SURVEY OF MINORITY-OWNED
BUSINESS ENTERPRISES

Summary

Acknowledgments

Many persons participated in conducting the 1992 Survey of Minority-Owned Business Enterprises. Primary direction was performed by **Frederick T. Knickerbocker**, Associate Director for Economic Programs; and **Thomas L. Mesenbourg**, Assistant Director for Economic Programs.

This report was prepared in the Agriculture and Financial Statistics Division (AGFS) under the general direction of **Dr. Ewen Wilson**, Chief; and **Ruth A. Runyan**, Assistant Division Chief for Financial Statistics.

The overall project development and planning of this report were under the direction of **Eddie J. Salyers**, Chief, Company Statistics Branch. **Valerie C. Strang** directed and implemented planning procedures, specification development, data collection, editing, and compilation of this report. Staff assistance was provided by **Melody Atkinson**, **Ahmad Bakhshi**, **Traci Brown**, **Rebecca Clement**, **Elaine Emanuel**, **Barbara Esworthy**, **Jesus Garcia**, **Donna Hambric**, **Durwin Knutson**, **Sungsoo Oh**, and **Patricia Patriarca**.

Development and implementation of the statistical methodology were performed under the general supervision of **Mitchell Trager**, Assistant Division Chief for Research and Methodology, Economic Census and Surveys Division (ECSD) and **Ruth Detlefsen**, Assistant Division Chief for Research and Methodology (AGFS). Direction in those areas was provided by **Kenneth Sausman**, Chief, Statistical Methods Branch, (ECSD) and **Carol Caldwell**, Chief, Frame Research and Development Branch (AGFS). **David Raglin**, preceded by **Mark Sands**, was assigned primary responsibility for sample design, imputation, and estimation with staff assistance by **Bill Kirby** and **Julia Klein Griffiths**. Keying procedures were developed by **Charles Fowler**, **Ellen Kummer**, and **Benjamin Stephens** of the Directory Operations Branch (ECSD).

Computer programs were developed in the Economic Statistical Methods and Programming Division under the general supervision of **Charles P. Pautler, Jr.**, Chief; and **Martin S. Harahush**, Assistant Division Chief for Quinquennial Programs; with assistance from **Steven G. McCraith**, Chief, Quinquennial Surveys Branch; and **Gary Sweetland**, Chief, Mailout and Data Collection Branch. **Joseph F. Keehan** was assigned primary programming responsibility with assistance from **John D. Bedwell**, **Sarah J. Castillo**, **William E. Dyer**, **Thaddeus S. Hess**, **Stephen D. Jarvis**, **James L. Kirk**, **Steven W. Laudrille**, **John E. McCormick**, and **Andrew M. Stevenson**.

The staff of the Technical Services Division, **Teresa Angueira**, Chief, captured the response data electronically using a Film Optical Sensing Device for Input to Computer (FOSDIC) operation.

The staff of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, performed publication planning, design, composition, editorial review, and procurement for publications. **Frances B. Scott** and **Helen M. Curtis** provided publication coordination and editing. **Evelyn Fedorko** and **Shirley Boswell** were responsible for design and procurement of the report forms, respectively.

Mailout preparation and receipt operations, clerical activities, and data keying were performed by the staff of the Data Preparation Division, **Judith N. Petty**, Chief.

Computer processing was performed in the Computer Services Division, **Marvin D. Raines**, Chief.

Photocomposition programs for the statistical tables were developed in the Systems Support Division, **Richard W. Swartz**, Chief.

The overall planning and review of the census operations were performed by the staff of the office of the Assistant Director for Economic and Agriculture Censuses.

This survey depended upon the cooperation of the staffs of the Internal Revenue Service and the Social Security Administration. Thanks are due to **Daniel Skelly**, Chief, Statistics of Income Division, **Karen Cys**, and **Ken Szelinski** of the Internal Revenue Service; **Warren Buckler**, **Barry Bye**, **Harry Stamer**, **Frank Thomas**, and **Peter Wheeler** of the Social Security Administration; and **Lynda DiNenna**, **Cheryl A. Leigh**, **Harvey Monk**, and **Edward D. Walker** of the Census Bureau, who coordinated activities with the agencies.

If you have any questions concerning the statistics in this report, call 301-763-5726.

Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the Nation's economy. It provides essential information for government, business, industry, and the general public.

