## ACKNOWLEDGMENTS

This report was prepared in the Manufacturing and Construction Division under the direction of **Mendel D. Gayle**, Assistant Division Chief for Census and Related Programs, who was responsible for the overall planning, management, and coordination. **Arminta N. Quash**, Chief, Census and Related Programs Support Branch, assisted by **Arlanda Allen** and **Ernest Wilson Jr.**, Section Chiefs, **Robert Reinard**, Chief, Consumer Goods Industries Branch, assisted by **Suzanne Conard**, **Susan DiCola**, and **James Hinckley**, Section Chiefs, **Raphael Corrado**, Chief, Investment Goods Industries Branch, assisted by **Chris Blackburn**, **Theresa Crowley**, and **Wanda Sledd**, Section Chiefs, **Nathaniel Shelton**, Chief, Primary Goods Industries Branch, assisted by **Walter Hunter**, **Joanna Nguyen**, and **Athanasios Theodoropoulos**, Section Chiefs, and **Keith Fuller**, **Kenneth Hansen**, **Robert Miller**, and **Robert Rosati**, Special Assistants, performed the planning and implementation. **Larry Blumberg**, **Phillip Brown**, **Brenda Campbell**, **Catherine Cooper**, **Paul Corey**, **Mary Kim Corley**, **Vance Davis**, **Jesse Dawson**, **Kellie Friedrich**, **Vera Harris-Bourne**, **James Day**, **Joe Guido**, **Nancy Higgins**, **Steven Hood**, **Rachael Horwitz**, **Tom Ickes**, **Christina Kane**, **Daphne Kelly**, **Cathy Knudsen**, **Kristen Lauziere**, **Mai Ngan Le**, **Jennifer Lee**, **Robert Lee**, **Jennifer Leotta**, **John Linehan**, **Emily Mayer**, **Keith McKenzie**, **Blynda Metcalf**, **Stanley Montgomery**, **Philippe Morris**, **Madelyn Nieves**, **Betty Pannell**, **Bridgett Parker-Bell**, **Dorothy Parsons**, **Gloria Peebles-Butler**, **Michael Perkinson**, **Lindsay Peters**, **Deanna Pickerall**, **Dana Sklut**, **LaTanya Steele**, **Susan Sundermann**, **Myss Sykes-Stephens**, **Betty Sutter**, **Dora Thomas**, **Ronanne Vinson**, **Keeley Voor**, **Denneth Wallace**, **Hilda Ward**, **Edward Watkins III**, **Barbara Wongus**, and **Kevin Younes**, provided primary staff assistance.

**Arminta N. Quash**, Chief, Census and Related Programs Support Branch, assisted by **Kimberly DePhillip** and **Baruti Taylor**, Section Chiefs, performed overall coordination of the publication process. **Patrick Duck**, **Michael Flaherty**, **Dennis Gosier**, **Taylor C. Murph**, and **Veronica White** provided primary staff assistance.

Mathematical and statistical techniques as well as the coverage operations were provided by **Paul Hsen**, Assistant Division Chief for Research and Methodology Programs, assisted by **Stacey Cole**, Chief, Manufacturing Methodology Branch, and **Robert Struble**, Section Chief, and **Jeffrey Dalzell** and **Cathy Gregor**, who provided primary staff assistance.

**Eddie J. Salyers**, Assistant Division Chief of Economic Planning and Coordination Division, was responsible for overseeing the editing and tabulation procedures and the interactive analytical software. **Dennis Shoemaker** and **Kim Wortman**, Special Assistants, **John D. Ward**, Chief, Analytical Branch, and **Brandy L. Yarbrough**, Chief, Edit Branch, were responsible for developing the systems and procedures for data collection, editing, review, and correction. **Donna L. Hambric**, Chief of the Economic Planning Staff, was responsible for overseeing the systems and information for dissemination. **Douglas J. Miller**, Chief, Tables and Dissemination Branch, assisted by **Lisa Aispuro**, **Jamie Fleming**, **Andrew W. Hait**, **Shawna J. Orzechowski**, and **John Walsh**, was responsible for developing the data dissemination systems and procedures.

The Geography Division staff, **Robert LaMacchia**, Chief, developed geographic coding procedures and associated computer programs.

The Economic Statistical Methods and Programming Division, **Howard R. Hogan**, Chief, developed and coordinated the computer processing systems. **Barry F. Sessamen**, Assistant Division Chief for Post Collection, was responsible for design and implementation of the processing system and computer programs. **Gary T. Sheridan**, Chief, Macro Analytical Branch, assisted by **Apparao V. Katikineni** and **Edward F. Johnson**, provided computer programming and implementation.

The Systems Support Division provided the table composition system. **Robert Joseph Brown**, Table Image Processing System (TIPS) Senior Software Engineer, was responsible for the design and development of the TIPS, under the supervision of **Robert J. Bateman**, Assistant Division Chief, Information Systems.

The staff of the National Processing Center performed mailout preparation and receipt operations, clerical and analytical review activities, and data entry.

**Margaret A. Smith**, **Bernadette J. Beasley**, and **Michael T. Browne** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publication and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **James R. Clark**, Assistant Division Chief, and **Susan L. Rappa**, Chief, Publications Services Branch.

Special acknowledgment is also due the many businesses whose cooperation contributed to the publication of these data.

# Introduction to the Economic Census

---

## **PURPOSES AND USES OF THE ECONOMIC CENSUS**

The economic census is the major source of facts about the structure and functioning of the nation's economy. It provides essential information for government, business, industry, and the general public. Title 13 of the United States Code (Sections 131, 191, and 224) directs the Census Bureau to take the economic census every 5 years, covering years ending in "2" and "7."

The economic census furnishes an important part of the framework for such composite measures as the gross domestic product estimates, input/output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions. Specific uses of economic census data include the following:

- Policymaking agencies of the federal government use the data to monitor economic activity and to assess the effectiveness of policies.
- State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.
- Trade associations study trends in their own and competing industries, which allows them to keep their members informed of market changes.
- Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

## **INDUSTRY CLASSIFICATIONS**

Data from the 2002 Economic Census are published primarily according to the 2002 North American Industry Classification System (NAICS). NAICS was first adopted in the United States, Canada, and Mexico in 1997. The 2002 Economic Census covers the following NAICS sectors:

21	Mining
22	Utilities
23	Construction
31-33	Manufacturing
42	Wholesale Trade
44-45	Retail Trade
48-49	Transportation and Warehousing
51	Information
52	Finance and Insurance
53	Real Estate and Rental and Leasing
54	Professional, Scientific, and Technical Services
55	Management of Companies and Enterprises
56	Administrative and Support and Waste Management and Remediation Services
61	Educational Services
62	Health Care and Social Assistance
71	Arts, Entertainment, and Recreation
72	Accommodation and Food Services
81	Other Services (except Public Administration)

(Not listed above are the Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11), partially covered by the census of agriculture conducted by the U.S. Department of Agriculture, and the Public Administration sector (NAICS 92), largely covered by the census of governments conducted by the Census Bureau.)

