

Notice for the **NRC** press release for **April 2018** data:

**Notice:** With this release, unadjusted estimates of housing units authorized by building permits for January through December 2017 have been revised. Also, seasonally adjusted estimates of housing units authorized by building permits have been revised back to January 2012, and seasonally adjusted estimates of housing units authorized but not started, started, under construction, and completed have been revised back to January 2013. All revised estimates are available on our website. With each April release, seasonally adjusted data will now be revised for an additional five years beyond the revision period for unadjusted data. Research has shown that this revision span should produce more reliable seasonally adjusted time series.
