Note: Population values shown in this table are derived from the CPS sample, and may not match independently-derived estimates of the population. See "State and Metropolitan Area Populations," in appendix A for more information.

<sup>1</sup>The value of 1.6 times the standard error [1.6\*(s.e.)], added to and subtracted from the estimated percentage, yields the 90-percent confidence interval. For further details of calculation and interpretation, see appendix B, Source and Accuracy of the Estimates.

Note: Based on population estimates of States as of July 1, 1986. Population values shown in this table are derived from the CPS sample, and may not match independently-derived estimates of the population. See "State and Metropolitan Area Populations," in appendix A for more information.

<sup>1</sup>The value of 1.6 times the standard error [1.6\* (s.e.)], added to and subtracted from the estimated percentage, yields the 90-percent confidence interval. For further details of calculation and interpretation, see appendix B, Source and Accuracy of the Estimates.

<sup>2</sup>Persons of Hispanic origin may be of any race.

<sup>1</sup>Beginning with data for 1992, a new question results in different categories than for earlier years. Data shown as "High School" "4 years" is now collected by the category "High School Graduate". Data shown as "College 1 to 3 years", is now collected by "Some College"; and two "Associate degree" categories.

Data shown as "College 4 years or more", is now collected by the categories, "Bachelor's degree"; "Master's degree"; "Doctorate". degree"; and "Professional degree".

Due to the change in question format, median years of schooling can not be derived.

<sup>2</sup>Total includes persons who did not report on years of school completed.
