2. In this chapter, the expression "densified wood" means wood which has been subjected to chemical or physical treatment (being, in the case of layers bonded together, treatment in excess of that needed to ensure a good bond), and which has thereby acquired increased density or hardness together with improved mechanical strength or resistance to chemical or electrical agencies.
3. Headings 4414 to 4421 apply to articles of the respective descriptions of particle board or similar board, fiberboard, laminated wood or densified wood as they apply to such articles of wood.

4. Products of heading 4410, 4411 or 4412 may be worked to form the shapes provided for in respect of the goods of heading 4409, curved, corrugated, perforated, cut or formed to shapes other than square or rectangular or submitted to any other operation provided it does not give them the character of articles of other headings.
5. Heading 4417 does not apply to tools in which the blade, working edge, working surface or other working part is formed by any of the materials specified in note 1 to chapter 82.
6. Subject to note 1 above and except where the context otherwise requires, any reference to "wood" in a heading of this chapter applies also to bamboo and other materials of a woody nature.

Subheading Note

1. For the purposes of subheading 4401.31, the expression "wood pellets" mean by-products such as cutter shavings, sawdust or chips, of the mechanical wood processing industry, furniture-making industry or other wood transformation activities, which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 percent by weight. Such pellets are cylindrical, with a diameter not exceeding 25 mm and a length not exceeding 100 mm.

Statistical Notes

1. In this chapter:
 - (a). The term "wood waste" means residual material other than firewood resulting from the processing of wood, including scraps, shavings, sawdust, veneer clippings, chipper rejects and similar small wood residues, as well as larger or coarser solid types of residual wood such as slabs, edgings, cull pieces and veneer log cores;
 - (b). The term "standard wood moldings" means wood moldings worked to a pattern and having the same profile in cross section throughout their length;
 - (c). The term "surface covered," as applied to the articles of heading 4411 and 4412, means that one or more exterior surfaces of a product have been treated with creosote or other wood preservatives, or with fillers, sealers, waxes, oils, stains, varnishes, paints or enamels, or have been overlaid with paper, fabric, plastics, base metal, or other
 - (d). Except where otherwise provided in this chapter, wood articles cover such articles whether or not they have been subjected to anti-stain or other temporary applications or treatment with creosote or other wood preservatives or with fillers, sealers, waxes, oils, stains, varnishes, paints or enamels.
2. For the purposes of heading 4407, the term "rough" includes wood that has been edged, resawn, crosscut or trimmed to smaller sizes but it does not include wood that has been dressed or surfaced by planing on one or more edges or faces or has been edge-glued or end-
3. Mixtures under subheading 4407.19 cover combinations of the named species whose proportions are not readily identifiable.

4. Heading 4409 includes articles having a repeating design worked along any edge or face.
5. Heading 4418 includes:
 - (a). Drilled or notched lumber studs; and
 - (b). Multi-layer assembled flooring panels having a face ply 4 mm or more in thickness.
