NOTICE OF REQUIRED INFORMATION FOR THE 1960 CENSUS OF POPULATION AND HOUSING

Please complete this form, as follows:

- First, fill the listing of persons and the information required for each of them on this page.
- Second, fill the questions about your dwelling on pages 2 and 3.
- Third, write the name of the head of this household at the top of page 4, and fill the questions for him on pages 4 and 5. Then, do the same for each person (including each child) you have listed on page 1, using pages 6 and 7, 8 and 9, etc.

Please tear out and study the enclosed example (on the white sheet) before you start to fill the inside pages of this form.

Never skip a question just because it does not seem to apply. For instance, an answer of "No" to the question, "Did this person work at any time last week?" is just as important as an answer of "Yes." Whenever you do not know the exact answer (such as the cost of utilities or the amount of wages last year) make a reasonable estimate. After you complete the form, please check it over to make sure you have not missed anything.

Please mail the completed form within 3 days in the special envelope. No postage is required.

**HOW TO FIGURE COST OF UTILITIES AND FUEL**

Enter the cost to the nearest dollar

**Utilities**

If you don’t know exactly how much you have spent and if you don’t have records, put down the approximate costs.

**Fuels**

If you don’t know how much fuels cost per year, one of the following methods may help you figure the approximate costs:

<table>
<thead>
<tr>
<th>Fuel used</th>
<th>Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coal</td>
<td>Multiply number of tons used per year by the cost per ton.</td>
</tr>
<tr>
<td>Oil or kerosene</td>
<td>Multiply number of gallons used per year by the cost per gallon; OR multiply number of deliveries by average cost per delivery.</td>
</tr>
<tr>
<td>Wood</td>
<td>Multiply number of cords (or loads) used per year by cost per cord (or load).</td>
</tr>
</tbody>
</table>

**NOTE:** If you buy fuel in small quantities (such as kerosene by the can or coal by the bag), it may be easier to figure about how much you spend for fuel per week, and multiply by the number of weeks during which it is used.
