

QUARTERLY RESIDENTIAL VACANCIES AND HOMEOWNERSHIP, THIRD QUARTER 2017

Release Number: CB17-170

October 31, 2017 — The U.S. Census Bureau announced the following residential vacancies and homeownership statistics for the third quarter 2017:

RESIDENTIAL VACANCIES AND HOMEOWNERSHIP THIRD QUARTER 2017	
Rental Vacancy Rate	7.5%
Homeowner Vacancy Rate	1.6%
Homeownership Rate	63.9%
Next release: January 30, 2018	
Data are not adjusted for seasonality. Source: U.S. Census Bureau, Current Population Survey/Housing Vacancy Survey, October 31, 2017	

National vacancy rates in the third quarter 2017 were 7.5 percent for rental housing and 1.6 percent for homeowner housing. The rental vacancy rate of 7.5 percent was 0.7 percentage points higher than the rate in the third quarter 2016 (6.8 percent) and not statistically different from the rate in the second quarter 2017 (7.3 percent). The homeowner vacancy rate of 1.6 percent was 0.2 percentage points lower than the rate in the third quarter 2016 (1.8 percent) and not statistically different from the rate in the second quarter 2017 (1.5 percent).

The homeownership rate of 63.9 percent was not statistically different from the rates in the third quarter 2016 (63.5 percent) or the second quarter 2017 (63.7 percent).

Table 1. Rental and Homeowner Vacancy Rates for the United States: 2010 to 2017

Year	Rental Vacancy Rate (percent)				Homeowner Vacancy Rate (percent)			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2017.....	7.0	7.3	7.5		1.7	1.5	1.6	
2016.....	7.0	6.7	6.8	6.9	1.7	1.7	1.8	1.8
2015.....	7.1	6.8	7.3	7.0	1.9	1.8	1.9	1.9
2014.....	8.3	7.5	7.4	7.0	2.0	1.9	1.8	1.9
2013.....	8.6	8.2	8.3	8.2	2.1	1.9	1.9	2.1
2012.....	8.8	8.6	8.6	8.7	2.2	2.1	1.9	1.9
2011.....	9.7	9.2	9.8	9.4	2.6	2.5	2.4	2.3
2010.....	10.6	10.6	10.3	9.4	2.6	2.5	2.5	2.7

All comparative statements in this report have undergone statistical testing, and unless otherwise noted, all comparisons are statistically significant at the 90 percent significance level. For an explanation of how the rates are calculated, please see the Explanatory Notes at the end of the press release.

Explanations of confidence intervals and sampling variability can be found on the CPS/HVS website at: www.census.gov/housing/hvs

In the third quarter 2017, the median asking rent for vacant for rent units was \$912.

In the third quarter 2017, the median asking sales price for vacant for sale units was \$187,300.

1. Median asking rent and median asking sales price data for vacant units can be found in Historical Table 11A/B at <www.census.gov/housing/hvs/data/histtabs.html>
2. The data in figures 2 and 3 are not adjusted for price changes.

The third quarter 2017 rental vacancy rate was higher outside Metropolitan Statistical Areas (8.5 percent) than in the suburbs (6.9 percent), but not statistically different from the rate inside principal cities (7.9 percent). The rate was lowest in the suburbs. The rental vacancy rate outside MSAs was lower than the third quarter 2016 rate, while the rates inside principal cities and in the suburbs were higher than the third quarter 2016 rates.

The homeowner vacancy rate was highest outside Metropolitan Statistical Areas (2.0 percent). The rates inside principal cities (1.6 percent) and in the suburbs (1.5 percent) were not statistically different from each other. The homeowner vacancy rates inside principal cities and outside MSAs were lower than the third quarter 2016 rates, while the rate in the suburbs was not statistically different from the third quarter 2016 rate.

The third quarter 2017 rental vacancy rate was highest in the South (9.4 percent), followed by the Midwest (8.1 percent). The rates in the Northeast (5.5 percent) and West (5.8 percent) were not statistically different from each other. The rental vacancy rates in the South and West were higher than the third quarter 2016 rates, while the rates in the Northeast and Midwest were not statistically different from the third quarter 2016 rates.

