### INSTRUCTIONS FOR FILLING THIS SCHEDULE.

This modified form of the general schedule for population is to be used in making the enumeration of Indians, both those on reservations and those living in family groups outside of reservations.

Detailed Indians living either in white or non-Indian families outside of reservations should be enumerated on the general population schedule (Form 8-1069) as members of the families in which they are found. But detached whites or non-Indians living in Indian families should be enumerated on this special Indian schedule as members of the Indian family in which they are found. In other words, every family composed mainly of Indians should be reported entirely on this special schedule, and every family composed mainly of persons not Indian should be reported entirely on the general population schedule.

Spaces are provided for entries for 20 persons on each side (A and B) of the sheet, for each person running twice to the page. Columns 1 to 48 are to be filled for each individual case, if applicable, according to the instructions.

Columns 1 to 24—These columns are identical with those on the general population schedule. Fill each column, as far as the inquiry applies, in accordance with the instructions for filling the corresponding column in the general population schedule (see book of instructions), but note the following additional instructions in relation to filling columns 1 and 2, columns 5 and 15, columns 14 and 15.

Columns 1 and 2—Violation numbers. If, in a given territory, you are using both the general population schedule (Forms 8-1069) and this schedule for Indian population, use two independent series of numbers for these columns, one series in each kind of schedule, so that the last number in column 1 on this schedule added to the last number in column 1 on the general population schedule will give the whole number of dwellings visited, and likewise, the last number in column 2 on this schedule added to the last number in column 2 on the general population schedule will give the whole number of families visited and enumerated in your entire district.

Column 7—Age at last birthday. Some difficulty may be met in ascertaining the exact age of Indians, as they frequently evolve that age from notable events occurring in the history of their respective tribes. Endeavor to ascertain the years in which these notable events occurred, and with a little calculation on your part you should be able to ascertain the exact age of each Indian.

Columns 14 and 15—Occupation. If the Indian is wholly self-supporting, enter his or her occupation in columns 14 and 15 in accordance with the general instructions for returning occupations. If the Indian—men, women, or child—has no occupation and is wholly dependent on the Government for support, write "Bureau Indian" in column 15. If the Indian is partly self-supporting and partly dependent upon the Government, write the occupation in column 14 and then the letter "B" (for bureau).