The 20 NAICS sectors are subdivided into 100 subsectors (three-digit codes), 317 industry groups (four-digit codes), and, as implemented in the United States, 1,179 industries (six-digit codes).

---

## **RELATIONSHIP TO HISTORICAL INDUSTRY CLASSIFICATIONS**

Prior to the 1997 Economic Census, data were published according to the Standard Industrial Classification (SIC) system. While many of the individual NAICS industries correspond directly to industries as defined under the SIC system, most of the higher level groupings do not. Particular care should be taken in comparing data for retail trade, wholesale trade, and manufacturing, which are sector titles used in both NAICS and SIC, but cover somewhat different groups of industries. The 1997 Economic Census *Bridge Between NAICS and SIC* demonstrates the relationships between NAICS and SIC industries. Where changes are significant, it may not be possible to construct time series that include data for points both before and after 1997.

Most industry classifications remained unchanged between 1997 and 2002, but NAICS 2002 includes substantial revisions within the construction and wholesale trade sectors, and a number of revisions for the retail trade and information sectors. These changes are noted in industry definitions and will be demonstrated in the *Bridge Between NAICS 2002 and NAICS 1997*.

For 2002, data for enterprise support establishments (those functioning primarily to support the activities of their company's operating establishments, such as a warehouse or a research and development laboratory) are included in the industry that reflects their activities (such as warehousing). For 1997, such establishments were termed auxiliaries and were excluded from industry totals.

## **BASIS OF REPORTING**

The economic census is conducted on an establishment basis. A company operating at more than one location is required to file a separate report for each store, factory, shop, or other location. Each establishment is assigned a separate industry classification based on its primary activity and not that of its parent company. (For selected industries, only payroll, employment, and classification are collected for individual establishments, while other data are collected on a consolidated basis.)

## **GEOGRAPHIC AREA CODING**

Accurate and complete information on the physical location of each establishment is required to tabulate the census data for states, metropolitan and micropolitan statistical areas, counties, and corporate municipalities (places) including cities, towns, townships, villages, and boroughs. Respondents were required to report their physical location (street address, municipality, county, and state) if it differed from their mailing address. For establishments not surveyed by mail (and those single-establishment companies that did not provide acceptable information on physical location), location information from administrative sources is used as a basis for coding.

## **AVAILABILITY OF ADDITIONAL DATA**

All results of the 2002 Economic Census are available on the Census Bureau Internet site ([www.census.gov](http://www.census.gov)) and on digital versatile discs (DVD-ROMs) for sale by the Census Bureau. The American FactFinder system at the Internet site allows selective retrieval and downloading of the data. For more information, including a description of reports being issued, see the Internet site, write to the U.S. Census Bureau, Washington, DC 20233-6100, or call Customer Services at 301-763-4100.

## **HISTORICAL INFORMATION**

The economic census has been taken as an integrated program at 5-year intervals since 1967 and before that for 1954, 1958, and 1963. Prior to that time, individual components of the economic census were taken separately at varying intervals.

The economic census traces its beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for the 1840 Decennial Census and subsequent censuses to include mining and some commercial activities. The 1905 Manufactures Census was the first time a census was taken apart

---

from the regular decennial population census. Censuses covering retail and wholesale trade and construction industries were added in 1930, as were some service trades in 1933. Censuses of construction, manufacturing, and the other business censuses were suspended during World War II.

The 1954 Economic Census was the first census to be fully integrated, providing comparable census data across economic sectors and using consistent time periods, concepts, definitions, classifications, and reporting units. It was the first census to be taken by mail, using lists of firms provided by the administrative records of other federal agencies. Since 1963, administrative records also have been used to provide basic statistics for very small firms, reducing or eliminating the need to send them census report forms.

The range of industries covered in the economic census expanded between 1967 and 2002. The census of construction industries began on a regular basis in 1967, and the scope of service industries, introduced in 1933, was broadened in 1967, 1977, and 1987. While a few transportation industries were covered as early as 1963, it was not until 1992 that the census broadened to include all of transportation, communications, and utilities. Also new for 1992 was coverage of financial, insurance, and real estate industries. With these additions, the economic census and the separate census of governments and census of agriculture collectively covered roughly 98 percent of all economic activity. New for 2002 is coverage of four industries classified in the agriculture, forestry, and fishing sector under the SIC system: landscape architectural services, landscaping services, veterinary services, and pet care services.

Printed statistical reports from the 1992 and earlier censuses provide historical figures for the study of long-term time series and are available in some large libraries. Reports for 1997 were published primarily on the Internet and copies of 1992 reports are also available there. CD-ROMs issued from the 1987, 1992, and 1997 Economic Censuses contain databases that include all or nearly all data published in print, plus additional statistics, such as ZIP Code statistics, published only on CD-ROM.

#### **SOURCES FOR MORE INFORMATION**

More information about the scope, coverage, classification system, data items, and publications for the 2002 Economic Census and related surveys is published in the *Guide to the 2002 Economic Census* at [www.census.gov/econ/census02/guide](http://www.census.gov/econ/census02/guide). More information on the methodology, procedures, and history of the census will be published in the *History of the 2002 Economic Census* at [www.census.gov/econ/www/history.html](http://www.census.gov/econ/www/history.html).

# Manufacturing

---

## SCOPE

The Manufacturing sector (sector 31-33) comprises establishments engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products. The assembling of component parts of manufactured products is considered manufacturing, except in cases where the activity is appropriately classified in Sector 23, Construction.

Establishments in the manufacturing sector are often described as plants, factories, or mills and characteristically use power-driven machines and materials-handling equipment. However, establishments that transform materials or substances into new products by hand or in the worker's home and those engaged in selling to the general public products made on the same premises from which they are sold, such as bakeries, candy stores, and custom tailors, may also be included in this sector. Manufacturing establishments may process materials or may contract with other establishments to process their materials for them. Both types of establishments are included in manufacturing.

The materials, substances, or components transformed by manufacturing establishments are raw materials that are products of agriculture, forestry, fishing, mining, or quarrying, as well as products of other manufacturing establishments. The materials used may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another, under the same ownership. The new product of a manufacturing establishment may be finished in the sense that it is ready for utilization or consumption, or it may be semifinished to become an input for an establishment engaged in further manufacturing. For example, the product of the alumina refinery is the input used in the primary production of aluminum; primary aluminum is the input to an aluminum wire drawing plant; and aluminum wire is the input for a fabricated wire product manufacturing establishment.