The homeowner vacancy rate was higher in the Northeast (1.9 percent) than in the Midwest (1.4 percent) and West (1.2 percent), but not statistically different from the rate in the South (1.8 percent). The homeowner vacancy rate in the South was lower than the third quarter 2016 rate, while the rates in the Northeast, Midwest and West were not statistically different from the third quarter 2016 rates.

Table 2. Rental and Homeowner Vacancy Rates by Area and Region: Third Quarter 2016 and 2017

Area/Region	Rental Vacancy Rates (percent)				Homeowner Vacancy Rates (percent)			
	Third Quarter 2016	Third Quarter 2017	Margins of Error ^a		Third Quarter 2016	Third Quarter 2017	Margins of Error ^a	
			of 2017 rate	of difference			of 2017 rate	of difference
United States.....	6.8	7.5	0.3	0.3	1.8	1.6	0.1	0.1
Inside Metropolitan Statistical Areas.....	6.5	7.4	0.3	0.4	1.6	1.5	0.1	0.1
In principal cities.....	6.9	7.9	0.4	0.5	1.9	1.6	0.2	0.3
Not in principal cities (suburbs).....	6.0	6.9	0.4	0.5	1.5	1.5	0.1	0.2
Outside Metropolitan Statistical Areas.....	9.6	8.5	0.9	1.0	2.5	2.0	0.3	0.3
Northeast.....	5.2	5.5	0.5	0.7	1.8	1.9	0.2	0.3
Midwest.....	7.8	8.1	0.8	1.0	1.5	1.4	0.2	0.3
South.....	8.7	9.4	0.5	0.6	2.1	1.8	0.2	0.2
West.....	4.4	5.8	0.4	0.6	1.5	1.2	0.2	0.3

^aA margin of error is a measure of an estimate's reliability. The larger the margin of error in relation to the size of the estimate, the less reliable the estimate. This number, when added to and subtracted from the estimate, forms the 90 percent confidence interval.

Approximately 87.1 percent of the housing units in the United States in the third quarter 2017 were occupied and 12.9 percent were vacant. Owner-occupied housing units made up 55.7 percent of total housing units, while renter-occupied units made up 31.4 percent of the inventory in the third quarter 2017. Vacant year-round units comprised 9.9 percent of total housing units, while 2.9 percent were for seasonal use. Approximately 2.6 percent of the total units were for rent, 0.9 percent were for sale only and 1.0 percent were rented or sold but not yet occupied. Vacant units that were held off market comprised 5.4 percent of the total housing stock -- 1.6 percent were for occasional use, 0.9 percent were temporarily occupied by persons with usual residence elsewhere (URE) and 2.9 percent were vacant for a variety of other reasons.

Table 3. Estimates of the Total Housing Inventory for the United States: Third Quarter 2016 and 2017^a

(Estimates are in thousands, percent distribution may not add to total due to rounding)

Type	Third Quarter 2016 (r)	Third Quarter 2017	Difference Between Estimates	Margins of Error ^b		Percent of total (2017)
				of 2017 estimate	of difference	
All housing units.....	135,774	136,684	910	X	X	100.0
Occupied.....	118,678	119,085	407	328	417	87.1
Owner.....	75,391	76,146	755	532	730	55.7
Renter.....	43,287	42,939	-348	573	776	31.4
Vacant.....	17,096	17,599	503	352	442	12.9
Year-round.....	12,881	13,580	699	311	367	9.9
For rent.....	3,217	3,551	334	126	163	2.6

Seasonal.....	4,217	4,020	-197	233	257	2.9

^aThe housing inventory estimates are benchmarked to 2010 Census.

^bA margin of error is a measure of an estimate's reliability. The larger the margin of error in relation to the size of the estimate, the less reliable the estimate. This number, when added to and subtracted from the estimate, forms the 90 percent confidence interval.

^cA detailed breakdown of the 'other' vacant category can be found in Historical Table 18 <www.census.gov/housing/hvs/data/histtabs.html>

(r) Revised using vintage 2016 housing unit controls. See note below.

X Not Applicable. Since the number of housing units is set equal to an independent national measure, there is no sampling error, and hence no confidence interval.

