Introduction to the Economic Census

PURPOSES AND USES OF THE ECONOMIC CENSUS

The economic census is the major source of facts about the structure and functioning of the nation's economy. It provides essential information for government, business, industry, and the general public. Title 13 of the U.S. Code (Sections 131, 191, and 224) directs the U.S. Census Bureau to take the economic census every 5 years, ending in "2" and "7."

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product estimates, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions. Specific uses of economic census data include the following:

- Policymaking agencies of the federal government use the data to monitor economic activity and assess the effectiveness of policies.
- State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.
- Trade associations study trends in their own and competing industries, which allows them to keep their members informed of market changes.
- Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

BASIS OF REPORTING

The economic census is conducted on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, ship, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company.

AVAILABILITY OF ADDITIONAL DATA

All results of the 2012 Economic Census are available on the American FactFinder Internet site <www.factfinder.census.gov>. The American FactFinder system at the Web site allows selective retrieval and downloading of the data. For more information, including a description of reports

being issued, see the Web site; write to the U.S. Census Bureau, Washington, DC 20233-8300; or call the Customer Services center at 1-800-923-8282 or 301-763-4636.

HISTORICAL INFORMATION

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1954, 1958, and 1963. Prior to that time, individual components of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for the 1840 Decennial Census and subsequent censuses to include mining and some commercial activities. The 1905 Census of Manufactures was the first time a census was taken apart from the regular decennial population census. Censuses covering retail and wholesale trade and construction industries were added in 1930, as were some service trades in 1933.

Censuses of construction, manufacturing, and the other business service censuses were suspended during World War II.

The 1954 Economic Census was the first census to be fully integrated, providing comparable census data across economic sectors and using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other federal agencies. Since 1963, administrative records have also been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census report forms.

The range of industries covered in the economic censuses expanded between 1967 and 2007. The census of construction industries began on a regular basis in 1967; and the scope of service industries, introduced in 1933, was broadened in 1967, 1977, and 1987. While a few transportation industries were covered as early as 1963, it was not until 1992 that the census broadened to include all of transportation, communications, and utilities. Also, new for 1992 was coverage of financial, insurance, and real estate industries. With these additions, the economic census and the separate census of governments and census

of agriculture collectively covered roughly 98 percent of all economic activity. In 2002, there was new coverage in the following four industries classified in the Agriculture, Forestry, and Fishing sector under the Standard Industrial Classification (SIC) system: landscape agricultural services, landscaping services, veterinary services, and pet care services.

Printed statistical reports from the 1997 and earlier economic censuses provide historical figures for the study of long-term time series and are available in some large libraries. CD-ROMs issued from the 1987, 1992, and 1997 Economic Censuses contain databases including all or nearly all data published in print, plus additional statistics, such as Zip Code statistics, published only on CD-ROM.

SOURCES FOR MORE INFORMATION

More information about scope, coverage, and classification system for each economic census and related surveys is published in the “What’s New” section of the 2012 Economic Census Web site at <www.census.gov/econ/census/about/whats_new.html>. Data items and publications for each economic census and related surveys are published as part of the 2012 Economic Census on American FactFinder at <www.factfinder.census.gov>. More information on the methodology, procedures, and history of each economic census is published in the “Methodology” section of the 2012 Economic Census Web site at <www.census.gov/econ/census/help/methodology_disclosure/>.

2012 Commodity Flow Survey

GENERAL

The Commodity Flow Survey (CFS) is a joint effort by the Bureau of Transportation Statistics (BTS) and the U.S. Census Bureau, U.S. Department of Commerce. The survey is the primary source of national and state-level data on domestic freight shipments by establishments in mining, manufacturing, wholesale, auxiliaries, and selected retail and services trade industries located in the 50 states and the District of Columbia. Data are provided on the type, origin and destination, value, weight, modes of transportation, distance shipped, and ton-miles of commodities shipped. The CFS is conducted every 5 years as part of the economic census. It provides a modal picture of national freight flows and represents the only publicly available source of commodity flow data for the highway mode. The CFS was conducted in 1993, 1997, 2002, 2007, and most recently in 2012.

The CFS assesses the demand for transportation facilities and services, energy use, and safety risk and environmental concerns. CFS data are used by policy makers and transportation planners in various federal, state, and local agencies. Additionally, business owners, private researchers, and analysts use the CFS data for analyzing trends in the movement of goods, mapping spatial patterns of commodity and vehicle flows, forecasting demands for the movement of goods, and determining needs for associated infrastructure and equipment.

SCOPE

Industry Coverage

The 2012 CFS covers business establishments with paid employees that are located in the United States and are classified using the 2007 North American Industry Classification System (NAICS) in mining, manufacturing, wholesale, and selected retail and services trade industries, namely, electronic shopping and mail-order houses, fuel dealers, and publishers. Additionally, the survey covers auxiliary establishments (i.e., warehouses and managing offices) of multiestablishment companies.

For the 2012 CFS, a targeted Advance Survey (precanvass) was conducted in 2011 to improve the quality of the data on the frame for certain industries or types of establishments. The groups included in this advance survey were:

Advance survey group	Number of establishments
Auxiliaries (NAICS 484, 4931, 551114)	34,985
Small electronic shopping and mail order establishments (NAICS 4541)	13,431
Small publishers (NAICS 5111)	11,804
Large establishments	39,608
Total	99,828

For the first three groups, the purpose was to identify those establishments that actually conduct shipping activities. In these groups, surveyed establishments that reported that they did not conduct any shipping activity were excluded from the eventual CFS sample universe. For large establishments the objective was to obtain an accurate measure of their shipping activity.

CFS Industries

In-scope industries for the 2012 CFS were selected based on the 2007 NAICS. Industries included in the 2007 and 2002 CFS were selected based on the 2002 and 1997 versions of the NAICS, respectively. The industries in the 1997 CFS and the 1993 CFS were selected based on the 1987 Standard Industrial Classification System (SIC) and, although attempts were made to maintain similar coverage among the SIC based surveys (1993 and 1997) and the NAICS based surveys (2002, 2007, and 2012), there have been some changes in industry coverage due to the conversion from SIC to NAICS. Most notably, coverage of the logging industry changed from an in-scope Manufacturing (SIC 2411) to the out-of-scope sector of Agriculture, Forestry, Fishing, and Hunting under NAICS 1133. Also, publishers were reclassified from Manufacturing (SIC 2711, 2721, 2731, 2741, and part of 2771) to Information (NAICS 5111 and 51223) and were excluded in the 2002 CFS. The 2007 and 2012 CFS, however, include publishers and retail fuel dealers.

The (2007) NAICS industries covered in the 2012 CFS are listed in the following table:

NAICS code	Description
212	Mining (except oil and gas)
311	Food manufacturing
312	Beverage and tobacco product manufacturing
313	Textile mills
314	Textile product mills
315	Apparel manufacturing
316	Leather and allied product manufacturing
321	Wood product manufacturing
322	Paper manufacturing
323 ¹	Printing and related support activities (except 323122)
324	Petroleum and coal products manufacturing
325	Chemical manufacturing
326	Plastics and rubber products manufacturing
327	Nonmetallic mineral product manufacturing
331	Primary metal manufacturing
332	Fabricated metal product manufacturing
333	Machinery manufacturing
334	Computer and electronic product manufacturing
335	Electrical equipment, appliance, and component manufacturing
336	Transportation equipment manufacturing
337	Furniture and related product manufacturing
339	Miscellaneous manufacturing
4231 ²	Motor vehicle and parts merchant wholesalers
4232 ²	Furniture and home furnishing merchant wholesalers
4233 ²	Lumber and other construction materials merchant wholesalers
4234 ²	Commercial equip. merchant wholesalers
4235 ²	Metal and mineral (except petroleum) merchant wholesalers
4236 ²	Electrical and electronic goods merchant wholesalers
4237 ²	Hardware and plumbing merchant wholesalers
4238 ²	Machinery, equipment, and supplies merchant wholesalers
4239 ²	Miscellaneous durable goods merchant wholesalers
4241 ²	Paper and paper products merchant wholesalers
4242 ²	Drugs and druggists' sundries merchant wholesalers
4243 ²	Apparel, piece goods, and notions merchant wholesalers
4244 ²	Grocery and related product merchant wholesalers
4245 ²	Farm product raw material merchant wholesalers
4246 ²	Chemical and allied products merchant wholesalers
4247 ²	Petroleum and petroleum products merchant wholesalers
4248 ²	Beer, wine, and distilled alcoholic beverage merchant wholesalers
4249 ²	Miscellaneous nondurable goods merchant wholesalers
4541	Electronic shopping and mail-order houses
45431	Fuel dealers
4841 ³	General freight trucking
4842 ³	Specialized freight trucking
4931 ³	Warehousing and storage
5111 ⁴	Newspaper, periodical, book, and directory publishers
551114 ⁵	Corporate, subsidiary, and regional managing offices

¹ Excludes Prepress Services (NAICS 323122). ² Wholesale establishments exclude manufacturers sale offices and own brand importers. ³ Includes only captive warehouses that provide storage and shipping support to a single company. Warehouses offering their services to the general public and other businesses are excluded. NAICS 4841 and 4842 are new industries to the 2012 CFS. For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931. ⁴ In 2007, NAICS 51223 Music Publishers was tabulated and published in NAICS 5111. However, for the 2012 cycle, NAICS 51223 was not sampled. ⁵ Includes only those establishments in NAICS 551114 with shipping activity. Notes: *Excluded industries:* Foreign establishments, establishments classified in transportation, construction, and most retail and services industries are excluded. Other industry areas that are not covered, but may have significant shipping activity, include agriculture and government. For agriculture, specifically, this means that the CFS does not cover shipments of agricultural products from the farm site to the processing centers or terminal elevators (most likely short-distance local movements), but does cover the shipments of these products from the initial processing centers or terminal elevators onward. *General exclusions:* Data for government-operated establishments are excluded from the CFS. These include public utilities, publicly operated bus and subway systems, public libraries, and government-owned hospitals. The CFS also excludes establishments or firms with no paid employees.

Shipment Coverage

The CFS captures data on shipments originating from select types of business establishments located in the 50 states and the District of Columbia. The CFS does not cover shipments originating from business establishments located in Puerto Rico and other U.S. possessions and territories. Likewise, shipments traversing the United States from a foreign location to another foreign location (e.g., from Canada to Mexico) are not included, nor are shipments from a foreign location to an initial U.S. location. However, imported products are included in the CFS from the point that they leave the importer's initial U.S. location for shipment to another location.

Shipments that are shipped through a foreign territory with both the origin and destination in the United States are included in the CFS data. The mileage calculated for these shipments exclude the foreign country segments (e.g., shipments from New York to Michigan through Canada do not include any mileage for Canada). Export shipments are included, with the domestic destination defined as the U.S. port, airport, or border crossing of exit from the United States. See the Mileage Calculation section for additional detail on how mileage estimates were developed.

Data Collection

Each establishment selected into the CFS sample was mailed a questionnaire for each of its four reporting weeks, that is, an establishment was sent a questionnaire once every quarter of 2012. For a given establishment, the respondent was asked to provide the following information about each of the establishment's reported shipments:

- Shipment ID number
- Shipment date (month, day)
- Shipment value
- Shipment weight in pounds
- Commodity code from Standard Classification of Transported Goods (SCTG) list
- Commodity description
- An indication of whether the shipment was temperature controlled
- United Nations or North American (UN/NA) number for hazardous material shipments
- U.S. destination (city, state, zip code)—or gateway for export shipment
- Modes of transport
- An indication of whether the shipment was an export
- City and country of destination for exports
- Export mode

By CFS definition, a shipment is a single movement of goods, commodities, or products from an establishment to a single customer or to another establishment owned or operated by the same company as the originating establishment (e.g., a warehouse, distribution center, or retail or wholesale outlet). Full or partial truckloads were counted as a single shipment only if all commodities on the truck were destined for the same location. For multiple deliveries on a route, the goods delivered at each stop were counted as one shipment. Interoffice memos, payroll checks, or business correspondence were not included in the CFS. Likewise, the CFS does not include shipments of refuse, scrap paper, waste, or recyclable materials unless the establishment was in the business of selling or providing these materials.

For a shipment that included more than one commodity, the respondent was instructed to report the commodity that made up the greatest percentage of the shipment's weight.

In addition, establishments were asked to provide information about the use and extent of rush delivery services.

Data Collection Method

The CFS survey was conducted through a mailout/mailback with an electronic reporting option. Each establishment selected into the 2012 CFS sample was mailed four questionnaires—one during each calendar quarter of the year 2012. The four questionnaires were the same for all reporting periods (see Appendix E for a copy of the questionnaire). The establishments were asked to provide shipment information about a sample of their individual outbound shipments during a prespecified one-week period in each calendar quarter. Each of the 4 weeks was in the same relative position of the calendar quarter. Respondents had the option of reporting electronically and were given log-in information on their mailed questionnaire.

Mileage Calculations

General

The distance traveled by each freight shipment reported by the respondents to the 2012 CFS was estimated by a software tool called GeoMiler that uses routing algorithms and an integrated, intermodal transportation network that has been developed and updated expressly for this purpose. Each shipment record contained the ZIP Codes of shipment origin and destination (O-D pair) and the mode or modal sequence required by the routing algorithm for distance estimation. Each record also contained information on type of commodity moved, its weight, dollar value, and hazardous materials (hazmat) status. For each export shipment, the U.S. port of exit (POE) was also identified, along with foreign destination country; a destination country of Canada/Mexico also required a Canadian/Mexican destination city.

Valid and accurate O-D pair ZIP Codes were essential elements needed for estimating the travel distance of any shipment. For shipments with missing or invalid geographic data elements, such data elements were imputed, if a reasonable correction appeared obtainable (e.g., if a specific destination city/state was provided, then a "reasonably reliable" destination ZIP Code was imputed for the shipment). Follow-up contact with respondents was required when the missing information could not be reasonably imputed.

GeoMiler—Software to Measure the Distance Traveled by Commodity Shipments

The CFS does not ask respondents to report the distance traveled for each shipment. Therefore, shipment mileage was calculated using GeoMiler, a routing tool developed by BTS specifically for CFS mileage calculations. GeoMiler used current Geographic Information System (GIS) technology and spatial multimodal network databases and integrated map-visualization features with route solvers to handle many alternative multimodal combinations. This tool used algorithms that found the quickest path over spatial representations of the U.S. highway, railway, waterway, and airway networks. For waterborne export shipments, GeoMiler used a waterborne commerce database from the U.S. Army Corps of Engineers (USACE) to route freight originating in the United States via the deep sea (ocean). For airborne export shipments, GeoMiler used an updated air export network from the BTS Office of Airline Information (OAI).

Methodological Changes to Mileage Calculation for the 2012 CFS

With a valid origin and destination Zip Code, GeoMiler will calculate the distance traveled (in miles) by mode for each shipment reported in the CFS. The following types of methodological changes to mileage processing were incorporated in 2012:

- A shipment with a respondent-provided mode of Parcel must weigh 150 pounds or less; in addition, a shipment with a respondent-provided mode of Air was not given a weight restriction.
- A mode of transportation was imputed whenever a respondent provided a mode of Other, or Unknown, or otherwise failed to provide a modal response (missing mode) for a shipment.
- Private truck is considered a "short-haul" mode; hence Private truck shipments were not routed more than 500 miles during shipment routing.

Air Versus Parcel Mode

According to the 2007 CFS Instruction Guide, an Air shipment was defined as a shipment that weighed 100 pounds or more. During mileage processing for the 2007 CFS,

an Air shipment was manually converted to Parcel if the weight of the shipment was less than 100 pounds.

However, airlines do not necessarily have minimum weight restrictions when transporting cargo. Hence, for the 2012 CFS, the definition of an Air shipment was changed. As a result, an Air shipment was acceptable as provided by the respondent, regardless of weight.

Furthermore, for the 2012 CFS, Parcel shipments conformed to the definition used by the parcel industry that a parcel is a shipment of 150 pounds or less. For shipments submitted by the respondent with mode of Parcel and a weight above 150 pounds, GeoMiler changed the mode to For-hire truck during mileage processing.

Routing a Shipment When Mode Is Other, Unknown, or Missing

On the survey form, respondents were given the following choices for mode of transport: Air, Highway (Private truck or For-hire truck), Rail, Waterway (Inland water or Deep sea), Parcel, Pipeline, Other mode (meaning none of the above), or Unknown.

During the 2007 CFS mileage processing, 2.4 percent of shipments had a respondent-provided mode of Unknown or Other, and an additional 2.1 percent had no reported mode at all. In these situations, the mode of transport was imputed. For 2012 CFS mileage processing, if the shipment weighed less than 80,000 pounds, it was routed via Highway mode as For-hire truck; if the shipment weighed 80,000 pounds or more, it was routed via Rail mode.

Private Truck Versus For-Hire Truck

Shipments via Private truck are generally “short-haul” in nature. Because of the number of shipments exceeding this norm in the 2007 CFS, Census Bureau analysts researched the Private truck shipments at or above 500 miles. In almost all cases, the mode should have been reported as For-hire truck instead of Private truck.

Consequently, for 2012 CFS GeoMiler mileage processing, Private truck was converted to For-hire truck if the shipment mileage was equal to or greater than 500 miles, regardless of the commodity being transported. The 2012 CFS preliminary data shows a decrease from 2007 in average miles per shipment for Private truck, with an average of 46 miles per shipment.

Mileage for Domestic Shipments

For a domestic shipment, the mileage was calculated between the centroid (center of a geographic area) of the

U.S. origin ZIP Code and the centroid of the destination ZIP Code. The route between an O-D pair was composed of a series of links, and an impedance factor was assigned to each link (impedance is defined as a function of distance and travel time). Given a mode or modal sequence, the role of GeoMiler was to find that “best path” route which minimized the total impedance of the links between the specified O-D pair.

The mileage for shipments within a ZIP Code (matching O-D pair) was calculated by means of a formula that approximated the longest distance within the boundaries of that ZIP Code.

For multimodal shipments (those shipments involving more than one mode, such as truck-rail shipments), spatial joins (intermodal transfer links) were added to the network database to connect the individual modal networks together for routing purposes. An intermodal terminals database and a number of terminal transfer models were developed at BTS to identify likely transfer points for freight. An algorithm was used to find the minimum impedance path between a shipment’s origin ZIP Code to the transfer point and then from the transfer point to the destination ZIP Code. Thus, for multimodal shipments, the cumulative length of the spatial joins, plus links on the path, was used for estimating distances.

To estimate highway mileage, GeoMiler considered the functional class of highway so that the “single best path” was the quickest path based on the likely use of interstate and other major roadways and not necessarily the shortest path. The “quickest path” algorithms in terms of travel time incorporated the following hierarchical functional class of highway:

1. Interstate route
2. U.S. route
3. State route
4. County or other local route

The model favored the selection of higher-order routes (interstate) rather than lower-order routes (state and county), which provided a more realistic path for freight movement via highway.

To estimate railway mileage, GeoMiler selected a “single best path” from those calibrated with route density information obtained from sampled rail waybills, assigned a specific railroad company at shipment origin, and considered ownership, trackage rights, and interlining (the

transfer from one railroad company's trackage network to that of another).

