officers or fire fighters. Where county governments administer their own retirement systems, the greatest effect on the data in this report will likely be in cash and security holdings.

FINANCIAL DATA FOR POPULATION-SIZE GROUPS

Tables 2, 3, and 4 summarize selected financial items for various population-size classes of counties nationally and in each state. The percent distribution and per capita calculations of these basic amounts, which are also provided, tend to indicate the relative financial scale of

counties of various size. However, the scope of county government responsibility differs widely throughout the Nation. Intrastate analyses generally do not encounter this difficulty and can reveal substantial differences among size groups.

INDIVIDUAL COUNTY GOVERNMENTS

The presentations in tables 5 and 6 display financial statistics for each of the 426 individual county governments. The tabulation also contains the 1990 population and fiscal year ending date. Within each state, the county governments are arranged alphabetically.

See the discussion in "Sources and Limitations of Data" below in this text for differing analytical uses of county government and county area data.

The footnotes and symbols in tables 5 and 6 denote data that are not for the 1992 fiscal year. An "NA" indicates that the Census Bureau staff imputed information using the methods described under "Sources and Limitations of Data."

The tabular display does not reflect the full extent of data that are available for each of these governments. Contact the Data Users Service Division, U.S. Census Bureau for documentation on 92SAM (formerly File A), which contains all the individual State and local government data from the sample.

SOURCES AND LIMITATIONS OF DATA

Local Government Finances

The Local Government Sample. The sample of local governments is drawn from the 1987 Census of Governments and consists of certain local governments taken with certainty plus a sample below the certainty level. Units in the certainty group are: all county governments with a population greater than 50,000; all city and township governments with populations greater than 25,000; all school district governments with enrollments greater than 5,000; and certain specialized classes of governments such as school districts providing higher education and special districts providing transit services.

The remaining sampled units were selected with probability proportional to their financial activity. This criterion was applied first for each county area having 100,000 or more population and then for the balance of local governments in each State.

General-purpose governments. This annual survey assembled information for a sample of county, city, and township governments. The initial data collection phase used three methods to obtain data: mail canvass, field compilation, and central collection from State sources. Trained Census representatives compiled data for the 78 largest, most

important county governments—generally those with a population of 500,000 or more—and the 52 largest city governments—those with a population of 300,000 or more. The balance of the county government data and city and township data was sought from cooperative Census Bureau-State arrangements or through mail canvass efforts.

The mail canvass involved the use of detailed census schedules with related reporting instructions. Census examiners reviewed the mail reports intensively and used extensive correspondence to supplement and verify incomplete and questionable information. In significant cases where returns of acceptable data could not be obtained by mail canvass or from available published sources, Census agents visited county and city government offices to obtain the basic statistics or important missing information.

A central data collection system existed for county governments in 23 states:

Alaska	Kentucky	Oregon
Arizona	Maryland	South Carolina
Arkansas	Michigan	Utah
California	Montana	Washington
Florida	Nebraska	West Virginia
Georgia	Nevada	Wisconsin
Indiana	New York	Wyoming
Kansas	North Carolina	

The methodology used in each instance and the extent of the available data varied widely. As with mail canvass questionnaires, the basic financial data sometimes needed supplementation for such items as debt, assets, particular functional expenditures or revenue items. Census staff obtained these supplementary data from special tabulations in other state offices, printed reports, secondary sources, or supplemental mailings directly to the county governments.

Through these efforts only a minor percentage of the county data file, representing nearly all quite small county governments, remained incomplete.

If data for the 1991 fiscal year data were available, they were made part of the 1992 data file.

Individuals desiring more detailed information about the precise application of this methodology should contact the Governments Division, U.S. Bureau of the Census.

Review Procedures

All schedules—mail canvass, those compiled by Census-trained enumerators from official sources, field enumerated, and centrally collected — were examined for evidence of completeness, internal consistency, and a reasonable relation to figures reported for earlier periods. In addition to the manual review, a computerized edit checked for impossible or improbable entries and identified in detail the differences with prior data.