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policymaking agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in 2 and 7. The 1992 Economic Census consists of the following eight censuses:

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Financial, Insurance, and Real Estate Industries
- Census of Transportation, Communications, and Utilities
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1992 Census of Agriculture and 1992 Census of Governments are conducted separately.) The next economic census is scheduled to be taken in 1998 covering the year 1997.

AVAILABILITY OF THE DATA

The results of the economic census are available in printed reports for sale by the U.S. Government Printing Office and on compact discs for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Bureau of the Census, Washington, DC 20233-1900. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State data centers in every State as well as business and industry data centers in many States also supply economic census statistics.

WHAT'S NEW IN 1992

The 1992 Economic Census covers more of the economy than any previous census. New for 1992 are data on communications, utilities, financial, insurance, and real estate, as well as coverage of more transportation industries. The economic, agriculture, and governments censuses now collectively cover nearly 98 percent of all economic activity.

Among other changes, new 1992 definitions affect the boundaries of about a third of all metropolitan areas. Also, the Survey of Women-Owned Businesses has now been expanded to include all corporations.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1963, 1958, and 1954. Prior to that time, the individual subcomponents of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic

activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 Manufactures Census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 Economic Census was the first census to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other Federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic census, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The census of construction industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The census of transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks, but expanded in 1987 to cover business establishments in several transportation industries. For 1992, these statistics are incorporated into a broadened census of transportation, communications, and utilities. Also new for 1992 is the census of financial, insurance, and real estate industries. This is part of a gradual expansion in coverage of industries previously subjected to government regulation.

The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic census in 1972 along with the Survey of Women-Owned Businesses.

An economic census has also been taken in Puerto Rico since 1909, in the Virgin Islands of the United States and Guam since 1958, and in the Commonwealth of the Northern Mariana Islands since 1982.

Statistical reports from the 1987 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the census provides complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, with the results appearing in publication series such as Current Business Reports (retail and wholesale trade and service industries), the Annual Survey of Manufactures, Current Industrial Reports, and the Quarterly Financial Report. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic detail than the census. The County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1992 Economic Census and Related Statistics*. More information on the methodology, procedures, and history of the census will be published in the *History of the 1992 Economic Census*. Contact Customer Services for information on availability.

Survey of Minority-Owned Business Enterprises

GENERAL

The Survey of Minority-Owned Business Enterprises (SMOBE) provides basic economic data on businesses owned by Blacks, persons of Hispanic or Latin American ancestry, and persons of Asian, Pacific Islander, American Indian, or Alaska Native descent. The survey is based on the entire firm rather than on establishments of a firm. The published data cover number of firms, gross receipts, number of paid employees, and annual payroll. The data are presented by geographic area, industry, size of firm, and legal form of organization of firm.

CENSUS DISCLOSURE RULES

The Bureau of the Census is prohibited by law from publishing any statistics that disclose information reported by individual companies or their establishments. Publishing the number of firms is not considered a disclosure by the Bureau of the Census rules. Therefore, these data are shown, even when other data must be withheld. The information and data obtained from the Internal Revenue Service (IRS), the Social Security Administration (SSA), and other sources are also treated as confidential and can be seen only by Bureau of the Census employees sworn to protect it from unwarranted disclosure.

SURVEY METHODOLOGY

Included in the universe of this survey is any activity for which an IRS form 1040, Schedule C (individual proprietorship or self-employed person); 1065 (partnership); or 1120S (subchapter S corporation) was filed in 1992. A subchapter S corporation is a special IRS designation for legally incorporated businesses with 35 or fewer shareholders who, because of tax advantages, elect to be taxed as individual shareholders rather than as corporations. For businesses filing those forms, the IRS provided the Census Bureau with the following information:

- Name and address of the firm
- Employer identification number of the firm
- Social Security numbers (SSN's) of the owners for filers of Form 1040 Schedule C
- Principal industrial activity code (see Comparability of 1987 and 1992 Data)

- Dollar receipts
- Legal form of organization

Individual Proprietorships and Self-Employed Persons (Filers of Form 1040 Schedule C)

The methodology for collecting information about businesses owned by Hispanics, Asians, Pacific Islanders, American Indians, and Alaska Natives that filed IRS Form 1040, Schedule C, was similar to 1987. The SSN's of the owners were sent to the SSA, which provided the race codes that were indicated by the individuals on their original applications for SSN's.

