## Preliminary: U.S. Imports for Consumption of Steel Products November 2016

The U.S. Census Bureau announced today that preliminary November steel imports were \$1.9 billion (2.5 million metric tons) compared to the preliminary October totals of \$1.9 billion (2.4 million metric tons).

The November change in steel imports based on metric tonnage reflected increases primarily in blooms, billets and slabs. Decreases occurred primarily in wire rods; hot galvanized sheets and strip; and oil country goods. Increases occurred primarily with Russia. Decreases occurred primarily with Japan, Turkey, and India.

The year to date final statistics through October 2016 showed steel imports of 25.0 million metric tons compared with 30.8 million metric tons through October 2015. The largest commodity decreases occurred primarily in oil country goods. Increases occurred primarily in tin plate, reinforcing bars, and wire rods. The largest country decreases occurred primarily with China. Increases occurred primarily with Belgium, Ukraine, and South Africa.

**Notes:**

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at [www.census.gov/trade](http://www.census.gov/trade). On the website, you can access product by country and country by product tables.*

*The next release is January 27, 2017.*

**Not Seasonally Adjusted**

**Exhibit 1. U.S. Imports For Consumption of Steel Products**

Quantity in metric tons/value in thousands of dollars. Details may not equal totals due to rounding.
