Preliminary: U.S. Imports for Consumption of Steel Products June 2015

The U.S. Census Bureau announced today that preliminary June steel imports were \$2.3 billion (2.8 million metric tons) compared to the preliminary May totals of \$2.7 billion (3.1 million metric tons).

The June change in steel imports based on metric tonnage reflected decreases primarily in reinforcing bars, galvanized hot dipped sheets, and oil country goods. Increases occurred primarily in line pipe, hot rolled sheets, and heavy structural shapes. Decreases occurred primarily with Brazil, China, and Turkey. Increases occurred primarily with Canada, Australia, and Japan.

The year to date final statistics through May 2015 showed steel imports of 16.9 million metric tons compared with 15.9 million metric tons through May 2014. The largest commodity increases occurred primarily in line pipe, hot dipped galvanized sheets, and cold rolled sheets. Decreases occurred primarily in blooms, billets, and slabs. The largest country increases occurred primarily with Turkey, South Korea, and Brazil. Decreases occurred primarily with Russia, Mexico, and the United Kingdom.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is July 24, 2015.
