## Preliminary: U.S. Imports for Consumption of Steel Products September 2013

The U.S. Census Bureau announced today that preliminary September steel imports were **\$2.3 billion (2.5 million metric tons)** compared to the preliminary August totals of \$2.5 billion (2.6 million metric tons).

The September change in steel imports based on metric tonnage reflected decreases primarily in oil country goods; standard pipe; and blooms, billets and slabs. Increases occurred primarily in hot rolled bars and plates cut lengths. Decreases occurred primarily with Argentina and Mexico. Increases occurred primarily with China and Japan.

The year to date final statistics through August 2013 showed steel imports of 19.2 million metric tons compared with 20.9 million metric tons through August 2012. The largest commodity decreases occurred primarily in blooms, billets and slabs; oil country goods; and plates cut lengths. Increases occurred primarily in structural shapes heavy, hot rolled bars, and reinforcing bars. The largest country decreases occurred primarily with Russia and Canada. Increases occurred primarily with Mexico.

### Notes:

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit the Foreign Trade Division web site at [www.census.gov/trade](http://www.census.gov/trade). On the website, you can access product by country and country by product tables.*

*The next release is November 26, 2013.*

**Not Seasonally Adjusted**
