U.S. MERCHANDISE TRADE: JANUARY 1993 TO DECEMBER 1993 --FINAL REPORT

With this release, the Bureau of the Census and the Bureau of Economic Analysis are publishing revised U.S. goods and services trade statistics for 1993.

GOODS

The 1993 unadjusted Census Basis goods data were revised to eliminate "carry-over" (that portion of the monthly statistics that arrives too late for inclusion in the transaction month) and to include errata (corrections to the published monthly data). Once these corrections were completed, factors for seasonal and working-day adjustments were recomputed, and the seasonally adjusted data were revised for 1992 and 1993.

SERVICES

The services estimates were revised to incorporate updated source data for 1992 and 1993. Revisions to most series were small and offsetting. Other private service receipts and other private service payments were both revised downward, based upon the receipts of new annual survey data. New seasonal factors were applied to unadjusted data for 1992 and 1993.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy related petroleum products as those aggregated in the SITC. The end-use petroleum products, however, include some products such as ethane, butane, benzene and toluene, which are included in "Manufactured Goods".

(1) Details shown for these Energy-Related Petroleum Products are not available on a Balance of Payments Basis. These products include the following SITC commodity groupings; crude oil, petroleum preparations, and liquified propane and butane gas. See exhibit 14 (exh14a, exh14b) under Mineral fuel for SITC system detail.