Persons applying for SSN's prior to 1981 could categorize their race as (a) White, (b) Black, or (c) Other. In 1981, the racial descriptions on social security applications were expanded to (a) Asian, Asian-American, or Pacific Islander, (b) Hispanic, (c) Black, (d) Northern American Indian or Alaskan Native, and (e) White.

Most persons who currently own businesses applied for their SSN's prior to 1981. Therefore, the majority of owners could be classified only as "White," "Black," or "Other" by use of SSA race codes. The SSA race codes were sufficient to determine if a firm was Black-owned, but a sample mail canvass was used to determine if a firm was owned by persons of Hispanic; Asian; Pacific Islander; American Indian or Alaska Native ancestry. Individual proprietors who reported they were of minority ancestry in the 1987 survey and whose firms were still active in 1992 were excluded from the mail canvass.

The Census Bureau has developed lists of Hispanic and Asian surnames. A firm was considered potentially minority owned if the owner's surname was included on these lists or the owner's SSA race code was "Hispanic" or "Other." Survey forms were sent to the following potentially minority-owned firms:

1. Individual proprietorships with no employees were sampled at varying rates based on the numbers of firms in a particular industry and State. All cases were selected in States and industries where there were relatively few firms, and the sampling rate was lowest in States and industries with the greatest number of firms. No sampling rate was lower than one in ten. Some cases were selected with certainty based on receipts size and their respective industry and State.

2. Individual proprietorships with paid employees were sampled at a rate of one in two, or were selected with certainty based on receipts size, number of employees, and annual payroll for their respective industry and State.

A similar methodology was used to select a sample from the remaining universe of individual proprietorships. A survey form was sent to these cases to estimate the number of firms owned by Americans of minority ancestry who have surnames more often associated with nonminority ancestries. These firms are not included in the published tables, but estimates of the undercoverage are shown on pages 3 and 4.

Partnerships and Subchapter S Corporations (Filed either IRS Form 1065 or 1120S)

The methodology for collecting information about minority-owned partnerships and subchapter S corporations changed in 1992. Information about the surnames of the business owners was not available. Therefore, a sample of all of the businesses filing 1065 and 1120S tax forms was taken at varying rates depending on the State, industry, and employer/nonemployer status of the businesses, and past SMOBE surveys indicating that the business was Black-, Hispanic-, Asian-, Pacific Islander-, American Indian- or Alaska Native-owned. A firm selected into the sample was mailed a form to determine the ethnicity and race of the owners.

In this publication, a firm is classified as minority-owned if the sole owner or information reported for the majority of owners of partnerships and subchapter S corporations indicated Black, American Indian, Alaska Native, Asian American or Pacific Islander race or Hispanic ancestry.

It was possible for a firm to be classified in more than one minority group (one racial and one Hispanic ethnicity) and to be included in more than one minority report. For example, a firm could be included in both this report and the Hispanic report if it were owned equally by two people, one of Japanese ancestry and one of Mexican ancestry. However, such a firm is counted only once at total levels in this publication.

The following information was obtained for each firm from the Census Bureau's 1992 Economic Census files:

- Standard industrial classification code (SIC) (see Industry Classifications)
- Geographic code
- Legal form of organization code
- Number of employees, annual payroll, and receipts for firms with paid employees

RELIABILITY OF ESTIMATES

The figures shown in this report are, in part, estimated from a sample and will differ from the figures which would have been obtained from a complete census. Two types of

possible errors are associated with estimates based on data from sample surveys: sampling errors and nonsampling errors. The accuracy of a survey result depends not only on the sampling errors and nonsampling errors measured, but also on the nonsampling errors not explicitly measured. For particular estimates, the total error may considerably exceed the measured errors. The following is a description of the sampling and nonsampling errors associated with the 1992 SMOBE.

Sampling variability. The particular sample used for this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The relative standard error is a measure of the variability among the estimates from all possible samples. The estimated relative standard errors presented in the tables estimate the sampling variability, and thus measure the precision with which an estimate from the particular sample selected for this survey approximates the average result of all possible samples. Relative standard errors are applicable only to those published cells in which sample cases are tabulated. A relative standard error is an expression of the standard error as a percent of the quantity being estimated.

The sample estimate and an estimate of its relative standard error can be used to estimate the standard error and then construct interval estimates with a prescribed level of confidence that the interval includes the average results of all samples. To illustrate, if all possible samples were surveyed under essentially the same condition, and calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average value of all possible samples.

Thus, for a particular sample, one can say with specified confidence that the average of all possible samples is included in the constructed interval.