These procedures were designed to achieve, for the data reported here, a high standard of completeness and

accuracy. Undoubtedly, however, some mistakes and inconsistencies of official reporting, or of Census Bureau handling of particular items, have escaped detection. Please inform the Governments Division, U.S. Bureau of the Census if the tables or data tapes reveal potential problems.

Population Data

Population data used in this report, both as an exhibit and in calculating per capita amounts are from the 1990 Census of Population and Housing, April 1, 1990.

Derivative Statistics

This report shows computations that use financial data in combination with population. These statistics on "per capita" make excellent tools for comparative analyses. Before initiating this type of study, however, refer to the portions of this text that focus on some of the difficulties inherent in this type of comparability study (for example, the allocation of government responsibility).

The calculations themselves use population data for 1990. In doing the arithmetic computations for per capita data, all original finance amounts were rounded to the nearest thousand and populations were in whole numbers.

Statistical Nature of Data

Finance amounts presented in this publication are statistical in nature and do not represent an accounting statement. Therefore, a difference between an individual government's total revenues and expenditures does not necessarily indicate a "budget" surplus or deficit. Large capital outlay expenditures, debt issuance or retirement, changes in cash and security holdings, or the existence of a retirement system are all factors that might have an important influence on the balance between revenues and expenditures.

Statistical Reliability

The statistics in this report that are based wholly or partly on data from the sample are apt to differ somewhat from the results of a survey covering all governments but otherwise conducted using the same schedules and procedures. Estimates based on a sample survey are subject to sampling variability. The particular sample used is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Each of the possible samples would yield somewhat different results. The standard error is a measure of the variation among the estimates from all possible samples

and thus is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

The sample estimate and the estimated standard error can be used to construct interval estimates with prescribed confidence that the interval includes the result from a complete enumeration of all government units. For example, a 90-percent confidence interval can be constructed by adding 1.6 times the estimated standard error to the estimate and subtracting 1.6 times the estimated standard error from the estimate. If intervals were constructed in such a manner for all possible samples of the same design and size, about 90 percent of them would include the complete enumeration statistic.

In this report, all comparisons (e.g., year-to-year, State-to-State, etc.) are made at the 90-percent confidence level. In order to make such comparisons, a 90-percent confidence interval should be constructed around the difference in the two estimates. For example, an increase between two years can be tested by constructing a 90-percent confidence interval about the difference in the first year's estimate and the second year's estimate. The hypothesis that the two estimates are the same would be rejected if the confidence interval about the difference does not include zero. A statement could then be made about an increase or decrease.

State government finance data are not subject to sampling; consequently, State-local aggregates shown here for individual States are more reliable (on a relative standard error basis) than the local government estimates they include. Nationwide estimates of local government finance items and totals in this report are based upon summations of State-by-State data; consequently, these estimates are more reliable than the State-area data. Estimates of major United States totals for local governments are subject to a computed sampling variability of less than one-half of 1 percent and other local government totals are generally subject to sampling variability of less than 1 percent. Estimates of major county government totals for each state are generally subject to sampling error of 3 percent or less. Relative standard errors of more detailed revenue and expenditure items may be considerably higher, but generally under 10 percent.

The estimates are also subject to the inaccuracies in classification, response, and processing which would occur if a complete census had been conducted under the same conditions as the sample. Every effort was made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted by government officials.

Appendix E of *Government Finances: 1991-92* contains the relative standard errors of major financial variables for each State. Table E-1 contains relative standard errors for State and local government estimates; Table E-2, relative standard errors for county government estimates; and

Table E-3, relative standard errors for municipal government estimates. The relative standard error is the estimated standard error expressed as a percent of the estimated total or proportion.