To estimate waterway mileage, GeoMiler selected a "single best path" from the USACE waterway network featuring dock-to-dock movements (from the dock nearest to origin, to the dock nearest to destination) by specific two-digit commodity codes for the Standard Classification of Transported Goods (SCTG).

To estimate domestic airway mileage, GeoMiler selected the "single best path" from the three airports closest to the origin ZIP Code to the three airports closest to the destination ZIP Code. Criteria for route selection were calibrated with air route information provided by the OAI at BTS. As in the past, to be acceptable, an airway routing must generate at least twice as many airway miles as highway miles (the ratio of air/truck miles should be at least 2 to 1) in order to reach the destination. Consequently, GeoMiler chose the most likely air route from those routes that were nonstop (direct) from airport facilities with higher cargo lifts (weight transported between two airports) based on the OAI air cargo data.

Mileage for Pipeline Shipments

For pipeline shipments, ton-miles and average miles per shipment are not shown in the data files. For most of these shipments, the respondents reported the shipment destination as a pipeline facility on the main pipeline network. Therefore, for the majority of these shipments, the resulting mileage represented only the access distance through feeder pipelines to the main pipeline network and not the actual distance through the main pipeline network. Pipeline shipments are included in the U.S. totals for ton-miles and average miles per shipment. For security purposes, there is no pipeline network available in the public domain with which to route petroleum-based products. Hence, any modal distance, either single or multi, involving pipeline was considered as solely pipeline mileage from origin ZIP Code to destination ZIP Code and calculated to equal great circle distance (GCD). GCD is defined as the shortest distance between two points on the earth's surface, taking into account the earth's curvature.

Mileage Routing in Alaska

Much of Alaska is inaccessible by any mode of transportation except "bush" airplanes. A "bush" airplane is a small aircraft that usually carries no more than four people, including the "bush" pilot. For the 2012 CFS, a network of mini airports, more extensive than that used previously in the 2007 CFS, was incorporated into intrastate travel

within Alaska to accommodate "short-hop" flights where no established roads existed, especially in cases where the respondent reported a mode of highway.

Mileage for Export Shipments

For all exports, GeoMiler determined a U.S. port of exit (POE): seaport, airport, or border crossing (in the case of highway exports to the border countries of Canada/Mexico). However, only the portion of mileage measured within U.S. borders was included as domestic mileage in the CFS estimates for export shipments. To find the POE, GeoMiler used foreign destination country, type of commodity being exported, port volume (tonnage), and domestic travel distances.

The mileage estimates for export shipments in the 2012 CFS included the total distance from the shipment origin up to the exit point on the U.S. territorial borders.

For waterway exports via inland waterways (e.g., the Mississippi River), the mileage calculation included the distance from an inland water POE (such as St. Louis) to a coastal POE (such as New Orleans), and this extra inland waterway mileage was included in the total domestic mileage for this shipment.

For waterway exports via the Great Lakes (Lakes Erie, Huron, Michigan, Ontario, Superior), the mileage calculation was continued from a Great Lakes POE (such as Chicago, Cleveland, Duluth) to the line of demarcation between the United States and Canada (drawn within each of the Great Lakes except Michigan), and this extra Great Lakes mileage was included in the total domestic mileage for this shipment.

For airway exports, the total domestic mileage included the mileage from the inland POE to a coastal point on the U.S. landmass (where the air flight path to a foreign country intersected with the U.S. territorial border).

Availability of Additional Transportation Data

Users of transportation data may be especially interested in the reports from the Service Annual Survey, which can be found on the Census Bureau's Web site at <www.census.gov/services>. This survey covers firms with paid employees that provide commercial motor freight transportation and public warehousing services. Data collected include operating revenue and operating revenue by source, percentage of motor carrier freight revenue by commodity type, size of shipments handled, length of haul, and vehicle fleet inventory.

Table 1a.

Shipment Characteristics by Mode of Transportation for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Mode of transportation	Value		Tons		Ton-miles ¹		Average miles per shipment
	2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total

2,000 miles or more.	421,964	410,646	2.8	49,589	60,290	-17.7	138,555	180,023	-23.0

¹ Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendices give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 3c.

Shipment Characteristics by Distance Shipped for the United States: Percentage of Total for 2012 and 2007

[Estimates are based on data from the 2012 and 2007 Commodity Flow Surveys. Because of rounding, estimates may not be additive]

Distance shipped ¹ (Based on Great Circle Distance)	Value		Tons		Ton-miles ²	
	2012	2007	2012	2007	2012	2007
Total	100.0	100.0	100.0	100.0	100.0	100.0
Less than 50 miles.	36.1	33.0	55.9	55.4	4.1	4.7
50 to 99 miles	9.8	9.2	10.1	10.0	3.5	3.7
100 to 249 miles	15.2	15.2	11.8	12.6	10.0	11.2
250 to 499 miles	12.5	13.7	8.4	8.5	15.5	15.8
500 to 749 miles	8.2	8.7	5.2	4.9	17.3	15.9
750 to 999 miles	5.8	6.2	3.9	4.1	17.7	18.4
1,000 to 1,499 miles	5.9	6.3	3.2	3.2	19.1	18.7
1,500 to 1,999 miles	3.5	4.2	0.9	0.8	8.0	6.2
2,000 miles or more.	3.0	3.5	0.4	0.5	4.7	5.4

¹ Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendices give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 4a.

Shipment Characteristics by Shipment Weight for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Shipment weight	Value		Tons		Ton-miles ¹		Average miles per shipment
	2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total	
Total	13,852,143	100.0	11,299,409	100.0	2,969,506	100.0	630
Less than 50 lbs.	1,834,685	13.2	31,186	0.3	18,170	0.6	738
50 to 99 lbs.	449,065	3.2	17,511	0.2	6,774	0.2	389
100 to 499 lbs.	1,174,345	8.5	96,778	0.9	26,972	0.9	291
500 to 749 lbs.	356,543	2.6	49,115	0.4	11,429	0.4	233
750 to 999 lbs.	260,051	1.9	42,923	0.4	9,054	0.3	211
1,000 to 9,999 lbs.	2,563,775	18.5	700,842	6.2	158,537	5.3	221
10,000 to 49,999 lbs.	4,614,596	33.3	4,480,995	39.7	877,905	29.6	198
50,000 to 99,999 lbs.	1,049,816	7.6	2,227,930	19.7	180,287	6.1	79
100,000 lbs. or more	1,549,267	11.2	3,652,128	32.3	1,680,378	56.6	577

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: Value-of-shippments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 4b.

Shipment Characteristics by Shipment Weight for the United States: 2012 and 2007

[Estimates are based on data from the 2012 and 2007 Commodity Flow Surveys. Because of rounding, estimates may not be additive]

Shipment weight	Value			Tons			Ton-miles ¹			Average miles per shipment		
	2012 (million dollars)	2007 (million dollars)	Percent change	2012 (thousands)	2007 (thousands)	Percent change	2012 (millions)	2007 (millions)	Percent change	2012	2007	Percent change
Total	13,852,143	11,684,872	18.5	11,299,409	12,543,425	-9.9	2,969,506	3,344,658	-11.2	630	619	1.7

Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.² Estimates exclude shipments of crude petroleum (SCTG 16).³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁴ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁵ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁶ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 5b.

Shipment Characteristics by Two-Digit Commodity for the United States: 2012 and 2007

[Estimates are based on data from the 2012 and 2007 Commodity Flow Surveys. Because of rounding, estimates may not be additive]

X Not applicable.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.² Estimates exclude shipments of crude petroleum (SCTG 16).³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁴ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁵ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁶ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 5c.

Shipment Characteristics by Two-Digit Commodity for the United States: Percentage of Total for 2012 and 2007

[Estimates are based on data from the 2012 and 2007 Commodity Flow Surveys. Because of rounding, estimates may not be additive]

Table 6.

Shipment Characteristics by Three-Digit Commodity for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

SCTG code	Commodity description	Value		Tons		Ton-miles ¹		Average miles per shipment
		2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total	
262	Lumber, wood continuously shaped along any of its edges or faces, shingles and shakes	57,583	0.4	123,636	1.1	45,637	1.5	238
263	Veneer sheets and sheets for plywood, particle board, fiberboard, plywood, and similar laminated wood	30,712	0.2	50,184	0.4	16,947	0.6	291
264	Windows, doors, thresholds, and builders' joinery and carpentry of wood, except shingles and shakes	28,523	0.2	8,749	0.1	2,390	0.1	308
269	Other wood products	23,785	0.2	39,279	0.3	8,687	0.3	440
271	Pulp of fibrous cellulosic materials	10,344	0.1	14,272	0.1	6,944	0.2	488
272	Newsprint in large rolls or sheets	2,640	Z	4,246	Z	1,739	0.1	S
273	Uncoated paper, tissue, and paperboard in large rolls or sheets	62,655	0.5	69,360	0.6	41,638	1.4	214
274	Coated, impregnated, treated, or worked paper and paperboard, in large rolls or sheets	48,253	0.3	35,423	0.3	18,800	0.6	398
280	Paper or paperboard articles	126,268	0.9	76,530	0.7	26,687	0.9	634
291	Printed books, brochures, leaflets, and similar printed products	67,497	0.5	9,011	0.1	5,663	0.2	823
292	Newspapers, journals, and periodicals	28,527	0.2	13,014	0.1	1,417	Z	S
293	Advertising material, commercial or trade catalogues, and similar printed products	16,869	0.1	9,484	0.1	3,951	0.1	790
299	Other printed products	46,691	0.3	7,291	0.1	3,860	0.1	929
301	Textile fibers, yarns, and broad woven or knitted fabrics	56,964	0.4	7,376	0.1	4,010	0.1	1,217
302	Textile clothing and accessories, and headgear, except safety	257,562	1.9	11,096	0.1	7,879	0.3	1,024
303	Textiles and textile articles, n.e.c.	105,290	0.8	18,132	0.2	10,928	0.4	1,044
304	Leather footwear	28,567	0.2	1,428	Z	1,337	Z	1,122
305	Leather and articles of leather or allied materials, and dressed fur skins	17,394	0.1	1,816	Z	1,332	Z	821
311	Hydraulic cements	11,530	0.1	139,594	1.2	18,432	0.6	86
312	Ceramic products	25,717	0.2	16,204	0.1	6,221	0.2	776
313	Glass and glass products	42,112	0.3	32,995	0.3	13,345	0.4	584
319	Other nonmetallic mineral products	101,145	0.7	604,254	5.3	55,583	1.9	107
321	Ferro-alloys, and iron and steel in primary or semi-finished forms, or in powders or granules	40,894	0.3	29,103	0.3	9,432	0.3	271
322	Flat-rolled products of iron or steel	158,399	1.1	162,861	1.4	52,455	1.8	260
323	Bars, rods, angles, shapes, sections, and wire, of iron or steel	96,442	0.7	74,506	0.7	27,078	0.9	268
324	Nonferrous metal, except precious, unwrought, or in finished basic shapes, or in powders or granules	161,545	1.2	38,188	0.3	20,957	0.7	412
331	Pipes, tubes, and fittings	115,567	0.8	40,465	0.4	16,721	0.6	281
332	Structures and parts, except prefabricated buildings	66,207	0.5	23,615	0.2	9,230	0.3	353
333	Hand tools, cutlery, except of precious metals, interchangeable tools for hand or machine tools, hardware, and industrial fasteners	74,799	0.5	10,138	0.1	4,627	0.2	622
339	Other articles of metal	95,562	0.7	26,536	0.2	11,407	0.4	655
341	Internal-combustion engines and parts	95,557	0.7	8,688	0.1	5,317	0.2	330
342	Turbines, boilers, nuclear reactors, and nonelectric engines and motors, except internal-combustion	57,286	0.4	1,489	Z	992	Z	964
343	Pumps, compressors, fans, and ventilating or recycling hoods incorporating a fan	81,742	0.6	5,724	0.1	3,618	0.1	470
344	Air-conditioning, refrigerating, or freezing equipment	75,801	0.5	9,961	0.1	4,253	0.1	426
345	Materials-handling, excavating, boring, and related machinery and equipment	124,799	0.9	16,301	0.1	8,686	0.3	422
349	Other mechanical machinery, n.e.c.	317,910	2.3	32,486	0.3	14,102	0.5	438
351	Electric motors, generators, rotary or static converters, and transformers	55,386	0.4	6,130	0.1	4,075	0.1	671
352	Electric cooking appliances, electro-thermic, or electro-mechanical domestic appliances	35,523	0.3	4,382	Z	3,099	0.1	1,008
353	Line telephone or telegraph apparatus	39,486	0.3	904	Z	811	Z	1,013
354	Electronic entertainment products, except parts	65,432	0.5	2,169	Z	2,191	0.1	1,030
355	Computer and electronic office equipment	186,125	1.3	3,033	Z	2,771	0.1	992
356	Prepared unrecorded or prerecorded media	31,553	0.2	923	Z	981	Z	1,011
357	Transmission, and reception apparatus for radio, television, radar, and remote-control	43,773	0.3	844	Z	657	Z	1,296
358	Electronic components and parts	202,566	1.5	1,350	Z	1,054	Z	1,193
359	Other electronic and electrical equipment, n.e.c.	372,098	2.7	26,477	0.2	12,724	0.4	574
361	Motorized vehicles for transport of less than 10 people, except motorcycles, armored, and recreational	263,073	1.9	23,207	0.2	13,634	0.5	1,258
362	Motor vehicles for the transport of goods, and road tractors for semi-trailers	48,848	0.4	7,129	0.1	4,033	0.1	311
363	Other vehicles	127,674	0.9	16,640	0.1	9,407	0.3	834
364	Motor vehicles parts and accessories except motorcycles and armored fighting vehicles	598,745	4.3	83,093	0.7	37,684	1.3	411
371	Railway equipment including locomotives and rolling stock, railway track fixtures and fittings, and parts	23,953	0.2	5,089	Z	3,133	0.1	883
372	Aircraft and spacecraft	225,507	1.6	945	Z	814	Z	865
373	Ships, boats, and floating structures	30,931	0.2	1,481	Z	395	Z	534
381	Optical elements, instruments, and apparatus, except photographic and cinematographic	31,937	0.2	210	Z	266	Z	992
382	Photographic and photocopying machines	28,046	0.2	823	Z	523	Z	654
383	Surveying, hydrographic, oceanographic, hydrological, meteorological, and geophysical instruments and appliances	10,899	0.1	82	Z	50	Z	1,191
384	Instruments, apparatus, and appliances for medical, surgical, dental, veterinary, or similar purposes	196,695	1.4	4,839	Z	3,348	0.1	983
385	Meters and other instruments and apparatus for measuring or process control	84,317	0.6	1,352	Z	1,138	Z	853
390	Furniture, mattresses and mattress supports, lamps, lighting fittings, and illuminated signs	160,790	1.2	27,573	0.2	13,621	0.5	837
401	Arms and ammunition	28,007	0.2	941	Z	583	Z	935
402	Toys, games, and sporting equipment	81,415	0.6	6,113	0.1	4,563	0.2	1,130
409	Miscellaneous manufactured products	407,645	2.9	67,074	0.6	26,058	0.9	1,007
411	Metallic waste and scrap	96,168	0.7	171,622	1.5	54,207	1.8	161
412	Nonmetallic waste and scrap, except from food processing	10,834	0.1	69,610	0.6	12,447	0.4	246
439	Mixed freight	1,377,371	9.9	374,071	3.3	75,269	2.5	413
999	Commodity unknown	360	Z	1,303	Z	162	Z	112

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.² Estimates exclude shipments of crude petroleum (SCTG 16).³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 074. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 182.⁴ Prior to the 2012 CFS, denatured alcohol of more than 80 percent by volume was included in Commodity Code 083. In the 2012 CFS, denatured alcohol of more than 80 percent by volume moved to Commodity Code 084.⁵ Prior to the 2012 CFS, Commodity Code 171 only included gasoline. In the 2012 CFS, mixtures of 10 percent ethanol and gasoline moved to Commodity Code 171.⁶ Prior to the 2012 CFS, kerosene was included in Commodity Code 192. In the 2012 CFS, kerosene moved to Commodity Code 172.

Note: Value-of-shippments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 7.

Shipment Characteristics by Two-Digit Commodity and Mode of Transportation for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

² Estimates exclude shipments of crude petroleum (SCTG 16).

³ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁴ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

⁵ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁶ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁸ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

See footnotes at end of table.

Table 8.

Shipment Characteristics by Two-Digit Commodity and Distance Shipped for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

SCTG code	Commodity description and distance shipped ¹	Value (million dollars)	Tons (thousands)	Ton-miles ² (millions)
99	Commodity unknown			
	Total	360	1,303	162
	Less than 50 miles.	0	0	0
	50 to 99 miles	286	1,035	113
	100 to 249 miles	74	268	48
	250 to 499 miles	0	0	0
	500 to 749 miles	0	0	0
	750 to 999 miles	0	0	0
	1,000 to 1,499 miles	0	0	0
	1,500 to 1,999 miles	0	0	0
	2,000 miles or more.	0	0	0

S Withheld because estimate did not meet publication standards.

¹ Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁵ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 9.

Shipment Characteristics by Two-Digit Commodity and Shipment Weight for the United States: 2012—Con.

	50,000 to 99,999 lbs.	0	0	0	0
	100,000 lbs. or more	353	1,301	161	117

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

² Estimates exclude shipments of crude petroleum (SCTG 16).

³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁴ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁵ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

S Withheld because estimate did not meet publication standards.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shipsments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendices give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

	Rail and water	0	0	0	0
	Other multiple modes	S	S	S	S
	Other modes	0	0	0	0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.⁴ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).⁵ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 12.

Shipment Characteristics by NAICS¹ and Distance Shipped for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

NAICS code	NAICS title and distance shipped ²	Value (million dollars)	Tons (thousands)	Ton-miles ³ (millions)
212	Mining (except oil and gas)

Table 12.

