Preliminary: U.S. Imports for Consumption of Steel Products May 2017

The U.S. Census Bureau announced today that preliminary May steel imports were \$2.6 billion (3.1 million metric tons) compared to the preliminary April totals of \$2.5 billion (3.0 million metric tons).

The May change in steel imports based on metric tonnage reflected increases primarily in line pipe; blooms, billets, and slabs; and plates in coil. Decreases occurred in oil country goods, structural heavy shapes, and structural pipe and tube. Increases occurred primarily with Brazil. Decreases occurred primarily with Russia, Japan, and Taiwan.

The year to date final statistics through April 2017 showed steel imports of 11.2 million metric tons compared with 9.1 million metric tons through April 2016. The largest commodity increases occurred primarily in blooms, billets and slabs. Decreases occurred primarily in hot rolled sheets, plates cut lengths, and plates in coils. The largest country increases occurred primarily with Russia. Decreases occurred primarily with Australia, France, and China.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is July 26, 2017.
