Preliminary: U.S. Imports for Consumption of Steel Products October 2017

The U.S. Census Bureau announced today that preliminary October steel imports were \$2.5 billion (2.8 million metric tons) compared to the preliminary September totals of \$2.4 billion (2.8 million metric tons).

The October change in steel imports based on metric tonnage reflected increases primarily in wire rods, plates in coils, and cold rolled sheets. Decreases occurred in line pipe, reinforcing bars, and standard rails. Increases occurred primarily with Canada, Korea, and France. Decreases occurred primarily with Japan, Mexico, and Spain.

The year to date final statistics through September 2017 showed steel imports of 26.9 million metric tons compared with 22.5 million metric tons through September 2016. The largest commodity increases occurred primarily in oil country goods. Decreases occurred primarily in hot rolled sheets, plates cut lengths, and reinforcing bars. The largest country increases occurred primarily with Russia. Decreases occurred primarily with Japan, France, and China.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is December 22, 2017.
