

MONTHLY FULL REPORT ON MANUFACTURERS' SHIPMENTS, INVENTORIES AND ORDERS APRIL 2026

Release Number: CB 26-93 M3-2 (26)-04

June 3, 2026 — The U.S. Census Bureau announced the April full report on manufacturers' shipments, inventories and orders:

MANUFACTURED GOODS – NEW ORDERS		
APRIL 2026	\$662.7 billion	+4.8%°
MARCH 2026 (revised)	\$632.7 billion	+1.8%°
Next release: July 2, 2026		
Data adjusted for seasonal variation but not for price changes. Statistical significance is not measurable for this survey. The Manufacturers' Shipments, Inventories, and Orders estimates are not based on a probability sample, so the sampling error of these estimates cannot be measured, nor can the confidence intervals be computed. Source: U.S. Census Bureau, Manufacturers' Shipments, Inventories and Orders, June 3, 2026.		

Summary

New orders for manufactured goods in April, up five of the last six months, increased \$30.1 billion or 4.8 percent to \$662.7 billion, the U.S. Census Bureau reported today. This followed a 1.8 percent March increase. Shipments, up six of the last seven months, increased \$6.3 billion or 1.0 percent to \$641.0 billion. This followed a 1.5 percent March increase. Unfilled orders, up twenty-one of the last twenty-two months, increased \$26.8 billion or 1.7 percent to \$1,569.0 billion. This followed a 0.2 percent March increase. The unfilled orders-to-shipments ratio was 6.95, up from 6.88 in March. Inventories, up seven consecutive months, increased \$2.4 billion or 0.3 percent to \$959.1 billion. This followed a 0.7 percent March increase. The inventories-to-shipments ratio was 1.50, down from 1.51 in March.

New Orders

New orders for manufactured durable goods in April, up two consecutive months, increased \$25.7 billion or 8.0 percent to \$346.2 billion, up from the previously published 7.9 percent increase. This followed a 1.3 percent March increase. Transportation equipment, also up two consecutive months, led the increase, \$23.3 billion or 21.6 percent to \$131.1 billion. New orders for manufactured nondurable goods increased \$4.4 billion or 1.4 percent to \$316.5 billion.

Shipments

Shipments of manufactured durable goods in April, up seven of the last eight months, increased \$1.9 billion or 0.6 percent to \$324.5 billion, up from the previously published 0.5 percent increase. This followed a 0.8 percent March increase. Transportation equipment, up six of the last seven months, led the increase, \$0.9 billion or 0.8 percent to \$107.8 billion. Shipments of manufactured nondurable goods, up five consecutive months, increased \$4.4 billion or 1.4 percent to \$316.5 billion. This followed a 2.3 percent March increase. Petroleum and coal products, up four consecutive months, led the increase, \$2.5 billion or 4.0 percent to \$64.7 billion.

Unfilled Orders

Unfilled orders for manufactured durable goods in April, up twenty-one of the last twenty-two months, increased \$26.8 billion or 1.7 percent to \$1,569.0 billion, unchanged from the previously published increase. This followed a 0.2 percent March increase. Transportation equipment, up eight of the last nine months, led the increase, \$23.2 billion or 2.4 percent to \$993.1 billion.

Inventories

Inventories of manufactured durable goods in April, up seven consecutive months, increased \$1.7 billion or 0.3 percent to \$598.9 billion, unchanged from the previously published increase. This followed a 0.3 percent March increase. Transportation equipment, up six of the last seven months, led the increase, \$0.7 billion or 0.4 percent to \$189.9 billion. Inventories of manufactured nondurable goods, up three consecutive months, increased \$0.7 billion or 0.2 percent to \$360.2 billion. This followed a 1.3 percent March increase. Chemical products, up following eight consecutive monthly decreases, led the increase, \$0.3 billion or 0.2 percent to \$129.2 billion. By stage of fabrication, April materials and supplies increased 0.6 percent in durable goods and decreased 0.2 percent in nondurable goods. Work in process increased 0.8 percent in durable goods and 1.4 percent in nondurable goods. Finished goods decreased 0.7 percent in durable goods and were virtually unchanged in nondurable goods.

The Advance Report on durable goods for May is scheduled for release on June 25, 2026, at 8:30 a.m. EDT and the Full Report on July 2, 2026, at 10:00 a.m. EDT. View the full schedule in the Economic Briefing Room: www.census.gov/economic-indicators/. The full text and tables of this release can be found at www.census.gov/m3.