1. Since first quarter 2003, the Current Population Survey/Housing Vacancy Survey estimates have been controlled to an independent set of housing unit estimates produced annually by the Census Bureau's Population Division from Census 2000 and 2010 and updated using building permit data, estimates of housing loss, and other administrative record data. Doing so makes the CPS/HVS estimates of housing units more comparable to other Census Bureau housing surveys controlled to these census-based estimates. The housing unit controls affect the estimate of vacant units in the sense that the estimates of total occupied and vacant units sum to the control total. Vacancy rates and homeownership rates are not affected by this change.

2. Beginning in the second quarter 2017, the housing inventory estimates are based on vintage 2016 housing unit controls that are projected forward through the first quarter 2017. The third quarter 2017 housing inventory estimates, shown above, reflect vintage 2016 housing unit controls, benchmarked to the 2010 Census. The CPS/HVS historical table series, from the first quarter 2010 through the first quarter 2017, has also been revised based on vintage 2016 housing unit controls. These revised estimates and additional information on terms and definitions can be found at: <www.census.gov/housing/hvs/data/histtabs.html>

3. For the methodology used in developing the housing unit estimates used for controls in the CPS/HVS, please see the Census Bureau's Population Division website: <www.census.gov/programs-surveys/popest.html>

The third quarter 2017 homeownership rate was highest for those householders ages 65 years and over (78.9 percent) and lowest for the under 35 years of age group (35.6 percent). None of the rates by age group were statistically different from the third quarter 2016 rates.

Table 6. Homeownership Rates by Age of Householder: 2011 to 2017

For homeownership rates by race, the third quarter 2017 homeownership rate for non-Hispanic White Alone householders reporting a single race was highest at 72.5 percent. The rate for Asian, Native Hawaiian and Pacific Islander Alone householders was second at 57.1 percent and Black Alone householders was lowest at 42.0 percent. The homeownership rate for non-Hispanic White Alone householders was higher than the third quarter 2016 rate, while the rates for Asian, Native Hawaiian and Pacific Islander Alone and Black Alone householders were not statistically different from the third quarter 2016 rates.

The homeownership rate for Hispanic householders (who can be of any race), 46.1 percent, was not statistically different from the third quarter 2016 rate.

Table 7. Homeownership Rates by Race and Ethnicity of Householder: 2013 to 2017

The fourth quarter 2017 data are scheduled for release on January 30, 2018. View the full schedule in the Economic Briefing Room: <www.census.gov/economic-indicators/>. More details can be found at <www.census.gov/housing/hvs/>.

EXPLANATORY NOTES

The estimates in this release are based on a sample survey and therefore are subject to both sampling and non-sampling error. Sampling error is a result of not surveying the entire population. Non-sampling error occurs because accurate information cannot always be obtained.

The sample estimate and its standard error enable one to construct a margin of error. A margin of error is a measure of an estimate's reliability. The larger a margin of error is in relation to the size of the estimate, the less reliable the estimate. For example, the standard error on the estimated rental vacancy rate of 7.5 percent is 0.158 percentage points. The margin of error is calculated as 1.645×0.158 percent, or 0.3 percent. Thus the 90 percent confidence interval is from 7.2 percent to 7.8 percent. If all possible samples were surveyed under essentially the same general conditions and the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the margins of error would include the average result of all possible samples.

In the first quarter 2017, the parameters used to calculate standard errors for rates and estimates were updated. The factors are evaluated, and updated if necessary, after approximately 15 months of data have been collected from a new CPS/HVS sample following a decennial census. The current sample has been fully phased-in since July 2015.

Since the first quarter 2003, the Current Population Survey/Housing Vacancy Survey housing inventory estimates have been controlled to independent housing unit estimates based upon Census 2000 (2000-2009 data) and Census 2010 (2010-present data) and updated with building permit data, estimates of housing loss, and other administrative records data. In the second quarter 2017, the CPS/HVS revised the series of housing inventory estimates back to the first quarter 2010, based on the latest series of independent housing controls, the vintage 2016 time series. Housing inventory estimates from the second quarter 2000 through the fourth quarter 2009 are revised based on the vintage 2010 time series. Housing inventory estimates, prior to the second quarter 2000, have not been revised. The CPS/HVS housing inventory data series are based on the independently produced vintage 2016 housing unit estimates that are projected forward through the first quarter 2017. The vintage 2016 estimates are benchmarked to the 2010 Census. The same general procedure will be followed each year in revising housing inventory estimates with the most up-to-date independent housing estimates available.

