

The U.S. Census Bureau's Puerto Rico Community Survey (PRCS)

The **Puerto Rico Community Survey (PRCS)** is part of the American Community Survey (ACS) that is customized for Puerto Rico. The PRCS provides data every year—giving communities in Puerto Rico the current information they need to manage change and plan for the future. Information from the ACS and PRCS generate data that help inform how trillions of dollars in federal funds are distributed every year.

The PRCS is unique in its ability to produce estimates for a wide range of topics for multiple geographies including the commonwealth, municipios, zonas urbanas, barrios, subbarrios, and smaller areas such as census tracts and block groups.

What Topics Are Covered in the PRCS?

The PRCS covers a wide range of topics including social, economic, demographic, and housing characteristics. Policymakers, business leaders, planners, and others nationwide rely on these data to make informed decisions.

Social 	Economic 	Demographic 	Housing 
<ul style="list-style-type: none">• Ancestry• Citizen voting-age population• Citizenship status• Disability status• Educational attainment• Fertility• Grandparents as caregivers• Language spoken at home• Marital history• Marital status• Migration/residence 1 year ago• Place of birth• School enrollment• Undergraduate field of degree• Veteran status; period of military service• Year of entry	<ul style="list-style-type: none">• Class of worker• Commuting (journey to work) and place of work• Employment status• Food stamps/ Nutritional Assistance Program• Health insurance coverage• Income and earnings• Industry and occupation• Poverty status• Work status last year	<ul style="list-style-type: none">• Age• Group quarters population• Hispanic or Latino origin• Race• Relationship to householder• Sex• Total population	<ul style="list-style-type: none">• Bedrooms• Computer and internet use• Electric vehicles• House heating fuel• Kitchen facilities• Occupancy/vacancy status• Occupants per room• Plumbing facilities• Rent• Rooms• Selected monthly owner costs• Solar panels• Telephone service available• Tenure (owner/renter)• Units in structure• Value of home• Vehicles available• Year householder moved into unit• Year structure built

How Often Are PRCS Data Released?

PRCS data are timely because they are released immediately following the year in which they are collected. The data collected by the PRCS are used to create period estimates, which means they represent the characteristics of the population and housing over a period of time. The PRCS data are released as part of the ACS estimates for 1-year and 5-year periods.

1-Year Estimates	1-Year Supplemental Estimates	5-Year Estimates
<ul style="list-style-type: none">Cover 12 months of collected data.Data for areas with populations of 65,000 or more.Data available for 2005 onward.	<ul style="list-style-type: none">Cover 12 months of collected data.Simplified versions of popular tables.Data for areas with populations of 20,000 or more.Data available for 2014 onward.	<ul style="list-style-type: none">Cover 60 months of collected data.Data available for geographic areas down to the block group level.Data available for the 2005–2009 5-year period onward.

How Are PRCS Data Collected?

Households that receive the survey can respond by mail, phone, or a personal visit with a field representative. The Census Bureau selects a random sample of about 36,000 housing unit addresses to be included in the PRCS. Each address has about a 1-in-480 chance of being selected in a month, and no address is selected more than once every 5 years. People living in group quarters facilities such as college dormitories, nursing homes, and prisons are also sampled.

Your Information Is Safe!

The U.S. Census Bureau is required under Title 13 of the U.S. Code to keep all information about respondents strictly confidential. The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household.