Example of a confidence interval. In table 1, the estimated number of employer minority-owned firms in Agriculture is 7,139. The estimated relative standard error is 2 percent. The estimated standard error is $7,139 \times .02 = 143$. An approximate 90-percent confidence interval is $7,139 \pm 143$ or 6,996 to 7,282.

Nonsampling errors. All surveys and censuses are subject to nonsampling errors. Nonsampling errors are attributable to many sources: inability to obtain information

for all cases in the universe, imputation for missing data, data errors and biases, mistakes in recording or keying data, errors in collection or processing, and coverage problems.

Explicit measures of the effects of these nonsampling errors are not available. However, it is believed that most of the important operational and data errors were detected and corrected through an automated data edit designed to review the data for reasonableness and consistency. Quality control techniques were used to verify that operating procedures were carried out as specified.

Approximately 77 percent of the questionnaires were returned. For those that were not returned, data were imputed using a procedure which substituted the data of a respondent with similar demographic characteristics. This procedure assumes that nonrespondents possess the same characteristics as respondents with similar demographic characteristics, but this is never exactly true.

INDUSTRY CLASSIFICATIONS

The system published in the *Standard Industrial Classification Manual: 1987* was used to classify firms for this report. Under this system, economic activities are coded on a numerical basis. Related activities are grouped at a primary level by industry division (i.e., manufacturing, construction, retail trade, etc.). Within each industry division, successive levels of detail of the economic activity are defined: major group (two-digit code); industry group (three-digit code); and industry (four-digit code). For example, one hierarchy in wholesale trade is:

SIC level	SIC code	Description
Industry division	—	Wholesale trade
Major group	50	Durable goods
Industry group	506	Electrical goods
Industry	5064	Electrical appliances, television and radio sets

Data in this report are presented at the industry division or major group level, depending on the table.

This study covers all industries in the SIC system except the following: Major Groups 01 and 02, Agricultural Production; 40, Railroad Transportation; 43, U.S. Postal Service; 86, Membership Organizations; 88, Private Households; and 91-97, Public Administration.

GEOGRAPHIC AREAS COVERED

This report presents data for the United States, each State and the District of Columbia; metropolitan areas (MA's), which include metropolitan statistical areas (MSA's) and primary metropolitan statistical areas (PMSA's); counties; and places with 100 or more minority-owned firms.

MSA's. The MSA's for which data are shown are among those defined by the Office of Management and Budget as of June 30, 1993. An MSA is an integrated economic and social unit with a population nucleus of at least 50,000 inhabitants.¹ Each MSA consists of one or more counties meeting standards of metropolitan character; in New England, cities and towns, rather than counties, are the component geographic units.

PMSA's. An MSA with a population of 1 million or more may be subdivided into PMSA's. A PMSA consists of a large urbanized county or a cluster of counties (cities and towns in New England) that demonstrates very strong internal economic and social links separate from the ties to other portions of its MSA. Where PMSA's are defined, the MSA of which they are component parts is redesignated a consolidated metropolitan statistical area (CMSA).

Counties. Data are shown for counties or county equivalents.² ³

Places. Included in this publication are places of 2,500 inhabitants or more or incorporated as a city, borough, village, or town.¹ ² Boroughs and census areas in Alaska, boroughs in New York, and towns in New York and Wisconsin are not included in this category. It does, however, include towns in the New England States and townships in New Jersey and Pennsylvania that are not classified as incorporated places if they have a total population of 10,000 or more.

COMPARABILITY OF 1987 AND 1992 DATA

The following changes were made in survey methodology in 1992 which affect comparability with past reports:

1. In the past, administrative data were used to classify individual proprietorships, partnerships, and subchapter S corporations as potentially minority owned for sampling. In 1992, the use of some administrative records data from the IRS and SSA which identify owners of partnerships and subchapter S corporations was discontinued. Therefore, a sample of all partnerships and subchapter S corporations was canvassed to determine which were minority-owned. Consequently, the information reported by these businesses may, in fact, differ from what would have been obtained from administrative data.
2. Since the 1987 survey, the number of subchapter S corporations (included in SMOBE) has risen at a much faster rate than the number of C corporations (not

¹ According to 1990 Census of Population or subsequent special census.

² Those defined as of January 1, 1987

³ See appendix C for Alaska, Louisiana, Maryland, Missouri, Montana, Nevada, Virginia, and District of Columbia county equivalents.

included in SMOBE). The net result was an approximately 20 percent increase in the SMOBE universe compared to an approximately 12 percent overall increase in business tax returns.

