Preliminary: U.S. Imports for Consumption of Steel Products November 2017

The U.S. Census Bureau announced today that preliminary November steel imports were \$2.3 billion (2.5 million metric tons) compared to the preliminary October totals of \$2.5 billion (2.8 million metric tons).

The November change in steel imports based on metric tonnage reflected decreases primarily in cold rolled sheets. Increases occurred in hot rolled bars, standard rails, and pipe for piling. Decreases occurred primarily with Russia. Increases occurred primarily with Brazil and Netherlands.

The year to date final statistics through October 2017 showed steel imports of 29.7 million metric tons compared with 25.0 million metric tons through October 2016. The largest commodity increases occurred primarily in oil country goods. Decreases occurred primarily in hot rolled sheets, plates cut lengths, and reinforcing bars. The largest country increases occurred primarily with Russia. Decreases occurred primarily with Japan, France, and Belgium.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is January 26, 2017.
