through payment of debt service on indebtedness incurred to finance the improvements ) and apportioned according to the assumed benefits to the property affected by the improvements.

**Special district governments.** All organized local entities (other than counties, municipalities, townships, or school districts) authorized by state law to provide only one or a limited number of designated functions, and with sufficient administrative and fiscal autonomy to qualify as separate governments; known by a variety of titles, including districts, authorities, boards, and commissions.

**State government.** The state government in each case consists of the legislative, executive, and judicial branches of government and all departments, boards, commissions, and other organizational units. It also includes any semi-autonomous authorities, institutions of higher education, districts, and other agencies that are subject to administrative and fiscal control by the state through its appointment of officers, determination of budgets, approval of plans, and other devices. As to all such agencies, financial information included in the Census reports represents their gross transactions with the public and other governments, rather than only the net effect of such transactions on central state funds. Each data item for a state government consists of the sum of amounts of the type described for all funds and accounts—including not only the general fund but also special revenue funds, sinking funds, public trust funds, bond funds, and all other special funds.

**Taxes.** Compulsory contributions exacted by a government for public purposes except employee and employee assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that local government tax revenue excludes any amounts from shares of state-imposed and collected taxes, which are classified as Intergovernmental revenue.

**Tobacco products sales taxes.** See Sales and gross receipts taxes.

**Toll highway facilities.** Toll turnpikes, toll roads, toll bridges, ferries, and toll tunnels operated by state agencies. Expenditure for this purpose includes only acquisition, construction, and maintenance of state facilities; it does not include any debt service on toll facility debt or any aid to local governments for toll facilities.

**Township governments.** Organized local governments authorized in state constitutions and statutes and established to provide general government for areas defined without regard to population concentration; includes

---

those governments designated as towns in Connecticut, Maine (including organized plantations), Massachusetts, Minnesota, New Hampshire (including organized locations), New York, Rhode Island, Vermont, and Wisconsin, and townships in other states.

**Transit.** Construction, maintenance, and operation of public mass transit systems—bus, commuter rail, light rail, or subway systems. Excludes systems established solely to transport elementary and secondary school pupils. Ferry systems are classified under Highways. See Utility.

**Transit subsidies.** Payments in support of subway, bus, surface rail and street railroad, and other passenger transportation systems, including public support of a private utility or railroad and intergovernmental subsidy payments. Excludes amounts paid by a parent government to its dependent transit utility. Also see Utility.

**Transportation.** Comprises the functions of Highways, Air transportation, Parking facilities, Water transport and terminals, and Transit subsidies.

**Unemployment compensation expenditure.** Comprises payments made to beneficiaries under basic provisions of unemployment compensation programs and special program payments, such as for extended benefits triggered by economic conditions.

**Utility.** A government owned and operated water supply, electric light and power, gas supply, or transit system. Government revenue, expenditure, and debt relating to utility facilities leased to other governments or persons, and other commercial type activities of governments, such as port facilities, airports, housing projects, radio stations, steam plants, ferries, abattoirs, etc., are classified as general government activities. Also see Transit subsidies.

**Utility debt.** Debt originally issued specifically to finance government owned and operated water, electric, gas, or transit utility facilities.

**Utility expenditure.** Expenditure for construction of utility facilities or equipment, for production and distribution of utility commodities and services (except those furnished to parent government), and for interest on utility debt. Does not include expenditure in connection with administration of utility debt and investments (treated as general expenditure) and the cost of providing services to the parent government (such costs, when identifiable, are treated as expenditure for the function served).

**Utility revenue.** Revenue from sale of utility commodities and services to the public and to other governments. Does not include amounts from sales to the parent government. Also excludes income from utility fund investments and from other nonoperating properties (treated as General revenue). Any monies from taxes, special assessments, and intergovernmental revenue are classified as General revenue, not Utility revenue.

**Vendor payments.** See Public welfare.

**Veterans' services.** Cash bonuses to veterans and other financial grants not contingent on need, administration of bonus payments, veterans' information and guidance services, and other veterans' services not classified under Public welfare, Education, Hospitals, or other functions.

**Water supply.** Operation and maintenance of water supply system including acquisition and distribution of water to the general public or to other local governments for domestic or industrial use. Acquisition and distribution of water for irrigation of agricultural lands are classified under Natural resources. See Utility.

**Water transport and terminals.** Construction, maintenance, operation, and support of canals and other waterways, harbors, docks, wharves, and related marine terminal facilities.

**Withdrawals, insurance trust.** See Insurance trust expenditure.

**Workers' compensation expenditure.** Insurance trust expenditure for state-administered workers' compensation systems. Consists of cash benefit payments to injured workers covered by the system. Excludes state contributions to system on behalf of state employees and expenditure for administration.

**Workers' compensation revenue.** Employer premiums, assessments, and other contributions to state-administered workers' compensation systems and earnings on investments of systems. Excludes contributions by state governments for state employees covered by system.

**Workers' compensation system.** A state-administered plan for compulsory accident and injury insurance of workers through accumulation of assets from contributions collected from employers for financing cash benefits to eligible injured workers.

## Finances of City-County Governments With 25,000 Population or More Classified as Municipalities: 2001-02

---

Appendix C contains a summary of financial data in governments of 25,000 population or more where there has been a merger of the municipal and county government activities.

A number of municipalities differ from the overwhelming majority in that they operate, either specifically by law or in effect, as composite city-county governments. This group includes New York City, Philadelphia, and several

other of the most populous cities in the nation. One of these cities—Washington, DC is unique in that it has no overlying state government and thus provides certain services commonly provided by states, as well as various county-type services. The 42 governments of this type with 25,000 population or more accounted for about 30 percent of the total revenue, 32 percent of total expenditure, and 31 percent of the total indebtedness of all municipalities in the nation in fiscal 2001-02.

<sup>1</sup>Includes amounts not shown separately.

Note: Appendix C contains a summary of financial data in governments of 25,000 population or more where there has been a merger of the municipal and county government activities. A number of municipalities differ from the overwhelming majority in that they operate, either specifically by law or in effect, as composite city-county governments. This group includes New York City, Philadelphia, and several other of the most populous cities in the nation. One of these cities—Washington, DC—is unique in that it has no overlying state government and thus provides certain services commonly provided by the states, as well as various county-type services.

## Explanation for Tracing Origin and Allocation of Funds in Tables 22 and 37

---

The following is a guide for tracing the origin and allocation of state and local government funds in Tables 22 and 37. Calculations exclude minor federal government amounts.

### **GENERAL REVENUE—TABLE 22**

**State.** Start with the amount of state government own source revenue, add in the funds received from the federal and local governments, and subtract the amount local governments receive from the state governments.

**Local.** Start with the amount of local government own source revenue, add in the funds received from the federal and state governments, and subtract the amount state governments receive from local governments.

### **GENERAL EXPENDITURE—TABLE 37**

**State.** Start with the state government direct general expenditure before transfers among governments, add in the intergovernmental transfers the state government receives from the federal and local governments, and subtract the amount local governments receive from the state governments.

**Local.** Start with the local government direct general expenditure before transfers among governments, add in the funds received from the federal and state governments, and subtract the amount state governments receive from local governments.
