## **Preliminary: U.S. Imports for Consumption of Steel Products March 2011**

The U.S. Census Bureau announced today that preliminary March steel imports were **\$2.5 billion (2.2 million** metric tons). This was an increase of \$0.7 billion (0.6 million metric tons) from the preliminary February totals of \$1.8 billion (1.6 million metric tons).

The March change in steel imports based on metric tonnage reflected an increase primarily in blooms, billets, and slabs. Increases occurred primarily with Mexico and Canada.

The year to date final statistics through February 2011 showed steel imports of 3.6 million metric tons compared with 2.9 million metric tons through February 2010. The largest commodity increases occurred primarily in oil country goods and blooms, billets, and slabs. The largest commodity decrease occurred primarily in line pipe greater than 16 inches. The largest country increase occurred primarily with Brazil and the largest country decrease occurred primarily with Canada.

**Notes:**

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details visit the Foreign Trade Division web site at: [www.census.gov/trade](http://www.census.gov/trade). On the web site you can access product by country and country by product tables.*

*The next release is May 25, 2011.*
