U.S. INTERNATIONAL TRADE IN GOODS AND SERVICES, ANNUAL REVISION

Release Number: CB 22-92, BEA 22-23

NOTICE

Updates to Goods and Services

In this release and in the accompanying “[U.S. International Trade in Goods and Services, April 2022](#)” release (FT-900), the U.S. Census Bureau and the U.S. Bureau of Economic Analysis (BEA) are publishing revised statistics on trade in goods and services. With these releases, statistics on trade in goods, on both a Census basis and a balance of payments (BOP) basis, are revised beginning with 2017, and statistics on trade in services are revised beginning with 2015.

Revised statistics on trade in goods reflect:

- Corrections and adjustments to previously published not seasonally adjusted statistics for goods on a Census basis.
- Reclassification of several commodities across end-use categories.
- Recalculated seasonal and trading-day adjustments.
- Newly available and revised source data on BOP adjustments, which are adjustments that BEA applies to goods on a Census basis to convert them to a BOP basis. See the “Goods (balance of payments basis)” section in the FT-900 explanatory notes for more information.

Revised statistics on trade in services reflect:

- Newly available and revised source data, primarily from BEA surveys of international services, including the results of BEA’s benchmark survey of financial services.
- Recalculated seasonal adjustments.
- Revised temporal distributions of quarterly source data to monthly statistics. See the “Services” section in the FT-900 explanatory notes for more information.

This annual revision has not changed the overall trend in the goods and services balance. The annual goods and services deficit was revised down for all years—ranging from 0.1 percent in 2015 to 3.4 percent in 2020—primarily reflecting upward revisions to the services surplus. Downward revisions to the goods deficit for 2019–2021 also contributed to downward revisions to the goods and services deficit for these years.

(1) The petroleum products aggregated in the end-use commodity classification system include virtually the same energy-related petroleum products as those aggregated in the Standard International Trade Classification (SITC). The end-use petroleum products, however, include some products such as ethane, butane, benzene, and toluene, which are included in "Manufactured Goods" in the SITC.
