## MONTHLY FULL REPORT ON MANUFACTURERS' SHIPMENTS, INVENTORIES AND ORDERS APRIL 2023

Release Number: CB 23-71 M3-2 (23)-04
June 5, 2023 - The U.S. Census Bureau announces the April full report on manufacturers' shipments, inventories and orders:

## Summary

New orders for manufactured goods in April, up four of the last five months, increased $\$ 2.6$ billion or 0.4 percent to $\$ 577.5$ billion, the U.S. Census Bureau reported today. This followed a 0.6 percent March increase. Shipments, down five of the last six months, decreased $\$ 2.5$ billion or 0.4 percent to $\$ 572.3$ billion. This followed a 0.6 percent March decrease. Unfilled orders, up four of the last five months, increased $\$ 10.4$ billion or 0.8 percent to $\$ 1,291.3$ billion. This followed a 0.4 percent March increase. The unfilled orders-to-shipments ratio was 6.71, up from 6.60 in March. Inventories, up following two consecutive monthly decreases, increased $\$ 4.2$ billion or 0.5 percent to $\$ 856.7$ billion. This followed a 0.8 percent March decrease. The inventories-to-shipments ratio was 1.50, up from 1.48 in March.

## New Orders

New orders for manufactured durable goods in April, up two consecutive months, increased $\$ 3.0$ billion or 1.1 percent to $\$ 282.8$ billion, unchanged from the previously published increase. This followed a 3.3 percent March increase. Transportation equipment, also up two consecutive months, drove the increase, $\$ 3.5$ billion or 3.7 percent to $\$ 97.7$ billion. New orders for manufactured nondurable goods decreased $\$ 0.4$ billion or 0.1 percent to $\$ 294.7$ billion.

## Shipments

Shipments of manufactured durable goods in April, down two of the last three months, decreased \$2.1 billion or 0.7 percent to $\$ 277.6$ billion, unchanged from the previously published decrease. This followed a 0.7 percent March increase. Transportation equipment, down three of the last four months, led the decrease, $\$ 1.6$ billion or 1.8 percent to $\$ 87.4$ billion. Shipments of manufactured nondurable goods, down five of the last six months, decreased $\$ 0.4$ billion or 0.1 percent to $\$ 294.7$ billion. This followed a 1.8 percent March decrease. Food products, down two consecutive months, led the decrease, \$0.3 billion or 0.4 percent to $\$ 79.8$ billion.

## Unfilled Orders

Unfilled orders for manufactured durable goods in April, up four of the last five months, increased \$10.4 billion or 0.8 percent to $\$ 1,291.3$ billion, unchanged from the previously published increase. This followed a 0.4 percent March increase. Transportation equipment, also up four of the last five months, led the increase, $\$ 10.3$ billion or 1.3 percent to $\$ 792.4$ billion.

## Inventories

Inventories of manufactured durable goods in April, up four of the last five months, increased $\$ 5.1$ billion or 1.0 percent to $\$ 521.8$ billion, unchanged from the previously published increase. This followed a 1.0 percent March decrease. Transportation equipment, up three of the last four months, led the increase, $\$ 5.1$ billion or 3.2 percent to $\$ 164.1$ billion. Inventories of manufactured nondurable goods, down five of the last six months, decreased $\$ 1.0$ billion or 0.3 percent to $\$ 334.9$ billion. This followed a 0.7 percent March decrease. Petroleum and coal products, also down five of the last six months, led the decrease, $\$ 0.7$ billion or 1.4 percent to $\$ 46.8$ billion. By stage of fabrication, April materials and supplies increased 0.3 percent in durable goods and decreased 0.6 percent in nondurable goods. Work in process increased 2.5 percent in durable goods and decreased 0.4 percent in nondurable goods. Finished goods increased 0.1 percent in durable and were virtually unchanged in nondurable goods.

The Advance Report on durable goods for May is scheduled for release on June 27, 2023, at 8:30 a.m. EDT and the Full Report on July 5, 2023, at 10:00 a.m. EDT. View the full schedule in the Economic Briefing Room: <www.census.gov/economic-indicators/>. The full text and tables of this release can be found at <www.census.gov/m3>.

## EXPLANATORY NOTES

Figures in text are adjusted for seasonality, but not for inflation. Figures on new and unfilled orders exclude data for semiconductor manufacturing.
"Virtually unchanged" indicates that the change is less than 0.05 percent for a percent increase or decrease.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY23-0265).