EXPLANATORY NOTES

Figures in text are adjusted for seasonality, but not for inflation. Figures on new and unfilled orders exclude data for semiconductor manufacturing.

“Virtually unchanged” indicates that the change is less than 0.05 percent for a percent increase or decrease.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY26-0151).

Description of the survey

This report is compiled from results of the U.S. Census Bureau’s Manufacturers’ Shipments, Inventories, and Orders (M3) survey, which is a voluntary survey authorized by Title 13 of the United States Code. This survey provides statistics on a calendar-month basis for manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-in-process, and finished goods). Data published from the M3 survey are based on a panel of approximately 4,700 reporting units that represent approximately 3,000 companies and provide an indication of month-to-month change for the Manufacturing Sector. These reporting units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 92 industry categories, which are combined into 65 publication levels due to the small monthly panel size. The survey methodology assumes that the month-to-month changes of the total operations of the reporting units in the M3 panel effectively represent the month-to-month movements of all establishments that make up the category. The companies for which shipments data are currently reported or imputed in the M3 survey represent approximately 58 percent of the total value of shipments for manufacturing establishments in the 2022 Economic Census, and these companies include roughly 52 percent of the manufacturing companies with \$500 million or more in shipments in the 2022 Economic Census. The companies for which shipments data are currently reported in the M3 survey represent approximately 38 percent of the total value of shipments for manufacturing establishments in the 2022 Economic Census. Statistics based on the M3 panel differ from the results that would be obtained from a complete enumeration of all manufacturing companies. The M3 panel is not based on a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many

sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report. Any revisions made later than two months will be reflected in the annual benchmark publication. Additional survey documentation can be found on our web site:

https://www.census.gov/manufacturing/m3/how_the_data_are_collected/index.html.

Special Notices:

Due to schedule and resource constraints, revised historical data and the seasonal adjustment models for the Manufacturers' Shipments, Inventories, and Orders (M3) Survey will remain unchanged for the remainder of 2026.

Starting with the June 2025 data released on July 25, 2025, the Advance Total Manufacturing publication includes detailed data for all nondurable industries from the Manufacturers' Shipments, Inventories, and Orders Survey. These estimates are available on both a seasonally and not seasonally adjusted basis and are included in the Advance Total Manufacturing Estimates file on the M3 website under the "Latest Monthly Advance report on Manufacturers' Shipments, Inventories and Order", [Monthly Advance Report on Durable Goods Manufacturers' Shipments Inventories and Orders - Press Releases](https://www.census.gov/manufacturing/m3/adv/current/index.html) <https://www.census.gov/manufacturing/m3/adv/current/index.html>.

² Preliminary

¹ Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Estimates and percent changes of shipments for the semiconductor industry are included in computers and electronic products, and all other applicable aggregate totals.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data [Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBRB-FY26-0151].

^p Preliminary

^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Data on unfilled orders are not available for the semiconductor industry. Estimates and percent changes for unfilled orders exclude semiconductor industry data.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see

<<http://www.census.gov/manufacturing/m3/>>.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CDBRB-FY26-0151).

^p Preliminary

^r Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Estimates of inventories for the semiconductor industry data are included in computers and electronic products, and all other applicable aggregate totals.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CDBR-FY26-0151).

^x Not Applicable

^p Preliminary

^f Revised data due to late receipts and concurrent seasonal adjustment.

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² Topical series are regroupings of the separate industry categories.

³ Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers; computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment, appliances, and components; heavy duty trucks; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.

⁴ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment.

⁵ Estimates and percent changes exclude semiconductor industry data.

⁶ Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDR-FY26-0151).

X Not Applicable

^a Preliminary

^b Revised data due to late receipts and concurrent seasonal adjustment.

^c Excludes the following industries with no unfilled orders: Wood products; nonmetallic mineral products; medical equipment and supplies; office supplies; other miscellaneous manufacturing; cutlery and handtools; farm and garden machinery; computer storage and peripheral devices; audio and video equipment; manufacturing and reproducing magnetic and optical media; batteries; automobiles; light trucks and utility vehicles; heavy duty trucks; and miscellaneous furniture.

³ Unfilled orders to shipments ratio excludes semiconductor manufacturing.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY26-0151).

¹ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.

² The current month revisions are the difference between the advance percent change and the percent change as shown in this publication.

³ The twelve month revisions are the differences between the month-to-month percent changes of the preliminary and final estimates. The monthly averages are the simple averages of the absolute values of the differences for the months specified. The advance to final percent change revisions for the durable goods industries are shown in the advance report for the month.

Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see <<http://www.census.gov/manufacturing/m3/>>.
