Products Being Released Today

- Geographical Mobility: 2010 to 2011
 Detailed Tables
- Geographical Mobility Report: 2008 to 2009
- State-to-State Migration Flows: 2010
- Lifetime Mobility in the United States: 2010

Geographical Mobility: 2010 to 2011 Detailed Tables

(Based on 2011 Current Population Survey)

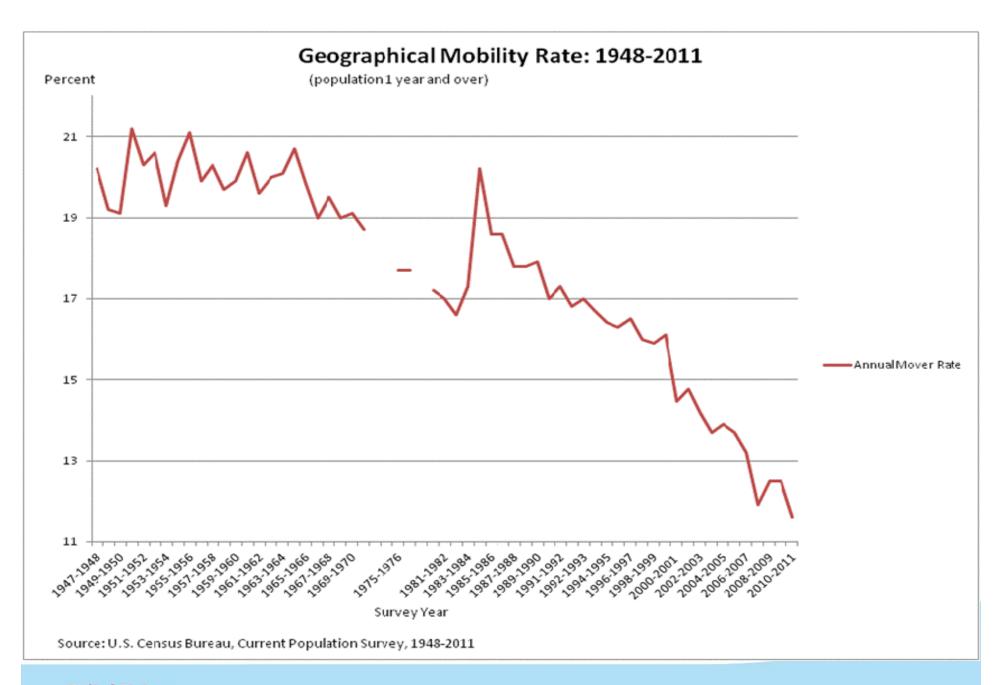

2010-2011 Migration Estimates

(Population 1 year and over)

- Mover rate: 11.6%. Lowest since first collected by CPS in 1948.
- Type of move*
 - Same county: 7.7%.
 - Different county, same state: 2.0%.
 - Different state: 1.6%.
 - From abroad: 0.4%.

^{*} When added, these numbers do not equal the mover rate due to rounding.

Other Results

- Reason for Move
 - Family related: 27.9%
 - Employment related: 18.5%
 - Housing related: 44.9%
 - Other: 8.8%
- Foreclosure/eviction: 1.2%*

^{*}The foreclosure/eviction category is new for 2011. It was created from write-in responses and will be added as a pre-coded response in 2012.