Shipment Characteristics by NAICS¹ and Distance Shipped for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

NAICS code	NAICS title and distance shipped ²	Value (million dollars)	Tons (thousands)	Ton-miles ³ (millions)
4241	Paper and paper product merchant wholesalers			
	Total	96,163	39,288	7,602
	Less than 50 miles.	53,304	22,732	475
	50 to 99 miles	12,609	5,152	466
	100 to 249 miles	10,760	4,752	939
	250 to 499 miles	7,058	2,712	1,162
	500 to 749 miles	4,199	1,863	1,429
	750 to 999 miles	3,106	875	897
	1,000 to 1,499 miles	2,135	613	857
	1,500 to 1,999 miles	1,779	321	644
	2,000 miles or more.	1,214	268	735
4242	Drugs and druggists' sundries merchant wholesalers			
	Total	535,889	12,815	6,710
	Less than 50 miles.	158,582	2,827	81
	50 to 99 miles	101,433	1,934	166
	100 to 249 miles	139,695	3,055	597
	250 to 499 miles	51,095	1,515	709
	500 to 749 miles	27,932	1,228	918
	750 to 999 miles	16,487	551	564
	1,000 to 1,499 miles	17,477	593	847
	1,500 to 1,999 miles	10,516	326	682
	2,000 miles or more.	12,672	786	2,146
4243	Apparel, piece goods, and notions merchant wholesalers			
	Total	121,916	9,535	8,015
	Less than 50 miles.	24,502	2,181	47
	50 to 99 miles	6,965	683	62
	100 to 249 miles	14,046	969	193
	250 to 499 miles	17,895	1,679	783
	500 to 749 miles	11,700	746	562
	750 to 999 miles	8,922	710	709
	1,000 to 1,499 miles	12,949	868	1,237
	1,500 to 1,999 miles	10,338	430	892
	2,000 miles or more.	14,597	1,269	3,531
4244	Grocery and related product merchant wholesalers			
	Total	647,284	336,965	66,571
	Less than 50 miles.	317,459	181,375	3,861
	50 to 99 miles	109,402	49,976	4,462
	100 to 249 miles	123,258	57,038	11,096
	250 to 499 miles	43,404	22,474	9,480
	500 to 749 miles	16,657	7,857	5,956
	750 to 999 miles	11,267	5,630	6,077
	1,000 to 1,499 miles	10,301	5,444	8,100
	1,500 to 1,999 miles	6,910	3,905	8,390
	2,000 miles or more.	8,626	3,267	9,148
4245	Farm product raw material merchant wholesalers			
	Total	239,194	642,820	260,458
	Less than 50 miles.	95,753	294,728	8,479
	50 to 99 miles	25,757	74,484	7,189
	100 to 249 miles	27,036	72,209	17,840
	250 to 499 miles	22,971	49,553	26,918
	500 to 749 miles	25,174	68,372	67,422
	750 to 999 miles	18,060	38,956	51,026
	1,000 to 1,499 miles	18,515	40,224	69,211
	1,500 to 1,999 miles	2,701	3,477	9,876
	2,000 miles or more.	3,228	818	2,497
4246	Chemical and allied products merchant wholesalers			
	Total	153,656	104,935	22,535
	Less than 50 miles.	61,155	47,220	1,109
	50 to 99 miles	20,023	20,019	1,852

S Withheld because estimate did not meet publication standards.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.⁴ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 13.

Shipment Characteristics by NAICS¹ and Shipment Weight for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

NAICS code	NAICS title and shipment weight	Value (million dollars)	Tons (thousands)	Ton-miles ² (millions)	Average miles per shipment
212	Mining (except oil and gas)

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shippments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 14.

Shipment Characteristics by Origin State for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Origin state	Value (million dollars)	Tons (thousands)	Ton-miles ¹ (millions)	Average miles per shipment

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendices give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 16.

Shipment Characteristics of Temperature Controlled Shipments¹ by Mode of Transportation for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Mode of transportation	Value		Tons		Ton-miles ²		Average miles per shipment
	2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total	
All modes	1,620,164	100.0	668,225	100.0	213,293	100.0	204
Single modes	1,465,548	90.5	659,921	98.8	204,550	95.9	138
Truck ³	1,408,696	86.9	616,703	92.3	170,122	79.8	120
For-hire truck	727,616	44.9	296,171	44.3	141,412	66.3	501
Private truck	681,080	42.0	320,532	48.0	28,710	13.5	61
Rail	23,977	1.5	34,454	5.2	28,636	13.4	864
Water	8,133	0.5	6,997	1.0	3,646	1.7	1,156
Inland water	4,898	0.3	5,813	0.9	S	S	473
Great Lakes	0	0.0	0	0.0	0	0.0	0
Deep sea	2,859	0.2	721	0.1	879	0.4	1,158
Multiple waterways	376	Z	463	0.1	188	0.1	1,708
Air (includes truck and air)	24,323	1.5	971	0.1	1,714	0.8	1,538
Pipeline ⁴	418	Z	796	0.1	S	S	S
Multiple modes	154,616	9.5	8,304	1.2	8,744	4.1	688
Parcel, U.S. Postal Service, or courier	144,887	8.9	502	0.1	288	0.1	686
Truck and rail	6,835	0.4	5,377	0.8	6,883	3.2	706
Truck and water	2,574	0.2	919	0.1	1,452	0.7	981
Rail and water	S	S	S	S	122	0.1	S
Other multiple modes	0	0.0	0	0.0	0	0.0	0
Other modes	0	0.0	0	0.0	0	0.0	0

S Withheld because estimate did not meet publication standards

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁴ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 17.

Shipment Characteristics of Temperature Controlled Shipments¹ by Total Modal Activity for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Mode of transportation ²	Ton-miles ³		Average miles per shipment
	2012 (million dollars)	Percent of total	
Total	213,293	100.0	201
Truck ⁴	170,917	80.1	119
Rail	35,438	16.6	779
Inland water	3,040	1.4	328
Great Lakes	S	S	757
Deep sea	2,037	1.0	1,057
Air (includes truck and air)	S	S	1,349
Pipeline ⁵	S	S	S
Parcel, U.S. Postal Service, or courier	286	0.1	682
Other modes	0	0.0	0

S Withheld because estimate did not meet publication standards.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Estimates represent activity for a given mode across single and multiple mode shipments. For example, "Truck" ton-miles includes total ton-miles for shipments moving only by truck plus ton-miles for truck segments of multiple mode shipments.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁵ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

Note: Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 18.

Shipment Characteristics of Temperature Controlled Shipments¹ by Distance Shipped for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Distance shipped ² (Based on Great Circle Distance)	Value		Tons		Ton-miles ³	
	2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total
Total	1,620,164	100.0	668,225	100.0	213,293	100.0
Less than 50 miles	528,448	32.6	256,826	38.4	6,296	3.0
50 to 99 miles	249,745	15.4	100,502	15.0	9,096	4.3
100 to 249 miles	336,574	20.8	132,871	19.9	26,096	12.2
250 to 499 miles	210,243	13.0	70,427	10.5	32,666	15.3
500 to 749 miles	102,207	6.3	39,142	5.9	30,564	14.3
750 to 999 miles	66,205	4.1	27,304	4.1	30,186	14.2
1,000 to 1,499 miles	66,632	4.1	23,563	3.5	35,523	16.7
1,500 to 1,999 miles	33,675	2.1	9,894	1.5	21,033	9.9
2,000 miles or more	26,434	1.6	7,696	1.2	21,835	10.2

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 19.

Shipment Characteristics of Temperature Controlled Shipments¹ by Shipment Weight for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

Shipment weight	Value		Tons		Ton-miles ²		Average miles per shipment
	2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total	
Total	1,620,164	100.0	668,225	100.0	213,293	100.0	204
Less than 50 lbs.	133,997	8.3	1,519	0.2	361	0.2	338
50 to 99 lbs.	46,571	2.9	1,812	0.3	188	0.1	104
100 to 499 lbs.	116,623	7.2	14,960	2.2	1,427	0.7	94
500 to 749 lbs.	38,969	2.4	8,769	1.3	884	0.4	100
750 to 999 lbs.	37,350	2.3	8,155	1.2	884	0.4	108
1,000 to 9,999 lbs.	419,944	25.9	130,820	19.6	24,111	11.3	163
10,000 to 49,999 lbs.	744,095	45.9	383,318	57.4	136,958	64.2	335
50,000 to 99,999 lbs.	42,318	2.6	64,988	9.7	10,316	4.8	153
100,000 lbs. or more	40,297	2.5	53,884	8.1	38,164	17.9	820

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 20.

Shipment Characteristics of Temperature Controlled Shipments¹ by Two-Digit Commodity for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

SCTG code	Commodity description	Value		Tons		Ton-miles ²		Average miles per shipment
		2012 (million dollars)	Percent of total	2012 (thousands)	Percent of total	2012 (millions)	Percent of total	
	All commodities³	1,620,164	100.0	668,225	100.0	213,293	100.0	204

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁵ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁵ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

⁶ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁷ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁸ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁹ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

	750 to 999 miles	0	0	0
	1,000 to 1,499 miles	0	0	0
	1,500 to 1,999 miles	0	0	0
	2,000 miles or more.	0	0	0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ Estimates exclude shipments of crude petroleum (SCTG 16).

⁵ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁶ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁸ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 23.

	50,000 to 99,999 lbs.	0	0	0	0
	100,000 lbs. or more	S	S	S	S

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁵ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

411	Metallic waste and scrap	S	S	S	S	S	S	S
412	Nonmetallic waste and scrap, except from food processing	0	0.0	0	0.0	0	0.0	0
439	Mixed freight	529,281	32.7	187,669	28.1	28,825	13.5	108
999	Commodity unknown	24	Z	S	S	S	S	94

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 074. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 182.

⁵ Prior to the 2012 CFS, denatured alcohol of more than 80 percent by volume was included in Commodity Code 083. In the 2012 CFS, denatured alcohol of more than 80 percent by volume moved to Commodity Code 084.

⁶ Prior to the 2012 CFS, Commodity Code 171 only included gasoline. In the 2012 CFS, mixtures of 10 percent ethanol and gasoline moved to Commodity Code 171.

⁷ Prior to the 2012 CFS, kerosene was included in Commodity Code 192. In the 2012 CFS, kerosene moved to Commodity Code 172.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

	Rail and water	0	0	0	0
	Other multiple modes	0	0	0	0
	Other modes	0	0	0	0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² NAICS codes shown are those covered in the Commodity Flow Survey.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁵ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

⁶ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Table 27.

Shipment Characteristics of Temperature Controlled Shipments¹ by NAICS² and Distance Shipped for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey. Because of rounding, estimates may not be additive]

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² NAICS codes shown are those covered in the Commodity Flow Survey.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² NAICS codes shown are those covered in the Commodity Flow Survey.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: Value-of-shipments estimates have not been adjusted for price changes. Appendix B tables provide estimated measures of sampling variability. The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/econ/cfs>.

Appendix A.

Comparability With the 2007, 2002, 1997, and 1993 Commodity Flow Surveys

The following tables show a comparison of the commodity classification system, industry coverage, sample size, sample weeks, reported mode of transportation, and data items requested for each shipment among the 1993, 1997, 2002, 2007, and 2012 Commodity Flow Surveys (CFS).

Commodity Classification System

1993	1997, 2002, 2007, and 2012
Standard Transportation Commodity Code (STCC), developed by the Association of American Railroads (AAR)	Standard Classification of Transported Goods (SCTG)

Industry Coverage

1993 CFS and 1997 CFS	2002 CFS	2007 CFS	2012 CFS
Establishments classified based on the 1987 Standard Industrial Classification (SIC) system	Establishments classified based on the 1997 North American Industry Classification System (NAICS)	Establishments classified based on the 2002 NAICS	Establishments classified based on 2007 NAICS
Publishers were covered—classified in Manufacturing Division	Publishers were not covered—classified in information sector ¹	Publishers were covered—classified in information sector ¹	Publishers were covered—classified in Information Sector ¹
Logging covered—under Manufacturing Division	Logging not covered ²	Logging not covered ²	Logging not covered
Other Manufacturing (excluding Printing Trade Services [SIC 279])	Other manufacturing (excluding Prepress services [NAICS 323122])	Other manufacturing (excluding Prepress services [NAICS 323122])	Manufacturing (excluding Prepress Services [NAICS 323122])
Mining (except mining services [SICs 108, 124, 138, 148] and oil and gas extraction [SICs 131 and 132])	Mining (except support activities [NAICS 213] and oil and gas extraction [NAICS 211])	Mining (except support activities [NAICS 213] and oil and gas extraction [NAICS 211])	Mining (except support activities [NAICS 213] and oil and gas extraction [NAICS 211])
Wholesale (merchants and manufacturers' sales branches and government-owned liquor stores)	Wholesale (merchants and manufacturers' sales branches and government-owned liquor stores)	Wholesale (merchants and manufacturers' sales branches and government-owned liquor stores)	Wholesale (merchants and manufacturers' sales branches and own brand importers)
Retail—catalog and mail-order houses	Retail—electronic shopping and mail-order houses	Retail—electronic shopping and mail-order houses, fuel dealers	Retail—electronic shopping and mail-order houses, fuel dealers
Auxiliaries (managing offices, warehouses)	Auxiliaries (managing offices, warehouses)	Auxiliaries (managing offices, warehouses) ³	Auxiliaries (managing offices, warehouses and trucking) ³

¹ Under NAICS, publishers were reclassified from Manufacturing (SIC 2711, 2721, 2731, 2741, and part of 2771) to Information (NAICS 5111 and 51223) and were excluded in the 2002 CFS. In 2007, Music Publishers (NAICS 51223) was tabulated and published in Newspaper, Periodical, Book and Directory Publishers (NAICS 5111). However, for the 2012 cycle, NAICS 51223 was not sampled.

² Because of changes in the classification of establishments between SIC and NAICS, logging establishments (NAICS 1133), which were covered as part of Manufacturing in the 1993 and 1997 surveys, were not included in 2002 and 2007. Detailed information about NAICS classification can be found on the Census Bureau's NAICS Web site.

³ While included in all surveys, the procedures for identifying in-scope auxiliary establishments have changed over the years. For the 1997 CFS, a managing office was considered in-scope only if it had sales or end-of-year inventories in the 1992 Census. Research conducted prior to the 2002 CFS showed that not all managing offices with shipping activity in the 1997 CFS indicated sales or inventories in the 1997 Economic Census. Consequently, the 1997 Economic Census results were not used to determine scope for managing offices in the 2002 CFS. For 2002, an auxiliary was included if it supported an in-scope or retail company. For the 2007 CFS, an advance survey of approximately 40,000 auxiliary establishments was conducted in 2006 to identify those auxiliary establishments with shipping activity. Those that indicated that shipping was performed (as well as nonrespondents) were included in the CFS sample universe. For the 2012 CFS, a targeted advance survey (precanvass) of approximately 100,000 establishments was conducted in 2011 to identify those establishments that actually conduct shipping activities. In these groups, surveyed establishments that reported that they did not conduct any shipping activity were excluded from the eventual CFS sample universe.

CFS Sample Size and Sample Frame

	Number of establishments in each CFS cycle				
	1993	1997	2002	2007	2012
Sample size	197,176	102,739	51,005	102,369	102,565
Sample frame size (approximately)	790,000	770,000	760,000	754,000	716,000

Sample Weeks

1993	1997, 2002, 2007, and 2012
Respondents were asked to select a sample of their individual outbound shipments during a 2-week period in each of the four calendar quarters of the year 1993, and report key characteristics (e.g., commodity, weight, value and destination) for each of the sampled shipments	Respondents were asked to select a sample of their individual outbound shipments during a 1-week period in each of the four calendar quarters of the reference CFS year, and report key characteristics (e.g., commodity, weight, value, and destination) for each of the sample shipments

Reported Mode of Transportation

Appendix B.

Reliability of the Estimates

INTRODUCTION

The estimates presented by the 2012 CFS may differ from the actual, unknown population values. The difference between the estimate and the population value is known as the total error of the estimate. When describing the accuracy of survey results, it is convenient to discuss total error as the sum of sampling error and nonsampling error. Sampling error is the average difference between the estimate and the result that would be obtained from a complete enumeration of the sampling frame conducted under the same survey conditions. Nonsampling error encompasses all other factors that contribute to the total error of a sample survey estimate.

The sampling error of the estimates in this publication can be estimated from the selected sample because the sample was selected using probability sampling. Common measures related to sampling error are the sampling variance, the standard error, and the coefficient of variation (CV). The sampling variance is the squared difference, averaged over all possible samples of the same size and design, between the estimator and its average value. The standard error is the square root of the sampling variance. The CV expresses the standard error as a percentage of the estimate to which it refers.

Nonsampling errors are difficult to measure and can be introduced through inadequacies in the questionnaire, nonresponse, inaccurate reporting by respondents, errors in the application of survey procedures, incorrect recording of answers, and errors in data entry and processing. In conducting the 2012 CFS, every effort has been made to minimize the effect of nonsampling errors on the estimates. Data users should take into account both the measures of sampling error and the potential effects of nonsampling error when using these estimates.

SAMPLING ERROR

Because the estimates are based on a sample, exact agreement with results that would be obtained from a complete enumeration of all shipments made in 2012 from all establishments included on the sampling frame using the same enumeration procedures is not expected. However, because probability sampling was used at each stage of selection, it is possible to estimate the sampling variability of the survey estimates. For CFS estimates, sampling variability arises from each of the three stages of sampling (See Appendix C).

The particular sample of shipments used in this survey is one of a large number of samples of the same size that could have been selected using the same design. If all possible samples had been surveyed under the same conditions, an estimate of a population parameter of interest could have been obtained from each sample. These samples give rise to a distribution of estimates for the population parameter. A statistical measure of the variability among these estimates is the standard error, which can be approximated from any one sample. The standard error is defined as the square root of the variance. The coefficient of variation (or relative standard error) of an estimator is the standard error of the estimator divided by the estimator. For the CFS, the coefficient of variation also incorporates the effect of the noise infusion disclosure avoidance method (see Disclosure Avoidance below). Note that measures of sampling variability, such as the standard error and coefficient of variation, are estimated from the sample and are also subject to sampling variability and, technically, we should refer to the estimated standard error or the estimated coefficient of variation of an estimator. However, for the sake of brevity, we have omitted this detail. It is important to note that the standard error only measures sampling variability. It does not measure systematic biases of the sample. The Census Bureau recommends that individuals using estimates contained in this report incorporate this information into their analyses, as sampling error could affect the conclusions drawn from these estimates.

An estimate from a particular sample and the standard error associated with the estimate can be used to construct a confidence interval. A confidence interval is a range about a given estimator that has a specified probability of containing the result of a complete enumeration of the sampling frame conducted under the same survey conditions. Associated with each interval is a percentage of confidence, which is interpreted as follows. If, for each possible sample, an estimate of a population parameter and its approximate standard error were obtained, then:

1. For approximately 90 percent of the possible samples, the interval from 1.833 standard errors below to 1.833 standard errors above the estimate would include the result as obtained from a complete enumeration of the sampling frame conducted under the same survey conditions.

2. For approximately 95 percent of the possible samples, the interval from 2.262 standard errors below to 2.262 standard errors above the estimate would include the result as obtained from a complete enumeration of the sampling frame conducted under the same survey conditions.

The 1.833 and 2.262 values, used to compute the 90 percent and 95 percent confidence intervals, are taken from the t-distribution with nine degrees of freedom. This takes into account the uncertainty in the estimates of the CVs and standard errors produced using the random group method with ten random groups.

To illustrate the computation of a confidence interval for an estimate of total value of shipments, assume that an estimate of total value is \$10,750 million and the coefficient of variation for this estimate is 1.8 percent, or 0.018. First obtain the standard error of the estimate by multiplying the value of shipments estimate by its coefficient of variation. For this example, multiply \$10,750 million by 0.018. This yields a standard error of \$193.5 million. The upper and lower bounds of the 90 percent confidence interval are computed as \$10,750 million plus or minus 1.833 times \$193.5 million or \$354.7 million. Consequently, the 90 percent confidence interval is \$10,395 million to \$11,105 million. If corresponding confidence intervals were constructed for all possible samples of the same size and design, approximately 9 out of 10 (90 percent) of these intervals would contain the result obtained from a complete enumeration.

NONSAMPLING ERROR

Nonsampling error encompasses all other factors that contribute to the total error of a sample survey estimate and may also occur in censuses. It is often helpful to think of nonsampling error as arising from deficiencies or mistakes in the survey process. In the CFS, nonsampling error can be attributed to many sources:

- Inability to obtain information about all units in the sample.
- Response errors.
- Differences in the interpretation of the questions.
- Mistakes in coding or keying the data obtained.
- Other errors of collection, response, coverage, and processing.

Although no direct measurement of the potential biases due to nonsampling error has been obtained, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize their influence. The Census Bureau recommends that individuals using estimates in this report incorporate this information into their analyses, as nonsampling error could affect the conclusions drawn from these estimates.