For an explanation of the methodology used in producing the housing inventory independent estimates, please see: <www.census.gov/programs-surveys/popest.html>

Note: This time series is by the latest "vintage" year. For example, vintage 2016 means that all of the estimates in this time series are identified as belonging to "vintage 2016." The 2010 data are from the 2016 vintage, the 2011 data are from the 2016 vintage, and so on.

The CPS/HVS also began computing first-stage factors (used for weighting purposes) based on year-round and seasonal counts of housing units from Census 2000 for the first quarter 2003. From 1980 to 2002, the CPS/HVS first-stage factors were based on year-round estimates only. The effect on the data is slight and the change should improve the counts of year-round and seasonal units. For more information on the effects of these changes, please see Source and Accuracy Statement at: <www.census.gov/housing/hvs/files/qtr317/source_17q3.pdf>

Beginning in the first quarter 2012, the population controls reflect the results of the 2010 decennial census. This change has virtually no effect on vacancy and homeownership rates. Research has shown that the new 2010-based controls increased the rental vacancy rate in April 2010 from 10.43 percent to 10.45 percent---a difference of less than 1/10 of one percent. The homeowner vacancy rate remained the same at 2.63 percent, while the homeownership rate was up from 66.67 percent to 66.74 percent.

The question on race on the CPS was modified beginning in the first quarter 2003 to comply with new standards for federal statistical agencies. Respondents are now allowed to report one or more races. The question on Hispanic origin is asked separately, and is asked before the question on race.

First stage factors for year-round vacant units have been corrected as of the second quarter 2004. Research has shown that this correction had no significant effect on the vacancy rates or homeownership rates.

The rental vacancy rate is the proportion of the rental inventory that is vacant for rent. In tables 1 and 2, the rates are computed using the following formula.

$$\text{Rental Vacancy Rate (\%)} = \left[\frac{\text{Vacant year - round units for rent}}{\left(\begin{array}{c} \text{Renter} \\ \text{occupied} \\ \text{units} \end{array} \right) + \left(\begin{array}{c} \text{Vacant year - round} \\ \text{units rented but} \\ \text{awaiting occupancy} \end{array} \right) + \left(\begin{array}{c} \text{Vacant year - round} \\ \text{units for rent} \end{array} \right)} \right] * 100$$

The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant for sale. In tables 1 and 2 the rates are computed using the following formula.

$$\text{Homeowner Vacancy Rate (\%)} = \left[\frac{\text{Vacant year - round units for sale only}}{\left(\begin{array}{c} \text{Owner} \\ \text{occupied} \\ \text{units} \end{array} \right) + \left(\begin{array}{c} \text{Vacant year - round} \\ \text{units sold but} \\ \text{awaiting occupancy} \end{array} \right) + \left(\begin{array}{c} \text{Vacant year - round} \\ \text{units for sale only} \end{array} \right)} \right] * 100$$

The homeownership rate is the proportion of households that is owner-occupied. It is computed by dividing the number of households that are occupied by owners by the total number of occupied households (tables 4, 4SA and 5).

$$\text{Homeownership Rate (\%)} = \left[\frac{\text{Owner occupied housing units}}{\text{Total Occupied housing units}} \right] * 100$$

For the homeownership rate for a specific characteristic (tables 6, 7 and 8), use the owner and total number of units for that characteristic. For example, for the West region:

$$\text{Homeownership Rate (West) (\%)} = \left[\frac{\text{Owner occupied housing units (West)}}{\text{Total Occupied housing units (West)}} \right] * 100$$

Third quarter 2017 data collection note

Due to Hurricanes Harvey and Irma, September 2017 CPS/HVS data collection was conducted under special guidance in affected areas (July and August data collections were not affected). If a field representative arrived at an unoccupied sample unit that appeared damaged and/or unlivable, field representatives were instructed to classify the sample unit in a manner that the unit remained in the sample the next month (for more information, see www2.census.gov/programs-surveys/cps/methodology/intman/CPS_Manual_April2015.pdf).

API

The Census Bureau's application programming interface lets developers create custom apps to reach new users and makes key demographic, socio-economic and housing statistics more accessible than ever before.