Geographical Mobility Report: 2008 to 2009

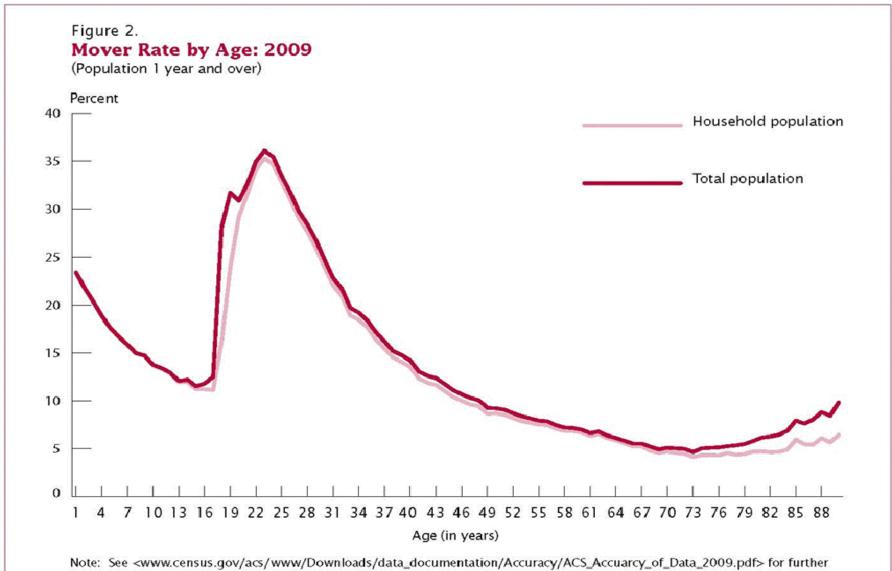

(Based on 2009 Current Population Survey and American Community Survey)

Topics Covered in the Report

- Mover Rate by Age: 2009
- State-to-State Migration: 2006 through 2009
- Reason for Move by Distance of Intercounty Move: 2009

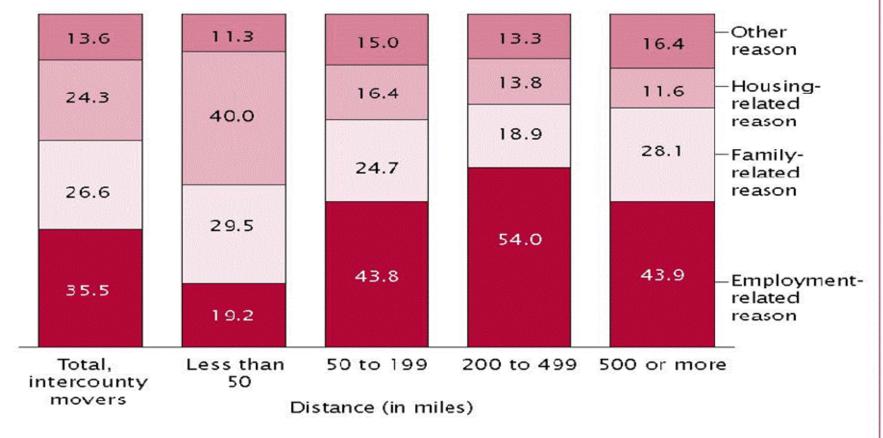

Source: U.S. Census Bureau, American Community Survey, 2009.

Figure 4.

Reason for Move by Distance of Intercounty Move: 2009

(Percent distribution of intercounty movers 1 year and over)

Source: U.S. Census Bureau, Current Population Survey, Annual Social and Economic Supplement, 2009.

State-to-State Migration (Among the largest yearly flows)

2009 1-year ACS data		
California to Texas	61,270	
New York to Florida	53,482	
California to Arizona	46,921	
Florida to Georgia	43,170	
California to Washington	42,693	

2007 1-year ACS data		
California to Texas	78,310	
Florida to Georgia	77,098	
California to Arizona	65,684	
New York to Florida	63,312	
California to Nevada	53,489	

2008 1-year ACS data		
California to Texas	73,174	
New York to Florida	58,145	
California to Arizona	51,253	
Florida to Georgia	50,222	
New York to New Jersey	48,055	

2006 1-year ACS data		
Louisiana to Texas	118,552	
New York to Florida	87,576	
California to Arizona	85,497	
California to Texas	81,572	
Florida to Georgia	75,182	

Source: U.S. Census Bureau, American Community Survey, 1-year estimates, 2006 to 2009.

Because of sampling error, the estimates may not be significantly different from one another or from estimates for other flows.

State-to-State Migration Flows: 2010

(Based on 2010 American Community Survey)

2010 1-Year ACS State-to-State Migration (Among the largest flows)

State-to-State Flow	Estimate	
California to Texas	68,959	
New York to Florida	55,011	
Florida to Georgia	49,901	
California to Arizona	47,164	
New Jersey to Pennsylvania	42,456	

State-to-State Flow	Estimate	
New York to New Jersey	41,374	
California to Washington	39,468	
Texas to California	36,582	
Georgia to Florida	35,615	
California to Nevada	35,472	

Source: U.S. Census Bureau, American Community Survey, 1-year estimates, 2010.

