Preliminary: U.S. Imports for Consumption of Steel Products August 2016

The U.S. Census Bureau announced today that preliminary August steel imports were \$2.0 billion (2.7 million metric tons) compared to the preliminary July totals of \$2.0 billion (2.9 million metric tons).

The August change in steel imports based on metric tonnage reflected decreases primarily in hot rolled sheets; blooms, billets, and slabs; and reinforcing bars. Increases occurred primarily in wire rods, standard pipe, and cold rolled sheets. Decreases occurred primarily with Brazil. Increases occurred primarily with Russia, Canada, and Germany.

The year to date final statistics through July 2016 showed steel imports of 17.2 million metric tons compared with 22.7 million metric tons through July 2015. The largest commodity decreases occurred primarily in oil country goods. Increases occurred primarily in reinforcing bars, wire rods, and tin plate. The largest country decreases occurred primarily with China. Increases occurred primarily with South Africa, Belgium, and Sweden.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is October 26, 2016.