County Governments and County Areas

Data in this report relate only to county governments and their dependent agencies and do not include amounts for other local governments in the same geographic location. For example, county government expenditure figures for education do not include spending by separate school districts that administer public schools within many county areas. Variations in the assignment of governmental responsibility—especially important in the areas of public welfare, health, hospitals, public housing — also have an important effect upon reported amounts of county expenditure, revenue, and debt.

Interstate comparisons should also take the allocation of governmental responsibilities into account. Refer to the section on “Individual State Descriptions,” in Volume 1, *Government Organization* (1992 Census of Governments) for a state-by-state explanation of the legal structure of local government. Table 50 in the *Compendium of Government Finances* (Volume 4, No. 5, 1992 Census of

Governments) will provide an aggregation of local government finances within the geographic boundaries of individual county areas, a data arrangement that reduces the effect of variable assignments of responsibility for local governments.

DATA IN ELECTRONIC FORMAT

The Census Bureau makes available on magnetic tape the data used for this publication. Providing much greater detail than is published, the two available formats are 92SAM (formerly File A), individual State and local government records; and 92EST (formerly File B), 416 summary records for State and local governments by State, level, and type of government. For further information, write to Customer Services Branch, Data User Services Division, U.S. Bureau of the Census, Washington, DC 20233 (telephone 301-457-4100).

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

-	Represents zero or rounds to zero.
NA	Not available.
X	Not applicable.

Table 1. Summary of County Government Finances: 1988-89 to 1991-92

[Dollar amounts in millions. Detail may not add to total because of rounding. For meaning of abbreviations and symbols, see introductory text]

Item	1991-92	1990-91	1989-90	1988-89	Percent change 1990-91 to 1991-92	Percent distribution 1991-92
	1	2	3	4	5	6
REVENUE

Note: See appendix B for factors that deserve special attention in interpreting this table. Counties were selected in table 7 based on 1986 population; counties in tables 2, 3, and 4 were distributed according to their 1990 populations.

¹Excludes "county contributions," classified as "nonrevenue," intragovernmental transfers.

²Includes items not included in detail.

³Payments to beneficiaries including withdrawal of contributions.

Note: Data partially based on estimates and subject to sampling variation; see text.

¹Utility revenue does not include certain receipts, such as permits, special assessments, intergovernmental aid (primarily transit subsidies), and interest income, classified in other general revenue categories, or subsidies from parent governments. Utility expenditure includes interest on debt.

Appendix A.

Definitions of Selected Terms

Agency and Private Trust Transactions— Transactions excluded from census data on county finances because they involve receipt, holding, and disbursement of monies by county governments as agent or trustee for other governments or private persons, such as collection of Federal income taxes and social security “taxes,” receipt and return of guarantee deposits, and the like.

Air Transportation— Construction, maintenance, operation and support of publicly operated airport facilities.

Assistance and Subsidies— For local governments this category is limited to direct cash assistance payments to public welfare recipients. See Public Welfare.

Bond Funds— Funds established to account for the proceeds of bond issues pending their disbursement.

Borrowing— Long-term debt incurred, other than to refund existing long-term debt, plus any net increase in short-term debt outstanding.

Capital Outlay— Direct expenditure for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current operation expenditure. See Construction and Equipment.

Cash and Security Holdings— Cash, deposits, and government and private securities (bonds, notes, stocks, mortgages, etc.), except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

Cash Assistance— See Public Welfare.

Construction— Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements, and provision of equipment and facilities that are integral parts of a structure. Includes construction, undertaken on a contract basis by private contractors, and force account construction, undertaken with direct use of material and labor by the county.

Correction— Confinement and correction of adults and minors convicted of offenses against the law and pardon, probation, and parole activities.

Current Charges— Amounts received from the public for performance of specific services benefiting the person charged and from sales of commodities and services except by county utilities and liquor stores. Includes fees, assessments, and other reimbursements for current services, rents and sales derived from commodities or services furnished incident to the performance of particular functions, gross income of commercial activities, and the like. Excludes amounts received from other governments (see Intergovernmental Revenue) and interdepartmental charges and transfers. Current charges are distinguished from license taxes, which relate to privileges granted by the government or regulatory measures for the protection of the public.