Because of sampling error, the estimates may not be significantly different from one another or from estimates for other flows.

In- and Out- Migration by State (Among the largest flows)

State	Domestic Inmigration
Texas	486,558
Florida	482,889
California	444,749
New York	269,427
North Carolina	263,256

State	Domestic Outmigration
California	573,988
Florida	427,853
Texas	411,641
New York	363,139
Illinois	277,579

Source: U.S. Census Bureau, American Community Survey, 1-year estimates, 2010.

These estimates were first released in September with the 2010 ACS 1-year standard data products on American FactFinder. Because of sampling error, the estimates may not be significantly different from one another or from estimates not shown.

The States of Origin....

Among the largest origin states to Texas in ACS 2010 data

- California 68,959
- Louisiana 31,149
- Florida 26,668
- Oklahoma 22,969
- Illinois 20,169

These estimates have not been previously published for 2010 ACS. Because of sampling error, these estimates may not be significantly different from one another or from estimates for other flows not listed.

And the States of Destination...

Among the largest destination states from California in ACS 2010 data

- Texas 68,959
- Arizona 47,164
- Washington 39,468
- Nevada 35,472
- Oregon 34,190

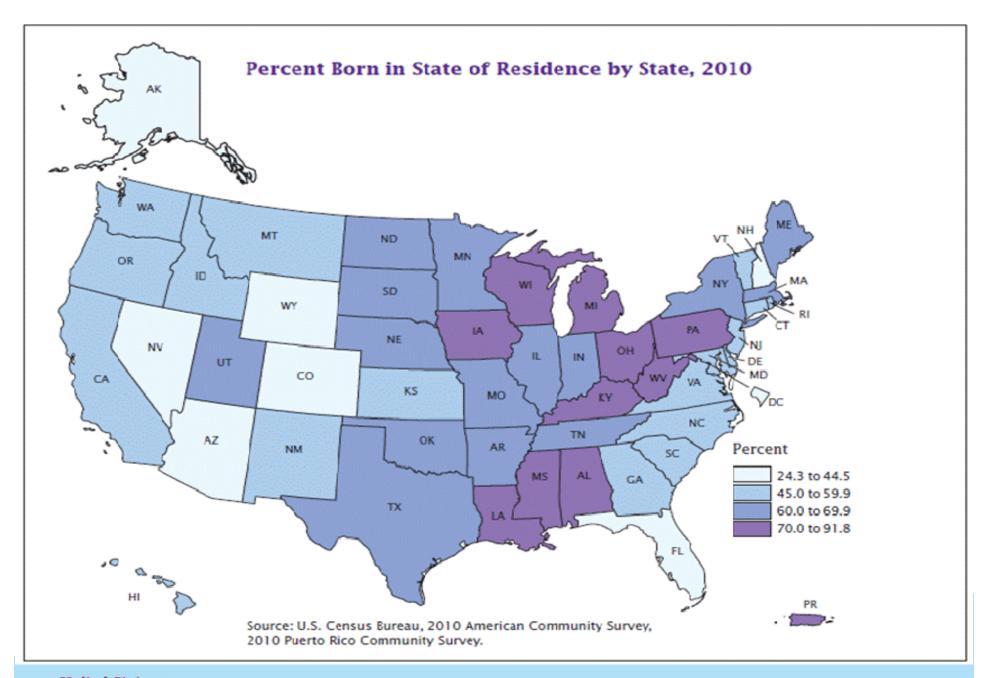

These estimates have not been previously published for 2010 ACS. Because of sampling error, these estimates may not be significantly different from one another or from estimates for other flows not listed.