Some possible sources of bias that are attributed to respondent-conducted sampling include:

- Misunderstanding the definition of a shipment.
- Constructing an incomplete frame of shipments from which to sample.
- Ordering the shipment sampling frame by selected shipment characteristics.
- Selecting shipment records by a method other than the one specified in the questionnaire's instructions.

The respondents who reported a shipment with unusually large value or weight when compared to the rest of their reported shipments were often contacted for verification. In such cases, if we were able to collect information on all of the large shipments a respondent had made either for a particular reporting week or for the entire quarter, we then identified those large shipments as certainty shipments.

A potential source of bias in the estimates is nonresponse. Nonresponse is defined as the inability to obtain all the intended measurements or responses from all units in the sample. Four levels of nonresponse can occur in the CFS:

- Item
- Shipment
- Quarter (reporting week)
- Establishment

Nonresponse

Item nonresponse occurs either when a particular shipment data item is unanswered or the response to the question fails computer or analyst edits. Nonresponse to the shipment value or weight items is corrected by imputation, which is the procedure by which a missing value is replaced by a predicted value obtained from an appropriate model. (See Appendix C for a description of the imputation procedure.)

Shipment, quarter, and establishment nonresponse describe the inability to obtain any of the substantive measurements about a sampled shipment, quarter, or establishment, respectively. Shipment and quarter nonresponse are corrected by reweighting (see Appendix C for the descriptions of the shipment and quarter nonresponse weights). Reweighting allocates characteristics to the nonrespondents in proportion to the characteristics observed for the respondents. The amount of bias introduced by this nonresponse adjustment procedure depends on the extent to which the nonrespondents differ, characteristically, from the respondents.

Establishment nonresponse is corrected during the estimation procedure by the industry-level adjustment weight. In most cases of establishment nonresponse, none of the four questionnaires have been returned to the Census Bureau after several attempts to elicit a response.

Response Rate

The CFS produces four different response rates: a participation response rate, a unit response rate, a weighted unit response rate, and a total quantity (item) response rate. The first three are based on the responses of the establishments selected into the survey. These unit response rates are shown in Table 1 below.

Table 1.
2012 CFS Unit Response Rates

Type of response rate	PRR, URR, WRR (percent) ^{1, 2, 3}
Participation.	57.0
Unit	66.1
Weighted unit.	76.7

¹ Participation Response Rate (PRR)—The Participation Response Rate is the total number of unweighted establishments that provided usable data divided by the total number of establishments in the sample (102,565) (expressed as a percentage). “Usable data” means that an establishment provided at least one shipment that was used in the tabulation of published estimates.

² Unit Response Rate (URR)—The Unit Response Rate is defined as the percentage of the total unweighted number of establishments that provided usable data to the total number of establishments that were eligible (or potentially eligible) for data collection. URRs are indicators of the performance of the data collection process in obtaining usable responses.

³ Weighted Unit Response Rate (WRR)—The Weighted Unit Response Rate is defined as the percentage of the total weighted 2012 Economic Census adjusted receipts of establishments that provided usable data to the total weighted economic census adjusted receipts of establishments that were eligible (or potentially eligible) for data collection. This incorporates the size of the establishment as well as its sample weight into the measure of response.

The fourth rate is based on the quality of the individual shipment data reported by the responding establishments. These total quantity response rates for the 2012 CFS are shown in Table 2 below.

Table 2.
2012 CFS Total Quantity Response Rates

CFS variable	TQRR (percent) ¹
Value	51.9
Tons.	50.9
Ton-miles	63.2

¹ Total Quantity Response Rate (TQRR)—The Total Quantity Response Rate is defined as the percentage of the estimated (weighted) total of a given data item (Value, Tons, or Ton-miles) that is based on reported shipment data or from sources determined to be of equivalent-quality-to-reported. The TQRR is an item-level indicator of the “quality” of each estimate. In contrast to the Unit Response Rate (URR), these weighted response rates are computed for individual data items, so CFS produces several TQRRs. The TQRR for the CFS is based on the weighting adjustments made for establishment, quarter, or shipment nonresponse.

DEFINITIONS OF TERMS

Confidentiality

Title 13 of the U.S. Code authorizes the Census Bureau to conduct censuses and surveys. Section 9 of Title 13 requires that any information collected from the public under the authority of Title 13 be maintained as

confidential. Section 214 of Title 13 and Sections 3559 and 3571 of Title 18 of the U.S. Code provide for the imposition of penalties of up to 5 years in prison and up to \$250,000 in fines for wrongful disclosure of confidential census information. In accordance with Title 13, no estimates are published that would disclose the operations of an individual firm.

The Census Bureau’s internal Disclosure Review Board sets the confidentiality rules for all data releases. A checklist approach is used to ensure that all potential risks to the confidentiality of the data are considered and addressed.

Disclosure Avoidance

Disclosure is the release of data that have been deemed confidential. It generally reveals information about a specific individual or establishment or permits deduction of sensitive information about a particular individual or establishment. Disclosure avoidance is the process used to protect the confidentiality of the survey data provided by an individual or firm.

Using disclosure avoidance procedures, the Census Bureau modifies or removes the characteristics that put confidential information at risk of disclosure. Although it may appear that a table shows information about a specific individual or business, the Census Bureau has taken steps to disguise or suppress the original data while making sure the results are still useful. The techniques used by the Census Bureau to protect confidentiality in tabulations vary, depending on the type of data.

For the CFS, the primary method of disclosure avoidance is Noise Infusion. Noise Infusion is a method of disclosure avoidance in which values for each shipment are perturbed prior to tabulation by applying a random noise multiplier to shipment value and weight. Disclosure protection is accomplished in a manner that causes the vast majority of cell values to be perturbed by at most a few percentage points. For sample-based tabulations, such as CFS, the estimated relative standard error for a published cell includes both the estimated sampling error and the amount of perturbation in the estimated cell value due to noise. In extremely rare circumstances, some individual cells may be suppressed on a case-by-case basis for additional disclosure avoidance. In these cases, the data are replaced with a “D” in the tables. Other cells in the table may be suppressed because the quality of the data does not meet publication standards. By far, the most common reason for suppressing a cell is a high coefficient of variation (greater than 50 percent). These suppressed cells are shown with an “S” in the tables.

Unpublished Estimates

Estimates that had high sampling variability or poor response quality were not published. Some of these unpublished estimates can be derived directly from the CFS tables by subtracting published estimates from their respective totals. However, the (unpublished) estimates obtained by such subtraction would be subject to poor response, high sampling variability, or other factors that may make them potentially misleading. Estimates derived in this manner should not be attributed to the Census Bureau.

Individuals who use estimates in these tables to create new estimates should cite the Census Bureau as the source of only the original estimates.

More detailed descriptions for the 2012 CFS can be found in the sampling and nonsampling errors sections (see Sampling and Nonsampling Error in Appendix B).

Table B-1a.

Estimated Measures of Reliability for Shipment Characteristics by Mode of Transportation for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

Mode of transportation	Value		Tons		Ton-miles ¹		Average miles per shipment—coefficient of variation of number
	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total

750 to 999 miles	1.9	0.2	8.4	0.3	8.3	1.0
1,000 to 1,499 miles	2.5	0.1	6.9	0.2	6.8	0.7
1,500 to 1,999 miles	4.0	0.1	5.4	Z	7.4	0.7
2,000 miles or more.....	3.5	0.1	4.3	Z	4.2	0.3

Z Rounds to zero.

¹ Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-3b.

Estimated Measures of Reliability for Shipment Characteristics by Distance Shipped for the United States: 2012 and 2007

[Estimates are based on data from the 2012 and 2007 Commodity Flow Surveys]

Distance shipped ¹ (based on Great Circle Distance)	Value			Tons			Ton-miles ²		
	Coefficient of variation of number		Standard error of percent change	Coefficient of variation of number		Standard error of percent change	Coefficient of variation of number		Standard error of percent change
	2012	2007		2012	2007		2012	2007	
Total	1.1	0.8	1.6	1.8	1.6	2.2	3.7	3.6	4.5
Less than 50 miles.	2.0	1.4	3.2	2.2	2.1	2.7	2.4	2.6	2.8
50 to 99 miles	2.2	1.6	3.5	2.8	3.2	3.9	3.1	3.5	4.0
100 to 249 miles	1.8	1.3	2.6	3.2	3.2	3.8	3.6	4.3	4.5
250 to 499 miles	1.2	1.8	2.3	4.1	3.4	4.7	4.0	3.3	4.5
500 to 749 miles	1.7	1.6	2.6	4.4	3.5	5.4	4.9	3.6	5.9
750 to 999 miles	1.9	2.4	3.4	8.4	9.7	11.1	8.3	9.7	10.9
1,000 to 1,499 miles	2.5	2.3	3.7	6.9	7.6	9.4	6.8	7.4	9.1
1,500 to 1,999 miles	4.0	4.5	6.0	5.4	5.1	8.2	7.4	4.4	9.9
2,000 miles or more.....	3.5	4.7	6.0	4.3	5.6	5.8	4.2	6.8	6.1

¹ Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.² Estimates exclude shipments of crude petroleum (SCTG 16).³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁴ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁵ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁶ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

X Not applicable.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.² Estimates exclude shipments of crude petroleum (SCTG 16).³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁴ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁵ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁶ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs/>.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.² Estimates exclude shipments of crude petroleum (SCTG 16).³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 074. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 182.⁴ Prior to the 2012 CFS, denatured alcohol of more than 80 percent by volume was included in Commodity Code 083. In the 2012 CFS, denatured alcohol of more than 80 percent by volume moved to Commodity Code 084.⁵ Prior to the 2012 CFS, Commodity Code 171 only included gasoline. In the 2012 CFS, mixtures of 10 percent ethanol and gasoline moved to Commodity Code 171.⁶ Prior to the 2012 CFS, kerosene was included in Commodity Code 192. In the 2012 CFS, kerosene moved to Commodity Code 172.Note: The Introduction and appendices give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	Other modes	0.0	0.0	0.0	0.0	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.
Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

² Estimates exclude shipments of crude petroleum (SCTG 16).

³ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁴ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

⁵ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁶ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁸ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	1,000 to 1,499 miles	0.0	0.0	0.0
	1,500 to 1,999 miles	0.0	0.0	0.0
	2,000 miles or more	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

¹ Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁵ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-9.

Estimated Coefficients of Variation for Shipment Characteristics by Two-Digit Commodity and Shipment Weight for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey]

SCTG code	Commodity description and shipment weight	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles¹— coefficient of variation of number	Average miles per shipment— coefficient of variation of number
29	Printed products				
	Total	4.3	8.0	9.2	17.1
	Less than 50 lbs.	6.5	10.0	6.9	17.6
	50 to 99 lbs.	8.3	14.6	14.2	14.6
	100 to 499 lbs.	8.9	14.6	11.0	15.2
	500 to 749 lbs.	11.9	14.4	13.6	15.9
	750 to 999 lbs.	11.9	21.2	15.0	12.5
	1,000 to 9,999 lbs.	4.1	9.2	12.1	6.1
	10,000 to 49,999 lbs.	4.8	12.3	12.5	8.9
	50,000 to 99,999 lbs.	39.3	36.6	22.5	49.3
	100,000 lbs. or more	19.8	21.8	S	29.0
30	Textiles, leather, and articles of textiles or leather				
	Total	8.8	8.0	11.0	2.3
	Less than 50 lbs.	8.8	8.3	10.8	2.1
	50 to 99 lbs.	7.4	6.2	15.6	9.6
	100 to 499 lbs.	5.0	6.0	5.7	5.3
	500 to 749 lbs.	9.5	10.3	12.0	9.8
	750 to 999 lbs.	22.0	19.8	15.7	9.8
	1,000 to 9,999 lbs.	18.2	7.7	8.2	5.2
	10,000 to 49,999 lbs.	14.4	9.9	11.2	7.0
	50,000 to 99,999 lbs.	37.7	34.3	42.7	33.2
	100,000 lbs. or more	32.6	28.0	S	31.0
31	Nonmetallic mineral products				
	Total	2.2	3.5	2.5	8.0
	Less than 50 lbs.	11.6	12.9	17.5	4.9
	50 to 99 lbs.	10.5	8.4	21.4	11.1
	100 to 499 lbs.	10.9	10.4	26.3	15.6
	500 to 749 lbs.	22.0	7.0	32.4	24.7
	750 to 999 lbs.	7.9	5.5	8.5	6.6
	1,000 to 9,999 lbs.	7.2	4.1	6.0	8.5
	10,000 to 49,999 lbs.	4.1	3.7	3.9	4.6
	50,000 to 99,999 lbs.	4.9	6.4	6.7	5.2
	100,000 lbs. or more	7.9	8.2	8.5	9.2
32	Base metal in primary or semifinished forms and in finished basic shapes				
	Total	2.2	3.1	2.8	6.0
	Less than 50 lbs.	5.8	7.4	21.2	10.0
	50 to 99 lbs.	5.3	6.0	6.6	6.0
	100 to 499 lbs.	5.0	5.5	8.0	5.9
	500 to 749 lbs.	7.1	6.2	6.8	6.4
	750 to 999 lbs.	5.8	6.3	9.8	5.7
	1,000 to 9,999 lbs.	4.1	5.4	6.1	3.5
	10,000 to 49,999 lbs.	3.0	4.0	4.2	2.3
	50,000 to 99,999 lbs.	5.9	6.5	4.4	6.7
	100,000 lbs. or more	6.8	5.4	7.1	6.5
33	Articles of base metal				
	Total	2.5	3.1	2.9	4.4
	Less than 50 lbs.	3.7	3.6	5.6	4.9
	50 to 99 lbs.	5.1	3.2	6.3	5.5
	100 to 499 lbs.	3.8	3.0	6.3	5.7
	500 to 749 lbs.	5.7	7.1	8.1	4.6
	750 to 999 lbs.	8.1	6.8	7.9	6.6
	1,000 to 9,999 lbs.	2.7	3.8	4.2	3.5
	10,000 to 49,999 lbs.	4.2	4.9	4.4	2.2
	50,000 to 99,999 lbs.	12.2	11.2	16.0	14.6
	100,000 lbs. or more	9.4	6.3	11.9	6.2
34	Machinery				
	Total	2.8	9.5	6.0	4.7
	Less than 50 lbs.	3.5	5.1	8.0	5.3
	50 to 99 lbs.	4.1	3.7	6.1	3.4
	100 to 499 lbs.	2.6	4.0	9.0	6.5
	500 to 749 lbs.	7.1	5.4	9.4	7.0
	750 to 999 lbs.	4.2	5.0	8.1	6.4
	1,000 to 9,999 lbs.	3.3	3.6	7.6	5.9
	10,000 to 49,999 lbs.	3.9	14.3	4.5	8.3
	50,000 to 99,999 lbs.	11.4	18.7	26.6	18.2
	100,000 lbs. or more	21.9	23.8	36.7	11.4
35	Electronic and other electrical equipment and components and office equipment				
	Total	3.4	3.8	4.0	4.8
	Less than 50 lbs.	3.8	3.5	6.1	4.6
	50 to 99 lbs.	5.8	3.2	9.2	7.8
	100 to 499 lbs.	4.0	4.0	6.5	6.9
	500 to 749 lbs.	10.0	7.1	12.5	11.5
	750 to 999 lbs.	12.7	8.0	8.3	7.4
	1,000 to 9,999 lbs.	3.7	6.4	5.0	4.2
	10,000 to 49,999 lbs.	7.0	7.1	5.2	4.6
	50,000 to 99,999 lbs.	16.8	21.1	31.0	25.4
	100,000 lbs. or more	32.0	30.4	26.8	22.3

See footnotes at end of table.

Table B-9.

Estimated Coefficients of Variation for Shipment Characteristics by Two-Digit Commodity and Shipment Weight for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey]

SCTG code	Commodity description and shipment weight	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles¹— coefficient of variation of number	Average miles per shipment— coefficient of variation of number
36	Motorized and other vehicles (including parts)				
	Total	2.4	4.5	7.9	8.9
	Less than 50 lbs.	5.3	17.9	14.3	9.5
	50 to 99 lbs.	5.4	10.1	12.0	9.6
	100 to 499 lbs.	4.4	5.4	13.3	11.5
	500 to 749 lbs.	7.9	8.7	14.4	8.6
	750 to 999 lbs.	17.6	10.9	11.4	14.0
	1,000 to 9,999 lbs.	8.8	6.6	11.2	5.1
	10,000 to 49,999 lbs.	7.3	8.0	12.1	7.0
	50,000 to 99,999 lbs.	8.7	11.6	23.8	13.2
	100,000 lbs. or more	24.4	24.9	44.9	14.7
37	Transportation equipment, n.e.c.				
	Total	6.4	9.3	11.6	4.9
	Less than 50 lbs.	6.8	11.0	6.4	5.0
	50 to 99 lbs.	15.1	14.7	11.5	12.3
	100 to 499 lbs.	10.4	13.5	9.5	8.4
	500 to 749 lbs.	27.6	11.5	11.2	8.8
	750 to 999 lbs.	12.6	23.3	23.1	7.6
	1,000 to 9,999 lbs.	19.2	29.7	28.3	11.6
	10,000 to 49,999 lbs.	21.9	21.4	14.3	9.5
	50,000 to 99,999 lbs.	S	31.8	36.5	17.2
	100,000 lbs. or more	24.4	9.2	15.1	9.3
38	Precision instruments and apparatus				
	Total	3.1	18.6	8.7	3.0
	Less than 50 lbs.	4.1	8.8	9.6	2.9
	50 to 99 lbs.	9.4	11.0	15.8	5.6
	100 to 499 lbs.	6.1	11.3	15.7	6.6
	500 to 749 lbs.	14.5	8.3	20.7	14.2
	750 to 999 lbs.	9.1	13.9	19.6	14.2
	1,000 to 9,999 lbs.	5.7	9.2	13.8	7.7
	10,000 to 49,999 lbs.	16.9	15.4	21.0	5.8
	50,000 to 99,999 lbs.	37.3	23.5	37.7	26.8
	100,000 lbs. or more	S	S	S	21.7
39	Furniture, mattresses and mattress supports, lamps, lighting fittings, and illuminated signs				
	Total	10.8	12.1	6.7	7.8
	Less than 50 lbs.	16.6	23.8	29.1	6.1
	50 to 99 lbs.	9.3	12.9	9.7	7.3
	100 to 499 lbs.	11.7	16.8	6.8	10.6
	500 to 749 lbs.	13.1	17.9	10.4	12.6
	750 to 999 lbs.	10.2	16.5	15.7	10.1
	1,000 to 9,999 lbs.	18.3	22.7	12.5	4.8
	10,000 to 49,999 lbs.	15.3	11.6	13.8	5.4
	50,000 to 99,999 lbs.	S	24.1	32.9	31.2
	100,000 lbs. or more	24.2	38.0	S	S
40	Miscellaneous manufactured products				
	Total	3.7	10.9	6.0	3.3
	Less than 50 lbs.	5.1	5.9	8.5	3.3
	50 to 99 lbs.	7.8	8.3	11.8	6.1
	100 to 499 lbs.	5.4	5.6	7.0	5.9
	500 to 749 lbs.	11.9	7.5	12.2	6.0
	750 to 999 lbs.	7.8	17.6	16.6	7.3
	1,000 to 9,999 lbs.	2.2	7.2	4.9	6.4
	10,000 to 49,999 lbs.	9.2	12.9	11.4	11.5
	50,000 to 99,999 lbs.	34.2	46.4	15.7	39.6
	100,000 lbs. or more	24.4	29.3	28.3	15.6
41	Waste and scrap				
	Total	9.2	8.1	17.5	9.2
	Less than 50 lbs.	36.4	S	S	38.2
	50 to 99 lbs.	S	36.5	44.4	32.0
	100 to 499 lbs.	S	22.9	S	31.3
	500 to 749 lbs.	S	22.6	32.8	S
	750 to 999 lbs.	S	27.3	35.4	S
	1,000 to 9,999 lbs.	10.2	14.6	16.2	20.9
	10,000 to 49,999 lbs.	12.5	7.9	14.8	11.0
	50,000 to 99,999 lbs.	21.0	12.1	20.5	15.0
	100,000 lbs. or more	12.2	14.7	27.3	11.7
43	Mixed freight				
	Total	3.4	3.3	4.7	9.5
	Less than 50 lbs.	7.0	9.6	13.1	9.9
	50 to 99 lbs.	7.8	8.8	6.1	5.7
	100 to 499 lbs.	4.3	7.6	6.2	4.8
	500 to 749 lbs.	4.6	5.0	5.8	4.4
	750 to 999 lbs.	8.3	5.0	7.2	4.0
	1,000 to 9,999 lbs.	3.6	4.8	4.0	3.3
	10,000 to 49,999 lbs.	6.2	5.3	6.9	2.8
	50,000 to 99,999 lbs.	24.4	31.7	21.0	S
	100,000 lbs. or more	39.3	32.5	36.6	36.9

See footnotes at end of table.