3. In 1987, classifications for firm data were based on the 1972 SIC manual. For 1992, classifications are based on the 1987 SIC manual. The SIC structure was changed to better reflect industry trends. These changes limit the comparability of data between the 1987 and 1992 SMOBE.
4. There was significant overstatement in the number of employer firms in 1987 due to processing errors. The overstatement primarily affects the number of employers, but minimally affects the employee and payroll numbers.

COMPARABILITY OF SURVEY DATA WITH OTHER ECONOMIC CENSUS DATA

Tables 10 through 14 show data for all firms that are comparable to the minority data in this report. Caution should be exercised in comparing data presented in this report with published or unpublished data from other reports of the 1992 Economic Census. Factors that affect comparability of data among censuses are industrial scope, business unit covered, receipts size, and coverage of nonemployers.

Industrial scope. Data in this report are based on the 1987 SIC Manual⁴ (see Industry Classifications). Most of the industries in scope of the other 1992 Economic Censuses were also in scope of this study. However, Major Group 86, Membership Organizations, was within the scope of the 1992 Economic Census, but out of the scope of the 1992 SMOBE.

The following major industry groups were in scope of this study, but not in scope of the other economic censuses (see exceptions below): Major Groups 07, Agricultural Services; 08, Forestry; 09, Fishing, Hunting, and Trapping; and domestically-owned scheduled airlines in industry 4512.

In this study, industry 6552 (land subdividers and developers, except cemeteries) is included with the construction industry group, unlike the other economic censuses which include it with industry 65 (real estate).

Business unit. Most of the economic censuses are conducted on an establishment or physical location basis;

each establishment owned by a firm is individually canvassed and tabulated. In this report, however, the unit tabulated was the firm rather than each establishment of the firm. (See appendix A for definition of "firm.")

Receipts size. Most of the economic censuses determine whether or not a firm may be counted as an active business according to its receipts size. The specified minimums vary by industry. For this study, a firm had only to file a business tax return with business receipts greater than \$500 for it to be counted as an active business.

Nonemployer firms. Although nonemployer firms are included in this survey, they are omitted from many of the economic census reports.

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars, i.e., 1992 data are expressed in 1992 dollars and 1987 data in 1987 dollars. Consequently, when making comparisons to prior years, users should take into consideration the inflation that has occurred.

COMPACT DISCS

Data for the economic censuses are also available on compact discs-read only memory (CD-ROM). For this report, discs will contain more detailed comparison data for all firms by State and MA, as well as the same information found in the report. Discs are sold by Administrative and Customer Services Division, Bureau of the Census, Washington, DC 20233-1900.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1992 Survey of Minority-Owned Business Enterprises may be obtained, depending on availability of time and personnel, on diskette, computer tape, or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual firms) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Company Statistics Branch, Agriculture and Financial Statistics Division, Bureau of the Census, Washington, DC 20233-1900.

Estimates of Total Firms Owned by Minorities

In 1992, there were 2,149,184 firms with \$210.0 billion in receipts owned by minorities as shown in table A. Detailed geographic and industry estimates are available in tables 1 to 9 of this report for 1,965,565 (92 percent) of these firms. Data for these firms were obtained from a sample of firms identified as possibly minority-owned based on race and ethnicity codes from Social Security records and by matching surnames of owners to lists of minority surnames from the most recent population census of the United States.

A small supplemental sample of the remaining firms was mailed to obtain estimates of the number of minority-owned firms that were not identified as possibly minority using the Social Security codes and surname information. Of the approximately 11.5 million firms eligible for this supplemental sample, about 150,000 were sampled and mailed. From

responses to this mailout, we estimate an additional 183,619 firms or 8.5 percent to be minority-owned.

The supplemental sample was not large enough to support the detailed estimates presented in tables 1 to 9. The only estimates for minority-owned businesses identified in the supplemental sample are presented in table C.

Table A provides estimates for all minority-owned firms by industry group. Table B includes those firms identified as possibly minority-owned prior to sampling. Detailed estimates for them are available in tables 1 to 9. Table C presents data for minority-owned firms not included in tables 1 to 9. Table D shows the percentage of the total estimate from businesses identified as possibly minority-owned prior to sampling.

Summary of Findings

All of the following data are based only on the 1,965,565 minority-owned businesses for which cross tabulations could be made. They do not include the 183,619 firms discussed in the previous section for which detailed estimates are not available.

Minority-owned firms increased 62 percent from 1,213,750 in 1987 to 1,965,565 in 1992. Receipts increased by 160 percent from \$77.8 billion to \$202.0 billion. Table A provides summary totals for 1987 and 1992 by minority group. Figure 1 shows the distribution of firms and receipts by minority group.

The data in this report were collected as part of the 1992 Economic Census from a large sample of all nonfarm businesses filing 1992 tax forms as individual proprietorships, partnerships, or subchapter S corporations, and with receipts of \$500 or more.

Black women owned the largest share (39 percent) of firms owned by minority women. Hispanic men owned the largest share (42 percent) of firms owned by minority men.

Asians and Pacific Islanders, American Indians, and Alaska Natives had the largest share of receipts for both minority men and women. Table B shows each minority group by gender.

COMPARISON TO ALL U.S. FIRMS

Comparable data for all businesses showed a 26 percent increase in number from 13.7 million in 1987 to 17.3 million in 1992, while receipts grew 67 percent from \$1,995 billion to \$3,324 billion.

Minority-owned firms accounted for 11 percent of the total number of all individual proprietorships, partnerships, and subchapter S corporations in the United States and 6 percent of their gross receipts.

Note: Detail in this table does not add to total because of duplication of some firms. Firms that were owned equally by two or more minorities are included in the data for each minority group but counted only once at total levels.

Asian, Pacific Islander, American Indian, and Alaska Native	208,647	24,853	29.1	49.9

Note: Detail in this table does not add to total because of duplication of some firms. Firms that were owned equally by two or more minorities are included in the data for each minority group but counted only once at total levels.

Average receipts per firm varied depending upon race, Hispanic origin, and gender. Firms owned by nonminority men had the highest average receipts with \$250,000, followed by firms owned by Asian, Pacific Islander, American Indian, and Alaska Native men with \$188,000. Firms owned by Black women had the lowest average receipts with \$31,000. Figure 2 shows average receipts per firm by race, Hispanic origin, and gender.

Of the major industry sectors, minorities owned the largest share of firms in transportation, communications, and utilities industries, with 17 percent of all firms. They owned the smallest share of firms in mining industries, with 2 percent of all firms. Table C compares the distribution of minority-owned firms with all U.S. firms by industry.

Minority-owned firms accounted for the largest share of firms in Hawaii with 52 percent of all firms and 46 percent of all receipts. The next largest share of firms was in the District of Columbia with 36 percent of all firms and 10 percent of all receipts. As might be expected, these areas also had the largest percentage of minority population. Table D shows the 10 States with the largest share of minority-owned firms compared to all U.S. firms and population.

INDUSTRY CHARACTERISTICS

Forty-eight percent of minority-owned firms were in the service industry and they accounted for 26 percent of gross receipts in that industry. Nearly half of these service firms provided business and personal services. The retail trade industry accounted for 16 percent of the minority-owned firms and 26 percent of the receipts.

The service industry accounted for 58 percent of the firms and 30 percent of the receipts for minority women but only 42 percent of the firms and 25 percent of the receipts for minority men. Construction firms accounted for 12 percent of the firms owned by minority men but only 2 percent of the firms owned by minority women. Table E shows the 10 industry groups with the greatest receipts by gender for minority-owned firms. Figure 4 shows the distribution of firms by industry for each minority group.

GEOGRAPHIC CHARACTERISTICS

California had the largest number of firms (541,414) and receipts \$61.8 billion, accounting for 28 percent of all minority-owned firms and 31 percent of their receipts. Texas had the second largest number of firms (241,334) but ranked third in receipts with \$19.7 billion, accounting for 12.3 percent of all minority-owned firms but only 10 percent of their receipts. Florida was third in number of firms

(173,287) but was second in receipts with \$21.2 billion. Florida accounted for 9 percent of all minority-owned firms but 10 percent of their receipts.

Table F shows the 10 metropolitan areas (MA's) with the largest number of minority-owned firms and compares the firms and receipts in these MA's with the number in their respective States. These 10 MA's accounted for 41 percent of the total number of minority-owned firms in the United States and 45 percent of their receipts.