Lifetime Mobility in the United States: 2010

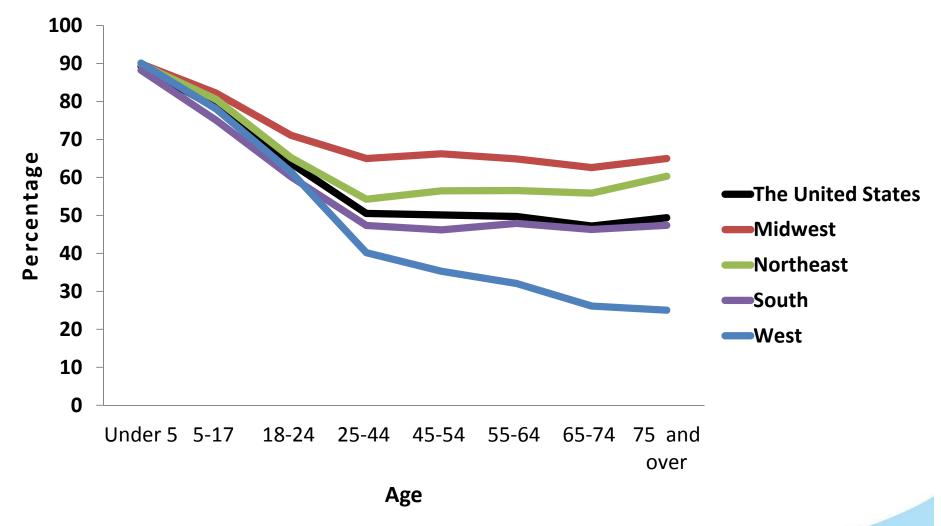

(Based on 2010 American Community Survey)

Percent Born in State of Residence by Age and Region: 2010

Source: U.S. Census Bureau, American Community Survey, 1-year Estimates, 2010.

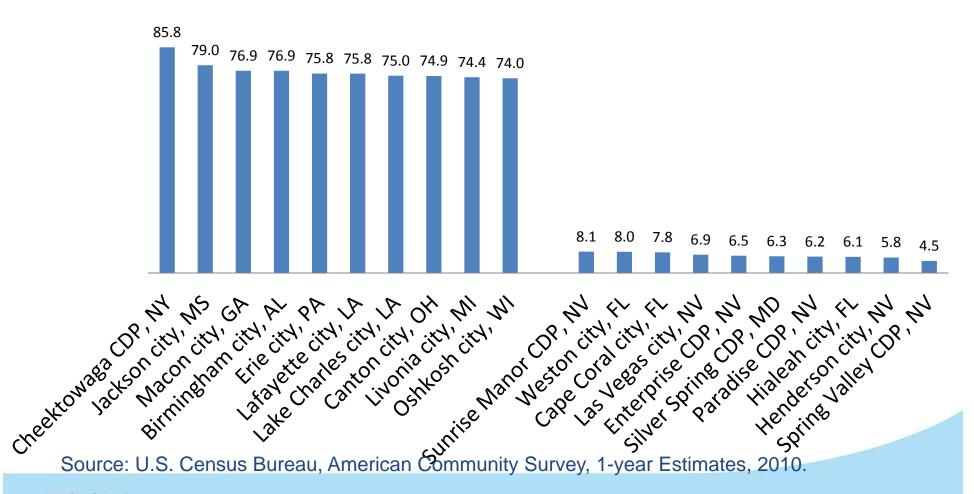

States with the Highest and Lowest Percentage of Residents Born in Current State, 2010

State	Total Population	Percent Born in Current State	MOE (+/-)
Highest Percentage			
Louisiana	4,544,228	78.8	0.4
Michigan	9,877,574	76.6	0.2
Ohio	11,536,182	75.1	0.2
Pennsylvania	12,709,630	74.0	0.2
Wisconsin	5,691,047	72.1	0.3
Lowest Percentage			
Alaska	713,985	39.0	0.9
Arizona	6,413,737	37.7	0.4
District of Columbia	604,453	37.3	0.9
Florida	18,843,326	35.2	0.2
Nevada	2,704,642	24.3	0.5

U.S. Cities with the Highest and Lowest Percentage of the Homegrown Population

Percentage of Population 25 and Older Born in State of Residence

Source and Accuracy

- The migration products being released today are from the American Community Survey and the Current Population Survey's Annual Social and Economic Supplement. Statistics from surveys are subject to sampling and nonsampling error. For more information on the source of the data and accuracy of the estimates, including standard errors and confidence intervals, see Appendix G of the technical documentation at http://www.census.gov/apsd/techdoc/cps/cps-main.html for the CPS and Accuracy of the Data at http://www.census.gov/acs/www/data_documentation/documentation_main/ for the ACS.
- All comparative statements have undergone statistical testing, and, unless otherwise noted, all comparisons are statistically significant at the 10 percent significance level.