Current Operation— Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractual services except amounts for capital outlay.

Debt— All long-term credit obligations of the county and its agencies whether backed by the county’s full-faith and credit or nonguaranteed, and all interest-bearing short-term credit obligations. Includes judgments, mortgages, and revenue bonds, as well as general obligation bonds, notes, and interest-bearing warrants. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individual’s to benefits from county employee retirement funds. Refunding of Long-Term Debt is the issuance of long-term obligations in exchange for, or to finance, the retirement of outstanding long-term debt, generally to obtain more favorable interest rates.

Debt Issued— See Long-Term Debt Issued.

Debt Offsets— See Long-Term Debt Offsets.

Debt Outstanding— All debt obligations remaining unpaid on the date specified.

Debt Redemption— Long-term debt redeemed—i.e., amounts retired other than by refunding—plus any net decrease in short-term debt outstanding.

Debt Retired— See Long-Term Debt Retired.

Direct Expenditure— Payments to employees, suppliers, contractors, beneficiaries, and other final recipients of government payments—i.e., all expenditure other than Intergovernmental Expenditure.

Education— Schools and other educational facilities and services. Elementary and Secondary Education includes mainly county-operated elementary and secondary schools and other educational institutions (other than higher education), and intergovernmental expenditures for education, payments to private institutions, and special educational programs. Revenue and expenditure for school lunch services, athletic events, and other commercial or auxiliary services are reported on a gross basis. Institutions of Higher Education include universities, colleges, and junior and/or community colleges operated by the county.

Elementary and Secondary Education— See under Education.

Employee-Retirement Expenditure— Cash payments to beneficiaries (including withdrawals of contributions) of county-administered employee-retirement programs. Excludes cost of administering retirement systems, county contributions to State-administered employee-retirement systems, and noncontributory gratuities paid to former employees; these are classed under General Expenditure.

Employee-Retirement Revenue— Revenue from contributions required of employees for financing county-administered employee-retirement systems, earnings on investments held for such systems, and receipts of State payments for employees covered by county systems. Excludes any contributions by a county, either as employer contributions or for general financial support to an employee-retirement system. Tax proceeds, donations, and any forms of revenue other than those enumerated above are classified as general revenue rather than employee-retirement revenue, even though such amounts may be received specifically for employee-retirement purposes.

Equipment— Apparatus, furnishings, motor vehicles, office machines, and the like, having an expected life of more than 5 years. Equipment expenditure consists only of amounts for purchase of equipment. Rental and repair expenditures are classified as current operation expenditure. Expenditures for facilities that are integral parts of structures are classified as expenditure for construction or for purchase of land and existing structures.

Expenditure— All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Note that expenditure includes only external transactions such as the provision of perquisites or other payments in kind.

Financial Administration— Activities involving finance and taxation. Includes central agencies for accounting, auditing, and budgeting; the supervision of county government finances; tax administration; assessment, collection, custody, and disbursement of funds; administration of employee-retirement systems; debt and investment administration; purchasing and the like.

Fire Protection— County firefighting organization and auxiliary services: fire inspection and investigation; support of volunteer fire forces; and other fire prevention activities. Includes cost of firefighting facilities such as fire hydrants and water, furnished by other agencies of the county government.

Full-Faith and Credit Debt— Long-term debt for which the credit of the county, implying the power of taxation, is unconditionally pledged. Includes debt payable initially from specific taxes or nontax sources, but represents a liability payable from any other available resources if the pledged sources are insufficient.

General Debt— All debt other than that identified as having been issued specifically for utility purposes. See Utility Debt.