Table B-9.

Estimated Coefficients of Variation for Shipment Characteristics by Two-Digit Commodity and Shipment Weight for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey]

SCTG code	Commodity description and shipment weight	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ¹ — coefficient of variation of number	Average miles per shipment— coefficient of variation of number
99	Commodity unknown				
	Total	37.9	33.0	28.0	19.4
	Less than 50 lbs.	0.0	0.0	0.0	0.0
	50 to 99 lbs.	0.0	0.0	0.0	0.0
	100 to 499 lbs.	0.0	0.0	0.0	0.0
	500 to 749 lbs.	0.0	0.0	0.0	0.0
	750 to 999 lbs.	0.0	0.0	0.0	0.0
	1,000 to 9,999 lbs.	0.0	0.0	0.0	0.0
	10,000 to 49,999 lbs.	S	S	S	S
	50,000 to 99,999 lbs.	0.0	0.0	0.0	0.0
	100,000 lbs. or more	38.2	33.0	28.0	18.5

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

² Estimates exclude shipments of crude petroleum (SCTG 16).

³ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁴ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁵ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-10a.

Estimated Coefficients of Variation for Shipment Characteristics by NAICS¹ for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

NAICS code	NAICS title	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ² — coefficient of variation of number	Average miles per shipment— coefficient of variation of number
	Total	1.1	1.8	3.7	3.4
212	Mining (except oil and gas)	3.1	2.6	9.7	3.0
31–33	Manufacturing	0.7	1.6	1.1	2.0
311	Food manufacturing	2.4	4.3	4.6	10.8
312	Beverage and tobacco product manufacturing	7.0	2.7	4.3	14.4
313	Textile mills	4.9	4.4	6.0	3.8
314	Textile product mills	9.1	18.9	19.1	4.7
315	Apparel manufacturing	18.1	17.1	36.7	4.5
316	Leather and allied product manufacturing	5.6	10.2	13.1	3.8
321	Wood product manufacturing	5.3	10.3	5.8	4.8
322	Paper manufacturing	2.4	4.4	3.9	5.7
323	Printing and related support activities	2.5	7.5	10.0	5.8
324	Petroleum and coal products manufacturing	4.3	4.1	10.2	10.9
325	Chemical manufacturing	2.1	3.8	5.6	3.7
326	Plastics and rubber products manufacturing	2.6	4.9	3.8	4.3
327	Nonmetallic mineral product manufacturing	2.2	2.6	4.9	5.9
331	Primary metal manufacturing	1.8	6.9	3.8	7.5
332	Fabricated metal product manufacturing	2.1	4.4	4.2	3.9
333	Machinery manufacturing	2.8	4.7	5.1	2.0
334	Computer and electronic product manufacturing	4.1	14.5	9.1	2.4
335	Electrical equipment, appliance, and component manufacturing	3.7	6.3	5.7	1.6
336	Transportation equipment manufacturing	3.8	6.0	5.9	4.1
337	Furniture and related product manufacturing	3.6	3.5	5.7	4.4
339	Miscellaneous manufacturing	2.6	14.7	10.2	2.5
42	Wholesale trade	1.5	3.6	5.1	2.9
423	Merchant wholesalers, durable goods	1.2	7.1	8.2	4.1
4231	Motor vehicle and motor vehicle parts and supplies merchant wholesalers	4.1	6.8	15.2	8.3
4232	Furniture and home furnishing merchant wholesalers	4.7	15.0	27.4	6.0
4233	Lumber and other construction materials merchant wholesalers	3.0	16.7	15.1	8.6
4234	Professional and commercial equipment and supplies merchant wholesalers	2.1	6.6	9.8	6.0
4235	Metal and mineral (except petroleum) merchant wholesalers	3.5	7.1	24.3	7.9
4236	Electrical and electronic goods merchant wholesalers	4.8	6.9	5.6	6.3
4237	Hardware, plumbing and heating equipment and supplies merchant wholesalers	3.4	2.6	7.4	7.1
4238	Machinery, equipment, and supplies merchant wholesalers	2.0	8.9	6.9	5.6
4239	Miscellaneous durable goods merchant wholesalers	4.6	8.1	6.8	5.1
424	Merchant wholesalers, nondurable goods	2.1	3.8	7.7	5.4
4241	Paper and paper product merchant wholesalers	3.3	4.6	10.4	10.1
4242	Drugs and druggists' sundries merchant wholesalers	5.4	9.2	16.0	6.7
4243	Apparel, piece goods, and notions merchant wholesalers	6.5	14.9	19.3	6.5
4244	Grocery and related product merchant wholesalers	2.3	5.2	5.2	9.5
4245	Farm product raw material merchant wholesalers	5.8	7.6	14.3	22.1
4246	Chemical and allied products merchant wholesalers	7.5	8.7	14.2	10.9
4247	Petroleum and petroleum products merchant wholesalers	3.5	5.6	15.7	8.6
4248	Beer, wine, and distilled alcoholic beverage merchant wholesalers	3.5	4.4	7.7	8.1
4249	Miscellaneous nondurable goods merchant wholesalers	3.5	12.1	11.3	6.7
4541	Electronic shopping and mail-order houses	5.1	12.6	7.7	2.4
45431	Fuel dealers	2.5	2.5	7.1	1.8
4931 ³	Warehousing and storage	3.5	7.8	4.3	4.5
5111	Newspaper, periodical, book, and directory publishers	7.1	15.9	22.3	S
551114	Corporate, subsidiary, and regional managing offices	11.2	14.8	40.6	7.7

S Withheld because estimate did not meet publication standards.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-10b.

Estimated Measures of Reliability for Shipment Characteristics by NAICS¹ for the United States: 2012 and 2007—Con.

[Estimates are based on data from the 2012 and 2007 Commodity Flow Survey]

Ton-miles ²			Average miles per shipment			NAICS title	NAICS code
Coefficient of variation of number		Standard error of percent change	Coefficient of variation of number		Standard error of percent change		
2012	2007		2012	2007			
3.7	3.6	4.5	3.4	2.5	4.3	Total	
9.7	9.1	10.8	3.0	4.4	4.8	Mining (except oil and gas)	212
1.1	1.9	2.1	2.0	2.1	2.8	Manufacturing	31–33
4.6	3.6	5.8	10.8	10.0	11.5	Food manufacturing	311
4.3	6.4	9.0	14.4	18.2	29.8	Beverage and tobacco product manufacturing	312
6.0	6.7	8.1	3.8	6.4	7.1	Textile mills	313
19.1	9.9	15.9	4.7	5.2	7.6	Textile product mills	314
36.7	31.1	13.8	4.5	4.8	6.3	Apparel manufacturing	315
13.1	23.8	24.4	3.8	4.4	5.8	Leather and allied product manufacturing	316
5.8	5.4	6.0	4.8	6.8	8.3	Wood product manufacturing	321
3.9	3.2	4.7	5.7	3.7	7.3	Paper manufacturing	322
10.0	5.6	7.4	5.8	5.9	8.0	Printing and related support activities	323
10.2	7.5	10.1	10.9	12.4	16.1	Petroleum and coal products manufacturing	324
5.6	5.5	8.8	3.7	3.8	5.6	Chemical manufacturing	325
3.8	3.8	4.8	4.3	3.6	6.3	Plastics and rubber products manufacturing	326
4.9	4.0	4.8	5.9	6.7	9.5	Nonmetallic mineral product manufacturing	327
3.8	5.7	6.1	7.5	3.7	9.2	Primary metal manufacturing	331
4.2	4.7	5.5	3.9	2.6	4.4	Fabricated metal product manufacturing	332
5.1	6.7	7.1	2.0	3.1	3.6	Machinery manufacturing	333
9.1	7.7	10.2	2.4	2.8	3.6	Computer and electronic product manufacturing	334
5.7	6.3	6.8	1.6	3.5	4.1	Electrical equipment, appliance, and component manufacturing	335
5.9	3.3	5.7	4.1	2.4	4.8	Transportation equipment manufacturing	336
5.7	5.8	6.8	4.4	3.2	6.0	Furniture and related product manufacturing	337
10.2	15.9	13.3	2.5	4.3	4.9	Miscellaneous manufacturing	339
5.1	4.1	6.2	2.9	3.6	4.5	Wholesale trade	42
8.2	5.7	8.6	4.1	4.9	5.8	Merchant wholesalers, durable goods	423
15.2	11.1	20.0	8.3	13.1	11.1	Motor vehicle and motor vehicle parts and supplies merchant wholesalers	4231
27.4	20.7	24.4	6.0	7.5	9.7	Furniture and home furnishing merchant wholesalers	4232
15.1	13.8	15.0	8.6	10.8	8.5	Lumber and other construction materials merchant wholesalers	4233
9.8	14.3	23.3	6.0	5.8	7.4	Professional and commercial equipment and supplies merchant wholesalers	4234
24.3	13.8	32.3	7.9	8.3	13.3	Metal and mineral (except petroleum) merchant wholesalers	4235
5.6	14.1	15.8	6.3	6.0	9.5	Electrical and electronic goods merchant wholesalers	4236
7.4	12.9	13.4	7.1	6.8	11.8	Hardware, plumbing and heating equipment and supplies merchant wholesalers	4237
6.9	7.0	8.6	5.6	4.9	7.4	Machinery, equipment, and supplies merchant wholesalers	4238
6.8	11.0	8.7	5.1	3.9	5.8	Miscellaneous durable goods merchant wholesalers	4239
7.7	5.5	9.3	5.4	3.5	6.6	Merchant wholesalers, nondurable goods	424
10.4	23.7	12.7	10.1	7.5	14.0	Paper and paper product merchant wholesalers	4241
16.0	11.8	13.9	6.7	6.9	9.8	Drugs and druggists' sundries merchant wholesalers	4242
19.3	20.6	26.7	6.5	4.0	8.1	Apparel, piece goods, and notions merchant wholesalers	4243
5.2	7.4	7.4	9.5	7.4	13.7	Grocery and related product merchant wholesalers	4244
14.3	10.2	19.1	22.1	14.5	48.3	Farm product raw material merchant wholesalers	4245
14.2	17.5	16.2	10.9	8.9	13.2	Chemical and allied products merchant wholesalers	4246
15.7	8.6	26.9	8.6	12.4	16.0	Petroleum and petroleum products merchant wholesalers	4247
7.7	14.8	15.6	8.1	6.0	10.7	Beer, wine, and distilled alcoholic beverage merchant wholesalers	4248
11.3	18.7	15.2	6.7	7.7	9.5	Miscellaneous nondurable goods merchant wholesalers	4249
7.7	8.1	16.3	2.4	2.4	3.4	Electronic shopping and mail-order houses	4541
7.1	33.2	14.0	1.8	7.3	6.2	Fuel dealers	45431
4.3	6.0	9.7	4.5	4.4	5.7	Warehousing and storage	4931 ³
22.3	14.4	24.8	S	25.8	S	Newspaper, periodical, book, and directory publishers	5111
40.6	11.9	18.4	7.7	4.8	8.9	Corporate, subsidiary, and regional managing offices	551114

S Withheld because estimate did not meet publication standards.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-11.

Estimated Coefficients of Variation for Shipment Characteristics by NAICS¹ and Mode of Transportation for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

NAICS code	NAICS title and mode of transportation	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ² — coefficient of variation of number	Average miles per shipment— coefficient of variation of number

	Other modes	0.0	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.⁴ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).⁵ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	750 to 999 miles	13.5	20.7	19.9
	1,000 to 1,499 miles	13.3	11.6	11.3
	1,500 to 1,999 miles	19.4	22.6	22.0
	2,000 miles or more.	22.6	11.1	11.3
4247	Petroleum and petroleum products merchant wholesalers			
	Total	3.5	5.6	15.7
	Less than 50 miles.	4.8	7.3	6.2
	50 to 99 miles	7.9	7.3	6.5
	100 to 249 miles	10.6	13.1	17.6
	250 to 499 miles	18.8	29.2	29.6
	500 to 749 miles	33.7	S	S
	750 to 999 miles	19.9	13.5	13.5
	1,000 to 1,499 miles	33.2	26.7	26.1
	1,500 to 1,999 miles	23.7	26.6	28.0
	2,000 miles or more.	33.0	37.6	38.3

See footnotes at end of table.

Table B-12.

Estimated Coefficients of Variation for Shipment Characteristics by NAICS¹ and Distance Shipped for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey]

NAICS code	NAICS title and distance shipped ²	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ³ — coefficient of variation of number
4248	Beer, wine, and distilled alcoholic beverage merchant wholesalers			
	Total	3.5	4.4	7.7
	Less than 50 miles	4.2	5.0	5.8
	50 to 99 miles	7.6	7.7	7.7
	100 to 249 miles	11.9	10.4	12.0
	250 to 499 miles	15.7	22.0	22.1
	500 to 749 miles	24.4	38.7	39.4
	750 to 999 miles	18.1	18.6	18.1
	1,000 to 1,499 miles	18.5	19.4	19.8
	1,500 to 1,999 miles	30.8	32.3	32.3
	2,000 miles or more	27.4	24.2	24.4
4249	Miscellaneous nondurable goods merchant wholesalers			
	Total	3.5	12.1	11.3
	Less than 50 miles	5.7	18.2	18.4
	50 to 99 miles	3.0	10.9	11.6
	100 to 249 miles	5.6	10.9	11.8
	250 to 499 miles	5.6	14.5	14.9
	500 to 749 miles	8.4	13.9	15.2
	750 to 999 miles	10.9	35.1	29.6
	1,000 to 1,499 miles	10.0	38.0	42.6
	1,500 to 1,999 miles	10.8	27.5	28.2
	2,000 miles or more	17.4	14.8	14.9
4541	Electronic shopping and mail-order houses			
	Total	5.1	12.6	7.7
	Less than 50 miles	12.4	25.4	31.1
	50 to 99 miles	12.6	22.2	45.0
	100 to 249 miles	8.7	16.5	15.6
	250 to 499 miles	5.0	12.8	12.0
	500 to 749 miles	6.3	8.9	8.6
	750 to 999 miles	9.5	17.6	15.9
	1,000 to 1,499 miles	5.7	11.2	10.4
	1,500 to 1,999 miles	8.4	13.3	13.8
	2,000 miles or more	8.4	10.4	10.5
45431	Fuel dealers			
	Total	2.5	2.5	7.1
	Less than 50 miles	2.6	2.4	2.8
	50 to 99 miles	16.0	16.0	17.1
	100 to 249 miles	17.2	26.8	33.7
	250 to 499 miles	S	S	S
	500 to 749 miles	S	S	S
	750 to 999 miles	0.0	0.0	0.0
	1,000 to 1,499 miles	44.2	S	S
	1,500 to 1,999 miles	0.0	0.0	0.0
	2,000 miles or more	0.0	0.0	0.0
4931⁴	Warehousing and storage			
	Total	3.5	7.8	4.3
	Less than 50 miles	6.6	13.8	13.2
	50 to 99 miles	7.0	4.8	4.9
	100 to 249 miles	6.6	8.5	9.3
	250 to 499 miles	7.1	7.5	7.0
	500 to 749 miles	7.7	14.4	17.0
	750 to 999 miles	7.0	6.4	6.6
	1,000 to 1,499 miles	14.9	11.8	11.6
	1,500 to 1,999 miles	22.8	14.3	14.0
	2,000 miles or more	12.5	16.4	16.4
5111	Newspaper, periodical, book, and directory publishers			
	Total	7.1	15.9	22.3
	Less than 50 miles	14.1	21.9	16.8
	50 to 99 miles	15.2	12.2	12.4
	100 to 249 miles	26.2	24.1	28.4
	250 to 499 miles	17.7	15.5	16.9
	500 to 749 miles	22.5	S	S
	750 to 999 miles	22.6	30.9	28.9
	1,000 to 1,499 miles	18.2	26.1	25.6
	1,500 to 1,999 miles	27.3	29.0	28.8
	2,000 miles or more	37.6	39.6	39.5
551114	Corporate, subsidiary, and regional managing offices			
	Total	11.2	14.8	40.6
	Less than 50 miles	9.2	22.2	17.9
	50 to 99 miles	26.8	22.7	21.6
	100 to 249 miles	24.6	24.0	25.4
	250 to 499 miles	18.1	22.0	20.7
	500 to 749 miles	15.6	37.6	38.3
	750 to 999 miles	12.7	25.5	25.2
	1,000 to 1,499 miles	15.0	S	S
	1,500 to 1,999 miles	34.4	S	S
	2,000 miles or more	26.9	S	S

S Withheld because estimate did not meet publication standards.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.⁴ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-13.

Estimated Coefficients of Variation for Shipment Characteristics by NAICS¹ and Shipment Weight for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

NAICS code	NAICS title and shipment weight	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ² — coefficient of variation of number	Average miles per shipment— coefficient of variation of number
212	Mining (except oil and gas)				
	Total	3.1	2.6	9.7	3.0
	Less than 50 lbs.	37.8	34.9	37.4	S
	50 to 99 lbs.	40.6	47.4	29.7	S
	100 to 499 lbs.	32.4	22.6	18.6	30.9
	500 to 749 lbs.	24.5	20.8	28.3	48.4
	750 to 999 lbs.	S	31.6	46.0	34.2
	1,000 to 9,999 lbs.	36.8	6.0	15.5	12.3
	10,000 to 49,999 lbs.	6.5	4.7	6.3	3.6
	50,000 to 99,999 lbs.	5.6	4.9	6.4	4.8
	100,000 lbs. or more	4.9	5.0	10.8	4.7
31-33	Manufacturing				
	Total	0.7	1.6	1.1	2.0
	Less than 50 lbs.	2.0	3.5	2.5	2.6
	50 to 99 lbs.	4.3	3.2	3.5	1.7
	100 to 499 lbs.	1.9	2.5	2.8	1.6
	500 to 749 lbs.	4.2	3.3	4.3	1.2
	750 to 999 lbs.	5.4	3.5	3.9	1.9
	1,000 to 9,999 lbs.	2.9	1.4	2.2	1.4
	10,000 to 49,999 lbs.	1.4	1.9	1.5	1.7
	50,000 to 99,999 lbs.	9.2	7.2	5.2	3.2
	100,000 lbs. or more	2.9	2.8	2.8	2.3
311	Food manufacturing				
	Total	2.4	4.3	4.6	10.8
	Less than 50 lbs.	22.4	26.1	11.5	26.9
	50 to 99 lbs.	16.9	15.5	18.2	18.3
	100 to 499 lbs.	6.7	6.7	9.1	11.5

See footnotes at end of table.