## Description of the survey

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey, which is a voluntary survey authorized by Title 13 of the United States Code. This survey provides statistics on a calendar-month basis for manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-inprocess, and finished goods). Data published from the M3 survey are based on a panel of approximately 5,000 reporting units that represent approximately 3,100 companies and provide an indication of month-to-month change for the Manufacturing Sector. These reporting units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 92 industry categories, which are combined into 65 publication levels due to the small monthly panel size. The survey methodology assumes that the month-to-month changes of the total operations of the reporting units in the M3 panel effectively represent the month-to-month movements of all establishments that make up the category. The companies for which shipments data are currently reported or imputed in the M3 survey represent approximately 60 percent of the total value of shipments for manufacturing establishments in the 2017 Economic Census, and these companies include roughly 61 percent of the manufacturing companies with $\$ 500$ million or more in shipments in the 2017 Economic Census. The companies for which shipments data are currently reported in the M3 survey represent approximately 51 percent of the total value of shipments for manufacturing establishments in the 2017 Economic Census. Statistics based on the M3 panel differ from the results that would be obtained from a complete enumeration of all manufacturing companies. The M3 panel is not based on a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many

Economic Indicators Division, Shipments, Inventories, and Orders Branch (M3) 301-763-4832

U.S. Department of Commerce U.S. CENSUS BUREAU census.gov
sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report.

Any revisions made later than two months will be reflected in the annual benchmark publication. Additional survey documentation can be found on our web site: <www.census.gov/manufacturing/m3/how the data are collected/index.html>.

## Benchmark notice

Revised historical data from the Manufacturers' Shipments, Inventories, and Orders (M3) Survey were issued on May 12, 2023. These revisions result from

- Benchmarking the M3 shipments and inventories data to the 2021 and 2020 Annual Survey of Manufactures (ASM) data;
- Incorporating the unfilled orders to shipments ratios obtained for 2021, 2020, and 2019 from the Manufacturers' Unfilled Orders (M3UFO) Survey;
- Adjusting the new orders data to be consistent with the benchmarked shipments and unfilled orders data;
- Correcting monthly data for late receipts, reclassifications of reported data, and revisions to previously reported data;
- Updating the seasonally adjusted data based on the results of benchmarking and the recent annual review of the seasonal adjustment models.

These revisions spanned the seasonally adjusted data for January 2012 through March 2023 and the data not seasonally adjusted for January 2017 through March 2023. An updated Press Release contains revised monthly tables for January 2023 through March 2023.

[^0]Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates inclu
model parameters. Estimates are not adjusted for price changes.
${ }^{2}$ Estimates and percent changes of shipments for the semiconductor industry are included in computers and electronic products, and all other applicable aggregate totals.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/)

## ${ }^{\mathrm{p}}$ Preliminary

${ }^{r}$ Revised data due to late receipts and concurrent seasonal adjustment.

 review of the model parameters. Estimates are not adjusted for price changes.
${ }^{2}$ Data on new orders are not available for the semiconductor industry. Estimates and percent changes for new orders exclude semiconductor industry data.

Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).

[^2]$r$ Revised data due to late receipts and concurrent seasonal adjustment.
${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
Estimates of inventories for the semiconductor industry data are included in computers and electronic products, and all other applicable aggregate totals.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <http://www.census.gov/manufacturing $/ \mathrm{m} 3 />$.

Table 5. Value of Manufacturers' Shipments, New Orders, Unfilled Orders, and Total Inventories for Topical Series ${ }^{1,2}$
[Estimates are shown in millions of dollars and are based on data from the Manufacturers' Shipments, Inventories, and Orders Survey.]

X Not Applicable
${ }^{\mathrm{r}}$ Preliminary
Revised data due to late receipts and concurrent seasonal adjustment.
Excludes the following industries with no unfilled orders: Wood products; nonmetallic mineral products; medical equipment and supplies; office video equipment; manufacturing and reproducing magnetic and optical media; batteries; automobiles; light trucks and utility vehicles; heavy duty trucks and miscellaneous furniture.
${ }^{3}$ Unfilled orders to shipments ratio excludes semiconductor manufacturing.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is
nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).
The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosw Source: U.S. Census Bureau, Manufacturers' Shipments, Inventories, and Orders (M3) Surve,
and methodology can be found on our website at <www.census.gov/manufacturing/m3/how_the_data_are_collected/index.html>.

    ${ }^{2}$ Topical series are regroupings of the separate industry categories.
    Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers; computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment, appliances, and components; heavy duty truck; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.
    ${ }^{4}$ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment.
    ${ }^{5}$ Estimates and percent changes exclude semiconductor industry data.
    ${ }^{6}$ Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).
    The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY23-0265).
    Source: U.S. Census Bureau, Manufacturers' Shipments, Inventories, and Orders (M3) Survey, April Full Report, June 5, 2023. Information on data sources and methodology can be found on our website at

[^4]:    Preliminary
    'Revised data due to late receipts and concurrent seasonal adjustment.
    ${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for noncalendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimate are not adjusted for price changes.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey
    panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <http://www.census.gov/manufacturing $/ \mathrm{m} 3 />$.