LEGAL FORM OF ORGANIZATION

The majority of minority-owned firms operated as individual proprietorships in 1992 (1,746,027 or 89 percent, down from 93 percent in 1987). This group accounted for 38 percent of gross receipts compared to 59 percent in 1987. Of the total number of firms, 125,155 or 6.4 percent were subchapter S corporations, accounting for 43 percent of gross receipts. This is up from 3.5 percent of the firms and 30 percent of the gross receipts in 1987.

Partnerships accounted for only 4.8 percent of the total number of firms and 19 percent of the gross receipts. They accounted for 3.5 percent of the minority-owned firms and 11 percent of the gross receipts in 1987.

SIZE OF FIRM

Minority-owned firms with paid employees accounted for 16 percent of the total number of firms and 79 percent of gross receipts. There were 1,690 firms with 100 employees or more. They accounted for \$33.8 billion in gross receipts.

Minority-owned firms with gross receipts of \$1 million or more accounted for 52 percent of the total gross receipts but only 1.2 percent of the total number of firms. Forty-six percent of the firms had receipts of less than \$10 thousand.

Table 1. Statistics for Minority-Owned Firms by Major Industry Group and Minority: 1992 and 1987—Con.

[Detail may not add to total because of rounding and because a firm may be included in more than one minority group (see Survey Methodology in the introductory text). This table is based on the 1987 SIC system. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendix A]

Table 1. Statistics for Minority-Owned Firms by Major Industry Group and Minority: 1992 and 1987—Con.

[Detail may not add to total because of rounding and because a firm may be included in more than one minority group (see Survey Methodology in the introductory text). This table is based on the 1987 SIC system. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendix A]

18 SUMMARY

MINORITY-OWNED BUSINESS ENTERPRISES

Table 1. Statistics for Minority-Owned Firms by Major Industry Group and Minority: 1992 and 1987—Con.

[Detail may not add to total because of rounding and because a firm may be included in more than one minority group (see Survey Methodology in the introductory text). This table is based on the 1987 SIC system. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendix A]

Table 1. Statistics for Minority-Owned Firms by Major Industry Group and Minority: 1992 and 1987—Con.

[Detail may not add to total because of rounding and because a firm may be included in more than one minority group (see Survey Methodology in the introductory text). This table is based on the 1987 SIC system. For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendix A]

¹In 1987, industry classifications for firm data were based on the 1972 SIC manual; the 1992 data are based on the 1987 SIC manual. See Comparability of 1987 and 1992 Data in the introductory text.

²For explanation of relative standard errors, see Reliability of Estimates in the introductory text. The estimated relative standard errors for 1987 American Indian, Alaska Native, and Asian and Pacific Islander data (columns G and H) are upper-bound estimates.

³The 1987 data for industries 11 (anthracite mining) and 12 (bituminous coal and lignite mining) have been combined into SIC code 12 (coal mining) for comparability to the 1987 SIC system.

⁴Excludes 6552 which is included in construction industries.

⁵The 1987 data excluded 673 (Trusts) and 679 (Miscellaneous investing).

Table 2. Statistics for Minority-Owned Firms by Minority for States: 1992 and 1987—Con.

[Detail may not add to total because of rounding and because a firm may be included in more than one minority group (see Survey Methodology in the introductory text). For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendix A]

Table 2. Statistics for Minority-Owned Firms by Minority for States: 1992 and 1987—Con.

[Detail may not add to total because of rounding and because a firm may be included in more than one minority group (see Survey Methodology in the introductory text). For meaning of abbreviations and symbols, see introductory text. For explanation of terms, see appendix A]

¹See Comparability of 1987 and 1992 Data in the introductory text.

²For explanation of relative standard errors, see Reliability of Estimates in the introductory text. The estimated relative standard errors for 1987 American Indian, Alaska Native, and Asian and Pacific Islander data (columns G and H) are upper-bound estimates. The relative standard errors for some of the 1987 American Indian, Alaska Native, and Asian and Pacific Islander Women could not be calculated (these are noted with NA). In general, the relative standard errors for women are slightly larger than the corresponding relative standard errors for men.

¹Firms reported annual payroll, but did not report any employees on their payroll during pay period in 1992.

Appendix A. Explanation of Terms

Annual payroll. Annual payroll consists of the combined amount of wages paid, tips reported, and other compensation including salaries, vacation allowances, bonuses, commissions, sick-leave pay, and the value of payments-in-kind (such as free meals and lodging) paid to all employees during the calendar year before deductions for social security, income tax, insurance, union dues, etc. All forms of compensation are included, whether or not subject to income tax or FICA tax, with the exception of annuities, third-party sick pay, and supplemental unemployment compensation benefits (even if income tax was withheld). For corporations, total payroll includes compensation paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners.