Table B-13.

Estimated Coefficients of Variation for Shipment Characteristics by NAICS¹ and Shipment Weight for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey]

NAICS code	NAICS title and shipment weight	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ² — coefficient of variation of number	Average miles per shipment— coefficient of variation of number
4248	Beer, wine, and distilled alcoholic beverage merchant wholesalers				
	Total	3.5	4.4	7.7	8.1
	Less than 50 lbs.	12.6	8.3	19.4	25.4
	50 to 99 lbs.	8.0	4.9	10.5	10.4
	100 to 499 lbs.	7.7	4.6	5.8	6.3
	500 to 749 lbs.	6.2	4.4	3.6	2.0
	750 to 999 lbs.	5.2	5.1	5.0	4.5
	1,000 to 9,999 lbs.	5.0	5.7	7.7	3.8
	10,000 to 49,999 lbs.	8.4	8.4	12.8	13.7
	50,000 to 99,999 lbs.	31.5	28.7	46.9	25.8
	100,000 lbs. or more	S	S	S	S
4249	Miscellaneous nondurable goods merchant wholesalers				
	Total	3.5	12.1	11.3	6.7
	Less than 50 lbs.	7.1	4.6	9.6	7.7
	50 to 99 lbs.	6.4	6.4	8.1	7.3
	100 to 499 lbs.	5.5	4.7	9.0	10.6
	500 to 749 lbs.	6.0	7.3	7.8	9.2
	750 to 999 lbs.	11.3	8.1	11.1	11.4
	1,000 to 9,999 lbs.	4.4	7.9	11.7	8.9
	10,000 to 49,999 lbs.	7.6	7.6	3.7	8.7
	50,000 to 99,999 lbs.	14.7	17.3	11.0	19.2
	100,000 lbs. or more	22.8	38.9	26.4	20.5
4541	Electronic shopping and mail-order houses				
	Total	5.1	12.6	7.7	2.4
	Less than 50 lbs.	6.4	7.1	8.8	2.0
	50 to 99 lbs.	16.3	16.0	12.2	17.0
	100 to 499 lbs.	16.1	27.1	13.2	25.3
	500 to 749 lbs.	19.8	22.8	36.2	16.2
	750 to 999 lbs.	24.8	33.6	28.4	S
	1,000 to 9,999 lbs.	18.3	22.7	30.4	28.9
	10,000 to 49,999 lbs.	36.0	S	S	23.2
	50,000 to 99,999 lbs.	32.8	S	S	S
	100,000 lbs. or more	S	S	S	S
45431	Fuel dealers				
	Total	2.5	2.5	7.1	1.8
	Less than 50 lbs.	32.5	13.6	17.9	8.6
	50 to 99 lbs.	9.5	8.8	12.1	6.0
	100 to 499 lbs.	5.9	4.9	3.5	3.4
	500 to 749 lbs.	5.2	5.0	4.9	3.1
	750 to 999 lbs.	4.1	4.3	4.8	2.5
	1,000 to 9,999 lbs.	3.5	3.5	4.5	1.8
	10,000 to 49,999 lbs.	8.0	6.5	25.9	16.7
	50,000 to 99,999 lbs.	38.8	41.6	32.8	32.1
	100,000 lbs. or more	28.3	24.4	23.5	29.7
4931³	Warehousing and storage				
	Total	3.5	7.8	4.3	4.5
	Less than 50 lbs.	11.3	19.7	17.8	5.2
	50 to 99 lbs.	15.7	14.4	20.5	8.3
	100 to 499 lbs.	10.6	14.2	23.1	10.5
	500 to 749 lbs.	12.9	10.7	26.3	15.1
	750 to 999 lbs.	11.2	11.0	16.1	10.1
	1,000 to 9,999 lbs.	8.9	3.4	6.3	6.7
	10,000 to 49,999 lbs.	5.8	6.2	6.8	4.4
	50,000 to 99,999 lbs.	26.5	30.1	12.9	40.2
	100,000 lbs. or more	24.9	37.6	34.2	36.2
5111	Newspaper, periodical, book, and directory publishers				
	Total	7.1	15.9	22.3	S
	Less than 50 lbs.	9.9	24.0	13.2	S
	50 to 99 lbs.	14.4	29.5	14.8	43.5
	100 to 499 lbs.	21.0	29.5	22.6	38.3
	500 to 749 lbs.	26.3	29.8	32.4	44.7
	750 to 999 lbs.	29.8	47.2	S	31.4
	1,000 to 9,999 lbs.	9.8	9.1	20.9	17.4
	10,000 to 49,999 lbs.	17.5	28.7	43.1	31.7
	50,000 to 99,999 lbs.	S	S	S	S
	100,000 lbs. or more	32.1	30.6	42.5	S
551114	Corporate, subsidiary, and regional managing offices				
	Total	11.2	14.8	40.6	7.7
	Less than 50 lbs.	13.4	12.5	14.8	10.2
	50 to 99 lbs.	17.7	23.7	39.0	15.6
	100 to 499 lbs.	15.0	27.0	23.2	18.9
	500 to 749 lbs.	15.1	31.2	36.2	34.6
	750 to 999 lbs.	21.8	22.7	37.1	30.7
	1,000 to 9,999 lbs.	12.0	23.7	23.7	25.1
	10,000 to 49,999 lbs.	23.8	24.9	S	24.0
	50,000 to 99,999 lbs.	48.5	S	36.3	S
	100,000 lbs. or more	19.1	20.0	45.2	22.6

S Withheld because estimate did not meet publication standards.

¹ NAICS codes shown are those covered in the Commodity Flow Survey.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-14.

Estimated Coefficients of Variation for Shipment Characteristics by Origin State for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

Origin state	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ¹ — coefficient of variation of number	Average miles per shipment— coefficient of variation of number
Total	1.1	1.8	3.7	3.4
Alabama	5.9	7.3	6.9	6.2
Alaska	18.1	15.9	16.0	14.4
Arizona	6.9	9.9	10.7	9.3
Arkansas	6.1	7.6	9.7	6.3
California	2.9	3.3	7.4	8.2
Colorado	6.3	8.2	9.2	10.5
Connecticut	14.6	22.2	34.6	5.4
Delaware	18.0	20.6	15.8	17.2
District of Columbia	18.4	27.2	S	S
Florida	4.3	14.4	10.9	8.1
Georgia	4.1	12.3	5.4	6.5
Hawaii	15.8	19.4	S	14.8
Idaho	10.1	14.2	17.5	15.9
Illinois	4.1	4.7	7.8	4.4
Indiana	4.8	5.6	4.7	7.6
Iowa	4.3	8.3	10.3	15.5
Kansas	9.3	15.0	40.6	5.5
Kentucky	5.8	19.0	22.8	5.5
Louisiana	8.1	9.2	12.1	10.1
Maine	8.9	16.9	15.0	13.9
Maryland	15.6	6.8	8.6	23.0
Massachusetts	11.9	25.0	13.4	8.9
Michigan	4.3	6.5	8.8	8.3
Minnesota	4.1	11.9	13.5	10.7
Mississippi	15.9	25.4	11.5	5.6

Vermont	6.3	18.8	5.5	10.0
Virginia	7.8	10.6	13.4	9.0
Washington	6.4	10.5	7.1	4.6
West Virginia	6.5	11.5	23.9	6.1
Wisconsin	2.9	7.5	8.8	4.3
Wyoming	9.2	17.1	9.7	9.7

¹ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-16.

Estimated Measures of Reliability for Shipment Characteristics of Temperature Controlled Shipments¹ by Mode of Transportation for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

Mode of transportation	Value		Tons		Ton-miles ²		Average miles per shipment— coefficient of variation of number
	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	
All modes	3.2	0.0	2.3	0.0	2.1	0.0	6.0
Single modes	2.7	0.8	2.2	0.2	2.1	0.3	5.4
Truck ³	2.9	0.7	2.3	0.7	2.6	1.2	4.6
For-hire truck	4.7	1.0	4.8	1.7	3.0	1.2	7.0
Private truck	3.0	1.2	3.8	1.7	2.7	0.5	2.7
Rail	9.9	0.2	10.6	0.4	8.0	1.0	8.1
Water	21.5	0.1	27.5	0.3	39.8	0.7	14.6
Inland water	34.2	0.1	30.6	0.3	S	S	24.7
Great Lakes	0.0	0.0	0.0	0.0	0.0	0.0	0.0
Deep sea	20.7	Z	12.6	Z	22.5	0.1	14.6
Multiple waterways	30.6	Z	44.8	0.1	27.4	0.1	32.1
Air (includes truck and air)	7.4	0.1	37.2	0.1	46.8	0.4	11.1
Pipeline ⁴	33.2	Z	29.4	0.1	S	S	S
Multiple modes	10.9	0.8	17.1	0.2	8.4	0.3	6.4
Parcel, U.S. Postal Service, or courier	11.7	0.8	15.7	Z	16.9	Z	6.6
Truck and rail	14.8	0.1	11.6	0.1	11.4	0.3	34.5
Truck and water	19.4	Z	22.9	Z	16.1	0.1	17.5
Rail and water	S	S	S	S	48.0	0.3	S
Other multiple modes	0.0	0.0	0.0	0.0	0.0	0.0	0.0
Other modes	0.0	0.0	0.0	0.0	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁴ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-17.

Estimated Measures of Reliability for Shipment Characteristics of Temperature Controlled Shipments¹ by Total Modal Activity for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

Mode of transportation ²	Ton-miles ³		Average miles per shipment— coefficient of variation of number
	Coefficient of variation of number	Standard error of percent of total	
Total	2.1	0.0	5.8
Truck ⁴	2.5	1.3	4.6
Rail	6.5	0.9	13.2
Inland water	43.7	0.7	35.1
Great Lakes	S	S	36.3
Deep sea	17.3	0.2	13.1
Air (includes truck and air)	S	S	13.3
Pipeline ⁵	S	S	S
Parcel, U.S. Postal Service, or courier	16.9	Z	6.8
Other modes	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Estimates represent activity for a given mode across single and multiple mode shipments. For example, "Truck" ton-miles includes total ton-miles for shipments moving only by truck plus ton-miles for truck segments of multiple mode shipments.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁵ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-18.

Estimated Measures of Reliability for Shipment Characteristics of Temperature Controlled Shipments¹ by Distance Shipped for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

Distance shipped ² (based on Great Circle Distance)	Value		Tons		Ton-miles ³	
	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total
Total	3.2	0.0	2.3	0.0	2.1	0.0
Less than 50 miles	4.5	0.6	4.2	1.3	4.8	0.2
50 to 99 miles	8.3	0.8	4.4	0.5	4.4	0.1
100 to 249 miles	3.1	0.5	3.7	0.5	3.9	0.4
250 to 499 miles	3.9	0.6	2.5	0.4	4.1	0.7
500 to 749 miles	3.8	0.2	6.8	0.3	6.1	0.7
750 to 999 miles	4.8	0.2	6.5	0.2	6.2	0.7
1,000 to 1,499 miles	4.8	0.2	4.7	0.2	5.4	0.9
1,500 to 1,999 miles	6.6	0.2	6.9	0.1	7.4	0.7
2,000 miles or more	6.5	0.1	5.4	0.1	5.3	0.6

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-19.

Estimated Measures of Reliability for Shipment Characteristics of Temperature Controlled Shipments¹ by Shipment Weight for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

Shipment weight	Value		Tons		Ton-miles ²		Average miles per shipment— coefficient of variation of number
	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	
Total	3.2	0.0	2.3	0.0	2.1	0.0	6.0
Less than 50 lbs.	8.0	0.5	8.4	Z	12.6	Z	10.6
50 to 99 lbs.	13.6	0.3	10.1	Z	15.2	Z	14.0
100 to 499 lbs.	6.8	0.5	5.7	0.1	6.1	Z	6.7
500 to 749 lbs.	7.9	0.2	3.6	0.1	4.7	Z	3.5
750 to 999 lbs.	6.5	0.1	2.5	Z	3.4	Z	3.4
1,000 to 9,999 lbs.	5.4	0.8	4.0	0.7	3.2	0.4	3.0
10,000 to 49,999 lbs.	2.5	1.0	2.3	1.1	2.6	0.9	2.6
50,000 to 99,999 lbs.	15.8	0.4	14.5	1.3	12.2	0.5	9.7
100,000 lbs. or more	7.1	0.2	10.8	0.8	7.5	1.3	8.5

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-20.

Estimates Measures of Reliability for Shipment Characteristics of Temperature Controlled Shipments¹ by Two-Digit Commodity for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

SCTG code	Commodity description	Value		Tons		Ton-miles ²		Average miles per shipment—coefficient of variation of number
		Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ Estimates exclude shipments of crude petroleum (SCTG 16).⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁵ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁶ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁷ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendices give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	Other modes	0.0	0.0	0.0	0.0	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ Estimates exclude shipments of crude petroleum (SCTG 16).⁴ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.⁵ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).⁶ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁷ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁸ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁹ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	2,000 miles or more	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² Shipments are grouped into distance categories based on Great Circle Distance (GCD). GCD is the shortest distance between two points on the surface of a sphere over the surface of that sphere.³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.⁴ Estimates exclude shipments of crude petroleum (SCTG 16).⁵ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.⁶ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.⁷ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.⁸ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	1,000 to 9,999 lbs.	0.0	0.0	0.0	0.0
	10,000 to 49,999 lbs.	S	S	S	S
	50,000 to 99,999 lbs.	0.0	0.0	0.0	0.0
	100,000 lbs. or more	S	S	S	S

S Withheld because estimate did not meet publication standards.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

³ Estimates exclude shipments of crude petroleum (SCTG 16).

⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 07. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 18.

⁵ Prior to the 2012 CFS, alcohols intended for use as fuel such as ethanol, although not specifically identified, were included in Commodity Code 08. In the 2012 CFS, ethanol moved to Commodity Code 17.

⁶ Prior to the 2012 CFS, fuel alcohols such as ethanol were included in Commodity Code 08, although not specifically identified. Also, kerosene was included in Commodity Code 19. In the 2012 CFS, ethanol, fuel alcohols and kerosene moved to Commodity Code 17.

⁷ Prior to the 2012 CFS, biodiesel, although not specifically identified, was included in Commodity Code 07. In the 2012 CFS, biodiesel moved to Commodity Code 18.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-24.

Estimated Measures of Reliability for Shipment Characteristics of Temperature Controlled Shipments¹ by Three-Digit Commodity for the United States: 2012—Con.

[Estimates are based on data from the 2012 Commodity Flow Survey]

SCTG code	Commodity description	Value		Tons		Ton-miles ²		Average miles per shipment—coefficient of variation of number
		Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	Coefficient of variation of number	Standard error of percent of total	
384	Instruments, apparatus, and appliances for medical, surgical, dental, veterinary, or similar purposes	22.5	Z	35.6	Z	32.7	Z	22.6
385	Meters and other instruments and apparatus for measuring or process control . . .	46.7	Z	32.4	Z	33.5	Z	6.6
390	Furniture, mattresses and mattress supports, lamps, lighting fittings, and illuminated signs	45.4	0.1	S	S	S	S	6.5
401	Arms and ammunition	0.0	0.0	0.0	0.0	0.0	0.0	0.0
402	Toys, games, and sporting equipment	S	S	S	S	S	S	S
409	Miscellaneous manufactured products	S	S	28.4	Z	35.1	Z	22.7
411	Metallic waste and scrap	S	S	S	S	S	S	S
412	Nonmetallic waste and scrap, except from food processing	0.0	0.0	0.0	0.0	0.0	0.0	0.0
439	Mixed freight	3.1	0.7	3.7	0.9	5.1	0.8	5.4
999	Commodity unknown	44.3	Z	S	S	S	S	12.1

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.³ Estimates exclude shipments of crude petroleum (SCTG 16).⁴ Prior to the 2012 CFS, oils and fats treated for use as biodiesel were included in Commodity Code 074. In the 2012 CFS, oils and fats treated for use as biodiesel moved to Commodity Code 182.⁵ Prior to the 2012 CFS, denatured alcohol of more than 80 percent by volume was included in Commodity Code 083. In the 2012 CFS, denatured alcohol of more than 80 percent by volume moved to Commodity Code 084.⁶ Prior to the 2012 CFS, Commodity Code 171 only included gasoline. In the 2012 CFS, mixtures of 10 percent ethanol and gasoline moved to Commodity Code 171.⁷ Prior to the 2012 CFS, kerosene was included in Commodity Code 192. In the 2012 CFS, kerosene moved to Commodity Code 172.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	Other multiple modes.....	0.0	0.0	0.0	0.0
	Other modes	0.0	0.0	0.0	0.0

S Withheld because estimate did not meet publication standards.

Z Rounds to zero.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.

² NAICS codes shown are those covered in the Commodity Flow Survey.

³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.

⁴ "Truck" as a single mode includes shipments that were made by only private truck or only for-hire truck.

⁵ Estimates for pipeline exclude shipments of crude petroleum (SCTG 16).

⁶ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

	2,000 miles or more	37.3	45.1	45.8

S Withheld because estimate did not meet publication standards.

¹ Shipments that are temperature controlled are transported in a vehicle or container that regulates or maintains the temperature when en route to its destination.² NAICS codes shown are those covered in the Commodity Flow Survey.³ Ton-miles estimates are based on estimated distances traveled along a modeled transportation network. See "Mileage Calculations" section for additional information.⁴ For tabulation and publication purposes, NAICS 484 is grouped with NAICS 4931.

Note: The Introduction and appendixes give information on confidentiality protection, sampling error, nonsampling error, sample design and definitions. Links to this information on the Internet may be found at <www.census.gov/cfs>.

Table B-28.

Estimated Coefficients of Variation for Shipment Characteristics of Temperature Controlled Shipments¹ by NAICS² and Shipment Weight for the United States: 2012

[Estimates are based on data from the 2012 Commodity Flow Survey]

NAICS code	NAICS title and shipment weight	Value— coefficient of variation of number	Tons— coefficient of variation of number	Ton-miles ³ — coefficient of variation of number	Average miles per shipment— coefficient of variation of number

Appendix C.

Sample Design, Data Collection, and Estimation

INTRODUCTION

The primary goal for the 2012 Commodity Flow Survey (CFS) was to estimate shipping volumes (value, tons, and ton-miles) by commodity and mode of transportation at varying levels of geographic detail. A secondary objective was to estimate the volume of shipments moving from one geographic area to another (i.e., flows of commodities between states, regions, etc.) by mode and commodity. A detailed description of the sample design for the 2012 CFS is provided below.

