Preliminary: U.S. Imports for Consumption of Steel Products February 2018

The U.S. Census Bureau announced today that preliminary February steel imports were \$2.1 billion (2.1 million metric tons) compared to the preliminary January totals of \$2.4 billion (2.6 million metric tons).

The February change in steel imports based on metric tonnage reflected decreases primarily in oil country goods; blooms, billets and slabs, and reinforcing bars. Increases occurred in wire rods, heavy structural shapes, and plates cut lengths. Decreases occurred primarily with Brazil. Increases occurred primarily with India, Indonesia, and Germany.

The year to date final statistics through January 2018 showed steel imports of 2.6 million metric tons compared with 2.6 million metric tons through January 2017. The largest commodity increases occurred primarily in oil country goods; blooms, billets and slabs; and line pipe. Decreases occurred primarily in reinforcing bars; hot dipped galvanized sheets and strips; and cold rolled sheets. The largest country increases occurred primarily with Mexico, Brazil, and Korea. Decreases occurred primarily with Turkey.

Notes:

The data in this report are preliminary and subject to revisions.

Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details, visit our web site at www.census.gov/trade. On the website, you can access product by country and country by product tables.

The next release is April 24, 2018.
