Locating QuickFacts Data Points on data.census.gov

Two different options

For general data: Geographic Profiles

Step 1. Navigate to data.census.gov. Enter your geography in the search bar and select the Profile option.

Step 2. Scroll down to explore data on topics such as Population, Employment, Income, and more.

For more detailed data: American Community Survey Data Profiles

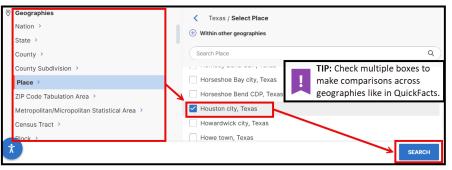

Step 1. Navigate to data.census.gov and select the advanced search button.

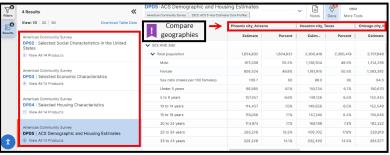

Step 2. Under Surveys, select American Community Survey > 5-Year Estimates > Data Profiles.

Step 3. Apply filters for your geographies. Once your geographies are selected, click Search.

Step 4. Select one of the four Data Profile tables from the list to view detailed Demographic, Housing, Economic, and Social Characteristics.

Example URL comparing the 5 most populated cities in the United States:
