

# Monthly State Retail Sales for September 2025

Released January 22, 2026

## Overview

The U.S. Census Bureau introduced the Monthly State Retail Sales (MSRS) report as an experimental data product in September 2020. The MSRS is a blended data product combining Monthly Retail Trade Survey data, administrative data, and third-party data. Year-over-year percentage changes are available for Total Retail Sales excluding Nonstore Retailers as well as 11 North American Industry Classification System (NAICS) retail subsectors. These data are provided by state and NAICS beginning in January 2019. We publish these data monthly on an ongoing basis and seek ways to improve the methodology whenever possible.

## Total Retail Sales

Total U.S. Retail Sales excluding Nonstore Retailers (not seasonally adjusted) in September 2025 were up 4.7 percent ( $\pm 0.4$  percent) from September 2024.

Forty-one states and the District of Columbia had positive and significant year-over-year percentage changes from September 2024 to September 2025.

The COVID-19 pandemic may lead to atypical year-over-year percentage changes in the MSRS data. The standard errors associated with these percentage changes may also be atypical. The MSRS standard errors are available [here](#). As you analyze the data during these months, it is important to consider this information in the use of these data. More information on the limitations of the MSRS data is available [here](#).
