FOR RELEASE AT 10:00 AM EDT, MONDAY, JULY 3, 2023

MONTHLY CONSTRUCTION SPENDING, MAY 2023

Release Number: CB23-107

July 3, 2023 — The U.S. Census Bureau announced the following value put in place construction statistics

for May 2023:

Total Construction

Construction spending during May 2023 was estimated at a seasonally adjusted annual rate of \$1,925.6 billion, 0.9 percent (±0.5 percent) above the revised April estimate of \$1,909.0 billion. The May figure is 2.4 percent (±1.2 percent) above the May 2022 estimate of \$1,880.9 billion. During the first five months of this year, construction spending amounted to \$740.8 billion, 2.9 percent (±1.0 percent) above the \$719.6 billion for the same period in 2022.

Private Construction

Spending on private construction was at a seasonally adjusted annual rate of \$1,513.2 billion, 1.1 percent (±0.3 percent) above the revised April estimate of \$1,497.2 billion. Residential construction was at a seasonally adjusted annual rate of \$857.4 billion in May, 2.2 percent (±1.3 percent) above the revised April estimate of \$839.4 billion. Nonresidential construction was at a seasonally adjusted annual rate of \$655.8 billion in May, 0.3 percent (±0.3 percent)* below the revised April estimate of \$657.8 billion.

Public Construction

In May, the estimated seasonally adjusted annual rate of public construction spending was \$412.4 billion, 0.1 percent (±1.0 percent)* above the revised April estimate of \$411.8 billion. Educational construction was at a seasonally adjusted annual rate of \$87.7 billion, virtually unchanged from (±1.5 percent)* the revised April estimate of \$87.7 billion. Highway construction was at a seasonally adjusted annual rate of \$124.6 billion, 0.4 percent (±2.8 percent)* below the revised April estimate of \$125.1 billion.

Notice

With this May 2023 press release, unadjusted data will be revised back to January 2021 and seasonally adjusted data will be revised back to January 2016. In addition, monthly (both unadjusted and seasonally adjusted) and annual estimates for private electric, private power, private nonresidential, total private, total power, total nonresidential, and total construction spending for January 2015 through December 2016 have been revised to correct a processing error in the tabulation of data on private electric power spending.

The June 2023 Monthly Construction Spending Report is scheduled for release on August 1, 2023. View the full schedule in the Economic Briefing Room: www.census.gov/economic-indicators/>. The full text and tables for this release can be found at www.census.gov/constructionspending/.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 2 months to establish an underlying trend for total construction and as long as 8 months for specific categories of construction. The statistics in this release are estimated from several sources and surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimates of the standard errors are provided in Table 3. Whenever a statement such as "2.3 percent (±3.1 percent) above" appears in the text, this indicates the range (-0.8 to +5.4 percent) in which the actual percentage change is likely to have occurred. All ranges given are 90 percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. Statistics for the current month are preliminary estimates subject to revision in following months as additional data become available. The average absolute percent changes from preliminary estimate to first revision for the major seasonally adjusted components are as follows: total construction, 0.86 percent; private construction, 0.94 percent; and public construction, 1.18 percent.

Explanations of confidence intervals and sampling variability can be found on our website at www.census.gov/construction/c30/meth.html/.

RESOURCES

API

The Census Bureau's application programming interface lets developers create custom apps to reach new users and makes key demographic, socio-economic and housing statistics more accessible than ever before. www.census.gov/developers/

FRED Mobile App

Receive the latest updates on the nation's key economic indicators by downloading the FRED App < https://fred.stlouisfed.org/fred-mobile/> for both Apple and Android devices. FRED, the signature database of the Federal Reserve Bank of St. Louis, now incorporates the Census Bureau's 13 economic indicators.

###

* The 90 percent confidence interval includes zero. There is insufficient evidence to conclude that the actual change is different from zero.