The subsectors in the manufacturing sector generally reflect distinct production processes related to material inputs, production equipment, and employee skills. In the machinery area, where assembling is a key activity, parts and accessories for manufactured products are classified in the industry of the finished manufactured item when they are made for separate sale. For example, a replacement refrigerator door would be classified with refrigerators and an attachment for a piece of metal working machinery would be classified with metal working machinery. However, components, input from other manufacturing establishments, are classified based on the production function of the component manufacturer. For example, electronic components are classified in Subsector 334, Computer and Electronic Product Manufacturing; and stampings are classified in Subsector 332, Fabricated Metal Product Manufacturing.

Manufacturing establishments often perform one or more activities that are classified outside the manufacturing sector of NAICS. For instance, almost all manufacturing has some captive research and development or administrative operations, such as accounting, payroll, or management. These captive services are treated the same as captive manufacturing activities. When the services are provided by separate establishments, they are classified to the NAICS sector where such services are primary, not in manufacturing.

The boundaries of manufacturing and the other sectors of the classification system can be somewhat blurry. The establishments in the manufacturing sector are engaged in the transformation of materials into new products. Their output is a new product. However, the definition of what constitutes a new product can be somewhat subjective. As clarification, the following activities are

---

considered manufacturing in NAICS: milk bottling and pasteurizing; water bottling and processing; fresh fish packaging (oyster shucking, fish filleting); apparel jobbing (assigning of materials to contract factories or shops for fabrication or other contract operations); as well as contracting on materials owned by others; printing and related activities; ready-mixed concrete production; leather converting; grinding of lenses to prescription; wood preserving; electroplating, plating, metal heat treating, and polishing for the trade; lapidary work for the trade; fabricating signs and advertising displays; rebuilding or remanufacturing machinery (i.e., automotive parts); ship repair and renovation; machine shops; and tire retreading.

**Exclusions.** There are activities that are sometimes considered manufacturing, but for NAICS are classified in another sector. These activities include logging, classified in Sector 11, Agriculture, Forestry, Fishing and Hunting is considered a harvesting operation; the beneficiating of ores and other minerals, classified in Sector 21, Mining, is considered part of the activity of mining; the construction of structures and fabricating operations performed at the site of construction by contractors, is classified in Sector 23, Construction; establishments engaged in breaking of bulk and redistribution in smaller lots, including packaging, repackaging, or bottling products, such as liquors or chemicals; the customized assembly of computers; sorting of scrap; mixing paints to customer order; and cutting metals to customer order, classified in Sector 42, Wholesale Trade or Sector 44-45, Retail Trade, produce a modified version of the same product, not a new product; and publishing and the combined activity of publishing and printing, classified in Sector 51, Information, perform the transformation of information into a product where as the value of the product to the consumer lies in the information content, not in the format in which it is distributed (i.e., the book or software diskette).

The tabulations for this sector do not include central administrative offices, warehouses, or other establishments that serve manufacturing establishments within the same organization. Data for such establishments are classified according to the nature of the service they provide. For example, separate headquarters establishments are reported in NAICS Sector 55, Management of Companies and Enterprises.

The reports described below exclude establishments of firms with no paid employees. These “nonemployers,” typically self-employed individuals or partnerships operating businesses that they have not chosen to incorporate, are reported separately in Nonemployer Statistics. The contribution of nonemployers, relatively small for this sector, may be examined at [www.census.gov/nonemployerimpact](http://www.census.gov/nonemployerimpact).

The reports described below cover all manufacturing establishments with one or more paid employees.

**Definitions.** Industry categories are defined in Appendix B, NAICS Codes, Titles, and Descriptions. Other terms are defined in Appendix A, Explanation of Terms.

## REPORTS

The following reports provide statistics on this sector:

**Industry Series.** There are 473 reports, each covering a single NAICS industry (six-digit code). These reports include such statistics as number of establishments, employment, payroll, value added by manufacture, cost of materials consumed, value of shipments, capital expenditures, etc. The industry reports also include data for states with 100 employees or more in the industry. The data in industry reports are preliminary and subject to change in the following reports.

**Geographic Area Series.** There are 51 separate reports, one for each state and the District of Columbia. Each state report presents similar statistics at the “all manufacturing” level for each state and its metropolitan and micropolitan areas with 250 employees or more, and for counties, consolidated cities, and places with 500 employees or more. The state reports also include six-digit NAICS level data for industries with 100 employees or more in the state.

### Subject Series:

x Manufacturing

2002 Economic Census

- **Industry-Product Analysis Summary.** This report presents value of shipments, value of product shipments, percentage of product shipments of the total value of shipments, and percentage of distribution of value of product shipments on the NAICS six-digit industry level and by the six- and seven-digit product code levels. It also includes miscellaneous receipts at the six- and seven-digit product code levels by NAICS six-digit industry levels.
- **General Summary.** This report contains industry and geographic area statistics summarized in one report. It includes higher levels of aggregation than the industry and state reports, as well as revisions to the data made after the release of the industry and state reports.
- **Product Summary.** This report summarizes the products data published in the industry reports. This report also includes a table with data for products that are primary to more than one industry, which are not in the industry reports.
- **Materials Summary.** This report summarizes the materials data published in the industry reports.
- **Concentration Ratio Summary.** This report publishes data on the percentage of value of shipments and value added accounted for by the 4-, 8-, 20-, and 50-largest companies for each manufacturing industry. Also shown in this report are Herfindahl-Herschmann indexes for each industry.
- **Location of Manufacturing Plants Summary.** This report contains statistics on the number of establishments for the three- and six-digit NAICS industry by state, county, place, and ZIP Code by employment-size of the establishment.

**ZIP Code Statistics.** This report contains statistics on the number of establishments for the three- and six-digit NAICS industry by employment size of the establishment by ZIP Code.

**Other reports.** Data for this sector are also included in reports with multisector coverage, including Nonemployer Statistics, Comparative Statistics, Bridge Between 2002 NAICS and 1997 NAICS, Business Expenses, and the Survey of Business Owners reports.

## GEOGRAPHIC AREAS COVERED

The level of geographic detail varies by report. Maps are available at [www.census.gov/econ2002maps](http://www.census.gov/econ2002maps). Notes specific to areas in the state are included in Appendix D, Geographic Notes.

1. The United States as a whole.
2. States and the District of Columbia.
3. Metropolitan and micropolitan statistical areas with 250 employees or more. A core based statistical areas (CBSA) contains a core area with a substantial population nucleus, together with adjacent communities having a high degree of social and economic integration with that core. CBSAs are differentiated into metropolitan and micropolitan statistical areas based on size criteria. Both metropolitan and micropolitan areas are defined in terms of entire counties, and are listed in Appendix E, Metropolitan and Micropolitan Statistical Areas.
  - a. Metropolitan Statistical Areas (metro areas). Metro areas have at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.
  - b. Micropolitan Statistical Areas (micro areas). Micro areas have at least one urban cluster of at least 10,000 but less than 50,000 population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.
  - c. Metropolitan Divisions (metro divisions). If specified criteria are met, a metro area containing a single core with a population of 2.5 million or more may be subdivided to form smaller groupings of counties referred to as Metropolitan Divisions.

- 
- d. Combined Statistical Areas (combined areas). If specified criteria are met, adjacent metro and micro areas, in various combinations, may become the components of a new set of areas called Combined Statistical Areas. The areas that combine retain their own designations as metro or micro areas within the larger combined area.
4. Counties and county equivalents defined as of January 1, 2002, with 500 employees or more. Counties are the primary divisions of states, except in Louisiana where they are called parishes and in Alaska where they are called boroughs, census areas, and city and boroughs. Maryland, Missouri, Nevada, and Virginia have one place or more that is independent of any county organization and constitutes primary divisions of their states. These places are treated as counties and as places.
  5. Economic places with 500 employees or more.
    - a. Municipalities of 2,500 inhabitants or more defined as of January 1, 2002. These are areas of significant population incorporated as cities, boroughs, villages, or towns according to the 2000 Census of Population. For the economic census, boroughs and census areas in Alaska and boroughs in New York are not included in this category.
    - b. Consolidated cities defined as of January 1, 2002. Consolidated cities are consolidated governments that consist of separately incorporated municipalities.
    - c. Townships in Michigan, New Jersey, and Pennsylvania, and towns in New York, Wisconsin, and the six New England states with 10,000 inhabitants or more (according to the 2000 Census of Population).
    - d. Balance of county. Areas outside the entities listed above, including incorporated municipalities with populations of fewer than 2,500, town and townships not qualifying as noted above, and the remainders of counties outside places are categorized as "Balance of county."

## **DOLLAR VALUES**

All dollar values presented are expressed in current dollars; i.e., 2002 data are expressed in 2002 dollars, and 1997 data, in 1997 dollars. Consequently, when making comparisons with prior years, users of the data should consider the changes in prices that have occurred.

All dollar values are shown in thousands of dollars.

## **COMPARABILITY OF THE 1997 AND 2002 ECONOMIC CENSUSES**

Both the 2002 Economic Census and the 1997 Economic Census present data based on the North American Industry Classification System (NAICS). While there were revisions to selected industries for 2002, this sector is not affected by those revisions.

For 2002, there has been an additional data table and an additional report added, which did not exist in 1997. The table for 2002 shows data for products primary to more than one industry. The report for 2002 is the **Industry-Product Analysis Summary**.

## **RELIABILITY OF DATA**

All data compiled for this sector are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, processing, and estimation for missing or misreported data. Selected data in tables titled "Detailed Statistics" are based on the Annual Survey of Manufactures and are subject to sampling errors as well as nonsampling errors.

No direct measurement of these effects has been obtained except for estimation for missing or misreported data, as by the percentages shown in the tables. Precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors. More information on the reliability of the data is included in Appendix C, Methodology.

---

## DISCLOSURE

In accordance with federal law governing census reports (Title 13 of the United States Code), no data are published that would disclose the operations of an individual establishment or company. However, the number of establishments in a specific industry or geographic area is not considered a disclosure; therefore, this information may be released even though other information is withheld. Techniques employed to limit disclosure are discussed at [www.census.gov/epcd/ec02/disclosure.htm](http://www.census.gov/epcd/ec02/disclosure.htm).

The disclosure analysis for "industry statistics" files is based on the total value of shipments. When the total value of shipments cannot be shown without disclosing information for individual companies, the complete line is suppressed except for capital expenditures. Nonetheless, the suppressed data are included in higher-level totals. A separate disclosure analysis is performed for capital expenditures, which can be suppressed even though value of shipments data are published.

## AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

The Census Bureau conducts the Annual Survey of Manufactures (ASM) in each of the 4 years between the economic censuses. The ASM is a probability-based sample of approximately 55,000 establishments and collects many of the same industry statistics (including employment, payroll, value of shipments, etc.) as the economic census. However, there are selected statistics not included in the ASM. Among these are the number of companies and establishments, detailed product and materials data, and substate geographic data. In addition to the ASM, the Census Bureau conducts the Current Industrial Reports (CIR) program. The CIR program publishes selected detailed product statistics for selected manufacturing industries at the U.S. level annually and, in some cases, monthly and/or quarterly. The Census Bureau also conducts the monthly Manufacturers' Shipments, Inventories, and Orders (M3) Program, which publishes detailed statistics for manufacturing industries at the U.S. level.

In addition, the County Business Patterns program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county, and Statistics of U.S. Businesses provides annual statistics classified by the employment size of the enterprise, further classified by industry for the United States, and by broader categories for states and metropolitan areas.

## CONTACTS FOR DATA USERS

Questions about these data may be directed to the U.S. Census Bureau, Manufacturing & Construction Division, Information Services Center, 301-763-4673 or [ask.census.gov](http://ask.census.gov).

## ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used with these data:

A	Standard error of 100 percent or more
D	Withheld to avoid disclosing data of individual companies; data are included in higher level totals
F	Exceeds 100 percent because data include establishments with payroll exceeding revenue
N	Not available or not comparable
S	Withheld because estimates did not meet publication standards
X	Not applicable
Z	Less than half the unit shown
a	0 to 19 employees
b	20 to 99 employees
c	100 to 249 employees
e	250 to 499 employees
f	500 to 999 employees
g	1,000 to 2,499 employees
h	2,500 to 4,999 employees
i	5,000 to 9,999 employees
j	10,000 to 24,999 employees
k	25,000 to 49,999 employees

---

l	50,000 to 99,999 employees
m	100,000 employees or more
p	10 to 19 percent estimated
q	20 to 29 percent estimated
r	Revised
s	Sampling error exceeds 40 percent
nsk	Not specified by kind
-	Represents zero (page image/print only)
(CC)	Consolidated city
(IC)	Independent city

**Table 1. Products Statistics: 2002 and 1997**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments		
				Quantity	Value (\$1,000)	
311313	Beet sugar manufacturing . . . . .	2002 . . . . . 1997 . . . . .	N N	X X	X X	2 219 221 2 619 463