SAMPLE DESIGN

Overview

The sample for the 2012 CFS was selected using a stratified three-stage design in which the first-stage sampling units were establishments, the second-stage sampling units were groups of four 1-week periods (reporting weeks) within the survey year, and the third-stage sampling units were shipments.

First Stage—Establishment Selection

To create the first-stage sampling frame, a subset of establishment records (as of July 2011) was extracted from the Census Bureau's Business Register. The Business Register is a database of all known establishments located in the United States or its territories. An establishment is a single physical location where business transactions take place or services are performed. Establishments located in the United States, having nonzero payroll in 2010, and classified in mining (except oil and gas extraction), manufacturing, wholesale, electronic shopping and mail order, fuel dealers, and publishing industries, as defined by the 2007 NAICS, were included on the sampling frame. Certain manufacturers (Prepress services) and wholesalers (manufacturers' sales offices, agents and brokers, and certain importers) were excluded from the frame.

Auxiliary establishments (e.g., truck transportation facilities, warehouses, and central administrative offices) with shipping activity were also included on the sampling frame. Auxiliary establishments are establishments that are primarily involved in rendering support services to other establishments within the same company, instead of for the public, government, or other business firms. All other establishments included on the sampling frame are referred to as nonauxiliary establishments.

Establishments classified in forestry, fishing, utilities, construction, and all other transportation, retail, and services industries were not included on the sampling frame. Farms and government-owned entities (except government-owned liquor stores) were also excluded from the sampling frame. The resulting frame comprised approximately 716,000 establishments as shown in the table below.

Trade area	Establishments on frame	
	2012 CFS	2007 CFS
Mining	5,543	6,789
Manufacturing	305,805	327,826
Wholesale	345,511	356,477
Retail	27,697	25,190
Services	15,599	22,539
Auxiliaries	14,959	14,878
Total	716,114	753,699

For each establishment, sales, payroll, number of employees, a six-digit NAICS code, name and address, and a primary identifier were extracted, and a measure of size was computed. The measure of size was designed to approximate an establishment's annual total value of shipments for the year 2009.

All of the establishments included on the sampling frame had state and county geographic codes. We used these codes to assign each establishment to one of the 83 CFS metropolitan areas (CFS Areas) defined as a state part of a metropolitan statistical area (MSA) or combined statistical area (CSA). Establishments not located in one of these specified metropolitan areas (MAs) were assigned to a Rest of State (ROS) CFS Area.

Stratification

The sampling frame was stratified by geography, industry, and measure-of-size (MOS) class (with some exceptions for auxiliary establishments and hazardous materials establishments, as described below). The geography by industry cells form the primary strata for the main part of the sample.

Geographic strata were defined by a combination of the 50 states, the District of Columbia, and specific metropolitan areas (called CFS Areas) selected based on their population and importance as transportation gateways. These CFS Areas were defined using the 2009 Office of Management

and Budget's definitions. All other MAs were collapsed with the nonmetropolitan areas within the state into ROS CFS Area strata. When an MA crossed state boundaries, we considered the size of each state part of the MA when determining whether or not to create strata in each state in which the MA was defined. For example, the Chicago CSA makes up two CFS Areas: the Illinois part and the Indiana part. The Wisconsin part of Chicago was too small to be a separate CFS Area and was combined into the Remainder of Wisconsin CFS Area. The table below (second column) summarizes the number of CFS Areas used for sampling by type.

Geographic stratum (CFS Area) type	Number of sampled CFS Areas	Number of published CFS Areas
Actual CSA or MSA (state part)	83	82
CFS area = state (DC, RI)	2	2
ROS = whole state (AK, AR, ID, IA, ME, MS, MT, NM, ND, SD, VT, WV, WY)	13	13
ROS < whole state.	36	35
Total number of CFS areas	134	132

Between the time the CFS sample of establishments was selected and publication of the data, there were changes to the definitions of the MAs used by the CFS. For sampling purposes, the CFS Areas were defined using the 2009 OMB MA definitions. For tabulation and publication, the 2013 OMB definitions were used to define the CFS Areas. As a result, two CFS Areas used for sampling (Stockton, CA and Remainder of New Jersey) disappeared and, for many others, the counties making up the CFS Areas changed. The rightmost column of the table above shows the number of CFS Areas for which data were eventually published.

The industry strata were defined as follows. Within each of the geographic strata, we defined 48 industry groups based on the 2007 NAICS codes:

- Three mining (four-digit NAICS).
- Twenty-one manufacturing (three-digit NAICS).
- Eighteen wholesale (four-digit NAICS).
- Two retail (NAICS 4541 and 45431).
- One services (NAICS 5111).
- Three auxiliary (combinations of NAICS 484, 4931 and 51114).

For auxiliaries that responded to the Advance Survey and were found to be shippers, 134 primary strata were created, one in each geographic stratum, combining NAICS 484, 4931, and 51114. For auxiliary establishments that did not respond to the Advance Survey, two national strata were created as follows:

- One stratum for nonresponding truck transportation establishments and warehousing and storage establishments (NAICS 484 and NAICS 4931).
- One stratum for nonresponding corporate, subsidiary, and regional managing offices establishments (NAICS 51114).

In order to produce good estimates of shipments of hazardous materials (HAZMAT), 20 six-digit NAICS industries with high amounts of HAZMAT shipments were identified and used to form primary strata. The 2007 CFS data were used to identify these industries and in general, these industries were chosen because:

- They had a large (weighted) total value or total tonnage of hazardous materials.
- A high percentage of their (unweighted) shipments were HAZMAT shipments.

Thirteen of the 20 industries were made certainty strata, and the remaining seven industries were made into primary strata defined by state and the six-digit NAICS code.

The table below shows the number and types of primary strata for the main, auxiliary, and HAZMAT parts of the sample. Note that we are counting the number of strata before they are further stratified by MOS size class.

Part of the sample	Number of primary strata
Main part of the sample (134 CFS areas x 45 industries)	6,030
Auxiliary part of the sample:	
Responders to the Advance Survey (134 CFS areas x 1 industry)	134
Nonresponders to the Advance Survey (2 industries)	2
HAZMAT part of the sample:	
Certainty (take-all) strata (13 six-digit NAICS codes)	13
Noncertainty strata (51 states [incl. DC] x 7 six-digit NAICS codes).	357

Determining the Sample Sizes, Stratifying by MOS Size Class, and Sample Selection

The total desired sample size for the first stage sample was approximately 100,000 establishments and was fixed due to budget constraints. Therefore, in addition to defining the strata, a sample size was determined for each primary stratum. This was performed as follows:

- A target coefficient of variation (CV) was assigned to each primary stratum (geography by industry cell).
- Within each primary stratum, substrata defined by MOS were developed to minimize the sample size needed to achieve the target CV. The establishments in the largest MOS size class were taken with certainty. For

the noncertainty substrata, the sample was allocated according to the Neyman allocation, since the Neyman allocation minimizes the sample size needed to achieve a target CV.

- Once the minimum sample sizes for each primary stratum were determined, these were added together and compared to the desired total sample size of 100,000. If the total was not close enough to 100,000, we multiplied all of the target CVs by a fixed factor and repeated the process until the total sample size was close to 100,000.
- The establishments in the geography by industry by MOS size class substrata were selected by simple random sampling without replacement. The total sample size was 102,565 establishments of which 46,265 were selected with certainty (see the table below).

Primary strata type	2012 frame		2012 sample			
	Estab-lish-ments	Total MOS (million dollars)	Total sample		Certainty component	
			Estab-lish-ments	MOS of sampled Establish-ments (million dollars)	Estab-lish-ments	MOS of certainty Establish-ments (million dollars)
Main.	680,128	8,361,138	95,678	6,215,482	42,187	5,620,044
Auxiliary. . . .	14,959	1,330,769	2,433	1,186,608	1,121	1,087,152

Second Stage—Reporting Week Selection

The frame for the second stage of sampling consisted of the 52 weeks in 2012. Each establishment selected into the 2012 CFS sample was systematically assigned to report for four reporting weeks, one in each quarter of the reference year (2012). Each of the 4 weeks was in the same relative position in the quarter. For example, an establishment might have been requested to report data for the 5th, 18th, 31st, and 44th weeks of the reference year. In this instance, each reporting week corresponds to the 5th week of each quarter. Prior to assignment of weeks to establishments, we sorted the selected sample by primary stratum (geography by industry) and measure-of-size.

Third Stage—Shipment Selection

For each of the four reporting weeks in which an establishment was asked to report, the respondent was requested to construct a sampling frame consisting of all shipments made by the establishment in the reporting week. Each respondent was asked to count or estimate the total number of shipments comprising the sampling frame and to record this number on the questionnaire. For each assigned

reporting week, if an establishment made more than 40 shipments during that week, we asked the respondent to select a systematic sample of the establishment's shipments and to provide us with information only about the selected shipments. By design, this systematic sample consisted of between 20 and 40 shipments. If an establishment made 40 or fewer shipments during that week, we asked the respondent to provide information about all of the establishment's shipments made during that week; i.e., no sampling was required.

DATA COLLECTION

Each establishment selected into the CFS sample was mailed a questionnaire for each of its four assigned reporting weeks; that is, an establishment was sent a questionnaire once every quarter of 2012. For a given establishment, the respondent was asked to provide the following information about each of the establishment's reported shipments:

- Shipment ID number
- Shipment date (month, day)
- Shipment value
- Shipment weight in pounds
- Commodity code from Standard Classification of Transported Goods (SCTG) list
- Commodity description
- An indication of whether the shipment was temperature controlled
- United Nations or North American (UN/NA) number for hazardous material shipments
- U.S. destination (city, state, zip code)—or gateway for export shipment
- Modes of transport
- An indication of whether the shipment was an export
- City and country of destination for exports
- Export mode

For a shipment that included more than one commodity, the respondent was instructed to report the commodity that made up the greatest percentage of the shipment's weight.

In addition, establishments were asked to provide information about the use and extent of use of rush delivery services.

IMPUTATION OF SHIPMENT VALUE OR WEIGHT

To correct for nonresponse or an unacceptable value in either the value or weight item for a given shipment, the missing item or unacceptable value (the one that has failed edit) is replaced by a predicted value obtained from a donor imputation model. Such a shipment is considered a “recipient” if its commodity code is valid and one of the two data items (either shipment value or shipment weight) is reported, greater than zero, and passed edit. The recipient’s item that is missing or failed edit is imputed as follows:

First a donor shipment for a given recipient with the same five-digit SCTG is selected at random from a pool of potential donor shipments (those with valid SCTGs and with reported and usable shipment value and weight). The donor pools are summarized below in order of preference (the lowest numbered donor pool with a matching shipment is used).

Donor pool	Description of donor pool shipments
1	From same establishment and in the same detailed shipment size class.
2	From same company and in the same detailed shipment size class.
3	From same geographic area and in the same detailed shipment size class.
4	From same establishment and in the same broad shipment size class.
5	From same company and in the same broad shipment size class.
6	From same geographic area and in the same broad shipment size class.
7	From same establishment (no restriction on shipment size).
8	From same company (no restriction on shipment size).
9	From same geographic area (no restriction on shipment size).

Then, the donor’s value and weight data are used to calculate a ratio, which is applied to the recipient’s reported item, to impute the item that is missing or failed edit. If a donor cannot be found in one of the nine donor pools then

the recipient’s item is imputed using the median value-to-weight ratio computed using all shipments in the same SCTG as that of the recipient.

Approximately 3 percent of shipment values are imputed, and, similarly, approximately 3 percent of shipment weights are imputed.

ESTIMATION

Estimated totals (e.g., value of shipments, tons, ton-miles) are produced as the sum of weighted shipment data (reported or imputed). Percentage change and percent-of-total estimates are derived using the appropriate estimated totals. Estimates of average miles per shipment are computed by dividing an estimate of the total miles traveled by the estimated number of shipments.

Each shipment has associated with it a single tabulation weight, which was used in computing all estimates to which the shipment contributes. The tabulation weight is a product of seven different component weights. A description of each component weight follows.

CFS respondents provided data for a sample of shipments made by their respective establishments in the survey year. For each establishment, we produced an estimate of that establishment’s total value of shipments for the entire survey year. To do this, we used four different weights: the shipment weight, the shipment nonresponse weight, the quarter weight, and the quarter nonresponse weight. Three additional weights are then applied to produce estimates representative of the entire universe. These are the establishment-level adjustment weight, the establishment (or first-stage sample) weight, and the nonresponse post-stratification adjustment weight.

Like establishments, we identified shipments as either certainty or noncertainty. (See the Nonsampling Error section below for a description of how certainty shipments were identified.) For noncertainty shipments, the **shipment weight** was defined as the ratio of the total number of shipments (as reported by the respondent) made by an establishment in a reporting week to the number of sampled shipments the respondent listed on the questionnaire

for the same week. This weight uses data from the sampled shipments to represent all the establishment's shipments made in the reporting week. However, a respondent may have failed to provide sufficient information about a particular sampled shipment. For example, a respondent may not have been able to provide value, weight, or a destination for one of the sampled shipments. If this data item could not be imputed or otherwise obtained, then this shipment did not contribute to tabulations and was deemed unusable. (A usable shipment is one that has valid entries for value, weight, and origin and destination ZIP Codes). To account for these unusable shipments, we applied the **shipment nonresponse weight**. For noncertainty shipments from a particular establishment's reporting week, this weight is equal to the ratio of the number of sampled shipments for the reporting week to the number of usable shipments for the same week. The shipment weight for certainty shipments from a particular establishment's reporting week is equal to one.

The **quarter weight** inflates an establishment's estimate for a particular reporting week to an estimate for the corresponding quarter. For noncertainty shipments, the quarter weight is equal to 13. The quarter weight for most certainty shipments is also equal to 13. However, if a respondent was able to provide information about all large (or certainty) shipments made in the quarter containing the reporting week, then the quarter weight for each of these shipments was set to one. For each establishment, the quarterly estimates were added to produce an estimate of the establishment's value of shipments for the entire survey year. Whenever an establishment did not provide the Census Bureau with a response for each of its four reporting weeks, we computed a **quarter nonresponse weight**. The quarter nonresponse weight for a particular establishment is defined as the ratio of the number of quarters for which the establishment was in business in the survey year (usually four) to the total number of quarters (reporting weeks) for which we received usable shipment data from the establishment.

Using these four component weights and the reported (or imputed) shipment values, we computed an estimate

of each establishment's value of shipments for the entire survey year. This estimate was multiplied by a factor that adjusts this estimated value to a measure of the establishment's value of shipments or receipts obtained from the 2012 Economic Census. This weight, the **establishment-level adjustment weight**, attempts to correct for any sampling or nonsampling errors caused by the selection of specific reporting weeks or that occur during the sampling of shipments by the respondent.

The adjusted value of shipments estimate for an establishment was then weighted by the **establishment weight**. This weight is equal to the reciprocal of the establishment's probability of being selected into the first-stage sample (see Sample Design).

A final adjustment, the **nonresponse post-stratification adjustment weight**, calibrates the weighted shipment value (using all prior weighting factors) to the levels of tabulated revenue data from the 2012 Economic Census for specified post-stratification cells. This accounts for:

- Establishments which did not respond to the survey or from which we did not receive any usable shipment data.
- Changes in the universe of establishments between the time the first-stage sampling frame was constructed (2011) and the year in which the data were collected (2012).

For the preliminary 2012 CFS estimates, the nonresponse post-stratification cells were defined by industry categories, typically by three-digit NAICS codes (for Manufacturing) or four-digit NAICS codes (all other industries). There were approximately 45 nonresponse post-stratification cells.

For the final 2012 CFS estimates, the nonresponse post-stratification cells were defined by state-by-industry categories. The industry categories were the same as those described above for the preliminary estimates. There were approximately 2,300 state-by-industry nonresponse post-stratification cells.

Appendix D.

Standard Classification of Transported Goods

Code Information

The commodities shown in this report are classified using the Standard Classification of Transported Goods (SCTG) coding system. The SCTG coding system was created jointly by U.S. agencies and Canadian governments based on the Harmonized System of product classification that is used worldwide. The purpose of the SCTG coding system was to specifically address statistical needs in regard to products transported.

In 2012, the Commodity Flow Survey provided respondents with a listing of SCTG codes and descriptions at the five-digit level to use in assigning a commodity code for each shipment. For shipments of more than one commodity, respondents were instructed to use the five-digit code for the major commodity, defined as the commodity of greatest total weight in the shipment. For the data presented on this report, the SCTG codes were aggregated to the two-digit level.

SCTG	Type of change	Description
07-R	Definition	Prior to the 2012 CFS, fats and oils were all classified under Commodity Code 07. For the 2012 CFS, fats and oils treated for use as biodiesel moved to Commodity Code 18 under Fuel Oils.
074-R	Definition	Prior to the 2012 CFS, fats and oils intended for use as biodiesel were not specifically identified, but were included in Commodity Code 074. In the 2012 CFS, fats and oils intended for use as biodiesel were specified and classified under Commodity Code 182 (biodiesel and blends of biodiesel).
0743-R	Definition	Prior to the 2012 CFS, fats and oils intended for use as biodiesel were not specifically identified, but were included in Commodity Code 0743. In the 2012 CFS, fats and oils intended for use as biodiesel were specified and classified under Commodity Code 182 (biodiesel and blends of biodiesel).
08-R	Definition	Prior to the 2012 CFS, alcohols intended for use as fuel were not specifically identified and were included under SCTG 08. In the 2012 CFS, ethanol for fuel moved to SCTG 17. Additionally, beverages and denatured alcohol were more clearly identified.
083-R	Definition	Prior to the 2012 CFS, denatured alcohol of more than 80 percent alcohol by volume was included in Commodity Code 083. In the 2012 CFS, denatured alcohol of more than 80 percent alcohol by volume was moved to Commodity Code 084, and ethanol for use as biofuel was moved to Commodity Codes 175 and 176.
0831-R	Definition	Prior to the 2012 CFS, both denatured ethyl alcohol and undenatured ethyl alcohol of more than 80 percent alcohol by volume were included in Commodity Code 0831. In the 2012 CFS, denatured alcohol of more than 80 percent by volume was moved to Commodity Code 0841, and ethanol for use as biofuel was specified and moved to Commodity Codes 175 and 176.
084	New	Denatured ethyl alcohol, not for ingestion or use as biofuel.
17-R	Definition	Prior to 2012 CFS, denatured ethyl alcohol and undenatured ethyl alcohol were all classified under SCTG 08. For the 2012 CFS, ethanol that is used for fuel was identified and removed from SCTG 08 to SCTG 17 under fuel alcohols. Also, kerosene, which prior to the 2012 CFS was included in Commodity Code 19, was moved under Commodity Code 17.
171-R	Definition	Prior to the 2012 CFS, Commodity Code 171 only included gasoline, and blends of gasoline and ethanol were not identified. In the 2012 CFS, Commodity Code 171 includes gasoline and mixtures of up to 10 percent ethanol and gasoline.
172-R	Definition	Prior to the 2012 CFS, kerosene was included in Commodity Code 192, and type A jet fuel was classified under Commodity Code 172. In the 2012 CFS, all kerosene is classified under Commodity Code 172.
1720-R	Definition	Prior to the 2012 CFS, kerosene was included in Commodity Code 192, and type A jet fuel was classified under Commodity Code 1720. In the 2012 CFS, all kerosene is classified under Commodity Code 1720.
175	New	Ethanol, ethanol blends of more than 10 percent ethanol, and other fuel alcohols.
176	New	Ethanol, for use as biofuels.
18-R	Definition	Prior to the 2012 CFS, fats and oils intended for use as fuel were not identified as such and were included in Commodity Code 07. In the 2012 CFS, such fats and oils were identified as biodiesel and were moved under Commodity Code 18.
181	New	Fuel oils including diesel, distillate heating oil, and Bunker C (excludes biodiesel).
182	New	Blends of fuel oils including 5 percent or less biodiesel by volume (b5 or less).
1821	New	Blends of fuel oils with more than 5 percent biodiesel by volume, except b100.
1822	New	Biodiesel derived from vegetable oils or animal fats, b100 (excludes mixtures of biodiesel and diesel fuel).

