

List of the New Features for Census Flows Mapper v1.1

Each of the numbers (except 8, 9, 10) corresponds to a section on Figures 1 and/or 2 for illustrative purposes.

1. The county search bar replaced state/county dropdown selection boxes.
2. Data available:
 - 2007-2011 5-year ACS county-to-county flows data now available (new)
 - 2006-2010 5-year ACS county-to-county flows data
3. The ordering of “Choose type of migration flow” changed, but includes the same choices.
4. Dropdown menu of characteristics now includes their subcategories, instead of two separate dropdown menus.
5. Additional colors were added to select from for the map display
6. Foreign lands (Canada, Mexico, and Russia) and AK and HI bounding boxes are no longer displayed on the map.
7. Major cities can be turned on and off on the map using the Cities checkbox located at the bottom left of the map frame.
8. The map source note updates based upon the dataset chosen
9. The data table is now displayed within the map frame when viewed and sortable by column (not pictured below) as opposed to being in a non-sortable pop-up box.
10. The .xls and .pdf file names reflect the selected dataset with either 0610 or 0711 added to the file name (not pictured below).
11. A feedback email address was added to the launch page to make questions, concerns, and comments from the public easily ascertained, sehds.migration@census.gov (not pictured below)