Employment. Employment includes all employees, full-time and part-time, reported on a firm's payroll during specified pay periods in 1992. Persons on paid sick leave, paid holidays, and paid vacations are included as employees, as are salaried officers and executives of corporations. However, proprietors and partners of unincorporated businesses are not considered as employees.

The derivation of the 1992 employment figures vary somewhat among the different industries. For firms in the minerals, manufacturing, and construction industries, employment represents an annual average of the number of "production workers" on the payroll for any part of the pay periods including the 12th of March, May, August, and November, plus the number of "all other employees" on the payroll during the March 12th pay period. For the other industries covered by the economic censuses and for those industries not covered, employment consists of all employees on the payroll of a firm during the pay period including March 12.

Ethnicity. The ethnic categories used in this survey are the same as those defined by the Office of Management and Budget (OMB) in their Circular No. A-46, dated May 12, 1977.

Firm. In this survey, a firm is a legal entity engaged in economic activity during any part of 1992 that filed an IRS form 1040, Schedule C; 1065; or 1120S. The different entities are described below under Legal Form of Organization. A firm may operate one place of business or more,

such as a chain of restaurants, or have no fixed business location, such as the firm represented by a self-employed carpenter or salesperson. A firm contrasts with an establishment, which is a single physical location at which business is conducted. Most of the other economic censuses are conducted on an establishment, rather than a firm, basis.

Legal form of organization. The three legal forms of organization included in this report are:

1. **Individual proprietorship.** An unincorporated business owned by an individual. Also included in this category are self-employed persons. The business may be the only occupation of an individual or the secondary activity of an individual who works full time for someone else.
2. **Partnership.** An unincorporated business owned by two or more persons having a financial interest in the business.
3. **Subchapter S corporation.** A legally incorporated business under State laws. A subchapter S corporation is a special IRS designation for legally incorporated businesses with 35 or fewer shareholders who, because of tax advantages, elect to be taxed as individual shareholders rather than as corporations.

Race. The race categories used in this survey are the same as those defined by the Office of Management and Budget (OMB) in their Circular No. A-46, dated May 12, 1977.

Receipts. Receipts include the gross value of all products sold, services rendered, or other receipts from customers during the year, less returns and allowances. Value for sales and services is given whether or not payment was actually received during the year, and therefore, does not indicate a cash flow. Although receipts data were supposed to cover calendar year 1992, fiscal year reporting was permitted if it did not produce great differences. No adjustments are made for the costs of doing business. Due to the nature of the banking, real estate, and insurance industries and educational and social services, receipts may not be a good indicator of financial worth or size.

Publications of the 1992 Survey of Minority-Owned Business Enterprises, containing data on minority-owned firms in the United States, are described below. Publication order forms may be obtained from any Department of Commerce district office or from Administrative and Customer Services Division, Bureau of the Census, Washington, DC 20233-1900.

Detailed statistics are issued in separate paperbound reports for businesses owned by Blacks; persons of Hispanic origin; and Asians and Pacific Islanders, American Indians, and Alaska Natives.

Reports

MB92-1 Minority-Owned Business Enterprises—Black
MB92-2 Minority-Owned Business Enterprises—Hispanic
MB92-3 Minority-Owned Business Enterprises—Asians and Pacific Islanders, American Indians, and Alaska Natives.
MB92-4 Minority-Owned Business Enterprises—Summary

Data are presented by industry classifications and/or geographic area (States, MA's, counties, and places), size of firm (employment and receipts), and legal form of organization (individual proprietorships, partnerships, and subchapter S corporations). Tables within the reports show the number of firms owned by minority groups, gross receipts, and number of employees and annual payroll for firms with paid employees.

Electronic Media

All data included in the printed reports are available on CD-ROM. The CD-ROM provides the same information

found in the final reports as well as additional information not published in the final reports, such as State and MA data by major industry group. Electronic media products are available for users who wish to summarize, rearrange, or process large amounts of data. These products, with corresponding technical documentation, are sold by Administrative and Customer Services Division, Bureau of the Census, Washington, DC 20233-1900.

The **Internet** (www.census.gov) highlights selected information from Bureau of the Census publications. This enables immediate access to recently released facts and data. Various subjects and topics are included on this electronic resource.
