Preliminary: U.S. Imports for Consumption of Steel Products June 2017

The U.S. Census Bureau announced today that preliminary June steel imports were \$2.9 billion (3.5 million metric tons) compared to the preliminary May totals of \$2.6 billion (3.1 million metric tons).

The June change in steel imports based on metric tonnage reflected increases primarily in reinforcing bars; cold rolled sheets; and blooms, billets, and slabs. Decreases occurred in standard pipe, line pipe, and galvanized hot dipped sheets and strip. Increases occurred primarily with Turkey. Decreases occurred primarily with India, Canada, and Germany.

The year to date final statistics through May 2017 showed steel imports of 14.3 million metric tons compared with 11.7 million metric tons through May 2016. The largest commodity increases occurred primarily in blooms, billets and slabs. Decreases occurred primarily in hot rolled sheets, plates cut lengths, and black plate. The largest country increases occurred primarily with Russia. Decreases occurred primarily with Australia, Korea, and France.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is August 23, 2017.
