Special Census Data Products

Once data collection, processing, and tabulation are complete, the governmental unit receives **population and housing unit** Official Statistics for the entire jurisdiction or part jurisdiction, as defined at the beginning of the Special Census process. Official Statistics are communicated to the jurisdiction through a signed letter from the Director of the U.S. Census Bureau. Official Statistics can be used by the jurisdiction for any purpose provided for through law, as specified in U.S. Code, Title 13, IV-196.

Additional data products provided to the jurisdiction include the following:

> Population and housing counts by census block

> Population Profile of Detailed Characteristics (DP-1) for the Special Census entity and nonzero population and housing census tracts or census tract parts, referred to as "Demographic Profiles"

Jurisdictions will receive detailed race and ethnic tabulations, if they have 5,000 persons or more and include at least 3 census tracts or census tract parts. If the jurisdiction's Special Census does not meet both requirements, the DP-1 file will only be produced for the entity and it's census tracts or census tract parts with 100 people or more, and detailed Asian (*Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese, and Other Asian*), detailed Native Hawaiian and Other Pacific Islander (*Native Hawaiian, Guamanian or Chamorro, Samoan, and Other Pacific Islander*), and detailed Hispanic (*Mexican, Puerto Rican, Cuban, and Other Hispanic or Latino*) will be suppressed and summary data provided for Asian, Native Hawaiian and Other Pacific Islander, and Hispanic or Latino.

Population and Housing Counts by Census Block (Excel)

Population and housing unit counts are provided at the block level in Excel format

The Excel format looks like the following example:

Block Counts for Montgomery Village, Illinois

Population Profile of Detailed Characteristics (DP-1) for the Special Census Entity and Nonzero Population and Housing Census Tracts or Census Tract Parts (Excel), Referred to as "Demographic Profiles"

The jurisdiction will receive an Excel worksheet that includes a demographic profile (DP-1) for the jurisdiction as a whole and for each tract or part tract within the area enumerated. The labels at the bottom of each worksheet include standard decennial summary level codes, FIPS state code, FIPS county code (unique within state), the FIPS entity code (unique within state), or census tract number (unique within county). The codes identify the minimal combination of geographic codes to identity the geographic data to which the data apply.

Examples:

> 160 - 17 - 50218
>> 160 is the Census Bureau standard state-place summary level
>> 17 is the FIPS state code for Illinois
>> 50218 is the FIPS entity code for Montgomery Village, Illinois

> 140 - 17089 - 854502
>> 140 is the standard summary level code for a state-county-census tract
>> 17 is the FIPS state code for Illinois
>> 089 is the FIPS county code for Kane County
>> 854502 is the census tract number, with two decimal places implied, such that the census tract would read as 8540.02

> 140 - 17093 - 890201

Same format as above, with the FIPS county code (093) representing the Kendall County part of the city within census tract 8902.01.
