

A Message from the Director, U.S. Census Bureau:

We request your participation with the **Survey of Construction**. The information requested is summary level data on how building permits are issued and maintained. This information helps facilitate the monthly collection and tabulation of permit data for your geographical area.

The Survey of Construction produces a variety of statistics on new residential construction and is partially funded by the Department of Housing and Urban Development (HUD). The survey produces key estimates, such as starts and completions of new single- and multifamily units and sales of new single-family houses. Government and private entities use these statistics to monitor and evaluate the large and dynamic housing construction industry and to make vital economic decisions.

Information about the authority, confidentiality, and burden of this data collection can be found on the back of this letter.

For assistance with completing this survey, please contact the Chicago Regional Office at the contact information below.
