Preliminary: U.S. Imports for Consumption of Steel Products October 2011

The U.S. Census Bureau announced today that preliminary October steel imports were **\$2.4 billion (2.0 million metric tons)**. These totals were virtually unchanged from the preliminary September totals of \$2.4 billion (2.0 million metric tons).

The October change in steel imports based on metric tonnage reflected a decrease primarily in blooms, billets, and slabs, and an increase primarily in hot-rolled sheets. A decrease occurred primarily with Russia.

The year to date final statistics through September 2011 showed steel imports of 19.9 million metric tons compared with 16.7 million metric tons through September 2010. The largest commodity increase occurred primarily in blooms, billets, and slabs. The largest country increase occurred primarily with Brazil.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details visit the Foreign Trade Division web site at: www.census.gov/trade. On the web site you can access product by country and country by product tables.

The next release is December 28, 2011.

Exhibit 4c. U.S. Imports For Consumption of Carbon (Non-Alloy) Steel Products From Selected Countries and Areas

Quantity in metric tons/value in thousands of dollars. (-) Represents zero or less than one half of measurement shown.

Details may not equal totals due to rounding.