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
313113	Thread mills—Con.				
3131130	Thread mills—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
324121	Asphalt paving mixture and block manufacturing—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
325191	Gum and wood chemical manufacturing—Con.				
3251910	Gum and wood chemicals, including wood distillation products—Con.				
32519102	Other gum and wood chemicals, incl. softwood distill. prod., gum naval stores, nat. tanning, tannic acid, nat. acetic acid, methanol, softwood charcoal, veg. pitches, wood tar and tar oil, etc. ....	2002.. N 1997.. N	X X	X X	357 391 310 066
3251910231	Refined tall oil (containing less than 90 percent free fatty acids, including tall oil resins, other than tall oil rosin) . . . . . mil lb.	2002.. 4 1997.. 9	X X	D 523.4	D 50 661
3251910241	Rosin and other tall oil derivatives, including rosin acid salts (excluding tall oil fatty acids) . . . . .	2002.. 1 1997.. 3	X X	X X	D 20 338
3251910291	Other gum and wood chems, incl. gum naval stores, nat. tanning and dyeing materials, tannic acid, nat. acetic acid, methanol, softwood charcoal, veg. pitches, wood tar and tar oil, pine oil, etc. ....	2002.. 14 1997.. 14	X X	X X	204 443 239 067

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
325411	Medicinal and botanical manufacturing—Con.				
3254114	Medicinals and botanicals, all other medicinal chemicals and botanical products, in bulk—Con.				
32541141	Botanical drugs, alkaloids drugs, other botanical drugs, naturally occurring vitamins, drugs of animal origin, and artificial mixtures of two or more medical or botanical substances—Con.				
3254114121	Other botanical drugs, including glycosides and ginseng extract .....	2002.. 22	X	X	392 753
		1997.. 21	X	X	292 608

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
325998	All other miscellaneous chemical product and preparation manufacturing—Con.				
325998J	All other chemical preparations, including essential oils and water-treating compounds—Con.				
325998J1	All other chemical preparations, including essential oils and water-treating compounds—Con.				
325998J101	Citrus fruit essential oils, including orange, lemon, and lime . . . . . mil lb. . . . .	2002 . . . . . 17 1997 . . . . . N	X X	S N	170 627 N
325998J103	Other essential oils, including spearmint, peppermint, cedar wood, clove, and nutmeg oils . . . . . mil lb. . . . .	2002 . . . . . 13 1997 . . . . . N	X X	S N	235 582 N
325998J106	Fireworks . . . . .	2002 . . . . . 9 1997 . . . . . N	X X	X X	D N
325998J107	Pyrotechnics, including flares, jet fuel igniters, railroad torpedoes, toy pistol caps, etc. . . . .	2002 . . . . . 10 1997 . . . . . N	X X	X X	132 644 N
325998J109	Rubber processing preparations, including red lead and 2-mercaptoimidazole rubber accelerator composition . . . . . mil lb. . . . .	2002 . . . . . 9 1997 . . . . . N	X X	S N	130 969 N
325998J111	Concrete curing and floor hardening materials . . . . .	2002 . . . . . 31 1997 . . . . . N	X X	X X	349 572 N
325998J121	Drilling mud materials; mud thinners, thickeners, and purifiers . . . . . mil lb. . . . .	2002 . . . . . 21 1997 . . . . . N	X X	478.7 N	309 415 N
325998J131	Chemical foundry supplies, including binders, core oils, core wash, etc. . . . .	2002 . . . . . 13 1997 . . . . . N	X X	X X	427 142 N
325998J141	Household tints and dyes . . . . . mil lb. . . . .	2002 . . . . . 1 1997 . . . . . N	X X	D N	D N
325998J151	Metal-treating compounds (nonoil-base) for nitriding, pickling, drawing, and cutting . . . . .	2002 . . . . . 19 1997 . . . . . N	X X	X X	207 414 N

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
326299	All other rubber product manufacturing—Con.				
3262991	Rubber sponge, expanded and foam rubber products—Con.				
32629911	Latex foam products—Con.				
3262991125	Other latex foam products (including clothing, insulation and padding, hospital padding, and topper pads) .....	2002.. 25	X	X	101 049
		1997.. 29	X	X	D

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments		
				Quantity	Value (\$1,000)	
327991	Cut stone and stone product manufacturing—Con.					
		1997..	N	X	X	1 198 713
3279911	Dressed dimension granite (including gneiss, syenite, diorite, and cut granite) .....	2002..	N	X	X	863 456
		1997..	N	X	X	539 053
32799111	Monumental stone, dressed dimension granite (including gneiss, syenite, diorite, and cut granite) .....	2002..	N	X	X	268 527
		1997..	N	X	X	232 563
3279911111	Monumental stone, dressed dimension granite (including gneiss, syenite, diorite, and cut granite) .....	2002..	94	X	X	268 527
		1997..	103	X	X	232 563
32799112	Building stone and other dressed dimension granite products, excluding monumental stone .....	2002..	N	X	X	498 450
		1997..	N	X	X	289 845
3279911211	Building stone, dressed dimension granite (including gneiss, syenite, diorite, and cut granite) .....	2002..	113	X	X	246 106
		1997..	66	X	X	147 436
3279911221	Other granite products, including paving blocks and curbing, dressed dimension granite (including gneiss, syenite, diorite, and cut granite) .....	2002..	94	X	X	252 344
		1997..	60	X	X	142 409
3279911Y	Dressed dimension granite (including gneiss, syenite, diorite, and cut granite), nsk .....	2002..	N	X	X	96 479
		1997..	N	X	X	16 645
3279911YWV	Dressed dimension granite (including gneiss, syenite, diorite, and cut granite), nsk .....	2002..	N	X	X	96 479
		1997..	N	X	X	16 645
3279914	Dressed dimension limestone (including dolomite, travertine, calcareous, tufa, and cut limestone) .....	2002..	N	X	X	282 021
		1997..	N	X	X	179 853
32799141	Dressed dimension limestone (including dolomite, travertine, calcareous, tufa, and cut limestone) .....	2002..	N	X	X	234 943
		1997..	N	X	X	156 082
3279914111	Building stone, dressed dimension limestone (including dolomite, travertine, calcareous, tufa, and cut limestone) .....	2002..	69	X	X	184 192
		1997..	58	X	X	107 457
3279914121	Other limestone products, including flagging, dressed dimension limestone (including dolomite, travertine, calcareous, tufa, and cut limestone) .....	2002..	15	X	X	50 751
		1997..	19	X	X	48 625
3279914Y	Dressed dimension limestone (including dolomite, travertine, calcareous, tufa, and cut limestone), nsk .....	2002..	N	X	X	47 078
		1997..	N	X	X	23 771

		1997..	N	X	N	N
3279920621	Other exfoliated vermiculite (including loose fill insulation, acoustical, etc.) .....	mil cu ft..2002..	5	X	S	14 428

