2002 Fast Facts for the District of Columbia

Data from the U.S. Census Bureau’s 2002 Vehicle Inventory and Use Survey (VIUS) are now available for the District of Columbia. The VIUS produces state and U.S. level statistics on the physical and operational characteristics of the Nation’s truck population.

There were 42.6 thousand private and commercial trucks registered in the District of Columbia during 2002, up approximately 29 percent from 33.0 thousand trucks in 1997.

The report includes these highlights for the District of Columbia:

The number of sport utility vehicles (SUVs) registered in the District of Columbia during 2002 increased an estimated 81 percent from 1997. The number of minivans increased 32 percent and the number of pickups decreased 12 percent during this same period.

- Total truck registrations in 2002 included an estimated 15 percent pickups, 51 percent SUVs, and 20 percent minivans.
- The District of Columbia has approximately one pickup for every 86 people and about one SUV for every 26 people. It also has approximately one pickup for every 47 licensed drivers and about one SUV for every 14 licensed drivers. Estimates are taken from this report and statistics from the U.S. Department of Transportation Highway Statistics 2002.
- About 75 percent of all trucks were used for personal transportation, while 18 percent were operated for business, including for-hire use.
The report also includes information on fuel efficiency, annual mileage, primary range of
operation, permanent equipment, and other physical and operational characteristics.

The U.S. Summary will be issued in late 2004, follow by a microdata CD-ROM.

The Vehicle Inventory and Use Survey is conducted every five years as part of the
Economic Census and data are used by government agencies, businesses, academia, and the
general public. Estimates in this report are based on data from the 2002 Vehicle Inventory and
Use Survey. They contain sampling and nonsampling errors. To keep the identity of an
individual respondent confidential, some estimates may be suppressed. Users making their own
estimates, based on survey estimates, should cite the U.S. Census Bureau as the source of the
original estimates only. See www.census.gov/svsd/www/02vehinv.html for measures of
sampling variability and other survey information.