General Expenditure— All county expenditure other than the specifically enumerated kinds of expenditure classified as Utility Expenditure, Liquor Stores Expenditure, and Employee-Retirement Expenditure or other Insurance Trust Expenditure.

General Public Buildings— Provision and maintenance of public buildings not allocated to particular functions.

General Revenue— All county revenue except Utility Revenue, Liquor Stores Revenue, and Employee-Retirement Revenue and other Insurance Trust Revenue. The basis for distinction is not the fund or administrative unit receiving particular amounts, but rather the nature of the revenue sources concerned. Includes all tax collections and intergovernmental revenue, even if designed for employee-retirement or local utility purposes.

General Sales or Gross Receipts Taxes— See under Sales and Gross Receipts Taxes.

Government Administration— Comprises the functions of Financial Administration, Judicial and Legal, and General Public Buildings; and activities of the governing body, office of the chief executive, central staff services, and agencies concerned with personnel administration, recording, planning, zoning, and the like.

Health— Out-patient health services, other than hospital care, including public health administration; research and education; categorical health programs; treatment and

immunization clinics; nursing; environmental health activities such as air and water pollution control; ambulance service if provided separately from fire protection services; and other general public health activities such as mosquito abatement. School health services provided by health agencies (rather than school agencies) are included here. Sewerage treatment operations are classified under Sewerage.

Highways— Construction, maintenance, and operation of highways, streets, and related structures, including toll highways, bridges, tunnels, ferries, street lighting, and snow and ice removal. However, highway policing and traffic control are classed under Police Protection.

Hospitals— Financing, construction acquisition, maintenance or operation of hospital facilities, provision of hospital care, and support of public or private hospitals. Own Hospitals are facilities administered directly by the government concerned; Other Hospitals refers to support for hospital services in private hospitals or other governments. However, see *Public Welfare* concerning vendor payments under welfare programs. Nursing homes are included under Public Welfare unless they are directly associated with a government hospital.

Housing and Community Development— County housing and redevelopment projects and regulation, promotion, and support of private housing and redevelopment activities.

Interest Earnings— Interest earned on deposits and securities, including amounts for accrued interest on investment securities sold. However, receipts for accrued interest on bonds issued are classified as offsets to interest expenditure. Note that interest earnings shown under general revenue do not include earnings on assets of employee-retirement systems.

Interest Expenditure— Amounts paid for the use of borrowed money. Interest on utility debt is included in Utility Expenditure.

Intergovernmental Expenditure— Amounts paid to other governments as fiscal aid in the form of shared revenues and grants-in-aid; as reimbursements for performance of general government activities; and for specific services for the paying government, or in lieu of taxes. Excludes amounts paid to other governments for purchase of commodities, property, or utility services, any tax imposed and paid as such, and employer contributions for social insurance—e.g., contributions to the Federal Government for Old Age, Survivors, Disability, and Health Insurance for county employees.

Intergovernmental Revenue— Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid; as reimbursements for performance of general government functions; and for specific

services for the paying government (e.g., care of prisoners or contractual research), or in lieu of taxes. Excludes amounts received from other governments for sale of property, commodities, and utility services. All intergovernmental revenue is classified as general revenue.

Intergovernmental Revenue for General Local Government Support— Fiscal aid revenue that allows the receiving governments unrestricted use as to function or purpose.

Intergovernmental Revenue From Federal Government— Intergovernmental revenue received by the county government directly from the Federal Government. Excludes Federal aid channeled through State governments.

Intergovernmental Revenue From State Government— All intergovernmental revenue received from the State government, including amounts originally from the Federal Government but channeled through the State.

Judicial and Legal— Courts and activities associated with courts including law libraries, prosecutorial and defendant programs, probate functions, and juries.

Libraries— Public libraries operated by the county (except those operated as part of a school system primarily for the benefit of students and teachers, and law libraries) and support of privately operated libraries.