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
327992	Ground or treated mineral and earth manufacturing—Con.				
3279920	Treated minerals and earths—Con.				
32799206	Other minerals or earths, treated—Con.				
3279920621	Other exfoliated vermiculite (including loose fill insulation, acoustical, etc.)—Con.	1997..	N	X	N
3279920630	Refractory magnesia (including dead-burned magnesia or magnesite) <sup>22</sup> .....	2002..	15	X	X
		1997..	N	X	N
3279920653	Graphite, refined or blended .....	1,000 s tons. 2002..	4	X	8 495
		1997..	N	X	N
3279920667	Other treated minerals and earths (including feldspar, mica, roofing, granules, etc.) (includes heat treated, chemical treated, and other manufacturing processes) .....	2002..	34	X	X
		1997..	N	X	N
3279920Y	Treated minerals and earths, nsk, total .....	2002..	N	X	X
		1997..	N	X	X
3279920YWW	Treated minerals and earths, nsk, for nonadministrative-record establishments .....	2002..	N	X	X
		1997..	N	X	X
3279920YWY	Treated minerals and earths, nsk, for administrative-record establishments .....	2002..	N	X	X
		1997..	N	X	X
327993	Mineral wool manufacturing .....	2002..	N	X	X
		1997..	N	X	X
3279931	Mineral wool for thermal and acoustical envelope insulation (for homes and commercial, and industrial buildings) .....	2002..	N	X	X
		1997..	N	X	X
32799311	Loose fiber (blowing and pouring) (shipped as such) and granulated fiber, mineral wool for thermal and acoustical envelope insulation (for insulating homes and commercial and industrial buildings) .....	2002..	N	X	X
		1997..	N	X	X
3279931111	Loose fiber (blowing and pouring) (shipped as such) and granulated fiber, mineral wool for thermal and acoustical envelope insulation (for insulating homes and commercial and industrial buildings) .....	2002..	13	X	X
		1997..	15	X	X
32799312	Building batts, blankets, and rolls (in thermal resistance (R) values) R19 or more, mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	N	X	X
		1997..	N	X	X
3279931211	Building batts, blankets, and rolls (in thermal resistance (R) values) R19 or more, mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	12	X	X
		1997..	8	X	X
32799313	Building batts, blankets, and rolls (in thermal resistance (R) values) less than R19, mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	N	X	X
		1997..	N	X	X
3279931311	Building batts, blankets, and rolls (in thermal resistance (R) values) R11 to R18.9, mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	10	X	X
		1997..	12	X	X
3279931321	Building batts, blankets, and rolls (in thermal resistance (R) values) R10.9 or less, mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	10	X	X
		1997..	11	X	X
32799314	Acoustical, such as wall and ceiling (sold as acoustical insulation), mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	N	X	X
		1997..	N	X	X
3279931411	Acoustical, such as wall and ceiling (sold as acoustical insulation), mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	22	X	X
		1997..	20	X	X
32799315	Board (including roof insulation) and other mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	N	X	X
		1997..	N	X	X
3279931511	Board (such as roof insulation), mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	9	X	X
		1997..	8	X	X
3279931521	Other mineral wool for thermal and acoustical envelope insulation (for homes and commercial and industrial buildings) .....	2002..	16	X	X
		1997..	17	X	X
3279931Y	Mineral wool for thermal and acoustical envelope insulation (for homes and commercial, and industrial buildings), nsk .....	2002..	N	X	X
		1997..	N	X	X
3279931YWV	Mineral wool for thermal and acoustical envelope insulation (for homes and commercial, and industrial buildings), nsk .....	2002..	N	X	X
		1997..	N	X	X
3279934	Mineral wool for industrial, equipment, and appliance insulation .....	2002..	N	X	X
		1997..	N	X	X
32799341	Blankets (flexible) (including fabricated pieces, rolls, and batts) .....	2002..	N	X	X
		1997..	N	X	X

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
332116	Metal stamping—Con.				
3321166	Stamped and pressed metal end products, including vitreous (porcelain) enameled products—Con.				
33211663	Metal electronic enclosures (stamped and pressed), excluding computer stampings—Con.				
3321166361	Metal electronic enclosures (stamped and pressed), excluding computer stampings—Con.				
33211661	Stamped and pressed vitreous (porcelain) enameled metal architectural parts (exterior and interior), including store front and curtain wall components	1997.. N	X	X	N

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
332510	Hardware manufacturing—Con.				
3325104	Builders' hardware—Con.				
33251043	Architectural trim and other miscellaneous closet hardware—Con.				
3325104341	Key blanks—Con.				
3325104346	Exit devices (including fire exit hardware) .....	1997.. N 2002.. 12 1997.. N	X X X	X X X	N 381 258 N
3325104336	All other miscellaneous architectural trim (sold separately) (including protection plates, push plates, pulls, push-pull bars, lock trim, etc.) .....	2002.. 24 1997.. N	X X	X X	128 150 N
3325104363	Surface applied door controls, closers, and checking devices .....	2002.. 16 1997.. N	X X	X X	265 517 N
3325104365	Concealed (overhead, in the door, on the floor) door controls, closers, and checking devices .....	2002.. 7 1997.. N	X X	X X	25 045 N
3325104367	Electromechanical-pneumatic door controls, closers, and checking devices (with hold-open mechanism released by integral or remote smoke detector) .....	2002.. 6 1997.. N	X X	X X	28 180 N
3325104361	Miscellaneous closet hardware (including shelving other than wire and decorative shelving) .....	2002.. 12 1997.. N	X X	X X	47 168 N
33251044	Screen and storm door hardware (including pneumatic and hydraulic closers and window locks) .....	2002.. N 1997.. N	X X	X X	410 435 N
3325104451	Screen and storm door hardware (including pneumatic and hydraulic closers) .....	2002.. 5 1997.. N	X X	X X	D N
3325104456	Window hardware (including window locks) .....	2002.. 33 1997.. N	X X	X X	D N
33251045	Hinges and cabinet hardware .....	2002.. N 1997.. N	X X	X X	678 464 N
3325104569	Butt hinges, including spring hinges (excluding cabinet hinges), 3 1/2 in. by 3 1/2 in. or less .....	2002.. 18 1997.. N	X X	X X	41 669 N
3325104571	Butt hinges, including spring hinges (excluding cabinet hinges), more than 3 1/2 in. by 3 1/2 in., either dimension .....	2002.. 19 1997.. N	X X	X X	157 510 N
3325104573	Other hinges, including spring hinges (excluding cabinet hinges) .....	2002.. 21 1997.. N	X X	X X	74 165 N
3325104575	Cabinet hinges .....	2002.. 12 1997.. N	X X	X X	39 871 N
3325104579	Cabinet locks .....	2002.. 10 1997.. N	X X	X X	31 250 N
3325104581	Cabinet knobs, pulls, and catches .....	2002.. 15 1997.. N	X X	X X	88 618 N
3325104583	Other cabinet hardware (including drawer slides, etc.) .....	2002.. 20 1997.. N	X X	X X	245 381 N
33251046	Other builders' hardware .....	2002.. N 1997.. N	X X	X X	777 631 N
3325104685	Hangers, tracks, and related builders' hardware items (except sliding and folding door hardware), residential and commercial .....	2002.. 38 1997.. N	X X	X X	302 974 N
3325104687	Sliding and folding door hardware, residential and commercial .....	2002.. 24 1997.. N	X X	X X	107 674 N
3325104689	Door holders and stops (overhead, surface, and concealed), floor and wall mounted .....	2002.. 17 1997.. N	X X	X X	44 203 N
3325104691	Rim locks and all other locking devices .....	2002.. 14 1997.. N	X X	X X	30 540 N
3325104699	Other builders' hardware .....	2002.. 54 1997.. N	X X	X X	292 240 N
33251047	Padlocks and locksets .....	2002.. N 1997.. N	X X	X X	1 121 977 N
3325104701	Pin tumbler padlocks .....	2002.. 7 1997.. N	X X	X X	183 904 N
3325104711	All other padlocks .....	2002.. 12 1997.. N	X X	X X	64 900 N
3325104721	Mortised doorlocks, locksets, and lock trim (except mortised deadlocks) .....	2002.. 12 1997.. N	X X	X X	120 637 N
3325104726	Tubular and mortised deadlocks .....	2002.. 12 1997.. N	X X	X X	159 278 N
3325104728	Fabricated metal safe and vault locks .....	2002.. 6 1997.. N	X X	X X	97 449 N
3325104731	Electronically or electrically operated doorlocks, locksets, and lock trim .....	2002.. 15 1997.. N	X X	X X	179 086 N
3325104733	All other doorlocks, locksets, and lock trim types .....	2002.. 19 1997.. N	X X	X X	316 723 N
3325104Y	Builders' hardware, nsk .....	2002.. N 1997.. N	X X	X X	13 623 N
3325104YVV	Builders' hardware, nsk .....	2002.. N 1997.. N	X X	X X	13 623 N
3325106	Motor vehicle hardware (lock units, door and window handles, window regulators, hinges, license plate brackets, etc.) .....	2002.. N 1997.. N	X X	X X	2 628 099 N
33251061	Motor vehicle hardware (lock units, door and window handles, window regulators, hinges, license plate brackets, etc.) .....	2002.. N 1997.. N	X X	X X	2 628 099 N
3325106100	Motor vehicle hardware (lock units, door and window handles, window regulators, hinges, license plate brackets, etc.) .....	2002.. 57	X	X	2 628 099

