## **Preliminary: U.S. Imports for Consumption of Steel Products April 2010**

The U.S. Census Bureau announced today that preliminary April steel imports were **\$1.9 billion (1.9 million metric tons)** compared to the preliminary March totals of \$1.8 billion (1.8 million metric tons).

The April change in steel imports based on metric tonnage reflected increases primarily in oil country goods and reinforcing bars. A monthly decrease occurred primarily with rails standard. Monthly increases occurred primarily with Russia and Korea. Monthly decreases occurred primarily with Canada and Brazil.

The year to date final statistics through March 2010 showed steel imports of 4.8 million metric tons compared to 5.0 million metric tons through March 2009. The largest commodity decrease was in oil country goods and the largest commodity increase was blooms, billets, and slabs. The largest country decrease was with China and the largest country increase was with Canada.

**Notes:**

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details visit the Foreign Trade Division web site at: [www.census.gov/trade](http://www.census.gov/trade). On the web site you can access product by country and country by product tables.*

*The next release is June 22, 2010.*