License Taxes— Taxes enacted (either for revenue raising or for regulation) as a condition to the exercise of a business or nonbusiness privilege, at a flat rate or measured by such basis as capital stock, capital surplus, number of business units, or capacity. Excludes taxes measured directly by transactions, gross or net income, or value of property except those to which only nominal rates apply. "Licenses" based on these latter measures, other than those at nominal rates, are classified according to the measure concerned. Includes "fees" related to licensing activities—automobile inspection, professional examinations and licenses, etc.—as well as license taxes producing substantial revenues.

Liquor Stores Expenditure— Expenditures for purchase of liquor for resale and provision and operation of liquor stores. Excludes expenditure for law enforcement and licensing activities carried out in conjunction with liquor store operations.

Liquor Stores Revenue— Amounts received from sale of liquor by county liquor stores and other revenues from county liquor store operations. Excludes any taxes collected by county liquor monopoly systems.

Long-Term Debt— Debt payable more than 1 year after date of issue.

Long-Term Debt Issued— The par value of long-term debt obligations incurred during the fiscal period concerned, including funding and refunding obligations. Debt obligations authorized but not actually incurred during the fiscal period are not included. Refunding Issues of Long-Term Debt represents the par value of refunding bonds issued during the fiscal year. Excludes any amounts authorized but not actually issued.

Long-Term Debt Offsets— Cash and investment assets of sinking funds and other reserve funds, however designated, which are specifically held for redemption of long-term debt, including bond reserve funds, deposits with fiscal agents for the redemption of uncanceled debt, and balances in refunding bond accounts held pending completion of refunding transactions.

Long-Term Debt Refunded— See under Long-Term Debt Retired.

Long-Term Debt Retired— The par value of long-term debt obligations liquidated by repayment or exchange, including debt retired by refunding operations. Long-Term Debt Refunded is the par value of long-term debt retired during the year as a result of refunding transactions.

Natural Resources— Flood control, soil and water conservation, irrigation, drainage, forestry and forest fire protection, agricultural fairs, and other activities for promotion of agriculture and conservation of natural resources.

N.E.C.— Not elsewhere classified.

Net Long-Term Debt— Long-term debt outstanding minus long-term debt offsets.

Nonguaranteed Debt— Long-term debt payable solely from pledged specific sources—e.g., from earnings of revenue producing activities (utilities, sewage disposal plants, toll bridges, etc.), from special assessments, or from specific nonproperty taxes. Includes only debt that does not constitute an obligation against any other resources of the county if the pledged sources are insufficient.

Other Government Administration— The governing body, county courts, office of the chief executive, and central staff services and agencies concerned with personnel administration, law, recording, planning and zoning, and the like. See also Financial Administration.

Own Hospitals— See under Hospitals.

Parking Facilities— County public-use garages and other parking facilities operated on a charge basis, including purchase and maintenance of on- and off-street parking meters.

Parks and Recreation— Cultural-scientific activities, such as museums and art galleries; organized recreation, including playgrounds and playfields, swimming pools and bathing beaches; county parks, and special facilities for recreation, such as auditoriums, stadiums, auto camps, recreation piers, and boat harbors.

Police Protection— Preservation of law and order and traffic safety. Includes police patrols and communications, crime prevention activities, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

Property Taxes— Taxes conditioned on ownership of property and measured by its value. Includes general property taxes related to property as a whole, real and personal, tangible or intangible, whether taxed as a single rate or at classified rates, and taxes on selected types of property, such as motor vehicles or certain or all intangibles.

Protective Inspection and Regulation— Regulation of private enterprise for the protection of the public and inspection of hazardous activities except where done incident to major functions, such as fire prevention, health, natural resources, etc. Distinctive licensing collection activities are classed under Financial Administration.

Public Safety— Comprises the functions of Police Protection, Fire Protection, Correction, and Protective Inspection and Regulation.