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
332812	Metal coating, engraving (except jewelry and silverware), and allied services to manufacturers—Con.				
3328120	Metal coating, engraving, and allied services—Con.				
33281205	Metal powder coating, including electrostatic and fluidized bed (including organic coatings, enamels, lacquers, alkyds, plastics, etc.)	2002.. N 1997.. N	X X	X X	910 294 1 027 662

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
332911	Industrial valve manufacturing—Con.				
332911B	All other miscellaneous industrial valves—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
332913	Plumbing fixture fitting and trim manufacturing—Con.				
3329133	Lavatory and sink fittings (except single control), including drains and overflows (brass goods)—Con.				
33291332	Other lavatory and sink fittings—Con.				
3329133221	Lavatory and sink basin cocks (one supply line only)—Con.				
		1997..	11	X	20 822

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333120	Construction machinery manufacturing—Con.				
3331201	Power cranes, excavation loaders, dozers, construction tractors, off-highway trucks and trailers, mixers, pavers, backhoes, and related equipment—Con.				
33312014	Tractor shovel loaders (skid steer, wheel, and crawler, and integral-design loader-backhoes) .....	2002.. N 1997.. N	X X	X X	1 290 786 2 829 877

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

3332950468	Semiconductor assembly dicing machines, including saws and scribing-fracturing machines, die bonding, and wire bonding .....	2002.. 6	X	X	12 905

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments		
				Quantity	Value (\$1,000)	
333295	Semiconductor machinery manufacturing—Con.					
3332950	Semiconductor manufacturing equipment (except furnaces and ovens, instruments, and photographic)—Con.					
33329504	Other semiconductor equipment—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

		1997 . . . . . 16	X	X	84 967
3334120219	Centrifugal classes I and II fans (more than 1 1/2 in. to 6 3/4 in. maximum total pressure) . . . . .	2002 . . . . . 21	X	X	106 506

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333414	Heating equipment (except warm air furnaces) manufacturing—Con.				
333414A	Heating equipment, other types (including parts for nonelectric heating equipment and oil burners)—Con.				
333414A1	Heating equipment, other types (including parts for nonelectric heating equipment and oil burners)—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333515	Cutting tool and machine tool accessory manufacturing—Con.				
3335151	Small cutting tools for machine tools and metalworking machinery—Con.				
33351512	Carbon steel and high-speed steel shank twist drills for machine tools and metalworking machinery (excluding combines drills, countersinks, and gun drills)—Con.				
3335151204	Carbon steel and high-speed steel taper shank twist drills for machine tools and metalworking machinery (excluding combined drills, countersinks, and gun drills) .....	2002.. 15 1997.. 23	X X	X X	13 841 26 751
3335151206	Carbon steel and high-speed steel straight shank twist drills for machine tools and metalworking machinery (excluding combined drills, countersinks, and gun drills) .....	2002.. 34 1997.. 39	X X	X X	248 502 315 211
33351513	Twist drills, gun drills, combined drills, countersinks, and counterbores .....	2002.. N 1997.. N	X X	X X	302 164 305 078

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

3336127A	Parts for mechanical adjustable speed drives (nonhydraulic variable speed changers) .....	2002 .. N	X	X	D
		1997 .. N	X	X	15 469
3336127A88	Parts for mechanical adjustable speed drives (nonhydraulic variable speed changers) .....	2002 .. 4	X	X	D
		1997 .. 6	X	X	15 469
3336127B	All other miscellaneous geared speed changers, industrial high-speed drives, and mechanical variable speed drives (gearboxes and allied products) (including parts) .....	2002 .. N	X	X	88 806
		1997 .. N	X	X	119 134

See footnotes at end of table.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333612	Speed changer, industrial high-speed drive, and gear manufacturing—Con.				
3336127	Speed changers and industrial high-speed drives—Con.				
3336127B	All other miscellaneous geared speed changers, industrial high-speed drives, and mechanical variable speed drives (gearboxes and allied products) (including parts)—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333912	Air and gas compressor manufacturing—Con.				
3339125	Parts and attachments for air and gas compressors (except refrigeration, ice making, and air-conditioning equipment), including packaged compressors .....	2002.. N	X	X	592 670
		1997.. N	X	X	713 789

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufacturers (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333992	Welding and soldering equipment manufacturing—Con.				
3339923	Arc welding electrodes, metal—Con.				
33399231	Electrodes for welding—Con.				
3339923111	Stainless steel (chromium, 4 percent or more) low alloy steel arc welding stick electrodes (including solid, cored, covered, and bare electrodes), except hard facing . . . . . mil lb. .2002 . . . . .	4	X	D	D
	1997 . . . . .	5	X	10.3	48 474

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
333999	All other miscellaneous general purpose machinery manufacturing—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
334413	Semiconductor and related device manufacturing—Con.

