## Preliminary: U.S. Imports for Consumption of Steel Products January 2018

The U.S. Census Bureau announced today that preliminary January steel imports were \$2.4 billion (2.6 million metric tons) compared to the preliminary December totals of \$2.1 billion (2.2 million metric tons).

The January change in steel imports based on metric tonnage reflected increases primarily in oil country goods. Decreases occurred in cold rolled sheets; blooms, billets, and slabs; and heavy structural shapes. Increases occurred primarily with Korea. Decreases occurred primarily with Russia, Indonesia, and Netherlands.

The year to date final statistics through December 2017 showed steel imports of 34.5 million metric tons compared with 30.0 million metric tons through December 2016. The largest commodity increases occurred primarily in oil country goods. Decreases occurred primarily in hot rolled sheets, reinforcing bars, and plates cut lengths. The largest country increases occurred primarily with Russia. Decreases occurred primarily with Japan, Turkey, and Belgium.

### Notes:

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at [www.census.gov/trade](http://www.census.gov/trade). On the website, you can access product by country and country by product tables.*

*The next release is March 23, 2018.*
