Section 22

Domestic Trade

This section presents statistics relating to the distributive trades, specifically wholesale trade and retail trade. Data shown for the trades are classified by kind of business and cover sales, establishments, employees, payrolls, and other items. The principal sources of these data are from the Census Bureau and include the 2002 *Economic Census*, annual surveys, and the *County Business Patterns* program. These data are supplemented by several tables from trade associations, such as the National Automobile Dealers Association (Table 1023). Several notable research groups are also represented, such as Claritas (Table 1021), National Research Bureau (Tables 1037 and 1038), Jupiter Research, Inc. (Table 1035), and Forrester Research, Inc. (Table 1034).

Data on retail and wholesale trade also appear in several other sections. For instance, labor force employment and earnings data appear in Section 12, Labor Force, Employment, and Earnings; gross domestic product of the industry (Table 651) appear in Section 13, Income, Expenditures, and Wealth; financial data (several tables) from the quarterly *Statistics of Income Bulletin*, published by the Internal Revenue Service, appear in Section 15, Business Enterprise.

Censuses—Censuses of retail trade and wholesale trade have been taken at various intervals since 1929. Beginning with the 1967 census, legislation provides for a census of each area to be conducted every 5 years (for years ending in "2" and "7"). For more information on these censuses, see the *History of the 1997 Economic Census* found at <<http://www.census.gov/prod/ec97/po100-hec.pdf>>. The industries covered in the censuses and surveys of business are those classified in 13 sectors defined in the *North American Industry Classification System*, called NAICS (see below). *Retail trade* refers to places of business primarily engaged in retailing merchandise to the general public; and *wholesale trade*, to

establishments primarily engaged in selling goods to other businesses and normally operating from a warehouse or office that have little or no display of merchandise. All Census Bureau tables in this section are utilizing the 2002 NAICS codes, which replaced the Standard Industrial Classification (SIC) system. NAICS makes substantial structural improvements and identifies over 350 new industries. At the same time, it causes breaks in time series far more profound than any prior revision of the previously used SIC system. For information on this system and how it affects the comparability of retail and wholesale statistics historically, see text, Section 15, Business Enterprise, and especially the Census Bureau Web site at <<http://www.census.gov/epcd/www/naics.html>>. In general, the 2002 Economic Census has two series of publications for these two sectors: 1) subject series with reports such as product lines and establishment and firm sizes, and 2) geographic reports with individual reports for each state. For information on these series, see the Census Bureau Web site at <<http://www.census.gov/econ/census02/>>.

Current surveys—Current sample surveys conducted by the Census Bureau cover various aspects of retail and wholesale trade. Its *Monthly Retail Trade and Food Services* report contains monthly estimates of sales, inventories, and inventory/sales ratios for the United States, by kind of business. Annual figures on sales, year-end inventories, and inventory/sales ratios, purchases, accounts receivable, and gross margins by kind of business, appear in the *Annual Benchmark Report for Retail Trade and Food Services*. Statistics from the Bureau's monthly wholesale trade survey include national estimates of sales, inventories, and inventory/sales ratios for merchant wholesales excluding manufacturers' sales branches and offices. Data are presented by major summary groups "durable and nondurable," and 4-digit

NAICS industry groups. Merchant wholesalers excluding manufacturers' sales branches and offices are those wholesalers who take title to the goods they sell (e.g., jobbers, exporters, importers, industrial distributors). These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report*. Annual figures on sales, inventory/sales ratios, year-end inventories, purchases, and gross margins appear in the *Annual Benchmark Report for Wholesale Trade*. Data on manufacturers' sales branches and offices were collected for the first time in the 2004 *Annual Trade Survey* and appear in the *Annual Report for Wholesale Trade*. Data are presented by major summary groups "durable and nondurable" and 4-digit NAICS industry groups for sales, end-of-year inventories, and operating expenses. The reports just mentioned may appear in print in some cases, but principally are available as documents on the Census Bureau Web site at <<http://www.census.gov/econ/www/retmenu.html>>.

E-commerce—Electronic commerce (or e-commerce) are sales of goods and services over the Internet and extranet,

electronic data interchange (EDI), or other online systems. Payment may or may not be made online. This edition has several tables on e-commerce sales, such as Tables 1020 and 1034 to 1036 in this section, 977 in Section 21, Manufactures, and 1261 in Section 27, Accommodation, Food Services, and Other Services. Also, there are several private sources for similar data such as Forrester Research Inc., Cambridge MA; BizRate.com, Los Angeles, CA; and Jupiter Research, Inc., New York, NY. These sources show estimated and projected online retail sales by key categories from business to consumers or to other businesses. Their methods of collecting the data vary widely between the sources and consequently these estimates of this activity vary also. Users of these estimates may want to contact the sources for descriptions of their methodology. Methodology for Census Bureau estimates can be found at <www.census.gov/estats>.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Table 1012. Wholesale and Retail Trade—Establishments, Sales, Payroll and Employees: 2002

[4,376 represents \$4,376,000,000,000. Covers establishments with payroll. These data are preliminary and are subject to change. For statement on methodology, see Appendix III]

Kind of business	NAICS code ¹ 2002	Sales, receipts, revenue, or shipments (bil. dol.)		Annual payroll (bil. dol.)	Paid employees (1,000)

Table 1037. Shopping Centers—Number, Gross Leasable Area, and Retail Sales: 1990 to 2004

[4,390 represents 4,390,000,000. As of December 31. A shopping center is a group of architecturally unified commercial establishments built on a site that is planned, developed, owned, and managed as an operating unit related in its location, size, and type of shops to the trade area that the unit serves. The unit provides on-site parking in definite relationship to the types and total size of the stores. The data base attempts to include all centers with three or more stores. Estimates are based on a sample of data available on shopping center properties; for details, contact source]

Year	Total	Gross leasable area (sq. ft.)					
		Less than 100,001	100,001-200,000	200,001-400,000	400,001-800,000	800,001-1,000,000	More than 1 million