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
335311	Power, distribution, and specialty transformer manufacturing—Con.				
3353111	Power and distribution transformers, except parts—Con.				
33531115	Large liquid-immersed power transformers with and without load-tap-changing—Con.				
3353111541	Large liquid immersed power transformers without load-tap-changing, 10,001 kVA, OA to 30,000 kVA, OA (50,000 kVA, top FOA) .....	2002.. 8	X	X	D
		1997.. 8	X	X	D
3353111543	Large liquid-immersed power transformers with load-tap-changing, 30,001 kVA, OA (50,000 kVA, top FOA) to 100,000 kVA, OA (167,000 kVA, top FOA) .....	2002.. 5	X	X	53 760
		1997.. 4	X	X	22 849
3353111546	Large liquid-immersed power transformers without load-tap-changing, 30,001 kVA, OA (50,001 kVA, top FOA) to 100,000 kVA, OA (167,000 kVA, top FOA) .....	2002.. 5	X	X	D
		1997.. 5	X	X	24 795
3353111549	Large liquid-immersed power transformers with load-tap-changing, 100,001 kVA, OA (167,001 kVA, top FOA) and larger .....	2002.. 1	X	X	D
		1997.. 2	X	X	D
3353111552	Large liquid-immersed power transformers without load-tap-changing, 100,001 kVA, OA (167,001 kVA, top FOA) and larger .....	2002.. 1	X	X	D
		1997.. 2	X	X	D
3353111Y	Power and distribution transformers, except parts, nsk .....	2002.. N	X	X	39 792
		1997.. N	X	X	57 749
3353111YV	Power and distribution transformers, except parts, nsk .....	2002.. N	X	X	39 792
		1997.. N	X	X	57 749
3353113	Specialty transformers, except fluorescent lamp ballast .....	2002.. N	X	X	284 817
		1997.. N	X	X	511 903
33531131	Specialty transformers, except fluorescent lamp ballasts .....	2002.. N	X	X	267 916
		1997.. N	X	X	509 436
3353113101	Open core and coil units, excluding machine tool control transformers and all units end-bell enclosed (250 VA and under) .....	2002.. 12	X	X	31 358
		1997.. 18	X	X	77 896
3353113104	Machine tool control transformers .....	2002.. 10	X	X	30 964
		1997.. 15	X	X	D
3353113107	Transformers for arc welders .....	2002.. 1	X	X	D
		1997.. 2	X	X	D
3353113109	Indoor and outdoor current instrument transformers .....	2002.. 10	X	X	D
		1997.. 12	X	X	D
3353113113	Indoor and outdoor voltage instrument transformers .....	2002.. 8	X	X	45 550
		1997.. 6	X	X	57 911
3353113115	High intensity discharge lamp transformers (ballasts) .....	2002.. 2	X	X	18 441
		1997.. 7	X	X	D
3353113116	All other specialty transformers (including luminous tube and ignition transformers), excluding internal combustion engine ignition .....	2002.. 12	X	X	181 056
		1997.. 19	X	X	73 723
3353113Y	Specialty transformers, except fluorescent lamp ballasts, nsk .....	2002.. N	X	X	128 138
		1997.. N	X	X	16 901
3353113YV	Specialty transformers, except fluorescent lamp ballasts, nsk .....	2002.. N	X	X	2 467
		1997.. N	X	X	16 901
3353115	Fluorescent lamp ballasts .....	2002.. N	X	X	2 467
		1997.. N	X	X	329 257
33531151	Fluorescent lamp ballasts .....	2002.. N	X	X	968 909
		1997.. N	X	X	329 257
3353115100	Fluorescent lamp ballasts <sup>47</sup> .....	2002.. N	X	X	968 909
		1997.. 11	X	X	329 257
		1997.. 17	X	X	968 909
3353117	Commercial, institutional, and industrial general-purpose transformers, all voltages .....	2002.. N	X	X	263 434
		1997.. N	X	X	303 791
33531171	Commercial, institutional, and industrial general-purpose transformers, all voltages .....	2002.. N	X	X	253 414
		1997.. N	X	X	289 378
3353117101	Commercial, institutional, and industrial general-purpose transformers, single- and three-phase, 3 kVA and below, all voltages .....	2002.. 17	X	X	86 984
		1997.. 22	X	X	140 871
3353117104	Commercial, institutional, and industrial general-purpose transformers, single- and three-phase, 3.01 kVA through 15 kVA, all voltages .....	2002.. 12	X	X	37 887
		1997.. 15	X	X	23 477
3353117107	Commercial, institutional, and industrial general-purpose transformers, single- and three-phase, 15.01 kVA through 100 kVA, all voltages .....	2002.. 18	X	X	48 672
		1997.. 15	X	X	42 056
3353117111	Commercial, institutional, and industrial general-purpose transformers, single- and three-phase, 100.01 kVA and above, all voltages .....	2002.. 11	X	X	17 265
		1997.. 12	X	X	25 322
3353117113	Other commercial, institutional, and industrial general-purpose transformers, including saturable core reactors and voltage regulating transformers .....	2002.. 19	X	X	62 606
		1997.. 18	X	X	57 652
3353117Y	Commercial, institutional, and industrial general-purpose transformers, all voltages, nsk .....	2002.. N	X	X	10 020
		1997.. N	X	X	14 413
3353117YV	Commercial, institutional, and industrial general-purpose transformers, all voltages, nsk .....	2002.. N	X	X	10 020
		1997.. N	X	X	14 413
3353119	Power regulators, boosters, and other transformers and parts for all transformers .....	2002.. N	X	X	547 747
		1997.. N	X	X	514 466

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)

**Table 1. Products Statistics: 2002 and 1997—Con.**

[Includes quantity and value of products produced by (1) establishments classified in the NAICS industry that matches the first six digits of the product code (primary products), and (2) establishments classified in other industries (secondary products). Transfers of products from one establishment of a company to another establishment of the same company (interplant transfers) are also included. Data based on the 2002 Economic Census. Differences between the 1997 data shown and comparable data in Table 3 of this report are due to revisions made during the Annual Survey of Manufactures (ASM) review. For information on confidentiality protection, nonsampling error, and explanation of terms, see note 2 at end of table. For meaning of abbreviations and symbols, see introductory text]

Product code	Product	Number of companies with shipments of \$100,000 or more	Quantity of production for all purposes	Product shipments	
				Quantity	Value (\$1,000)
335932	Noncurrent-carrying wiring device manufacturing—Con.				
3359326	Other noncurrent-carrying wiring devices and supplies (boxes, covers, bar hangers, etc.)—Con.
