Preliminary: U.S. Imports for Consumption of Steel Products April 2016

The U.S. Census Bureau announced today that preliminary April steel imports were \$1.6 billion (2.2 million metric tons) compared to the preliminary March totals of \$1.7 billion (2.3 million metric tons).

The April change in steel imports based on metric tonnage reflected decreases primarily in reinforcing bars. Increases occurred primarily in line pipe, hot rolled bars, and cold rolled sheets. Decreases occurred primarily with Turkey. Increases occurred primarily with Brazil, Korea, and South Africa.

The year to date final statistics through March 2016 showed steel imports of 6.8 million metric tons compared with 10.6 million metric tons through March 2015. The largest commodity decreases occurred primarily in blooms, billets, and slabs. Increases occurred primarily in drawn wire, standard rails, and tin free steel. The largest country decreases occurred primarily with Korea. Increases occurred primarily with Australia, South Africa, and Venezuela.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is June 23, 2016.