Public Welfare— Support of and assistance to needy persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include: Cash Assistance paid directly to needy persons under the categorical programs (Old Age Assistance, Aid to Families with Dependent Children, Aid to the Blind, and Aid to the Disabled) and under any other welfare programs; Vendor Payments made directly to private purveyors for medical care, burials, and other commodities and services provided under welfare programs; and provision and operation by the county of Welfare Institutions. Other Public Welfare includes payments to other governments for welfare purposes, amounts for administration, support of private welfare agencies, and other public welfare services. Health and Hospital services provided directly by the county through its own hospitals and health agencies and any payments to other governments for such purposes are classed under those functional headings rather than here.

Purchase of Land and Existing Structures— Purchase of these assets as such, purchase of rights-of-way, and title search and similar activity associated with the purchase transactions.

Refunding Issues of Long-Term Debt— See under Long-Term Debt Issued.

Refunding of Long-Term Debt— See under Debt.

Revenue— All amounts of money received by a government from external sources—net of refunds and other correcting transactions—other than from issuance of debt, liquidation of investments, and as agency and private trust transactions. Note that revenue excludes noncash transactions such as receipt of services, commodities, or other “receipts in kind.”

Salaries and Wages— Amount expended for compensation of employees. Consists of gross amounts without deduction of withholdings for income tax, social security, or retirement coverage.

Sale of Property— Sale of real property and improvements. Excludes sale of securities and sale of commodities, equipment, and other personal property.

Sales and Gross Receipts Taxes— Taxes, including “licenses” at more than nominal rates, based on volume or value of transfers of goods or services; upon gross receipts, or upon gross income, and related taxes based upon use, storage, production (other than severance of natural resources), importation, or consumption of goods. Dealer discounts or “commissions” allowed to merchants for collection of taxes from consumers are excluded. Comprises:

General Sales or Gross Receipts Taxes— Sales or gross receipts taxes which are applicable with only specified exceptions to all types of goods and services, or all gross income, whether at a single rate or at classified rates. Taxes imposed distinctively upon sales of or gross receipts from selected commodities, services, or businesses are reported separately under category listed below.

Selective Sales and Gross Receipts Taxes— Sales and gross receipts taxes imposed on sales of particular commodities or services or gross receipts of particular businesses, separately and apart from the application of general sales and gross receipts taxes.

Sanitation— Comprises Sewerage and Sanitation Other Than Sewerage (see below). Sanitary engineering, smoke regulation, and other health activities are classified under Health.

Securities— Stocks and bonds, notes, mortgages, and other formal evidences of indebtedness.

Selective Sales and Gross Receipts Taxes— See under Sales and Gross Receipts Taxes.

Sewerage— Sanitary and storm sewers and sewage disposal facilities and services, and payments to other local governments for such purposes.

Short-Term Debt— Interest-bearing debt payable within 1 year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

Solid Waste Management— Street cleaning and collection or disposal of garbage and other waste.

Special Assessments— Compulsory contributions collected from owners of property benefited by special public improvements (street paving, sidewalks, sewer lines, etc.) to defray the cost of such improvements (either directly or through payment of debt services on indebtedness incurred to finance the improvements) and apportioned according to the assumed benefits to the property affected by the improvements.

Taxes— Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that county tax revenue excludes any amounts from shares of State-imposed and collected taxes, which are classified as intergovernmental revenue.

Transit Subsidies— Payments in support of subway, bus, surface rail and street railroad, and other passenger transportation systems, including public support of a private utility or railroad and intergovernmental subsidy payments. Excludes amounts paid by a parent government to its dependent transit utility. Also see under Utilities.

Transportation— Comprises the function of Highways, Air Transportation, Parking Facilities, Water Transport and Terminals, and Transit Subsidies.

Utility— A county owned and operated water supply, electric, light and power, gas supply, or transit system. County revenue, expenditure, and debt relating to utility facilities leased to other governments or persons, and other commercial type activities of county governments, such as port facilities, airports, housing projects, radio stations, steam plants, ferries, abattoirs, etc., are classified as general government activities. Also see Transit Subsidies.