Appendix E.

Sample Questionnaire Instructions and Form

The sample questionnaire instructions and form are shown on the following pages.

Note: Establishments were asked to provide information about the use and extent of use of rush delivery services.

2012 Commodity Flow Survey

INSTRUCTION GUIDE

Instructions for Completing the Commodity Flow Survey
Please read all instructions.

Contents:

- **Part I** — Instructions for Completing your Questionnaire Pages 2–6
- **Part II** — Mode of Transportation Definitions Page 7
- **Part III** — State Postal Abbreviation List Page 8

To complete the Commodity Flow Survey (CFS) online, visit **econhelp.census.gov/cfs**. See the front page of the questionnaire for log-in information. Instructions, as well as other useful tools, can be found on the website. If you need to contact us by telephone, a representative will be glad to assist you. Call us at **1-800-772-7851**, option "3," between 8:30 a.m. and 5:00 p.m. Eastern time.

NOTICE: Public reporting burden for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Paperwork Project 0607-0932, U.S. Census Bureau, 4600 Silver Hill Road, AMSD – 3K138, Washington, DC 20233-1500. You may e-mail comments to Paperwork@census.gov; use "Paperwork Project 0607-0932" as the subject. Respondents are not required to respond to any information collection unless it displays a valid approval number in the top right corner on the front of the questionnaire.

Part I — Instructions for Completing Your Questionnaire

When entering numerical digits, illustrate as follows:

0	1	2	3	4	5	6	7	8	9

- Use blue or black ballpoint pen.
- Do not use pencil or felt-tip pen.
- Do not put slashes through 0 or 7.

Item A – Verification of Shipping Address

Verify that the address listed at the top of the form is the correct address from where your shipments originate. If the shipping address is correct mark the “Yes” box. If the shipping address is incorrect mark the “No” box, and make the corrections directly to the pre-printed name and address at the top of the form. Shipping address is defined as the location from where shipments originate.

Item B – Verification of Mailing Address

Mark an (X) in the box that correctly identifies the mailing address. If the shipping location can receive mail and has access to the information asked, then mark the appropriate box and skip to Item C.

Otherwise, if you prefer the future CFS questionnaires to be sent elsewhere, as in a headquarters or office building that reports for the physical shipping location, mark the appropriate box and use the space provided in B(2) to enter the preferred mailing address.

Item C – Operating Status

Mark an (X) in the box that best describes this establishment’s operating status during the designated reporting week.

If this establishment was inactive and made no outbound shipments during the designated reporting week then mark an (X) in the appropriate box, skip to the end of the questionnaire, complete the Contact information, and then return the form to the Census Bureau in the envelope provided.

Item D(1) – Total Number of Outbound Shipments

In the space provided enter the total number of outbound shipments **for the one week reporting period** printed in Item D(1).

What we mean by a “shipment”

An outbound shipment is a movement of commodities from your establishment to another single location, in one trip. Single shipments may have multiple pieces, and go by multiple vehicles, such as unit trains or truck convoys, but only one destination. A full, or partial, truckload should be counted as a single shipment only if all the commodities on the truck are destined for one location. On the other hand, commodities sent from your establishment on a vehicle with multiple destinations constitute multiple shipments. Each location on the route to which your commodities are delivered is considered one shipment.

“Commodities” refer to items that the establishment at this location produces, sells, or distributes. Waste-products (without value) of your location’s operation are not considered commodities and should not be reported.

Part I — Instructions for Completing Your Questionnaire – Continued

Item D(1) – Total Number of Outbound Shipments – Continued

Shipments to include

- in this count any materials picked up by the customer ("customer pick-up")
- only those shipments that were sent from the location specified in Item A
- shipments of commodities of all sizes, by any mode of transportation (e.g., parcels)
- any shipment of products from this establishment to another location of the company that are intended for sale (e.g., products moved from this establishment to a company warehouse)

Do not include

- drop-shipments where the origin was not the shipping address in Item A
- shipments such as internal administrative items, inter-office memos, payroll checks, business correspondence, promotional items, etc.
- shipments such as refuse, scrap paper, waste, and recyclable materials unless this establishment is in the business of selling these materials
- shipments of items moved from this location to another location of the company if not intended for commercial activity (e.g., the transfer of office furniture to be used at another location of this company)

Item D(2) – Total Number of Outbound Shipments

Mark an (X) in the appropriate box in Item D(2) to indicate whether you have reported 40 or fewer shipments in Item D(1). If "Yes" is marked, skip to Item F beginning on page 4 and report the information requested for all shipments made during the assigned week.

If "No" is marked, continue with Item E on page 3 to determine the sample of shipments that your establishment should report in Item F.

Item E – Sampling Instructions

If you have more than 40 outbound shipments for the one-week reporting period you are asked to report only a sample of them in Item F. Using the table in Item E, locate the row that includes the number of outbound shipments you reported in Item D(1) and the corresponding "report every" number. Mark an (X) in the space provided.

When sampling your shipments, please use the files, or combination of files that reflect the full range of your location's shipping activities in terms of modes of transportation used, commodities or products shipped, and destinations.

Note: The sample selected should not exceed 40 outbound shipment records.

An instructional video on how to sample your shipments can be found at econhelp.census.gov/cfs/surveytools. If you still have questions about the sampling process (or any part of the questionnaire) call us at 1-800-772-7851, option "3," from 8:30 a.m. to 5:00 p.m. Eastern time.

Part I — Instructions for Completing Your Questionnaire – Continued

Item F – Shipment Characteristics

- **Shipment ID Number, Column (B)** – Enter the invoice number, shipment number, or some other unique identification number that your establishment could use to find this particular shipping document if questions arise regarding your report.
- **Shipment Date, Column (C)** – Enter the month and day of the shipment. If shipment date is not available, use the invoice/shipping document date. Use numbers only.
- **Shipment Value, Column (D)** – Enter the dollar value, in whole dollars, of the entire shipment. The value should not include freight charges or excise taxes (i.e., report the net selling value, freight on board plant). If the value is not readily available from your records, please estimate.
- **Net Shipment Weight, Column (E)** – Enter the net weight of the total shipment in whole pounds. If net weight is not readily available from your records, please estimate. Convert all other types of measurements to whole pounds (e.g., gallons, tons, cubic yards).
- **SCTG Commodity Code, Column (F)** – Use the list of commodity codes provided in the accompanying 2012 Standard Classification of Transported Goods (SCTG) Commodity Codes booklet to select the proper 5-digit code. For shipments with more than one commodity, enter only the code for the commodity with the greatest weight. Mixed freight categories are also available for some standard groupings of commodities. For assistance in locating the appropriate commodity code, refer to the alphabetized quick reference at the beginning of the 2012 SCTG Commodity Codes booklet. Additional assistance is available at econhelp.census.gov/cfs.
- **Commodity Description, Column (G)** – Enter a brief description of the commodity shipped. For shipments with more than one commodity, describe only the commodity with the greatest weight. Do not use trade names, catalog numbers, or other codes not familiar to persons outside your business.
- **Temperature Controlled, Column (H)** – A temperature controlled shipment is defined as a shipment that is transported in a vehicle or container that regulates the temperature while en route (such as heating and refrigeration) or maintaining the temperature of the commodity at the time of loading (such as insulation). This excludes shipments of commodities that have temperature sensitivity without a means of controlling the temperature in the vehicle or container while in transport.
- **Hazardous Materials, Column (I)** – If the shipment is a hazardous material, enter the 4-digit United Nations (UN) or North American (NA) number.

Item F SHIPMENT CHARACTERISTICS									
Line No. (A)	Your Shipment ID Number (B)	Shipment Date (C)		Shipment value (excluding shipping costs) in whole dollars. Estimates acceptable. (D)	Net Shipment weight in pounds (E)	SCTG commodity code from accompanying booklet (F)	Commodity Description (G)	Temperature Controlled (Y/N)? (H)	If a hazardous material, Enter the "UN" or "NA" number (I)
		Month	Day						
0	123-5	4	26	244,235	4,840	34520	Mechanical machinery	Y	
00	402H	4	26	1,375	50,125	20222	Sulfuric acid	N	1830
1									
2									

Part I — Instructions for Completing Your Questionnaire – Continued

Item F – Shipment Characteristics – Continued

- **U.S. Destination or U.S. Exit Port, Column (J)** – For domestic shipments, enter the city, state, and 5-digit ZIP Code of the buyer/receiver's "**ship to**" address as it appears on the shipping document. For the state portion, use the two-letter state postal abbreviation shown in Part III.

Important – For export shipments, report the U.S. **port of exit** as the destination city. The port of exit is the port or airport from which the shipment left the country. In case of land shipments into Mexico or Canada, the **port of exit** is the border crossing.

- **Mode(s) of Transport to U.S. Destination, Column (K)** – Enter the code(s) for **all** modes of transport used for the shipment to its U.S. destination (i.e., the destination reported in **Column (J)**). Codes are located on the bottom of pages 5 and 7 of the questionnaire. Enter all that apply in the sequence in which the mode is used. Do not include the export mode of transport in this column, report in **Column (N)**. See Part II for definitions of each mode. Do not use commas (,) to separate each mode.

For Customer Pick-up – Report the mode(s) of transportation used, if known. Otherwise, report mode as "0" (unknown).

- **Export, Column (L)** – Indicate whether or not the shipment is intended for export outside of the United States, by entering a "Y" for yes and "N" for no. For the purposes of this survey, shipments to Puerto Rico and U.S. territories and possessions **are** considered exports.
- **Foreign Destination, Column (M)** – Only respond if answer in **Column (L)** is "Y". Enter the foreign city and country of destination. Make sure **Column (J)** and **Column (K)** only contain the domestic portion of the shipment (see above).
- **Export Mode, Column (N)** – Only respond if answer in **Column (L)** is "Y". Enter the code for the mode of transport by which the shipment left the country. Codes are located at the bottom of pages 5 and 7 of the questionnaire.

U.S. Destination or U.S. Exit Port (Complete for all shipments.) (J)			Mode(s) of transport to U.S. destination Enter all that apply in order used. Use codes at bottom. (K)	Export? (Y/N) (L)	Foreign Destination (for export shipments only) Note: In column (J) enter the U.S. port, airport, or border crossing of exit (M)		Export Mode (N)
City	State	ZIP Code			City	Country	
Los Angeles	CA	90040	2 4	Y	Beijing	China	6
Newark	NJ	07105	4	N			

Part I — Instructions for Completing Your Questionnaire – Continued

Item G(1) – Rush Deliveries

Mark an (X) in the “Yes” box if any of the shipments reported in Item F required purchase of a faster level of service (e.g., same day/overnight, 2–3 business days, or faster service arrangement provided by hired carriers). If not, mark an (X) in the “No” box and proceed to Item H.

Item G(2) – Rush Deliveries

If “Yes” in Item G(1) list the number of shipments reported in Item F that required the specific type of rush delivery services listed. Enter a number for each type of service.

Item H – Monthly Value of Outbound Shipments

Mark an (X) in the box that corresponds to the total value of all outbound shipments from this location for the most recently completed calendar month.

Contact

Enter the name, title, signature, telephone number, and fax number for the person to contact in the event that we have a question about your report.

Remarks

Use this space to clarify your responses, if needed or to note any critical business changes that have recently occurred or are forthcoming (e.g., closures, plant renovations, merges, etc.).

Part II — Mode of Transportation Definitions

Parcel delivery/Courier/U.S. Parcel Post – Includes ground shipments of packages and parcels that each weigh less than or equal to 150 pounds, and are transported by a for-hire carrier.

Private truck – Trucks operated by employees of this establishment or the buyer/receiver of the shipment. Includes trucks providing dedicated services to this establishment.

For-hire truck – Shipments by common or contract carriers made under a negotiated rate.

Railroad – Any common carrier or private railroad.

Inland water – Barges, ships, or ferries operating primarily in navigable waters, both within and along the borders of the United States, such as:

- Rivers – *Examples: the Mississippi River and Saint Lawrence Seaway*
- Lakes – *Examples: the Great Lakes*
- Along the shoreline but actually in the ocean – *Examples: Intracoastal Waterway along the Atlantic and Gulf coasts and the Inside Passage of Alaska*
- Canals, harbors, major bays, and inlets

Deep sea – Barges, ships, or ferries operating primarily in the open waters of the ocean, outside the borders of the United States.

Pipeline – Movements of oil, petroleum, gas, slurry, etc. through pipelines that extend to other establishments or locations beyond the shipper's establishment. (Aqueducts for the movement of water are not included.)

Air – Any shipment sent via air mode.

Other mode – Any mode not listed above.

Unknown – A shipment where you are unable to determine the mode of transportation.

Note: Transportation equipment that is "shipped" under its own power, such as boats, barges, ferries, ships, aircraft, trucks, and trains **should be classified with the appropriate mode above.** Transportation equipment shipped under its own power for which an appropriate mode is not listed (e.g., buses, recreational vehicles) should be listed as **"other mode."**

Part III — State Postal Abbreviation List

State	Abbreviation	State	Abbreviation
Alabama	AL	Montana	MT
Alaska	AK	Nebraska	NE
Arizona	AZ	Nevada	NV
Arkansas	AR	New Hampshire	NH

Make corrections to name, shipping address, and ZIP code if necessary.

YOUR RESPONSE IS REQUIRED BY LAW. Title 13, United States Code, requires businesses and other organizations that receive this form to answer the questions and return the report to the U.S. Census Bureau. By the same law, **YOUR U.S. CENSUS BUREAU REPORT IS CONFIDENTIAL.** It may be seen only by persons sworn to uphold the confidentiality of U.S. Census Bureau information and may be used only for statistical purposes. Further, copies retained in respondents' files are immune from legal process.

INSTRUCTIONS:

- Refer to the accompanying Instruction Guide for help in answering specific questions.
- More information is available at econhelp.census.gov/cfs

Item A VERIFICATION OF SHIPPING ADDRESS

Is the address listed above the location from which this establishment's shipments originate?

- ☐ Yes, the address listed above is correct. (Proceed to Item B.)
- ☐ No, the address is incorrect. (Make changes directly to the address label above.)

Item B VERIFICATION OF MAILING ADDRESS

1. What address should the remaining quarterly 2012 CFS questionnaires be mailed to?

- ☐ Mail the 2012 CFS questionnaire to this establishment's shipping address. (Proceed to Item C.)
- ☐ Mail the 2012 CFS questionnaire to the address entered below.

2. Enter your mailing address.

Company Name 1

Company Name 2

Address

City

State

ZIP Code

United States[™]
Census
Bureau

Item C OPERATING STATUS

Which of the following best describes this establishment's operating status during the week of

?

- ☐ In operation
- ☐ Temporarily or seasonally inactive
- ☐ Ceased operation - Enter date ceased operation →

Example: (04-09-1978)

		-			-				

Item D TOTAL NUMBER OF OUTBOUND SHIPMENTS

For this survey, it is important to obtain information about a sample of the outbound shipments made from this establishment.

*An outbound shipment in this survey is defined as a movement of commodities from your establishment to another **single** location.*

- Remember to include only outbound shipments from your shipping address (address printed on the label).
- Also include customer pick-ups, parcels, and all other outbound shipments.

1. What was the total number of all outbound shipments for this establishment the week of

?

.....

Total number of outbound shipments

Estimates are acceptable.

For further information, refer to the Instruction Guide, page 2.

2. Did you enter 40 or fewer shipments above?

- ☐ Yes (Skip Item E and report all outbound shipments in Item F, pages 4-7.)
- ☐ No (Proceed to Item E, on page 3.)

Item E SAMPLING INSTRUCTIONS

In order to avoid asking you for information regarding all of your shipments, we will only ask about a sample of them. This section will help you **identify your sample of shipments** that should be reported in Item F.

Using the table below, mark the row that includes the total number of outbound shipments reported in Item D, and the corresponding "report every" number.

Number of outbound shipments reported in Line 1	Report every...	Mark (X) one
1-40	Report every outbound shipment	
41-80	Report every 2nd outbound shipment	
81-100	Report every 3rd outbound shipment	
101-200	Report every 5th outbound shipment	
201-400	Report every 10th outbound shipment	
401-800	Report every 20th outbound shipment	
801-1600	Report every 40th outbound shipment	
1601-3200	Report every 80th outbound shipment	
3201-6400	Report every 160th outbound shipment	
6401-12800	Report every 320th outbound shipment	
More than 12800	Call Census at 1-800-772-7851, option "3", or go to econhelp.census.gov/cfs	

Example:

If an establishment reported 253 shipments in Item D, it would correspond to the range of 201-400 in the table above, and every 10th outbound shipment record would be selected. This means the establishment would count 10 shipment records, select that record, and report it in Item F. Continuing with the next shipment record, the establishment would count 10 shipment records again, select that record, and report it in Item F. The establishment would repeat this until it had gone through the full set of shipment records for the week named in Item D.

For further information, refer to the Instruction Guide, page 3, or visit the business help site at econhelp.census.gov/cfs/surveytools to view an instructional video on how to sample.

Item F SHIPMENT CHARACTERISTICS										
NOTE: Each line runs across pages 4 and 5. After entering column (I) data on page 4 for any line, continue with column (J) on page 5 for the same line.										
Line No.	Your Shipment ID Number	Shipment Date (C)		Shipment value (excluding shipping costs) in whole dollars. Estimates acceptable.	Net Shipment Weight in pounds	SCTG commodity code from accompanying booklet	Commodity Description	Temperature controlled? Form CFS-1000 (2012) (12-06-2011)

Item G RUSH DELIVERIES

For this survey, rush deliveries require the purchase of a faster level of service by the shipper or buyer (e.g., same day/overnight or 2-3 business days). It also includes faster service provided by hired carriers, as part of an arrangement. Excluded, are shipments that would arrive in the same amount of time without the purchase of a faster level of service, and shipments delivered by company operated vehicles.

1. Considering the shipments reported in Item F, did you use rush delivery service?
☐ Yes

☐ No (Proceed to Item H.)
2. How many shipments, reported in Item F, required the use of the following rush delivery services?

Same day/Overnight.

2-3 business days

More than 3 business days

Item H MONTHLY VALUE OF OUTBOUND SHIPMENTS

Which of the following represents your best estimate of the total value of all outbound shipments originating from this establishment for the most recently completed month?

☐ Less than \$1 Million

☐ \$40 Million or more but less than \$100 Million

☐ \$1 Million or more but less than \$10 Million

☐ \$100 Million or more but less than \$400 Million

☐ \$10 Million or more but less than \$40 Million

☐ \$400 Million or more
