1 This summary is based on the Quarterly Survey of Public Pensions, which consists of a panel of the 100 largest state and local government pension systems, as determined by their total cash and security holdings reported in the 2007 Census of Governments. These 100 systems comprised 89.4 percent of financial activity among such entities, based on the 2007 Census of Governments. Each of the 100 systems represents itself only. These data are not subject to sampling error, but are subject to various nonsampling errors, such as errors of nonresponse and respondent error.