Utility Debt— Debt originally issued specifically to finance county-owned and operated water, electric, gas, or transit utility facilities.

Utility Expenditure— Expenditure for construction of utility facilities or equipment, for production and distribution of utility commodities and services (except those furnished to parent county), and for interest on utility debt. Does not include expenditure in connection with administration of utility debt and investments (treated as general expenditure) and the cost of providing services to the parent county government (such costs, when identifiable, are treated as expenditure for the function served).

Utility Revenue— Revenue from sale of utility commodities and services to the public and to other governments. Does not include amounts from sales to the parent county.

Also excludes income from utility fund investments and from other nonoperating properties (treated as General Revenue). Any revenue from Taxes, Special Assessments, and Intergovernmental Revenue is classified as General Revenue, not Utility Revenue.

Vendor Payments— See under Public Welfare.

Water Transport and Terminals— Provision, operation, and support of canals and other waterways, harbors, docks, wharves, and other related terminal facilities.

Appendix B. Factors Affecting County Finances

Listed below are some factors which deserve special attention in interpreting data shown in tables 5, 6, and 7.

DADE COUNTY, FL

The long-term debt outstanding amount includes \$865,275,000 of Aviation Department revenue bonds.

JEFFERSON PARISH, LA

The long-term debt outstanding amount includes \$9,595,000 for water supply.

ANNE ARUNDEL COUNTY, MD

The long-term debt includes \$243,160,000 for water and sewer systems and \$4,105,000 for public schools.

CLARK COUNTY, NV

The long-term debt outstanding amount includes \$648,705,000 for airport revenue bonds.

NEW JERSEY

Effective January 1, 1992, housing authorities were classified as dependent agencies of the county, borough, city, town, village, or township government they serve. Previously, they had been considered special district governments.

ALBANY COUNTY, NY

The long-term debt includes \$211,220,000 for state office buildings (South Mall).

HARRIS COUNTY, TX

Toll road bonds in the amount of \$1,122,146,000 are included in the long-term debt outstanding.

MARYLAND AND NORTH CAROLINA COUNTY LIQUOR STORES

In the following counties in Maryland and North Carolina, utility data include county liquor store operations in the indicated amounts:

County	Revenue (dollars)	Expenditure (dollars)
Montgomery County MD	103,330,000	86,699,000
Catawba County, NC	7,669,000	6,379,000
Cumberland County, NC	7,279,000	6,193,000
Durham County, NC	9,120,000	7,935,000
Mecklenburg County, NC	33,052,000	28,575,000
New Hanover County, NC	9,034,000	7,398,000
Onslow County, NC	2,970,000	2,661,000
Rowan County, NC	4,483,000	4,083,000
Wake County, NC	21,150,000	16,344,000

Appendix C.

Finances of Individual City-Counties Having 100,000 Population Classified as Municipalities: 1991-92

[Dollar amounts in thousands. For meaning of abbreviations and symbols, see introductory text]

¹Officially designated a "city and county."

²The following are consolidated or substantially merged for governmental purposes: Columbus and Muscogee County; Indianapolis and Marion County; Baton Rouge and East Baton Rouge Parish; New Orleans and Orleans Parish; Boston and Suffolk County; New York City and the five counties—Bronx, Kings, New York, Queens, and Richmond; and Philadelphia and Philadelphia County. The cities of Chelsea and Revere and the town of Winthrop are also located within Suffolk County, but all "county" activities are financed by Boston.

³Officially designated as the Lexington-Fayette Urban County Government.

⁴An "independent city" (or district), not within any county, but included in many reports and listings of "county areas."

⁵Officially designated as the Metropolitan Government of Nashville and Davidson County.

⁶There are 41 independent cities in Virginia (as of Jan. 1, 1992). Only those with more than 100,000 inhabitants are shown here.
